The Graduate Catalog

The Graduate Catalog is the official listing of the policies governing graduate education at the University of Maryland, College Park.

This Catalog documents policies and procedures set by the Graduate Council and the Graduate School, and is updated each academic semester to reflect changes and updates to policy. Information on admissions policies, academic policies (including degree requirements), registration policies, and financial aid and student support policies are contained in the Catalog. Abstracts and information on academic degree and certificate programs, a list of graduate-level courses by program, and a roster of graduate faculty members are also included in each edition of the Catalog.

The University of Maryland, the flagship institution of the University System of Maryland, originated in 1856 as the Maryland Agricultural College and became one of the country's first land-grant institutions in 1867. The state assumed authority over the College in 1920 and formed the University of Maryland by joining the College with long-established professional schools in Baltimore. In 1988, the General Assembly of Maryland designated the College Park campus as the flagship institution for the University System of Maryland, which comprises 13 institutions across the state. The College Park campus is built around a central mall, anchored by McKeldin Library and the Main Administration Building. Fanning out from the mall are thirteen academic colleges. The University's mission is to provide graduate and undergraduate education of the highest quality, to pursue advanced research, and to serve the needs of the State of Maryland.

The University of Maryland and its surrounding area provide boundless opportunities for conducting research. The University's dynamic research environment allows students from all disciplines to undertake scholarly exploration of their special interests and to gain valuable practical experience. It also enables faculty members to advance their own areas of expertise and bring their research insights into the classroom. On campus, special facilities and a number of organized research centers, bureaus, and institutes promote the acquisition and analysis of new knowledge in the arts, sciences, and applied fields.

The Graduate School and The Graduate Council

The University of Maryland Board of Regents mandates that a Graduate Faculty and a Graduate Council provide the organization by which the Graduate Faculty discharge its responsibilities for graduate education. The Graduate Council, appointed by the Dean of the Graduate School, includes faculty representatives elected by the Graduate Faculty, and graduate students. The Graduate Council recommends to the Dean, the Provost and the President policies that affect all aspects of graduate education at the University. A list of the current Graduate Council members can be found on our Graduate School website.

The Graduate School, under the leadership of its Dean, establishes and oversees procedures to enact these policies and serves as an advocate for excellence in all aspects of graduate education.

The Graduate School, on behalf of its Dean, officially admits all students into graduate degree programs and acts as the conferring body for all graduate degrees.

In conjunction with the Graduate Council, the Graduate School:

- Administers all University policies that affect graduate education.
- Sets academic and admissions standards for graduate programs.
- Reviews applications for admission to the Graduate School for compliance with academic standards.
- Admits graduate students to all programs.
- Administers the processes for graduate students' grievances
- Admits and oversees the academic progress of non-degree seeking students.
- Reviews and approves all new graduate programs.
- Allocates annual fellowship funding to the colleges, sets minimum stipend levels, and monitors the application and academic impact of awards.
- Recommends annual minimum stipend levels for fellowships and teaching and research assistantships.
- Sets policy for and awards tuition remission as a component of University fellowship awards, external fellowships, and training grants.
- Establishes qualifications for and approves membership in the Graduate Faculty.
- Establishes qualifications necessary for graduate faculty to serve on and to chair thesis and dissertation examining committees.
- Sets policy that governs the composition of the thesis and dissertation examining committees and the conduct of the examinations.
- By appointment of a Dean's representative, oversees dissertation examinations to assure quality and uniformity of standards across academic units.
- Oversees the process of submitting approved dissertations and theses preservation of and access to the documents are the responsibilities of the University Library.
- Sets University-wide requirements for awarding graduate degrees.
- Recommends to the President that students who meet established requirements be awarded graduate degrees.
- Reviews and approves as appropriate requests for exceptions to University policies on graduate matters.
- Ensures that the University maintains official graduate student records are kept in the Office of the Registrar.
- Approves and oversees programs created by interdisciplinary Field Committees.
- Approves the programs for the Master's degree and graduate certificate in Professional Studies.
- Prepares and disseminates an annual report on graduate education.
- Administers the General Research Board, the Creative and Performing Arts Awards, the Goldhaber Travel Grants, and other programs.
- Assumes leadership in the recruitment and retention of graduate students with special emphasis on students from under-represented groups.
- Provides orientation programs, advising, and other support services that contribute to the successful matriculation, retention, and graduation of a diverse population of graduate students .

- Supports the Graduate Student Government, graduate student groups, and the Office of Graduate Student Life.

The policies and procedures that are found in this document have been approved by the Graduate Council, the Dean of the Graduate School, the Provost, and the President.

Introduction to the University of Maryland

Location of Campus and Nearby Academic Resources

Situated on 1,300 acres in the suburban town of College Park, the University is centrally located in the Baltimore-Washington corridor. This unique location, just nine miles from downtown Washington, D.C., and approximately 30 miles from both Baltimore and Annapolis, enhances research opportunities for faculty and students by providing access to some of the finest libraries and research centers in the country.

The University houses seven separate libraries. Together they contain 3 million books, 5,000 journal titles, and 2.3 million microforms. The University's main library is the Theodore R. McKeldin Library. Its collection of books, reference materials, newspapers, journals, and electronic resources is especially strong in the life sciences, social sciences, and humanities. Among its 1.2 million volumes is one of the best collections of Judaica in the region.

In addition to the general collection, the University of Maryland is home to several archives: the Gordon W. Prange Collection is one of the world's largest repositories of published and unpublished Japanese-language materials from the period of the Allied Occupation. It contains Japanese newspapers, monographs, periodicals, pamphlets and newsletters, textbooks, maps, news photographs, and political posters produced primarily between 1945 and 1949, a time of Allied civil censorship controls. The collection is especially rich in fiction and poetry, including reprints and first editions. These rare manuscript materials have attracted scholars from around the world and have been utilized frequently in recent Japanese and Western scholarship on post-World War II Japan. They are complementary to the American government documents that are housed in National Archives II, immediately adjacent to the College Park campus.

The East Asia Collection, available since the mid-1960s, includes Japanese, Korean, and Chinese language monographs, periodicals, and newspapers. It currently contains about 74,000 catalogued items, and is particularly strong in scholarly works in the humanities, in the behavioral and social sciences and in reference and serial publications. With the exception of the Japanese Division of the Library of Congress, this is the largest East Asian language collection to be found in any academic institution in the tri-state region of Delaware, Maryland, and Virginia.

The University's collection of Government Documents and Maps is the Regional Federal Depository Library for Maryland, Delaware, and the District of Columbia. This collection includes more than one million government publications from 1789 to the present, spanning virtually all subjects from arts to zoology. Congressional documents and laws, census data, and

consumer guides are among the most popular items. The map collection contains nearly one-half million topographic and thematic maps from federal agencies as well as some produced by foreign governments, including a collection of World War II maps. Accompanying the paper maps are GIS workstations with gigabytes of map files and geo-referenced statistical data.

The UM Libraries system includes six branch libraries in addition to McKeldin:

The Engineering and Physical Sciences Library (EPSL) contains materials in physics, engineering, mathematics, and geology with other significant collections in computer science, environmental sciences, water resources, and aerospace science. EPSL is also a U.S. patent and trademark depository library, and its large Technical Reports Center contains collections from NASA, ERDA, Rand Corporation, and other agencies and organizations.

The Charles E. White Memorial Library (Chemistry) is a collection of 80,000 volumes covering chemistry, biochemistry, cell biology, enzymology, immunology, microbiology, and molecular genetics. Materials include books, periodicals, major indexes, and comprehensive spectra collections.

The Architecture Library contains materials on architectural design, theory and history, urban design, landscape architecture, and building technology. This library's special collections include rare architecture books dating as far back as the 17th century, with materials on world expositions from 1851 to 1937.

The Art Library collects materials in art history, studio art, art education, photography, graphic arts, interior design, and textiles. Special collections include art reproductions and art exhibition catalogs.

Opened in 2000 as part of the Clarice Smith Performing Arts Center, the Michelle Smith Performing Arts Library is the central location on the College Park campus for music, theatre, and dance materials. Included in the Performing Arts Library is the International Piano Archives at Maryland (IPAM), which houses one of the world's most extensive concentrations of piano recordings, books, scores, and related materials, including the personal papers of many great classical pianists. Special Collections in Performing Arts houses research collections maintained through joint agreements with national and international performing arts organizations, as well as collections donated by individuals, such as the Charles Fowler Papers and the Howe Collection of Musical Instrument Literature.

Hornbake Library is home to the bulk of the University's special collections.

The Maryland Collection represents a variety of materials, including more than 60,000 books and periodicals about Maryland , current and historical. A fine collection of rare Maryland items includes scarce copies of the almanac published by Benjamin Banneker, early American imprints, and strong holdings in literature by and about Marylanders. The Baltimore News American Photograph Archive of over 1.5 million images dating from 1920 to 1986 is part of the Maryland Collection, which also features broad holdings in Maryland newspapers both on microfilm and in original form.

The Rare Books Collection in Hornbake contains books and pamphlets from the 15th to 20th centuries. Approximately 17,000 volumes represent all areas of the humanities and sciences, with strong holdings in natural history, especially in botany and agriculture. Other notable rare book collections include French political pamphlets published during the civil war of 1649-1652 and the French Revolution, pamphlets documenting slavery and African-American life in America, and works by and about William Morris.

The National Trust for Historic Preservation Library Collection in Hornbake Library includes 13,000 volumes covering preservation topics from the technical to the aesthetic and more than 300 periodical titles on international, national, state, and local historic preservation issues.

The Archives and Manuscripts Department is also located in Hornbake Library. Historical Manuscripts collections include holdings pertaining to the Maryland region, labor union history, women's history, and University of Maryland faculty and administrators. Highlights of the historical manuscripts collection include the papers of political leaders from Maryland, such as U. S. Senator Milliard E. Tydings, Governor Theodore R. McKeldin, State Treasurer Lucille Maurer, and Vice President Spiro T. Agnew. Significant holdings documenting women's history include the papers of the League of Women Voters of Maryland, the Association for Intercollegiate Athletics for Women, and the Association for Childhood Education International. The details of day-to-day life throughout Maryland history are recorded in the personal and family papers collections, which include diaries, correspondence, and photographs. The literary manuscript collections center on the papers of two prominent twentieth-century women writers: Katherine Anne Porter and Djuna Barnes. The Katherine Anne Porter Room is a permanent installation in Hornbake Library that houses Porter's library, art, and artifacts. On display are photographs, furnishings, decorative arts, and books that belonged to Porter. The University Archives is the repository for a broad range of materials, including official office records, printed publications, photographs, and memorabilia, documenting the history and present activities of the University of Maryland. The University Archives' photograph collection features campus views and scenes, individual and group portraits, and University of Maryland events.

Established at the University of Maryland in 1990, the National Public Broadcasting Archives serves as the official archival repository for the primary national agencies of noncommercial broadcasting in the United States. Organizations represented include the Corporation for Public Broadcasting, the Public Broadcasting Service, National Public Radio, and the Children's Television Workshop. The Library of American Broadcasting holds a wide-ranging collection of materials devoted exclusively to the history of radio and television broadcasting in the United States. Representative collections include material from the papers of broadcasting giant Arthur Godfrey and the papers of Edythe Meserand, radio executive and first woman president of the American Women in Radio and Television.

Nonprint Media Services is the central audiovisual department for the University of Maryland Libraries. In addition to American movies and documentaries, its holdings include the complete BBC Shakespeare Plays, the JVC/Smithsonian Video Anthology of World Music and Dance, and the Library of African Cinema.

Research is supported in the UM Libraries with a variety of technological tools. The online

catalog identifies library materials from the collections of libraries on all campuses in the University of Maryland System . Access to this information is available through public terminals located throughout the library systems and can be accessed through internet connections in homes, offices, and libraries around the country. Research Port allows students, faculty, and others connected with the University of Maryland to access databases and e-journals from on and off campus. Patrons can search for journal articles and books in databases, e-journals, and library catalogs; access databases and e-journals from on and off campus; search an individual database OR several databases simultaneously; search databases and the UM Libraries' catalog simultaneously; and find full-text articles. They can save lists of databases, e-journals, searches, and articles in My Research Port, as well as e-mail and save citations.

The Digital Repository at the University of Maryland (DRUM) provides digital repository services for the University. Currently three types of materials are being collected: faculty deposited documents, a Library managed collection of UM doctoral dissertations and master's theses, and a collection of technical reports. DRUM provides a distribution service by making files available via the Internet. As a repository, DRUM maintains files for the long term. Unlike the web, where pages come and go and addresses to resources can change overnight, DRUM items have a permanent URL.

Borrowing library materials is aided by several services in addition to basic circulation assistance. Direct borrowing privileges at the other University of Maryland System libraries are available for registered UMCP graduate students. Through Inter-Library Loan, one can obtain loans or photocopies of materials from other libraries that are not available at the University. All of the University libraries are equipped with study carrels and group study areas, wireless internet access, and computer terminals.

Accreditation

The University of Maryland is accredited by the Middle States Association of Colleges and Secondary Schools and is a member of the prestigious Association of American Universities. Individual graduate programs may be accredited by their appropriate agencies. Students should check with their graduate program of interest for particular accreditations.

Non-Discrimination Statement

The University of Maryland is committed to the elimination of discrimination on the basis of race, color, creed, sex, sexual orientation, marital status, personal appearance, age, national origin, political affiliation, physical or mental disability, or on the basis of the exercise of rights secured by the First Amendment of the United States Constitution. The Human Relations Code is established to prevent or eradicate such discrimination in accordance with due process within the University community. In doing so, the University recognizes that it must strive actively and creatively to build a community in which opportunity is equalized.

Every effort will be made to make students and potential students, employees and potential employees, faculty members and potential faculty members aware of the opportunities that the University provides for every individual to develop and utilize his or her talents and skills. It is

the intent of the University to observe and promote respect for each member of the community's own race, ethnic background, sex, or sexual orientation. The Human Relations Code is accessible in its entirety online.

Under advice of the Maryland Attorney General's Office, the University may interpret the Code to include both gender identity and gender expression.

Disclaimer

The provisions of this publication are not to be regarded as an irrevocable contract between the student and the University of Maryland. Changes are effected from time to time in the general regulations and in the academic requirements. There are established procedures for making changes that protect the institution's integrity and the individual student's interest and welfare. A curriculum or graduation requirement, when altered, is not normally made retroactive unless the alterations are to the student's advantage and can be accommodated within the span of years normally required for graduation. When a competent authority judges the actions of a student, using established procedures, to be detrimental to the interests of the University community, that person may be required to withdraw from the university.

Campus Libraries

The University houses seven separate libraries. Together they contain 3 million books, 5,000 journal titles, and 2.3 million microforms. The University's main library is the **Theodore R. McKeldin Library**. Its collection of books, reference materials, newspapers, journals, and electronic resources is especially strong in the life sciences, social sciences, and humanities. Among its 1.2 million volumes is one of the best collections of Judaica in the region.

In addition to the general collection, the University of Maryland is home to several archives: the **Gordon W. All of the University libraries are equipped with study carrels and group study areas, wireless internet access, and computer terminals.

Admissions Policies

Admission to Graduate School

Responsibility for admitting applicants to graduate programs rests with the Dean of the Graduate School. Academic department and program offices review admissions applications and credentials and make admissions recommendations to the Graduate Dean. In cases where credentials were earned abroad, the Graduate School admissions staff will evaluate to ensure that the applicant has the equivalent of an accredited 4 year U.S. baccalaureate degree. The standards maintained by the Graduate School and individual departments and programs are applied to ensure that applicants admitted to the University are well qualified and trained to study at this institution and have a reasonable expectation of successfully completing a graduate program.

Standards for admission to doctoral degree programs are frequently higher than those for admission to master's degree programs. In many degree programs, the number of applications received from individuals qualified for graduate study regularly exceeds the number of applicants who can be accommodated. In such cases, only the most highly qualified are offered admission. The number of spaces available in various departments is limited according to the availability of faculty, special resources, and funds for students requiring financial assistance.

Criteria for Admission

Those applicants who have earned or will earn a bachelor's degree at a regionally accredited college or university in the United States (or the equivalent of a baccalaureate degree from a nationally recognized institution in another country) are eligible to be considered for admission to the Graduate School at the University of Maryland. With the exception of established dual-degree programs, an applicant can matriculate in only one graduate program at a time.

Admission to graduate programs is highly competitive, and space is limited. The decision to admit an applicant to a program is based primarily on a combination of the following criteria, evaluated from a complete application:

- **Quality of previous undergraduate and graduate work**. The Graduate School requires as a minimum standard an average of 3.0 on a 4.0 scale in all undergraduate courses taken at a regionally accredited college or university. Adequate performance in prerequisite courses is required. Applicants with international credentials must submit in the original language those academic records that are not written in English. Such credentials must be accompanied by a literal English translation. Both must be submitted by the published international application submission deadline for the degree or certificate program. Original copies must be submitted to the Graduate School before the completion of the first term (semester or 12-week term) of enrollment.
- **Strength of letters of recommendation from persons competent to judge the applicant's probable success in graduate school**. These letters are usually from the applicant's former professors who are able to give an in-depth evaluation of the applicant's strengths and weaknesses with respect to academic work. Additional recommendations may come from employers or supervisors who are familiar with the applicant's work experience.
- **Scores on a nationally standardized examination**. The three most widely used standardized examinations are the Graduate Record Examination (GRE), the Graduate Management Admissions Test (GMAT) and the Miller Analogies Test (MAT). Because the predictive utility of these test scores may vary from one group of applicants to another, a discriminating use of all relevant materials will be made in each applicant's case. The TOEFL, IELTS Academic, or PTE Academic are required of international applicants who are not native speakers of English.
- **Applicant's statement of his or her academic career objectives and their relation to the intended program of study**. These statements help the program to identify students whose goals are consonant with the program's objectives and expertise.
- **Other evidence of potential success in graduate studies**. Some programs require other evidence of potential for success in graduate study, such as a portfolio of creative work,

completion of specialized examinations, personal interviews, or an example of scholarly work.
- **Availability of an advisor in the applicant's specific field, available space in the program, and competitive rating within the applicant pool for the given term of entry.**

Prospective students may apply for admission to the University of Maryland during or after their final year of undergraduate study but must furnish proof of graduation before the end of their first term (semester or 12-week term) of enrollment at the University. Students applying for admission to a graduate degree program in a field of specialization in which they already hold that same degree or its equivalent may do so only if the previous degree program was of substantially different character or was not accredited. Summer-only students applying for entrance in either of the two summer sessions should check the Summer Sessions Bulletin to determine if the courses they wish to take will be offered. To obtain this publication, write to the Office of Continuing Education, Summer and Special Programs, Suite 0132 Main Administration Building, 7901 Regents Drive, University of Maryland, College Park, MD 20742. This information may also be accessed online at http://www.summer.umd.edu.

The Admission Process

To be considered for admission to the Graduate School, each applicant must follow the Graduate School application procedures, currently available at http://gradschool.umd.edu/admissions/application-process/step-step-guide-applying. The process requires the following:

- Completion of the University of Maryland Graduate Application (online);
- Payment of the non-refundable application fee;
- Submission of all relevant transcripts and supplementary application materials;
- Fulfillment of all graduate program admissions requirements;
- Adherence to published application deadlines.

Admissions Records and Disposition

All records, including both standardized test scores and academic records from other institutions, become part of the official file and can neither be returned nor duplicated for any purpose. Students should retain an additional copy of their official credentials to keep in their possession for advisory purposes and for other personal requirements.

The admission credentials and the application data of applicants are retained from the date of receipt for 12 months only and then destroyed in the following cases: 1) Applicants who do not register for courses at the time for which they have been admitted; 2) Applicants whose applications have been disapproved; 3) Applicants who do not respond to graduate program requests for additional information; and 4) Applicants whose applications are not complete with respect to the inclusion of all transcripts or test results.

Admission to Degree Programs

Graduate students are admitted to a particular program for a specific degree objective (M.A., Ph.D., Ed.D, etc.). With the exception of established dual degree programs, joint-degree programs, and certificate programs, graduate students are permitted to matriculate into only one graduate degree program at a time. Graduate students are admitted to either full or conditional status as outlined below:

Full Graduate Student Status

Students may be admitted to full graduate status if they have submitted official documents indicating a completed baccalaureate degree from a regionally accredited institution or have earned a degree equivalent to a baccalaureate degree from another country, and are fully qualified in the judgment of the individual program and the Graduate School.

Conditional Graduate Student Status

Students may be admitted to conditional status if:

- The previous academic record is not outstanding; **or**
- The prerequisite course work in the chosen field is insufficient; **or**
- The applicant has majored in another field with a creditable record but has not yet clearly demonstrated abilities in the proposed new field; **or**
- The applicant needs to fulifll an English remediation requirement; **or**
- The applicant has not provided official verification of information required by the graduate program or the Graduate School , such as the last semester's work or receipt of a degree.

Official transcripts indicating receipt of the degree must be submitted before the end of the first term of enrollment (semester or 12-week term). Registration for a second term (semester or 12-week) will not be permitted unless these documents are received by the Graduate School.

Offer of Admission

All completed applications will be reviewed by the Graduate School and the graduate program to which the applicant applied. Applicants may receive correspondence from each of these offices requesting clarification or additional information or documents. Responses should be directed to the inquiring office directly.

Formal admission to The University of Maryland is offered only by the Graduate School. Applicants admitted to the Graduate School will receive a written offer of admission from the Dean of the Graduate School. To accept or decline the offer, applicants must notify the Graduate School by the first day of classes of the term (semester or 12-weekterm) for which the applicant was accepted or the offer becomes void. Immediately following written acceptance, applicants should contact the graduate program for registration information. Applicants are allowed a one-time only deferral of the admission of up to one year, subject to approval by the graduate program. Applicants who are unsuccessful in gaining admission to a graduate program are also notified in writing by the Graduate School.

Admission Term Changes

The Offer of Admission is extended to the applicant only for a specified term (semester or 12-week term). If an admitted student or a Graduate Program wishes to change the term of entry (semester or 12-week term), they must petition the Graduate School in writing. The Graduate School will allow one (1) term (semester or 12-week term) change requested by the program, and one (1) requested by the admitted student, contingent upon the approval of the program's Director of Graduate Studies. Any further changes will require a new application to the Graduate School.

Non-Degree Admission: Non-Degree Seeking Student Status

Although the primary mission of the Graduate School is to conduct programs of graduate instruction leading to advanced degrees, the Graduate Faculty will admit qualified students without degree objectives as Non-Degree Seeking Students, to the extent that resources allow. Unofficial transcripts or photocopies of diplomas will be accepted with the application for evaluation purposes, but the student must submit official copies of all required documents before the end of the first term of enrollment (semester or 12-week term). Official transcripts must be submitted from all institutions except the University of Maryland, College Park.

The Non-Degree Seeking Student status is not available to international students who would require the University of Maryland to sponsor them on an F-1 student visa.

Applicants for admission to Non-Degree Seeking Student status must hold a baccalaureate degree from a regionally accredited institution, with a cumulative 3.0 grade point average, and:

- Submit official transcripts covering all credits used in satisfying the baccalaureate degree requirements, **or**
- If the applicant holds a master's or doctoral degree from a regionally accredited institution, submit an official transcript showing the award of a master's or doctoral degree, **or**
- Achieve a score that places the applicant in the upper 50th percentile of appropriate national standardized aptitude examinations, including the Graduate Record Examination, the Miller Analogies Test, and the Graduate Management Admissions Test (where different percentiles are possible, the Graduate School will determine which score is acceptable), **or**
- Provide a strong letter of support from the Graduate Director of the program in which the applicant plans to take a course.

Admission to Non-Degree Seeking Student status will continue for five years. If there is no registration in two consecutive academic terms (semesters -Fall and Spring or 12-week term), the admitted status will lapse and a new application will be required.

Non-Degree Seeking Students must maintain a 3.0 grade point average. Non-Degree Seeking Students whose grade point average falls below 3.0 will not be permitted to register.

Non-Degree Seeking Students must pay all standard graduate fees. Students in this status are not eligible to hold appointments as Graduate Teaching or Research Assistants or Fellows, or to

receive other forms of financial aid. All other services available to them (e.g., parking, library privileges) are the same as those accorded to other graduate students.

Successful completion of courses taken as a Non-Degree Seeking Student does not guarantee admission to a graduate degree or certificate program. Each program may accept such courses in satisfaction of program requirements to a maximum of nine (9) credits, contingent on admission to the degree or certificate program and on the approval of the faculty in the program. For consideration of admission to a degree program at a later time, the student must submit a new application. (For those admitted as an Advanced Special Student prior to the Fall 2017 term, each program may accept such courses in satisfaction of program requirements to a maximum of twelve (12) credits, contingent on admission to the degree or certificate program and on the approval of the faculty in the program.)

Visiting Graduate Student Status

A graduate student matriculated in another graduate school who wishes to enroll in the Graduate School of the University of Maryland and who intends to return to the graduate school in which he or she is matriculated, may be admitted as a Visiting Graduate Student.

To apply, the applicant must submit a completed application (http://gradschool.umd.edu/admissions/application-process/step-step-guide-applying) and pay the current application fee. Transcripts, letters of recommendation, and test scores are not required. In lieu of transcripts, the applicant must submit a letter from the Graduate Dean at the applicant's institution confirming that the applicant is in good academic standing and that courses taken at the University of Maryland will be transferred to the home institution.

Golden Identification Card for Senior Citizens of Maryland

The University's services and courses are available without charge to citizens who are residents of the State of Maryland, 60 years of age or older, and retired (retired persons will be considered those who affirm that they are not engaged in gainful employment for more than 20 hours per week). Individuals who meet these requirements may apply for graduate admission, either as degree-seeking or non-degree-seeking students, and must meet all admissions criteria. Once admitted and issued the Golden Identification Card, senior citizens may register for courses in any session on a space-available basis, and may use the library and other University facilities during the time they are enrolled in courses. Tuition will be waived for Golden Identification Card holders, but mandatory fees must be paid. Golden ID Card holders may register during the first week of classes for up to 3 courses; they may not pre-register. Please refer to the *Schedule of Classes* for more information on the Golden ID registration procedures.

Change of Status or Program

Students are admitted with a particular status to a specified program for a specified objective. A new application is required if:

- The student wishes to change programs (students may be admitted to only one graduate program at any one time); **or**
- The student wishes to change status (from non-degree to degree); **or**
- The student wishes to pursue a new degree objective (e.g., change from master's to doctoral degree).
- Admission to a new program and/or status is not granted automatically. Each application is subject to review and approval.

Admission of Members of the Faculty

No member of the faculty who is employed by the University of Maryland with the position of assistant professor or higher is permitted to enroll in a program leading to an advanced degree in his or her academic college or school. A faculty member who wishes to take course work for personal enrichment in his or her academic college or school may choose to investigate the Non-Degree Seeking Student status. A faculty member who wishes to pursue an advanced degree in a graduate program outside his or her academic college or school may do so by obtaining written consent from the Deans of both the academic college/school in which he or she is employed and that from which he or she seeks a degree, and, subsequently, from the Dean of the Graduate School.

Admission to An Institute

Application for admission to an institute should be made directly to the director of the institute. If admission to the Graduate School is also necessary, the decision will be based on the same criteria for admitting other degree applicants. Admission to an institute does not imply that the individual will be automatically admitted in any other status at the University of Maryland at a later date. The status terminates upon completion of the institute in which the student is enrolled. A new application and fee must be submitted for admission to any other graduate status or program.

Students already admitted to a regular graduate degree or non-degree status may also qualify for participation in an institute.

Immunization

The University of Maryland requires all freshmen, new graduate students, and transfer students to provide documentation of measles, mumps, rubella, and tetanus / diphtheria immunizations. It is a student's responsibility to provide this information to the Health Center before school begins. This requirement will not be waived.

Residency Classification

Petitions, related documents and questions concerning the Board of Regents Policy on Student Classification for Admission and Tuition Purposes should be directed to the Residency Reclassification Services in the Office of the Registrar.

Determination of In-State Status for Admission and Tuition Purposes: See www.usmh.usmd.edu/regents/bylaws/SectionVIII/VIII270.html for the complete text of this policy.

An initial determination of in-state status will be made by the Graduate School at the time a students' application for admission is considered. The determination made at that time, and any determination made thereafter, shall prevail in each term (semester or 12-week term) until the determination is successfully challenged. Students may challenge their classification by submitting a timely petition to the Residency Reclassification Services. Determinations are based on the residency policy and requirements. The deadline for submitting a complete petition along with all supporting documents, is the first day of the term (semester or 12-week) in which the student wishes to be classified as in-state.

The volume of requests for reclassification may necessitate a delay in completing the review process. A decision in each case will be made within 60 days of receipt of a complete petition and all required documentation. During this period of time, or any further period of time required by the university, any fees and charges based on the previous determination must be paid. The student is solely responsible for any late charges incurred by the residency process. If the determination is changed, any excess fees and charges will be refunded.

Students classified as in-state for admission and tuition purposes are responsible for notifying the Residency Reclassification Services in writing within 15 days of any change in their circumstances that might in any way affect their classification at the University of Maryland.

For more information, refer to the Residency Classification Services web page.

Registration Policies

Registration and Credit Information

To attend classes at the University of Maryland, College Park, it is necessary to process an official registration. Specific registration dates and instructions are printed in the Registration Guide and on the MyUM website, www.my.umd.edu. Registration information for Summer Term, Winter Term, and Professional Programs may be found at www.oes.umd.edu.

Designation of Full-Time and Part-Time Status

The Graduate School uses a unit system in making calculations to determine full-time or part-time student status. Please note that graduate units are different from credit hours. The number of graduate units per credit hour is calculated in the following manner:

- Courses in the series: 000-399 carry 2 units per credit hour.
- Courses in the series: 400-499 carry 4 units per credit hour.
- Courses in the series: 500-599 carry 5 units per credit hour.

- Courses in the series: 600-897 carry 6 units per credit hour.
- Master's Research course: 799 carries 12 units per credit hour.
- HESP 829 course carries 18 units per credit hour.
- Pre-candidacy Doctoral Research courses: 898 carries 18 units per credit hour.
- Doctoral Dissertation Research: 899 carries 18 units per credit hour. All doctoral candidates must pay candidacy tuition for which they will be registered for six (6) credit hours of 899; this defines all currently registered doctoral candidates as full-time.

For programs on the semester term,to be certified as full time, a graduate student must be officially registered for a combination of courses equivalent to 48 units per semester. Graduate assistants holding regular appointments have full-time status if they are registered for at least 24 units in addition to the assistantship; holders of half-time assistantships are considered full-time if registered for 36 units. Audited courses do not generate graduate units and cannot be used in calculating full-time or part-time status.

For programs on the 12-week term,to be certified as full time, a graduate student must be officially registered for a combination of courses equivalent to 36 units per 12-week term. Graduate assistants holding regular appointments have full-time status if they are registered for at least 18 units in addition to the assistantship; holders of half-time assistantships are considered full-time if registered for 27 units. Audited courses do not generate graduate units and cannot be used in calculating full-time or part-time status.

Course Numbering System

Courses are designated as follows:

- 000-099: Non-credit courses
- 100-199: Primarily first-year courses (not acceptable for credit toward graduate degrees).
- 200-299: Primarily sophomore courses (not acceptable for credit toward graduate degrees).
- 300-399: Junior and senior courses (not acceptable for credit toward graduate degrees).
- 400-499: Junior and senior courses acceptable for credit toward some graduate degrees. The number of such credits is limited by policies of the Graduate School and by the graduate program.
- 500-599: Professional school courses (Dentistry, Law, Medicine) and post-baccalaureate courses not for graduate degree credit.
- 600-898: Courses restricted to graduate students (see above for exceptions).
- 799: Master's thesis credit.
- 899: Doctoral dissertation credit.

The first character of the numeric position of the course number determines the level of the course and the last two digits are used for course identification. Courses ending with the numeral 8 or 9 are the only courses that are repeatable for credit.

Continuous Registration Requirements

All graduate students must register for courses and pay associated tuition and fees each term (semester or 12-week term), not including summer and winter sessions for semester-based programs, until the degree is awarded.

A student who fails to register and who has not requested and received a waiver of registration or "Leave of Absence for Childbearing, Adoption, Illness or Dependent Care" will be notified by the Graduate School after the first day of classes that he or she must register for the current term (semester or 12-week term). The Graduate School will also inform the Graduate Director of the graduate program that the student is in jeopardy of termination. If the student does not register, he or she will be dismissed from the Graduate School at the end of the term (semester or 12-week term) for failure to comply with the continuous registration requirement.

A student who is dismissed for non-registration may appeal dismissal during a 30-day period following the end of the semester or during a 10-day period following the end of a 12-week term of non-registration. If the student does not appeal, or if the appeal is denied, and the student wishes to continue in the Graduate School, the student must apply for readmission. In this case, readmission does not alter the initial requirements for time to complete the degree or advance to candidacy.

Waiver of Registration for Certificate, Master's, and Pre-Candidacy Doctoral Students

Certificate, Master's, and pre-candidacy Doctoral students who will be away from the University for a term (semester or 12-week term) or for two terms (a year on the semester system or two 12-week terms) may request a waiver of continuous registration and its associated tuition for the term(s) granted. Waivers of registration will be granted only if the student is making satisfactory progress toward the degree and can complete the degree requirements within the required time limits. Interruption of registration cannot be used to justify a time extension.

Permission for non-registration is obtained from the Graduate Director of the student's program and the waiver must be filed with the Graduate School. Students who are not registered may not use any University facilities, including the library, and should expect to consult with members of the Graduate Faculty seldom or not at all.

A request for a waiver of registration should be filed 30 days before the beginning of the term (semester or 12-week term) for which the waiver is sought. Tuition waiver requests will be granted only when the student affirms in writing that he or she will not be using any University resources, including the time of faculty members, during the waiver period.

Waiver of Registration for Doctoral Candidates

Doctoral Candidates are not eligible for Waivers of Continuous Registration. Each doctoral Candidate must maintain continuous registration in 899 (Doctoral Dissertation Research) until the degree is awarded. Waivers of Registration may be granted only under the University's policy for Leave of Absence for Graduate Students for Childbearing, Adoption, Illness or Dependent Care (see below).

Waiver of Mandatory Fees

A waiver of Mandatory Fees may be granted to any graduate student, including Doctoral Candidates, if the registered student will be away from the University for a term (semester or 12-week). An application for waiver of Mandatory Fees must be submitted to the Graduate School 30 days before the beginning of the term (semester or 12-week) for which the waiver is sought.

Leave of Absence for Childbearing, Adoption, Illness or Dependent Care

In recognition of the effects that childbirth, adoption, illness, and caring for incapacitated dependents (such as children, ill or injured partners, or aging parents) may have on the time and energy that graduate students have to devote to their educational programs, the University allows students in such circumstances to apply for a leave of absence of up to two semesters or up to three 12-week terms during which time they do not intend to make academic progress toward the completion of their degree. The time taken on an approved leave of absence is not included in the time limitations for degree completion and advancement to candidacy. For the Graduate Student Parental Accommodation Policy, which enables students to maintain full-time enrollment status rather than take a leave of absence, see the Parental Accommodation Policy.

Length of Leaves

Application for a leave of absence may be made either on a one- or two-semester basis or on one- or two- or three 12-week term basis. A leave of absence ordinarily will not be granted for more than one academic year. Leaves requested for a longer period are approved only in exceptional circumstances. An approved leave for one semester will be extended to two semesters as needed or an approved leave for one 12-week term will be extended to two will be extended to three, if so requested by the applicant prior to the expiration of the approved one- term (semester or 12-week) leave of absence.

Application Procedures

A leave of absence for childbearing, adoption, illness, or dependent care normally must be requested and approved prior to the beginning of the academic term for which it is being requested. A letter of request should be addressed to the Dean of the Graduate School and should provide a detailed explanation of the circumstances leading to the request and a justification of the time requested. The request must be approved by the student's faculty advisor and Graduate Director prior to submission to the Graduate Dean. The faculty advisor, Graduate Director, and/or Graduate Dean may request a doctor's statement. Approved leaves will stop the student's "time-to-degree clock."

Special Considerations

- **Registration Requirements.** Students on approved leaves of absence are not registered at the University and, therefore, do not have the rights and privileges of registered students. Students must be registered during a term (semester or 12-week) in which they fulfill a University or departmental degree requirement, such as taking qualifying exams or

submitting a dissertation/thesis. In addition, students must also be registered in order to be eligible for any form of University financial aid (e.g., a teaching or research assistantship) and to be certified as full-time students.

- **Impact on Funding.** When contemplating a leave of absence, graduate students are advised to consult with the sources of their funding to determine whether a leave might involve a long-term financial loss. Because academic programs and financial aid packages may be constructed and sequenced over a period of years, individual interruptions to the normal sequence of academic progress and scheduled employment may result in a loss of future funding and a slower time to completion of degree. In some programs, a leave of absence may mean that students may have to join a new project upon return, with the likelihood that their research may take longer to complete. Whenever a leave of absence is being considered, a student should meet with the advisor to develop a plan for resumption of study and gain a clear understanding of future funding opportunities. Some outside funding agencies frown on interruptions to a degree program. Some only allow leaves for medical reasons or military service. Others require prior approval of the fellowship agency.
- **Students with outstanding educational loans** need to consider the effect of taking a leave of absence on their loan status. For some student loans, a grace period for repaying the loan begins once the student stops registering. If the leave period is longer than the grace period, then the student may have to begin repaying the loan while on a leave of absence. Prior to taking a leave, students should arrange to meet with a Student Financial Aid officer, and/or contact their lenders .
- **International students.** Non-immigrant F-1 and J-1 students and their dependents must maintain legal immigration status at all times. Students with F-1 or J-1 visas must be enrolled full-time every term (semester or 12-week) at the University while they remain in the United States . The only possible exception that might allow a student to remain in the United States while on an approved leave of absence might be a serious illness or medical condition. Students are advised to consult with International Student and Scholar Services for more information when considering a leave of absence.
- **Student Accounts.** Students are advised to check with the Bursar's Office prior to taking an approved leave of absence in order to determine the status of their student accounts. Students are advised that accounts that are overdue will be subject to regular procedures in accordance with University guidelines, notwithstanding any approved leave of absence: specifically, late fees and finance charges will continue to accrue, students will be blocked from future registration upon their return, and accounts will be referred to the State Central Collection Unit, with the imposition of additional collection charges, for non-payment in accordance with regular timeframes.
- **University Housing.** The University's general policy is that students must be registered to be eligible for University housing. For specific information about continued eligibility for University housing during an approved leave of absence, students are advised to contact the Department of Resident Life. Additional restrictions may apply to students leasing housing through Southern Management Corporation. For specific information, students should contact the appropriate rental agent.
- **Access to University Resources**. Students who are on a leave of absence do not have a valid University of Maryland Identification card and therefore are not entitled to use University resources, such as the libraries, recreational centers, shuttle buses, and other

services covered by mandatory fees. Students seeking information on use of the libraries may find it at http://www.lib.umd.edu/access/access-privileges, or they may contact the McKeldin Library Circulation Department, Community Borrowers Office, Monday-Friday, 9:00 a.m. - 4:00 p.m.

Academic Calendar

The academic calendar contains important information regarding registration. Graduate students preparing to graduate should refer to the Deadlines for Graduate Students.

Course and Credit Changes

A graduate student may drop a course, add a course, change between audit and credit status, change the number of credits for a course within the listed range, cancel registration, or withdraw from the University without special approval until the tenth class day each semester or until the fifth day each 12-week term. No credit level changes or grading option changes are permitted after the tenth week of classes of the semeser term or the eighth week of classes of the 12-week term. The deadlines are published each term in the *Schedule of Classes* ; the procedures governing each of these transactions are listed below. Drop/Add and other changes may be done in person at the Registrar's Office or online at http://www.testudo.umd.edu . **Full refunds are not available for reductions in total credits after the first day of classes.** For more information, please see the Refunds section of this Catalog.

Exceptions to the published deadlines require a petition to the Graduate School which must include the written approval of the instructor and the Graduate Director of the program. Petitions should be submitted to the Graduate School, 2123 Lee Building. The graduate program stamp must be placed on the change of grading option/credit level form.

Withdrawal from Classes

The term "withdrawal" means termination of enrollment in all classes for a given term (semester or 12-week). The date of the withdrawal is indicated on a graduate student's academic record. To withdraw from a term (semester or 12-week) on or before the last day of classes a graduate student must notify the Office of the Registrar, 1113 Mitchell Building , in writing or in person. Withdrawal becomes effective on the date notification is received in the Records Office. The University Refund Policy applies to withdrawals after the first day of classes. Students who withdraw may be in violation of the University's continuous registration requirement, unless they have received a waiver of registration from the Graduate School.

If the time limitation in a master's or pre-candidacy student's program has not lapsed (5 years to obtain a master's degree and 5 years to reach doctoral candidacy), the graduate student is eligible to re-enroll without readmission provided he or she has received a waiver of registration from the graduate program or has received an approved Leave of Absence from the Graduate School; withdrawal by a doctoral candidate without an approved Leave of Absence or Waiver of Registration will officially end the student's status as a graduate student.

Resignation from the University

A graduate student wishing to withdraw from the University and terminate his or her graduate student standing may do so by submitting a letter to the Graduate School . The Graduate School will then cancel the student's admission status, effective the date the letter is received. If the student is registered for classes at the time of his or her resignation, the Graduate School will ask the Office of the Registrar to withdraw the student effective the date of the resignation. The University Refund Policy applies for resignation after the first day of classes. A graduate student seeking to return to the University of Maryland after resigning must reapply for admission and is subject to all graduate program and Graduate School requirements. He or she may be required to repeat previously elected courses (see time limits for relevant degree or certificate programs).

Grading Systems

The University's A through F grading system is used in graduate level courses. A "Satisfactory or Failure" (S-F) grading system may be used for certain types of graduate study at the discretion of the graduate program. These include courses that require independent fieldwork, special projects, or independent study. Graduate program seminars, workshops, and graduate program courses in instructional methods may also be appropriate for the S-F grading system. The "Pass-Fail" grading system is not available for graduate students. However, a graduate program may allow, in certain cases, a graduate student to use the Pass-Fail option for 100-300 level courses. Graduate credit may not be earned for these courses. Either the A-F or the S-F grading system may be used for master's thesis (799), and pre-candidacy (898) and doctoral dissertation (899) research, as well as for courses labeled "Independent Study" or "Special Problems." Only one grading system may be used per course in a particular term (semester or 12-week) except for thesis and dissertation credits. The grading system will be designated by the student's graduate program or the graduate program offering the course.

Graduate Credit for Undergraduates

An undergraduate degree-seeking student at the University of Maryland may register for graduate-level courses (600-897) with the approval of the Dean of his or her academic college, the chair of the department, the instructor offering the course, and the Dean of the Graduate School . These courses will be recorded as "for graduate credit only" and may ONLY be applied toward an advanced degree at this university or elsewhere. Students eligible for this option must have achieved Junior standing, will have a GPA of at least 3.0, and will have successfully completed the prerequisite courses with a grade of "B-" or better. The student must submit a plan of study showing that taking graduate courses will not unduly delay completion of the requirements for the bachelor's degree. The total of graduate and undergraduate credits attempted in any semester may not be more than eighteen. The graduate credits so earned will not count toward any requirements for the bachelor's degree. An undergraduate student may take a maximum of 12 graduate credits whether taken as graduate credits only or as graduate credits as part of a dual bachelors/masters program. Courses in a 12-week term program are not open to undergraduate students.

Undergraduate Credit for Graduate Courses

Subject to requirements determined by the Graduate Faculty of the department or program offering the course, undergraduate degree-seeking students may register for graduate level courses, (those numbered from 600 to 897) with the exception of 799, for undergraduate credit. The student must obtain the prior approval of the department and instructor offering the course.

Enrollment in a graduate-level course does not in any way imply subsequent departmental or Graduate School approval for admission into a graduate program. The course may not be used as credit for a graduate degree at the University of Maryland except as part of an approved Bachelor's/Master's program into which the student has been admitted. Courses in 12-week programs are not open to undergraduate students.

Partial Credit for Students With Disabilities

The Graduate School recognizes that students with documented disabilities may be prevented from participating courses that include laboratories, studio work, or other non- classroom activities in which the student is prevented from participating because of the disability. Therefore, it is the Graduate School 's policy to allow students with disabilities to enroll in such courses, complete only those parts of the course that their capabilities permit, and receive credit for the course proportionate to their levels of participation. Students with disabilities should contact Disability Support Services (DSS) for information and assistance with any disability related issue. Phone (301) 314-7682 (V/TTY). Graduate students with disabilities who wish to enroll under this policy should consult the the Graduate School . The Dean, in consultation with DSS, will assist the student in making the necessary arrangements with the graduate program offering the course, the graduate program in which the student is enrolled, and the Office of Registrar. The final agreement as to the student's level of participation and the amount of credit to be awarded will be specified in an agreement to be drawn up by the Dean of the Graduate School and signed by all parties concerned.

Inter-Institutional Registration, University System of Maryland

A student admitted to the Graduate School in any institution of the University System of Maryland is eligible to take courses at any other institution of the University System of Maryland subject to the approval of the Graduate Directors and the Graduate Deans of the home and host institutions. Credits earned at a host institution are considered resident credit at the home institution, and, following normal procedures for graduate program approval, these credits may be used to meet University of Maryland graduation requirements. Transcripts of courses taken at another institution will be maintained at the home institution and fees will be paid to the home institution. Forms for registration as an inter-institutional student may be obtained from the Office of the Registrar. For more information, refer to Inter-Institutional Enrollment.

The Washington Consortium Arrangement

The University of Maryland is a member of the Consortium of Universities of the Washington Metropolitan Area. Other institutions currently associated with the consortium include American University, The Catholic University of America, the University of the District of Columbia, Gallaudet University, George Mason University, Georgetown University, George Washington

University, Howard University, Marymount University, Trinity University, the National Defense University, The Joint Military Intelligence College, and Southeastern University. Students enrolled in any one of these institutions are able to attend certain classes at the other institutions and have the credit considered "residence" credits at their own institutions. Grades in these courses are calculated into the student's GPA. Tuition remission awarded to graduate assistants and fellows may not be used to pay for courses at other consortium universities. Graduate assistants and fellows must pay for any courses that they take under the consortium arrangement. Students from schools in the Consortium of Universities of the Washington Metropolitan Area may register for University of Maryland courses on a space-available basis beginning with the first day of classes.

The policies governing registration through the Consortium Arrangement are listed below.

- Courses for majors in graduate programs at the University of Maryland that have restricted enrollment will not be available to students from other consortium schools. Similar rules may apply at other consortium universities.
- Students from consortium schools are expected to meet all prerequisites for University of Maryland courses for which they wish to enroll. Similar rules may apply at other consortium universities.
- Students from consortium schools will not be permitted to register for practica, workshops, internships, and other experiential courses at the University of Maryland . Similar rules may apply at other consortium universities.
- Students from consortium schools who have previously applied for admission to a University of Maryland graduate degree program and have been denied admission will be permitted to register for graduate courses in that program only with the specific approval of the Director of Graduate Studies of the program.
- Students from consortium schools who have been dismissed from the University of Maryland for disciplinary or financial reasons will not be permitted to enroll in courses at the University of Maryland under the consortium arrangement.
- Graduate assistants and fellows cannot use tuition remission provided by the Univeresity of Maryland to pay for courses at other consortium universities.

For more information, refer to the D.C. Consortium Enrollment.

Tuition, Fees, and Expenses

Payment of Tuition and Fees

Tuition rates and fees are posted on the University's web site at https://bursar.umd.edu/t_grd1617.html

Tuition, fees, and other University charges may be paid by mail, online (http://www.umd.edu/bursar) or in person at the Cashier's Window of the Bursar's Office, 1135 Lee Building , 8:30 a.m.- 4:30 p.m., Monday through Friday. The University accepts checks and

Visa, MasterCard, American Express, and Discover cards for payment. Checks should be made payable to "The University of Maryland." Students can also obtain their account balances through the Office of the Bursar.

It is the policy of the University not to allow deferment of payment pending the result of an application for financial assistance to an outside agency, including Veterans Administration benefits, bank loans, or guaranteed student loan programs.

Each student is individually responsible for his or her bill and for meeting payment deadlines. Failure to meet these deadlines may result in late charges or cancellation of registration. The University will suspend services to students for delinquent indebtedness and failure to pay bills. The University will also transfer delinquent accounts to the State Central Collections Unit, which will levy further late fees and take necessary steps to obtain payment.

Forms of Financial Aid

The Office of Student Financial Aid administers a number of programs to assist graduate students (e.g. loans and federal work study). Please see http://www.financialaid.umd.edu for more information.

Emergency Loans

Students may receive up to $500 as an interest-free loan that must be repaid in 60 days. If the loan is not repaid within 60 days, the amount will be charged against the student's account and late fees may be incurred. These loans are available from the Office of Student Financial Aid, 1135 Lee Building . Applicants should bring documentation of their need. They will then be asked to complete a short loan application form. They will subsequently meet briefly with a loan counselor who will review their need. The loan counselor will either approve or deny funds.

University Refund Statement

Tuition, fees, and refundable deposits are authorized for refund only if the student completes the prescribed withdrawal procedures or is dismissed from the University. Residence Hall and Dining Services charges are authorized for refund only if the student completes the prescribed residence hall and dining services contract release procedures. Please refer to the current Academic Deadlines for complete refund information and procedures.

Refunds for Withdrawal from All Classes

A Cancellation of Registration submitted to the Registrar's Office **before** the first day of classes entitles the student to a full credit or refund of term (semester or 12-week) tuition and fees.

After classes begin, students who wish to terminate their registration and withdraw from all classes must follow the withdrawal procedures specified in the *Schedule of Classes* . Students will find the necessary forms for withdrawal in 1113 Mitchell Building. The effective date used in computing refunds is the date the withdrawal form is filed with the Registrar's Office. Stopping

payment on a check, failure to pay the term (semester or 12-week) bill, or failure to attend classes does not constitute withdrawal.

Students withdrawing from the University will be credited for tuition in accordance with the following schedule:

Period from date instruction begins	Refundable tuition *
Two weeks or less	**80%**
Two to three weeks	**60%**
Three to four weeks	**40%**
Four to five weeks	**20%**
Over five weeks	**no refund**

* *Fees are non-refundable after the first day of classes.*

Withdrawal from all classes may be a violation of the Graduate School's Continuous Registration policy. Students withdrawing from classes who intend to continue in their graduate degree or certificate program should secure a Waiver of Continuous Registration or Leave of Absence from the Graduate School before withdrawing.

Refunds for Dropping Individual Courses

Graduate students may obtain refunds for courses that are dropped (*if dropping a course results in the overall number of registered credits*) during the first ten days of classes. Students may drop and add courses without penalty provided that the changes are made on the same day and that the total number of credits does not change. Graduate students are charged by the credit hour. A percentage charge and/or complete charge will be imposed according to the schedule below:

Prior to the first day of classes -- no charge.	**100% refund.**
During the first ten days of classes -- 20% charge.	**80% refund.**
After the first ten days of classes. -- 100% charge.	**0% refund.**

For funds to be returned, students must file a request for a refund with the Office of the Bursar. If a request for refund is not filed, credit on the student account will automatically be carried over to the next term (semester or 12-week). Refund requests may be made by addressing a letter to the Office of The Bursar, Lee Building, University of Maryland, College Park, 20742, visiting the Student Financial Service Center, Lee Building, Room 1135, between 8:30 am to 4:30 pm, Monday-Friday, or requesting a refund online through the Office of the Bursar. A credit balance is not automatically refunded.

Fellowships, Assistantships, and Financial Assistance

The University of Maryland recognizes the high cost of education today and makes every effort to offer financial assistance to qualified students through a variety of programs. Approximately seventy percent (70%) of all full-time graduate students receive financial support, which may include remission of tuition, teaching and research assistantships, work-study support, and University and other fellowships. Referrals for University or area employment opportunities for students and students' spouses are also available in various graduate programs and in specific student service centers at the University.

Admission to a graduate degree program is a prerequisite for the award of a teaching or research assistantship, a fellowship, a traineeship, a loan, or a work-study award.

Graduate Fellowships

Graduate Fellowships are funded by the Graduate School through grants allocated to the academic colleges specifically for this purpose. Applicants and current students must apply directly to their Graduate Programs for fellowship funding. The Graduate School offers a limited number of dissertation fellowships. Applications are solicited annually. More information may be obtained from the Graduate School, http://gradschool.umd.edu/funding/fellowship-information. For more information, also please see the Fellowships chapter of this Catalog.

Graduate Assistantships

A graduate assistantship is an academic appointment not involving academic tenure. Such assistantships take the form of teachings assistantships, research assistantships or, in a few cases, administrative assistantships. Offers of these positions are made to graduate students directly by the programs and departments.

The assigned duties of a graduate assistant are consistent with the aims and objectives of the teaching and research missions of the University. An appointment of 20 hours per week is considered a full-time assistantship. An appointment of 10 hours per week is considered a half-time assistantship. The responsibilities assigned to a graduate assistant should take into account what may be reasonably expected given the graduate assistant's education and experience.

For more information, please see the Assistantships chapter of this Catalog.

Overload Payments for Graduate Students

Under certain circumstances, fellows and graduate assistants may be offered employment in addition to their normal appointments. As outlined in Chapter 15: Graduate Assistants and Chapter 16: Graduate Fellows , approval for such overload payments must be obtained from the Graduate School in advance of the appointment. The required request form can be found at https://gradschool.umd.edu/forms

Travel Grants

The Graduate School administers the Jacob K. Goldhaber travel grants for graduate students. Goldhaber grants are available to support part of the cost of attending conferences at which graduate students will present the results of their research. Because funding is limited, students are urged to apply as soon as their presentations have been accepted. More information is available at https://gradschool.umd.edu/funding/graduate-school-travel-grants.

Policies for Graduate Assistantships

I. General Policies

Graduate Assistants (GAs) are, first and foremost, graduate students pursuing an education. The opportunity to work closely with faculty members and undergraduate students in teaching, research, or administrative environments is an integral part of that education.

Graduate students who hold assistantships benefit educationally and professionally. They gain further expertise in their field; enhance their research skills and develop pedagogical skills; acquire experience in leadership, interpersonal effectiveness, and performance evaluation; acquire academic administrative experience; and enjoy collegial collaborations with advisors that may result in joint publications and other professional activities. Skills learned in assistantships prepare students not only for the academy, but also for corporate, government, and nonprofit organizations.

Assistantships also provide graduate students with the financial resources necessary to pursue their degrees. This financial support—stipend, tuition remission, and benefits—is part of the University's commitment to the success of our graduate students.

The University is committed to ensuring that graduate assistant assignments are productive, enhance student qualifications, meet funding support and workload goals, and are consistent with the educational objectives of the student and his or her program.

Categories

The official title of Graduate Assistant (GA) is used in all university documents, but, in general practice, Graduate Assistants are referred to either as Graduate Teaching Assistants (TAs), Graduate Research Assistants (RAs), or Graduate Administrative Assistants (AAs). Additionally, a small number of Graduate Assistants serve as resident life counselors. Qualified graduate students often move between these kinds of appointments during their graduate education.

Administration

Graduate Assistants at the University of Maryland, College Park are under the direct supervision of the department, program, or unit that offers the appointment. The department determines the GA's assignment, supervises his or her work, and recommends him or her for reappointment and promotion to various stipend or compensation levels. The department is the primary source of

information for the details of the assistantship. Within the department, the GA's work assignment is determined by the Department Chair, the Director of Graduate Studies, any duly appointed executive committees and assistants to the chair, and/or the faculty member assigned to supervise the GA's particular course, laboratory session, or research project. Graduate Administrative Assistants are under the supervision of the heads of the academic or non-academic units in which they work.

Student Status

A Graduate Assistant is on an academic appointment not involving academic tenure. The appointment may be full-time (20 hours per week) or half-time (10 hours per week).
GAs holding regular 20-hour appointments are considered full-time students by the University if they are registered for at least 24 units in a semester term or 18 units in a 12-week term program. GAs who hold half-time (10 hour) assistantships are considered full-time students if they are registered for 36 units in a semester term or 27 in a 12-week term program. Audited courses do not generate units and cannot be used in calculating registration status. Individual departments or graduate programs may have higher registration requirements for their GAs.

For more information about unit requirements, please view the Registration Policies.

Qualifications

A Graduate Assistant must be a registered graduate student in good standing enrolled in a degree program at the University of Maryland, College Park and must be making satisfactory progress toward the degree. Appointments are normally given to those students who have shown superior aptitude in their field of study and who appear likely to render a high quality of service to the university by their teaching or research activities or their administrative work in a unit. Non-Degree Seeking Students are not eligible to hold Graduate Assistantships.
In rare instances, an appointment of a Graduate Research Assistantship (RA) may be made for a graduate student who has been admitted into a graduate degree program at another campus within the University System of Maryland. In this exceptional case, the student will be supported by a Principal Investigator whose research contract or grant is administered by the College Park campus. The student's tuition, benefits, etc. will also be paid from research funds.

English Proficiency Requirements for International Students

International Teaching Assistants (ITAs) who are non-native speakers of English are required to undergo an evaluation of their spoken English abilities by the Maryland English Institute (MEI). The ITA Evaluation is not required of students who serve only as graders or researchers, or whose entire education has been in the U.S, United Kingdom, Ireland, English-speaking Canada, Australia, New Zealand, Anglophone Africa, or Commonwealth Caribbean. Students must pass the ITA Evaluation prior to being assigned teaching duties, including duties in labs. This requirement may not be waived.

The Graduate School pays the fee for the ITA Evaluation for students who have been formally appointed as TAs. All other students are responsible for paying this fee. If the department wishes

to cover the cost of the evaluation for those students, the Graduate Director must indicate this in writing on the referral form.

Students who fail the ITA Evaluation are required to take an English course. On the basis of the evaluation results, MEI will place the student into either UMEI 006 (pronunciation) or UMEI 008 (broader communication patterns). If the student has been formally appointed as a TA, the department is responsible for the tuition of the course and may not pass the cost of this instruction on to the student. If the student fails the ITA evaluation and is not an ITA, the student is responsible for paying tuition for the course. Tuition remission cannot be used for UMEI courses.

Full details regarding the ITA Evaluation can be found on the Maryland English Institute website.

II. Appointments

Appointment, Reappointment, Duration of Appointment

Most Graduate Assistants are appointed either for a regular academic year (9.5 months) or for 12 months. Some appointments may be for a shorter period. The academic-year appointment begins in mid-August and ends in May. Students may be reappointed one or more times at the discretion of the department in which they serve. To allow a larger number of qualified students to benefit from assistantships, many departments limit the number of years that a graduate student may serve as an assistant in any capacity.

Each department is responsible for determining and communicating its own specific criteria, within the limits of university policy, for assessing student qualification for appointment and reappointment to a graduate assistantship. In general, reappointment is dependent upon satisfactory performance and normal progress toward a graduate degree. As with all university faculty and staff positions, appointment and reappointment are contingent upon the availability of funds.

Letters of Appointment

It is the responsibility of the department to notify the graduate student in an official letter of the final offer of appointment. These letters provide information on the terms of the assistantship and should be explicit and clear with respect to workload expectations. A template can be found on the Graduate School's Forms webpage.

Performance Reviews

Each department is responsible for determining procedures for review and evaluation of Graduate Assistants and for informing GAs of these procedures. The process of evaluation will vary by departments, and may include written assessment of work by an individual faculty member, classroom visitation by designated faculty members, and written student evaluations. The results of reviews and evaluations should be discussed with the GA concerned.

Termination or Loss of Support

A Graduate Assistant's appointment may be terminated before the expiration of its designated term for loss of funding, for cause, for academic delinquency, by written notice, and by voluntary mutual agreement.

1. *Loss of Funding*. A graduate assistantship may be terminated on account of a loss, reduction, or reallocation in appropriation, grant, contract, gift, or other funds with which to support the appointment. Subject to the fiscal priorities of the unit, programs will make a good faith effort to find alternative funding for the full term of the appointment for a GA who is in good standing and making satisfactory progress to degree. The University will give the GA 30 calendar days written notice of termination for loss of funding.
2. *Cause*. An appointment may be terminated immediately for cause. The following are examples of sufficient cause for removal: incompetence, inefficiency, wanton carelessness or neglect of duty, insubordination, repeated or extended absence, and misconduct related to the GA's suitability or capacity to continue to perform assignments. A GA may be suspended from responsibilities without pay pending the investigation of cause for termination of the appointment.
3. *Academic Delinquency*. An appointment may be terminated if the GA is not making satisfactory academic progress to a degree or is otherwise not in good academic standing. The termination shall be in writing and may be immediate or with such notice as the University believes compatible with the GA's academic situation, not to exceed 30 calendar days.
4. *Written Notice*. An appointment may be terminated by delivery of 30 days written notice to the GA.
5. *Voluntary Agreement*. With the agreement of the University, an appointment may be terminated by the voluntary written resignation of the GA.

Special Appeals Process

A Graduate Assistant whose appointment shall be terminated for the reasons 1, 2, 3, or 4 above, may obtain a review by the Chair of the Department under the Informal Consultation procedure in Section VII, below. Thereafter, if desired, the GA may obtain a special review by the Dean of the unit where the assistantship is located.

1. The GA shall initiate the formal review by sending a letter to the College or School Dean with copies to the faculty member and the Department Chair. To be considered, the letter must be received by the Dean within 15 calendar days from the date the GA is first informed of the intent to terminate the assistantship. The grounds for appeal in terminations based on *Loss of Funding, Academic Delinquency,* and *Written Notice* shall be prejudicial procedural error and/or a violation of substantive due process.

2. The burden of proof in these types of termination shall be upon the GA. The burden of proof in terminations for *Cause* shall be on the faculty member to demonstrate that cause exists and warrants termination.

Upon receipt of the letter requesting formal review, the Dean will:

1. Solicit a written response from the faculty member; and,
2. Offer to meet with the GA and the faculty member, either individually or together, before reaching a decision. The Dean shall consult with the Department Chair and such other persons as the Dean believes may be knowledgeable about the matter. The Dean shall endeavor to convey a written decision and, where appropriate, the remedy, to the GA and the faculty member within 10 calendar days of receipt of the letter requesting formal review.
3. The decision of the Dean shall be final in all matters pertaining to the review.

Renewal and Non-Renewal of Appointment

The University does not guarantee an appointment as a Graduate Assistant will be renewed at the end of its designated term. Although appointments are often renewed, the University cannot promise and there can be no expectancy that a graduate assistantship will be continued over an extended period of time.

For assistantships in non-academic units, "Dean" shall mean the Vice President of the division.

A termination would violate substantive due process if it is arbitrary or capricious or if it were based on an illegal or unconstitutional consideration.

III. Duties and Time Commitments

The assigned duties of a Graduate Assistant are consistent with the objectives of the teaching and research missions of the university, including the objective that assistantships are to be educationally productive for graduate students. Workload expectations of the department, and of the student's advisor/supervisor, should be explicit and clear. The appointment may be full-time (20 hours per week) or half-time (10 hours per week).

Departments are to provide work assignments that GAs receiving full stipends can satisfactorily complete in no more than a 20-hour average work week, and are to ensure that GAs spend no more than 20 hours per week on average throughout the term of appointment on work unrelated to their research. The actual number of hours required to complete assignments in any given week may vary.

Graduate Teaching Assistants

The specific duties of Graduate Teaching Assistants (TAs) vary across disciplines and departments. For the majority of teaching assistants, however, assignments and responsibilities fall into four categories:

- Assuming teaching responsibility for a laboratory or discussion session of a course;
- Assuming teaching responsibility for a classroom section of a multi-sectional course, under the close supervision of the director(s) of the course;
- Assisting a faculty member in the grading, advising, and administrative duties necessary for a course(s);

- Assisting in general departmental administrative duties, such as advising or the administration of community programs, workshops, etc.

Within a department, the particular assignment depends on the department's needs and the experience and academic qualifications of the TA. All graduate TAs serving in any capacity are under the direction and close supervision of a member of the faculty.

Time Commitment: For TAs, the 20-hour average should include the time spent in faculty lectures, class preparation, classroom or laboratory teaching, reading and commenting on student papers or examinations, office consultation, and other duties required to carry out the teaching role.

The time that TAs devote to their assignments varies. The proportion of hours spent in preparation, classroom or laboratory time, and grading, for example, differs from one discipline to another. In some disciplines, a new TA may find that a task such as grading initially requires more time than the usual 20-hour weekly average allows.

TAs may be required to come to campus prior to the actual beginning of classes to participate in orientation and class-preparation duties. TAs usually complete their formal duties when examinations have been graded.

Graduate Research Assistants

The specific duties of Graduate Research Assistants (RAs) vary according to the nature of the research project in which they participate and the source of the funding. RAs may occasionally be asked to conduct some work at home or to do their research at times when classes are not officially in session. The duties of RAs are also performed under the close direction and supervision of a member of the faculty.

Time Commitment: For RAs, the 20-hour average should include the time spent in library and/or laboratory, and on all other research tasks providing assistance to the assigned project.

Graduate students working on research projects funded by grants are often also working on material directly related to their theses or dissertations. It is not unusual in such cases for grant work and personal work to merge and for the work time to consume far more than the usual 20-hour weekly average.

Graduate RAs usually follow the project director's instructions regarding work when classes are not in session.

Graduate Administrative Assistants

A number of academic and non-academic units employ Graduate Administrative Assistants (AAs), generally to perform administrative support functions in an office setting. Such positions are expected to have a research or professional development component. Some administrative appointments are for less than one academic year.

Time Commitment: For AAs, the 20-hour weekly average should include all time spent on assigned duties, including mandatory training sessions. Unless explicitly stated in writing, AAs are expected to work no more than the 20-hour average work week. If greater amounts of time are periodically required, the unit must provide the AA with an offer letter that includes a statement of expected duties, approximate dates when extra hours might be necessary, and maximum work hours required. If the AA is required to work more than 20 hours in a given week, the time should be deducted from another week.

Just as the unit may require the AA to work more than 20 hours in a given week to meet peak work periods, the AA may request that he or she be allowed to reduce time in a given week to finish a paper or study for an exam and make up the hours later. Such arrangements are allowed and encouraged and should be made between the student and the student's supervisor within the unit.

AAs follow the staff holiday and vacation schedule. Consequently, if the campus is closed (for any reason) for regular staff, AAs who normally would work those days will receive the appropriate compensation and will not be required to make up the hours missed.

Conflict Resolution

A GA who experiences problems related to workload should address them without delay through the process indicated in "Grievance" Section below.

IV. Compensation

Compensation and Stipends

Three categories (called Steps) are currently used for the classification of graduate assistantships. These steps, based on a student’s experience and progress toward the degree, determine compensation levels. Graduate Assistants fall into one of the three steps: Step I is only for first-year GAs; Step II is for second-year GAs, as well as for those students, new or continuing, holding a master’s degree; and Step III is reserved for doctoral candidates.

The Graduate School sets the minimum stipend level for Step I. Departments and programs determine their own increments for Step II and Step III within guidelines set annually by the Graduate School. All GAs working within a particular step, in a particular unit, should be paid the same assistantship stipend.

TAs must be offered a 9.5-month or 12-month assistantship due to duties and responsibilities occurring after the last day of classes.

Additional Employment: On-Campus

Graduate Assistants may be employed on campus for an additional 10 hours per week beyond their assistantship duties, with an overload approval. No individual may be employed in two capacities in the same department without an overload approval. International students may be

limited to a certain number of hours of employment according to their visa status; these students should check with International Student and Scholar Services.

Domestic students who are GAs and who wish to hold more than one position on campus may do so only if the second position is paid on an hourly basis with Labor & Assistants funds (subcode 2075). This policy is necessary to avoid complications concerning benefits. For such individuals, the only benefits allowed are those associated with the graduate assistantship.

Additional Employment: Off-Campus

It is expected that the combined responsibilities of graduate studies and assistantship duties will fully occupy a student during the academic year. The University, however, does not prohibit Graduate Assistants from accepting outside employment in addition to their assistantship appointment. It is up to the GA to determine how much time, if any, he or she can devote to additional activities while still maintaining satisfactory progress toward the degree and satisfactory fulfillment of the assistantship responsibilities. Departments and programs have the discretionary right, however, to make appointments to students whose commitment suggests that they are most likely to attain their educational goals and maintain their assistantship responsibilities expeditiously and effectively.

Overload Payments for Graduate Students

Overload requests are for temporary, short-term arrangements only. They must be limited to one semester per request and must be received and approved prior to the beginning of the appointment. No graduate student may be employed in two capacities within the same department without an overload approval.

9.5-month Appointments

A full-time GA (20 hours per week) on a 9.5-month appointment must have an overload approval for any on-campus employment above the assistantship assignment while classes are in session for the Fall and Spring semesters.

An overload request must be submitted for Winter Term *only* if the student is teaching a Winter Term course, as a TA or lecturer, in addition to his or her normal assistantship assignment.

An overload request must be submitted for Summer terms *only* if a student (a) is paid in the home unit over four equal pays for summer *or* is paid hourly for 20 hours per week *and* (b) also will be paid in a second unit or in Summer Programs. (The overload form should be completed for the second unit or Summer Programs.)

Graduate Assistants in a 12-week program must submit an overload request for each 12-week term.

12-month Appointments - Semester Term Programs

A full-time GA (20 hours per week) on a 12-month appointment must have an overload approval for any employment above the assistantship assignment when classes are in session during Fall and Spring semesters.

During Winter Term and Summer terms, an overload request must be submitted *only* if the student is teaching a class, either as a TA or lecturer, in addition to the assistantship appointment.

12-month Appointments - 12-Week Term Programs

An overload request must always be submitted for each 12-week term.

International Students

Federal Law prohibits international students from working more than 20 hours per week while classes are in session; international students holding full-time assistantships (20 hours) are therefore ineligible for overload assignments during the Fall and Spring semesters or during a 12-week term.

Sources of Funding

GAs may not be employed in more than one position eligible for benefits; their percentage on payroll may not exceed 50%. Hours over and above the assistantship must be paid with Labor & Assistants funds (subcode 2075).

Retirement and Social Security (FICA)

Retirement benefits are not withheld from the salaries of Graduate Assistants. GAs are exempt from Federal Insurance Contribution Act (FICA) taxes provided that they maintain enrollment and are registered with at least half-time status in the term (Semester or 12-week) they are holding an assistantship.

Tax Status

Pursuant to U.S. federal tax code revisions effective January 1, 1987, all graduate students are liable to pay income tax on compensation received for Graduate Assistantships. The amount remitted for tuition is a benefit and is not taxed. A GA with questions about tax obligations should consult a tax counsel or the Internal Revenue Service (1-800-829-1040).

V. Tuition Remission and Mandatory Fees

Graduate Assistants on a full-time appointment (20 hours per week) are eligible for 10 credits of tuition remission in the Fall and Spring semesters and 4 credits in Winter Term. GAs on a half-time appointment (10 hours per week) are eligible for 5 credits of tuition remission in the Fall and Spring semesters and 2 credits in Winter Term. GAs on a full-time *12-month appointment* are also eligible for up to 8 credits of tuition remission during Summer; and GAs on a half-time *12-month appointment* are eligible for up to 4 credits during Summer.

Tuition remission is credited at the prevailing standard in-state credit hour rate at the time the class is taken. Some programs, such as the MBA, have higher credit hour rates or flat fee pricing. The tuition remission benefit does not cover the difference, which remains the responsibility of the GA.

Tuition remission does not cover Mandatory Fees. Please see the Schedule of Classes for a current schedule of Mandatory Fees.

Residency Classification

All Graduate Assistants on a full-time or half-time appointment are billed at the in-state rate for credits taken during their appointment, including any credits taken over the tuition remission allowance. *Official residency classification, however, does not change.* Consequently, at any time when a graduate student is no longer supported by an assistantship—including summer months if the student is on a 9.5-month assistantship—he or she will be billed according to the official residency status that was assigned upon admission. Thus, a student may pay in-state rates during the academic year but out-of-state rates during the summer if the student is classified as out-of-state. Graduate students are urged to be aware of their official residency classification status and to address any problems immediately.

Contact Residency Reclassification Services at resclass@umd.edu or 301-314-9596 for more information regarding changing residency classification and changing residency statuses.

Health Insurance

Graduate Assistants on a full-time or half-time appointment may enroll in the university employee health benefits program. The personnel coordinator in the student's department should be able to provide appropriate forms. GAs must enroll within 60 days of their initial employment to be eligible for a health care program. GAs may enroll their spouses and children under this program.

Any graduate student who is ineligible for the employee health care program may enroll in the student health insurance program offered by the University Health Center. For more information, call the University Health Center Insurance Office at 301-314-8165.

Facilities and Parking

It is the expectation that departments will provide Graduate Assistants with suitable workspace, laboratory space, and, when necessary, office space. GAs also generally have access to desks, file space, mailboxes, computers, telephones, and duplicating machines or services.

Vehicles must display a valid UMCP parking permit or be parked in metered spaces. While GAs are not assigned to faculty parking lots, the Department of Transportation Services endeavors to assign GAs to a student lot close to the building where they work. Students who register early have the best choice of parking assignments. The Department of Transportation Services is located on the ground floor of Regents Parking Garage, phone 301-314-PARK. Parking for GAs is not subsidized; each GA is responsible for the cost of his or her parking permit.

Time Away from Duties

The objective of graduate assistantships is education. They are a component of learning and, as practicum, advance understanding through application. Stipends are an acknowledgment both of the expense and need for support during graduate education and of the contribution made by the Graduate Assistant to the mission of the University. The relation between the GA and a professor is academic, partaking of the traditions and practices of the academy. While an appointment as graduate assistant shares some attributes of employment, these are secondary. Time away from duties is foremost time away from class, not time away from the office. The following "Time Away" policies reflect these principles.

A. *Accrued Leave.* Graduate Assistants do not earn paid annual, personal, or sick leave.

B. *Time-Away from Duty.* Graduate Assistants working full-time on 12-month appointments may have time-away from their duties. A full time (20 hours per week), 12-month assistantship carries the expectation that the GA will be allowed ten workdays (40 hours) of collegially supported absence. This time away from duties must be taken during the current appointment. It may not be accumulated or transferred. It does not include time when the University is closed. Because colleagues must perform the GA's responsibilities during an absence, reasonable notice and prior approval by the GA's supervisor are required.

Time-away from duty may be used for such purpose as the GA elects and is, therefore, distinct and separate from allowable absences for illness, maternity, or adoption.

C. *Absence due to Illness*. If a Graduate Assistant becomes ill, time away from duties should initially be supported collegially. Occasional, short-term absences on account of illness generally will not require the use of the allowable "time-away from duty" days.

In the event an absence due to illness extends for a period longer than two weeks, support for time away from duties must be requested by the GA and lies in the discretion of the head of the funding unit (in the case of a State supported assistantship) or of the Principal Investigator or other grant administrator (in the case of an externally funded assistantship). The GA's request must be accompanied by supporting medical documentation satisfactory to the University, including a letter from a physician or other licensed heath-care professional that provides (1) the nature of the illness; (2) a statement that the GA should not return to work for health reasons; and (3) the duration of the required absence. The University may require the GA to have a fitness for duty examination prior to resuming duties.

D. *Absence due to Maternity or Adoption.* On February 20, 2013, the Graduate Council updated the approved *Graduate Assistant Parental Accommodation Guidelines,* subsequently endorsed by the Offices of the Provost and President.

Graduate Assistant Parental Accommodation Guidelines

It is important that graduate assistants becoming parents be accommodated; that parental accommodation be regarded as accepted practice; that the terms of an accommodation be

reasonable and appropriate; that accommodations within a unit be consistent and equitable in application; and that a request for parental accommodation, if denied, receive timely review.

1. Graduate Assistants will be provided a guaranteed parental accommodation of six weeks, retaining their full stipends and benefits during the accommodation. If both parents are Graduate Assistants, the six-week accommodation will be divided between them.
2. Departments, faculty, and graduate assistants should continue to work collegially on further details of the accommodation, recognizing that these may differ from case to case owing to individual student circumstances and departmental cultures. The Graduate School Parental Accommodation Form should be submitted at least eight weeks prior to anticipated leave and is available on the Graduate School's Forms webpage.
3. A graduate assistant whose request for a reasonable accommodation is not approved should consult first with his or her Director of Graduate Studies or Department Chair, next with his or her college Dean, and last, if necessary, with the Dean of the Graduate School. Alternatively, the assistant may go directly to the Ombuds Officer for Graduate Students for advice and/or informal mediation. In either case, the Dean of the Graduate School will serve as the final arbiter between college/department and student.

Approved by the Graduate Council on February 20, 2013

VI. Conduct and Professional Behavior

A Graduate Assistant's teaching, research, and administrative activities are subject to the ethical precepts and codes of the academic profession, to the laws of the State of Maryland regarding its employees, and to University policies governing institutional obligations. Violation of any of these regulations constitutes a basis for disciplinary action in accordance with procedures set forth in the University's policies.

In their interactions with students, faculty, and all other members of the university community, GAs are expected to conduct themselves with the same sensitivity and thoughtfulness that they expect to receive from others. The University Human Relations Code states that the University of Maryland affirms its commitment to a policy of eliminating discrimination on the basis of race, color, creed, national origin, sex, sexual orientation, marital status, personal appearance, age, physical or mental disability, political affiliation, or on the basis of the exercise of rights secured by the First Amendment of the United States Constitution.

The precepts stated above apply equally to GAs and to supervisors of GAs.

Scholarly Misconduct

Scholarly misconduct means fabrication, falsification, plagiarism or other misconduct in proposing, performing, reviewing, or reporting research and/or in connection with other scholarly or creative activities.

Other terms such as research fraud, scientific misconduct, or research misconduct are subsumed within the term scholarly misconduct. Scholarly misconduct does not include honest error or

honest differences of opinion. A finding of scholarly misconduct requires that there be a significant departure from accepted practices of the scholarly community for maintaining the integrity of the research or scholarly record; the misconduct must be committed intentionally, or knowingly, or in reckless disregard of accepted practices; and the allegation must be proven by a preponderance of relevant evidence.

The full text of the University of Maryland's Procedures for Scholarly Misconduct can be found on the University System of Maryland's webpage.

Sexual Harassment

The University of Maryland is committed to maintaining a learning and work environment in which students, faculty, and staff can develop intellectually, professionally, personally, and socially. Such an environment must be free of intimidation, fear, coercion, and reprisal. The University prohibits sexual harassment. Sexual harassment may cause others unjustifiable offense, anxiety, and injury. Sexual harassment threatens the legitimate expectations of all members of the campus community. Academic progress or progress in employment is determined by the publicly stated requirements of classroom and job performance, and the campus environment will not unreasonably impede study or work.

Sexual harassment by university faculty, staff, and students is prohibited and constitutes violation of campus policy. Sexual harassment may also constitute violations of the criminal and civil laws of the State of Maryland and the United States. For the purpose of campus policy, sexual harassment is defined as follows: 1) unwelcome sexual advances; or 2) unwelcome requests for sexual favors; and 3) other behavior of a sexual nature where:

- Submission to such conduct is made either explicitly or implicitly a term or condition of an individual's employment or participation in a university-sponsored educational program or activity; or
- Submission to or rejection of such conduct by an individual is used as the basis for academic or employment decisions affecting that individual; or
- Such conduct has the purpose or effect of unreasonably interfering with the individual's academic or work performance, or of creating an intimidating, hostile, or offensive educational or working environment.

The full text of the University of Maryland Sexual Misconduct Policy and Procedures can be found online.

Statement on Sexual Relationships and Professional Conduct

While sexual relationships between instructors and the students in their classes are not prohibited in the sense that penalties are attached to such conduct, all members of the campus community are urged to consider the ethical concerns that may arise as a result of such relationships.

All members of the campus community should understand that sexual relationships that occur in the context of educational evaluation are generally deemed very unwise because they present

serious ethical concerns. Many professional codes of conduct prohibit sexual relationships that occur within the context of one's profession. Accordingly, faculty, supervisors, and Teaching Assistants are warned about the possible costs of even an apparently consenting relationship. The element of power implicit in sexual relationships occurring in the academic-evaluation context can diminish a student's actual freedom of choice. There is doubt whether any such relationship can truly be consensual. In addition, sexual relationships between a faculty member or Teaching Assistant and a student create an environment charged with potential conflicts of interest. Questions of favoritism frequently arise. As a result, such conduct may subvert the normal structure of incentives that spur work and learning and interjects attitudes and pressures that are not consonant with the education policies and principles to which the campus is committed.

The full text of the University's Statement on Consensual Relationships and Professional Conduct can be found at the end of the University of Maryland Sexual Misconduct Policy and Procedures.

Equal Opportunity Statement

The University of Maryland is an equal opportunity institution with respect to both education and employment. The university does not discriminate on the basis of race, color, religion, age, national origin, sex, or disability in admission to or access to, or treatment of employment in, its programs and activities, as required by federal law (Title VI, Title IX, Section 504) and state laws and regulations. Inquiries regarding compliance with Title VI of the Civil Rights Act of 1964, as amended, Title IX of the 1972 Education Amendments, Section 504 of the Rehabilitation Act of 1973, or related legal requirements should be directed to:

Director, Human Relations Program
Office of Human Relations
1130 Shriver Lab
University of Maryland
College Park, MD 20742
Telephone: 301-405-2838

Inquiries concerning the application of Section 504 and Part 34 of C.F.R. to the University of Maryland may be directed to:

Director, Disability Support Services
0106 Shoemaker Hall
University of Maryland
College Park, MD 204742
Telephone: 301-314-7682 (V/TTY)

VII. Grievance Procedure

The University is an academic and collegial community. Regular and clear communication between Graduate Assistants and their advisors and supervisors is essential to maintaining an effective educational environment. GAs who believe their workload is not in conformity with these *Policies for Graduate Assistantships* may seek a review in accordance with this Section.

In addition to workload, a GA may also seek review under this Section of whether the GA is receiving Overload Payments, Tuition Remission, and Time Away from Duties in accordance with these *Policies*.

For the purpose of this Section, "workload" shall mean the greater of (a) the average number of hours assigned to the GA throughout the term of an appointment (e.g., 20 hours per week), or (b) the average number of hours throughout the term reasonably required for an experienced GA in the GA's department to complete the GA's assigned work.

In all instances noted above, the GA should attempt to resolve these matters locally, collegially, and informally. If the difficulty has not been resolved to the GA's satisfaction through informal means, then he or she may elect to file a formal grievance.

Informal Consultation

The Graduate Assistant should first attempt to resolve the difficulty by discussing the situation with his or her faculty advisor/supervisor as expeditiously as possible.

1. In the case of a TA, this usually would be the professor in charge of the course; in the case of an RA, the director of the research project on which the student is working; in the case of an AA, the immediate supervisor of the student in the unit in which the student is working.

The GA should provide the reasons for complaint and a suggested resolution/remedy.

If a satisfactory resolution is not reached, the GA should next discuss the situation with the Chair of the Department.

2. Either before or after such discussions, the GA may wish to seek advice from another academic advisor, the Director of Graduate Studies of the GA's program, an associate dean of the Graduate School, or the Ombuds Officer for Graduate Students. The GA is strongly encouraged to consult with the Ombuds Officer early in the informal discussion process, and must consult with the Ombuds Officer before initiating a formal grievance.

Ombuds Officer for Graduate Students

The Ombuds Officer is available to all graduate students with questions or concerns related to their graduate experience, including their roles as GAs. The Ombuds Officer provides informal assistance in resolving conflicts and works to promote fair and equitable treatment within the University. The Ombuds Officer works confidentially within the scope of the law. The purpose of the Ombuds Officer is to ensure that the graduate student's voice is heard and that problems receive prompt and impartial attention. The Ombuds Officer does not advocate for an individual; rather, the Ombuds Officer advocates for a fair process that promotes the University's commitment to excellence in graduate education and in the graduate student experience. Queries may be directed to Ombuds Officer for Graduate Students, The Graduate School, 2103 Lee Building, phone (301) 405-3132.

Formal Grievance

Most problems related to assistantships are resolved through informal consultation. If a problem pertaining to Workload, Overload Payment, Tuition Remission, or Time Away for Duties has not been solved informally to the GA's satisfaction, he or she may initiate a formal grievance. The formal procedures outlined below are intended to provide a mechanism through which grievances related to assistantships can be formally made and decided.

The Grievance Procedure

The process of formal consideration offers the GA a review by the Dean of the Graduate School or by a panel appointed to make a recommendation to the Dean of the Graduate School. The steps are as follows:

If a satisfactory resolution has not been achieved following informal consideration by the Chair of the Department, the GA may initiate a formal grievance by sending a letter to the Dean of the Graduate School. To be considered, it must be received by the Graduate Dean within 30 calendar days from the action involved or from the GA having reasonable knowledge of it. Under exceptional circumstances, that deadline may be extended at the discretion of the Graduate Dean.

1. The letter must be signed and:
    1. Contain a clear description of the facts giving rise to the grievance; and,
    2. Identify the provision(s) of these *Policies for Graduate Assistantships* which have been violated; and,
    3. Set forth the desired remedy; and,
    4. Be copied to the faculty member and the Chair of the Department.
    5. Elect to have the Graduate Dean decide the grievance either:
        1. In the manner described in Paragraph 2.3., below; or,
        2. Following receipt of a recommendation from a three-person panel appointed by the Graduate Dean to consider the matter.
2. Upon receipt of a letter of formal grievance, the Graduate Dean will:
    1. Share the letter with the Dean of the appropriate college or school; and,
    2. Solicit a written response from the Department Chair.
    3. Offer to meet with the GA and the faculty member, either individually or together, before reaching a decision. The Graduate Dean shall consult with the Academic Dean and such other persons as the Graduate Dean believes may be knowledgeable about the policies and practices involved. The Graduate Dean shall endeavor to convey a written decision and, where appropriate, the remedy, to the GA and the faculty member within 15 calendar days of receipt of the letter of grievance.
    4. If the GA elects to have a panel, the Graduate Dean will appoint two graduate faculty (one of whom shall chair the panel) and one graduate student, each familiar with the GA's discipline but not from the GA's program or department, to review the matter and make a recommendation. The Graduate Dean will provide the panel with the letter of formal grievance and the written response of the Department Chair. The panel shall offer to meet with the GA and the faculty member and proceed in the manner described in Paragraph 2.3, above.

The Panel shall provide the Graduate Dean a written report containing a statement of the issues, the panel's findings of fact, the controlling policy provisions, the panel's conclusions regarding the merits of the grievance, and a recommended disposition of the grievance, including any suggested remedy.

The Graduate Dean shall decide the grievance and fashion any necessary remedy, giving substantial weight to the findings, conclusions, and recommendations of the panel.

The decision of the Graduate Dean regarding the merits of a grievance and, where appropriate, the remedy, shall be final.

General Principles Controlling Formal Grievance Procedures

These Section VII procedures are not intended to mimic a courtroom and be adversarial in nature. Rather, they are formal in the meaning of offering a structured method to investigate, weigh and remedy differences. They are designed to preserve collegiality and minimize injury to the student-faculty relationship. Because grievances, if not made known or not considered expeditiously, threaten the learning experience, GAs, faculty, and administrators share responsibility alike to deal with them promptly. Experience has shown that the following rules promote the orderly and efficient disposition of grievances. Accordingly, they shall be observed:

1. There is a burden of proof. The GA has the responsibility of convincing the Graduate Dean or panel of three things: a) that the *Policies of Graduate Assistantships* has not been followed; b) that the GA has been adversely affected; and c) and that the requested remedy is appropriate.
2. All matters to be considered in support or defense of a grievance should be made known as early in the informal process as possible. Absent extenuating circumstances, matters not raised in the informal process should not be considered in the formal process. In both the informal and formal process, it is the responsibility of the GA and faculty member, respectively, to produce in a timely way the evidence they each wish considered, including any documents and witnesses.
3. The Grievance Procedure is not a trial. Formal rules of evidence commonly associated with criminal and civil trials may be counterproductive in an academic investigatory process and shall not be applied. The Dean, Graduate Dean, and three-member panel shall give effect to the rules of confidentiality and privilege, but shall otherwise accept for consideration all matters which reasonable persons would accept as having probative value in the conduct of their affairs, giving it such weight as they consider proper. Unduly repetitive, irrelevant, or personally abusive material, however, should be excluded. They may also consider matters within the common knowledge and experience of University faculty, including published policies of the University System of Maryland and the University of Maryland.
4. The GA may be assisted at any meeting by an advisor, who must be a registered, degree-seeking graduate student at the University. Although the GA is expected to take an active

role in all meetings, the advisor may help with the presentation of arguments and evidence.

5. The University has in place other grievance procedures and administrative processes designed to address specific types of claims.4 These are meant to be the exclusive avenue for review and redress. Grievances that by their subject matter may be considered under other established institutional procedures must be brought under those procedures and may not be considered under this these Section VII formal procedures. Matters pertaining to the general level of wages, wage patterns, fringe benefits, or to other broad areas of financial management and staffing are not grievable. Matters expressly excluded from consideration under other procedures may not be grieved under these Section VII formal procedures. These procedures also may not be used to challenge faculty judgment about a GA's academic performance (including, for example, test scores, grades, waivers, dissertation defenses and other indicia of mastery of subject matter and taught skills).
6. The filing of a grievance does not relieve the GA of the obligation to perform all duties as assigned unless and until otherwise decided pursuant to a decision under these procedures. All remedies will operate prospectively.5 Financial awards (e.g., "back pay," "damages," "compensation," and "raises") may not be awarded. The acceptance of a proposed remedy by the GA shall terminate the grievance process. The matter may not then be further considered or additional remedies sought under other campus procedures.
7. A decision may not be made at any step that conflicts with or modifies a policy, regulation, or grant of authority approved by the Board of Regents, the Chancellor, the President, the Provost, or the University Senate or with any applicable Federal or State of Maryland law.
8. Only currently enrolled University of Maryland graduate students may initiate a formal grievance. The grievance must pertain to the GA's personal services, not those of another GA. Group grievances are not permitted, although similar grievances may be consolidated and processed together as a single issue. As a general matter, where a number of individual grievances have been reduced into a single grievance, not more than three GAs selected by the group may be excused from their duties to attend.
9. Because it is critical to address potentially corrosive grievances sooner than later, and because the remedies available are prospective, the time requirement established for initiating a formal grievance is necessary to the effective administration of the graduate program. Unless otherwise agreed in advance among the GA, the faculty member, and the Graduate Dean, strict adherence to them is a condition of review and appeal under these Section VII procedures. Time requirements are measured from the first occurrence of an event; "continuing" wrongs are not recognized for the purpose of satisfying time requirements.
10. The Graduate Dean may delegate such parts of his responsibilities as he deems reasonable and efficient, provided the final decision and any remedy must be reviewed and approved by the Dean personally.

In this Section VII, the term "faculty member" designates the individual directing and supervising the GA. Depending on the circumstances of the GA's appointment, this person may, in fact, be a University staff employee, and not on the faculty. It is the design of these procedures that the GA first raise the matter of concern with the individual whose direction or decision has given rise to complaint.

In this Section VII, the term “Chair of the Department” shall also mean, as appropriate to the GA’s appointment, the Program Director or the unit head in non-departmental colleges and schools and in administrative departments.

For the purpose of this Section VII, “Dean of the appropriate college or school” or “Dean of the unit” means the academic dean of the unit where the assistantship is located. For assistantships in non-academic units, “Dean” shall mean the Vice President of the division.

These include, for example, the *Code of Academic Integrity*, the *Policy on Arbitrary and Capricious Grading*, the *Code of Student Conduct*, the *Procedures for Scholarly Misconduct*, the *Human Relations Code*, the *Policy and Procedures on Sexual Harassment*, the *Policy on Student Classification for Admission and Tuition Purposes*, the *University of Maryland Policy on Intellectual Property* and the *Policy on Acceptable Use of Information Technology Resources*.

The resolution of a “workload” grievance, for example, may entail a reduction in work hours, future overload pay when approved and budgeted, time management training, and referral to the Center for Teaching Excellence.

Graduate Student Fellowships

Graduate fellowships are merit-based awards that enable the recipient to focus on graduate study, that do not have to be repaid, and that generally include both a stipend and tuition remission. Fellowships differ from Graduate Assistantships, which carry an obligation to teach classes, to work on a research project, or to perform administrative tasks.

Fellowship offers are made by graduate programs to incoming students as part of a recruitment package; some are made to current students through competitive awards processes. Applicants to graduate programs and current students should contact the relevant program for more information on available fellowships.

Fellowships are funded either internally, through several Graduate School's Fellowship programs, or externally, through a variety of outside funding agencies. A list of the Graduate School Fellowship and Award Programs can be found here.

The University of Maryland is committed to diversity and encourages programs to offer support to a diverse range of students consistent with campus principles of equal opportunity.

Status

Fellowships and scholarships are offered only to graduate students admitted to or enrolled in graduate degree programs at the University of Maryland. Fellows and scholars are expected to devote themselves full time to graduate study and to register full time as defined by the unit system. Students on fellowships and assistantships must be registered for **48** units. Audited

courses do not generate units and cannot be used to determine full-time status. Fellows who also hold half-time assistantships need only register for **36** units to maintain full-time status.

Doctoral Candidates are automatically registered for Candidacy Tuition (899) each semester. This will satisfy the unit requirement for full-time status.

For more information about unit requirements, please view the registration policies page.

Qualifications

Students whose records indicate superior academic achievement and promise and who will increase diversity in their graduate program may be nominated for fellowships and scholarships. The determination of academic merit is based on undergraduate and graduate Grade Point Averages (GPA); scores on such national tests as the Graduate Record Examination (GRE), Graduate Management Admissions Test (GMAT), and the Miller Analogies Test (MAT); the judgment of academic professionals in letters of recommendation; the nominee's Statement of Goals and Research Interests; and the nominee's Statement of Experiences.

External Fellowship Funding

External Graduate Fellowships are fellowships sponsored and funded by organizations outside the university. Corporations, charitable foundations, and numerous other groups fund graduate fellowships.

Private and Non-University Sponsored Fellowships. UMCP has several government and privately funded fellowships that are handled through the graduate programs and colleges. Some of these fellowships are won independently by students in national competitions; others are awarded directly to the colleges or programs, which then select student recipients. Students submitting applications for admission to graduate programs will be considered for such awards as appropriate; no additional application forms are required. Our graduate students are supported on fellowships from the Department of Defense, Ford Foundation, National Science Foundation, Woodrow Wilson National Fellowship Foundation, to name just a few. In addition, several graduate programs sponsor fellowship programs jointly with federal agencies, such as the National Institutes of Health, NASA, and the National Institute of Standards in Technology.

Matching Tuition Scholarships for External Fellowships. These scholarships are awarded, subject to the availability of funding, to students who have received external fellowships that provide a stipend, but do not provide separate funds to cover the cost of tuition. The Graduate School policy on External Fellowship Tuition Remission is listed here.

Fellowship & Award Offer Letters

A formal offer letter specifying the award of a **Graduate School fellowship** is sent to the student from the Dean of the Graduate School in the spring semester. This letter specifies the stipend level, the duration of the commitment, the amount of tuition remitted, and the details of the fellowship or scholarship.

Duties

No service of any kind, either during the tenure of a scholarship or fellowship or in the future, is to be required of a fellow or scholar by their mentor or their graduate program. Fellows and scholars will carry out independent research under the supervision and guidance of-and sometimes in collaboration with-their mentors. Typically, at the start of their tenure as fellows or scholars, inexperienced students will require more supervision and guidance. Eventually, however, fellows in particular, should be treated as junior research associates. Under no circumstances are they to be assigned routine technical or administrative duties or given teaching assignments during the years in which they are supported by fellowships or scholarships.

Supplementation of Support

Students are not allowed to hold two full fellowships ($15,000 or higher each) concurrently. Please contact the graduate school if this situation occurs.

Gifts, departmental fellowships, or other special funds may provide additional support, in an amount not to exceed half the stipend of the fellowship or scholarship. If the fellowship allows, the fellow may be supplemented by an appointment to a position such as a half-time or quarter-time graduate assistantship, or by hourly employment not to exceed 10 hours per week.

Domestic students must consult the award's Memorandum of Understanding (MOU) or the Award Guidelines to determine eligibility for supplementary employment. International students should consult International Student and Scholar Services by phone at 301-314-7740, regarding supplementary employment while on fellowship.

Additional On-Campus and Outside Employment

According to university policy, full time fellows and scholars may work on-campus or off-campus for a maximum of 10 hours per week in addition to holding the fellowship or scholarship as long as the fellowship rules allow for supplementary employment. In other words, fellows may be hired on a half-assistantship (which requires 10 hours per week) or work 10 hours per week on an hourly basis. This restriction on employment is intended to assure that students make rapid progress toward their degrees.

International fellows should consult International Student and Scholar Services by phone at 301-314-7740, regarding supplementary employment.

Deferral or Duplication of Support

Students are not allowed to hold two full fellowships or scholarships, either internal or external awards, or a combination of both, simultaneously. Fellows or scholars who receive offers of external fellowships, such as National Science Foundation, Ford Foundation Fellowships, or any other private or university-administered fellowships may request to defer their Graduate School fellowship or scholarship offer until such time as their other fellowship expires. Assuming

satisfactory academic progress at that time, the student may again resume the Graduate School fellowship or scholarship.

Overload Payments for Graduate Fellows

If a circumstance arises that a fellow must work over the 10 hours per week, an overload form is necessary. This includes the winter term. Overload requests should be for temporary, short-term arrangements only. The request must be limited to one semester per request and must be received and approved by the Graduate School prior to the beginning of the appointment.

Stipend Disbursement

Fellowships are awarded for the academic year only. Stipend disbursements for US citizens and Permanent Residents may be given in lump sums at the start of each semester or spread out monthly. This disbursement is processed through the student award system. For international students, those on a J1 or F1 visas, the disbursement must be processed through payroll. Fellows must receive stipends within the ranges below in order to qualify for associated benefits.

Tuition Remission and Mandatory Fees

The Graduate School provides tuition remission to graduate fellowship recipients who are paid from University and Dean's Fellowship funds, or from external fellowship funds meeting the criteria specified below. Tuition remission and health insurance subsidies are subject to continued availability of resources. *Tuition remission will be provided only for credits that are degree applicable.*

I. GRADUATE FELLOWS HOLDING UNIVERSITY OR DEAN'S FELLOWSHIPS (entered through the Student Award System found on www.ares.umd.edu)

A. A **University Fellow** may be eligible for *up to* 12 credits of fellowship tuition remission per semester (Spring and Fall only). **A University Fellowship (UF)** must supplement a standard support package (assistantship, external fellowship, Dean's Fellowship, and/or other internal fellowship). Tuition remission credits deriving from that support package will be applied first and augmented by fellowship tuition remission up to the maximum remission indicated below:

TYPE	UF FUNDING PER YEAR		TOTAL ANNUAL CREDITS	FALL	SPRING
University Fellowship (paid in 1yr)	$20,000	Maximum fellowship credits:	24	12	12
University Fellowship (paid over 2 yrs)	$10,000	Maximum fellowship credits:	10	5	5
University	$5,000	Maximum	0	0	0

Fellowship (paid over 4 yrs)		fellowship credits:			

B. A **Dean's Fellow** maybe eligible for *up to* 12 credits of fellowship tuition remission per semester (Spring and Fall only). A **Dean's Fellowship (DF)** may be combined with a University Fellowship, additional Dean's Fellowships, and/or other funding (assistantship, external fellowship, and/or other internal fellowship) to create the support package. Tuition remission credits deriving from other funding will be applied first. Tuition remission credits for **Dean's Fellowships** will be provided up to the maximum remission indicated below:

TYPE	**DF FUNDING PER YEAR**		**TOTAL ANNUAL CREDITS**	**FALL**	**SPRING**
Three Dean's Fellowships	≥$15,000	Maximum fellowship credits:	24	12	12
Two Dean's Fellowships	≥$10,000	Maximum fellowship credits:	10	5	5
One Dean's Fellowship	$5,000	Maximum fellowship credits:	0	0	0

II. GRADUATE FELLOWS HOLDING PRESTIGIOUS EXTERNAL FELLOWSHIPS

(use the *Request for Tuition Remission for External Fellowships and Scholarships* form found on the Graduate School Forms page on the Gradute School website.

Graduate students holding **prestigious external fellowships** may be eligible for fellowship tuition remission. A Memorandum of Understanding (MOU) or contractual agreement must be filed with the Graduate School. Unless otherwise specified in the MOU or contract, fellowship tuition remission credits up to 10 credits will be awarded as follows:

- A prestigious external fellowship carrying an annual stipend of at least $15,000 may be awarded up to 10 credits of tuition remission per semester.
- A prestigious external fellowship carrying an annual stipend of at least $7,500 may be awarded up to 5 credits of tuition remission per semester.
- A prestigious external **fellowship carrying an annual stipend of less than $7,500 is not eligible for tuition remission**

III. GRADUATE FELLOWS ON FEDERAL TRAINING GRANTS

(use the *Training Grant Fellowship Matching Tuition Remission Request* found on the Graduate School Forms page on the Gradute School website,

Federal Training Grants covering only partial tuition for fellows may be eligible for an institutional match of fellowship tuition remission. Upon written agreement with the Graduate School, tuition remission may be awarded to Training Grants on a 60% (grant) / 40% (GS) matching basis.

IV. GRADUATE FELLOWS HOLDING INTERNAL FELLOWSHIPS OTHER THAN UNIVERSITY OR DEAN'S FELLOWSHIPS

Fellowship tuition remission is not awarded to fellowships funded from department or college sources; state monies from any source, including DRIF, UM, and UMCP Foundations, unless formal agreements have been made with the Graduate School. Tuition for these fellowships should be charged to the account to which the stipend is being charged.

V. TUITION REMISSION FOR SUMMER SESSIONS AND WINTER TERM

Fellowship tuition remission is not awarded for Summer Sessions or Winterterm.

VI. TUITION REMISSION FOR PROGRAMS WITH NON-STANDARD TUITION

Fellows enrolled in graduate programs with non-standard tuition rates (whether by course or by flat-fee pricing) will be responsible for tuition costs above the standard rate covered by fellowship tuition remission.

VII. OTHER

The Graduate School's Graduate Dean's Fellowships, the Wylie Dissertation Fellowships, the Lee Thornton Fellowship, the Spencer Award, and the Longest Award are eligible for candidacy fellowship tuition remission. Please see the official Fellowship Guidelines for each of these fellowships for complete information about tuition remission eligibility. Fellowships and Award guidelines can be found on the Graduate School Funding web page.

Residency Classification

The official residency classification of students holding fellowships, assistantships, and scholarships does not change as result of their awards, but remain resident or non-resident as indicated in the original admissions offer. Fellows and scholars who also hold a half-time graduate assistantship will be billed in-state tuition as a benefit of their status only while they hold that assistantship. When/if the graduate student is no longer supported by the assistantship-including summer months if the student is on a 9.5-month assistantship-he or she will be billed according to their official residency status determined at the time of their admission.

Students are expected to be aware of their official residency classification status, how their assistantship, scholarship, or fellowship may affect their billing for each semester, and to address any problems immediately to avoid incurring unexpected tuition charges.

Questions about residency classification and changing status for those who intend to become residents of the State of Maryland for tuition and billing purposes under the University System of Maryland Board of Regents policy should be addressed to:

Residency Classification Office
Room 1130 Mitchell Building
Phone 301-314-9596
Web: http://www.registrar.umd.edu/resreclass.html
Email: resclass@umd.edu

Tax Status

Fellows and scholars must pay tax on the stipends they receive to cover living and general expenses, but may deduct certain educational expenses. Amounts awarded in payment of tuition are not taxable for fellows. Taxes are not withheld from stipends disbursed through student financial aid so you may choose to file an estimated tax payment. Please refer to the *Internal Revenue Service Tax Publication 970, Benefits for Education*, for more information regarding the tax status of fellowship and scholarship stipends or call 1-800-829-1040.

Health Insurance

Graduate fellows supported by **University Fellowships**, **Dean's Fellowships**, or **prestigious external fellowships** are eligible to receive a reimbursement of one-half of the annual United Health Care (UHC) insurance premium for *individual coverage*.

The UHC plan must be purchased *prior* to submitting a request for reimbursement to the Graduate School. The Health Insurance Reimbursement Request Form can be found at http://gradschool.umd.edu/forms.

University or Dean's Fellows must provide a Health Insurance Reimbursement Request Form, proof of payment, and copy of insurance card.

Holders of prestigious external fellowships must provide a Health Insurance Reimbursement Request Form, proof of payment, copy of insurance card and a copy of the fellowship MOU or contract.

Ann G. Wylie Dissertation Fellows are entitled to a sum of up to $1,000.00 in addition to their stipend for the cost of the health insurance premium for one semester of coverage.

Lee Thornton Dissertation Fellows are entitled to a sum of up to $1,000.00 in addition to their stipend for the cost of the health insurance premium for one semester of coverage.

The following graduate fellows are *not* eligible for this subsidy: fellows holding *internal* fellowships other than University or Dean's Fellowships; fellows holding half or full-time assistantships entitling them to employee health insurance benefits; and fellows who are part-time students.

For information on the United Health Care plan, please visit the University Health Center website at http://www.health.umd.edu/insurance. United Health Care offers online enrollment at http://www.firststudent.com/.

Vacation and Sick Leave

There is no policy on vacation and sick leave for fellows or scholars. Fellows and scholars are required to maintain satisfactory academic performance in order to retain their support. A fellow or scholar may request deferment of a semester or year of fellowship tenure if documented personal illness prevents him or her from satisfactorily completing academic requirements.

Facilities

Fellows are fully integrated into departmental activities and are to be provided with the same facilities as other graduate students, such as mailboxes, office space, access to a telephone and computer, and email and internet access.

General Policies and the Academic Record

Developing a Program

The student is responsible for ascertaining and complying with the policies and procedures of the Graduate School and all applicable graduate program requirements that govern the individual program of study. Registration for the newly admitted graduate student seeking a certificate or degree begins with a visit to the student's academic advisor in the graduate program to which the student has been admitted. There the student will obtain information about specific certificate or degree requirements for satisfactory progress that supplement those of the Graduate School. The student should consult the *Schedule of Classes*, and should develop an individual program of study and research in consultation with his or her graduate advisor. Students admitted as Non-Degree Seeking Students may seek advice from the Graduate School , Graduate Directors, or from appropriate faculty members. Petitions for waivers of regulations of graduate degree requirements or for appeals of decisions of graduate program faculty or administrators should be directed to the Dean of the Graduate School, 2125 Lee Building.

Academic Integrity

The University is an intellectual community. Its fundamental purpose is the creation and dissemination of knowledge. Like all other communities, the University can function properly only if its members adhere to clearly established goals and values. Essential to the fundamental

purpose of the University is the commitment to the principles of truth and academic honesty. The Code of Academic Integrity is designed to ensure that the principle of academic honesty is upheld. While all members of the University community share this responsibility, The Code of Academic Integrity is designed so that special responsibility for upholding the principle of academic honesty lies with students.

Honor Pledge

On every examination, paper or other academic exercise not specifically exempted by the instructor, the student will write by hand and sign the following pledge:

I pledge on my honor that I have not given or received any unauthorized assistance on this examination.

Failure to sign the pledge is not an honors offense, but neither is it a defense in case of violation of this Code. Students who do not sign the pledge will be given the opportunity to do so. Refusal to sign must be explained to the instructor. Signing or non-signing of the pledge will not be considered in grading or judicial procedures. Material submitted electronically should contain the pledge; submission implies signing the pledge.

On examinations, no assistance is authorized unless given by or expressly allowed by the instructor. On other assignments, the pledge means that the assignment has been done without academic dishonesty, as defined in the Code of Academic Integrity, available online.

The pledge is a reminder that at the University of Maryland students carry primary responsibility for academic integrity because the meaningfulness of their degrees depends on it. Faculty are urged to emphasize the importance of academic honesty and of the pledge as its symbol.

Penalties for Violations of Academic Integrity

Students who are found to have falsified, fabricated, or plagiarized in any context, such as course work, laboratory research, archival research, or thesis / dissertation writing--will be referred to the Office of Student Conduct. The Office of Student Conduct has some discretion in determining penalties for violations of the University's standards of academic integrity, but the normal sanction for a graduate student found responsible for a violation of academic integrity will be dismissal (suspension or expulsion) from the University.

To review the whole policy on academic integrity, see the University of Maryland Code of Academic Integrity. The Code was amended on November 7, 2014.

Academic Record (Transcript)

A graduate student's academic record (transcript) is intended to serve as a complete history of the student's academic progress at the University of Maryland. Under no circumstances will academic records be altered because of dissatisfaction with a grade or other academic accomplishment.

Grade Point Average Computation

The A+ and A is calculated at 4 quality points, A- at 3.7 quality points, B+ at 3.3 quality points, B at 3 quality points, B- at 2.7 quality points, C+ at 2.3 quality points, C at 2 quality points, and C- at 1.7 quality points. The grades of D+, D, D-, F, and I receive no quality points. Students do not earn credit toward the degree for courses in which they receive a grade of D+, D, D-, or F. For graduate students, all courses taken that are numbered 400 and above (except 500-level courses, those numbered 799, 898, or 899, and those graded with an S) will be used in the calculation of the grade point average. A student may repeat a course in an effort to earn a better grade. Whether higher or lower, the most recent grade will be used in computing the grade point average. Grades for graduate students remain as part of the student's permanent record. Changes in previously recorded grades may be made if made within one term (semester or 12-week term) from original posting of the grade and if the original instructor certifies that an actual mistake was made in determining or recording the grade. The change must be approved by the department chair and the Dean of the Graduate School. Graduate credit transferred from another institution will not be included in the calculation of the grade point average.

Criteria for Courses to be Accepted for Graduate Credit

Any courses, workshops or seminars that take place in a span of time less than a normal academic term (semester or summer session or 12-week) and offering graduate credit to the participants must meet the following criteria:

- There must be 15 "contact hours" per graduate credit.
    - Lectures: 50 minutes of lecture are equivalent to 1 contact hour.
    - Non-lecture contact (laboratories, workshops, discussion and problem-working sessions, etc.): One two-hour or three-hour session is equivalent to one contact hour.
- No more than three "contact hours" per day will be permitted. (Three "contact hours" are equivalent to 0.2 credits).
- Credit may be accumulated at the rate of no more than one credit per week.
- Courses numbered at the 100-, 200-, 300, and 500-level are ineligible for graduate credit. 400 level classes are eligible for graduate credit provided they were not used in fulfillment of an undergraduate degree requirement.

Credit by Examination

Credit by examination will be awarded upon successful completion of a formal examination (typically written) at a normal standard for examinations within the department/program. The examination must be approved by a committee composed of the examiner plus two Full Members of the Graduate Faculty. A copy of the examination, the student's answers, and the names of the examiner and the approving faculty member must be placed in the student's file in the department/program.

Normally, credit by examination is not available for 600 level and higher courses. The maximum number of credits by examination that can be applied to a master's degree is 12 for a non-thesis

master's degree and six for the thesis option. The graduate program in which the student is enrolled may establish a limit on the number of credits that may be earned in this manner. Information on fees for Credit by Examination is available from the Registrar.

Incomplete Grades

An incomplete is a mark that an instructor may award to a student whose work in a course has been qualitatively satisfactory, but who is unable to complete some portion of the work required *because of illness or other circumstance beyond the student's control* . In awarding the mark of "I" for graduate courses other than 799 and 899, instructors must fill out an "Incomplete Contract for Graduate Students." The contract will specify the work remaining to be completed, the date by which the work must be completed, and the letter grade that will replace the incomplete if the work is not completed by the date specified. It must be signed by the instructor and the student and maintained by the department offering the course. The student is responsible for providing a copy of the contract to the director of graduate studies in his or her program. All courses must receive a grade by the time the stduent graduates.

The mark of incomplete in 500-, 600-, 700-, and 800-level courses will automatically roll-over to letter grades if the work is not completed by the specified date. Students are expected to complete courses in which they have received an "I" by a date no more than twelve months from the beginning of the term (semester or 12-week) in which the course was taken or by date of graduation. A course is considered complete in the semester that the contract is fulfilled The mark of incomplete in 400-level courses will be governed by the rules for awarding incompletes to undergraduate students, including the provision of automatically converting an "I" to a letter grade.

Advisors should stay current with their students in urging completion of incomplete grades, and programs should review the status of incompletes in their annual reviews of students' progress toward their degrees. Students will remain in good standing despite marks of incomplete if the courses are not required for their degrees. For courses required for graduation, students will be considered to be making satisfactory progress only if they fulfill the conditions of any outstanding incomplete contracts in a timely manner. An "I" can remain in place on a student's transcript for a maximum of one year.

Departments and programs may specify the maximum number of incomplete credits students may carry, exclusive of credits in 799 and 899. For graduate courses 799 and 899, the grade of I(ncomplete) must be assigned until the student has completed the thesis/dissertation. Upon successful completion of all degree requirements and the award of the degree, all Incompletes for 799 and 899 will automatically be changed to S, unless the advisor has provided another grade. It is the responsibility of the instructor or department chair concerned to submit the grade promptly upon completion of the conditions of the Incomplete contract. If the instructor is unavailable, the department chair, upon request by the student, will make appropriate arrangements for the student to complete the course requirements.

Transfer of Credit

All graduate study credits offered as transfer credit must meet the following criteria:

- No more than six credit hours of graduate work may be transferred from another institution, unless the program has special approval by the Graduate Council. When changing programs within the University of Maryland, the student may request inclusion of credits earned at the University of Maryland. When moving from non-degree to degree-seeking status, Non-Degree Seeking Students may transfer up to nine (9) graduate credits to the degree program (students admitted as non-degree seeking prior to Fall Term 2017 may transfer up to twelve (12) graduate credits to the degree program), subject to the approval of the Graduate Program.
- The advisor and Graduate Director will need to certify that transfer courses are applicable to the student's program and, for non-University of Maryland courses, that the courses have been revalidated.
- Credit must have been granted by a regionally accredited U.S. institution or foreign university. If the latter, evaluation by the staff of the International Education Services and the Graduate School is required.
- The courses must be graduate level and have been taken for graduate credit at the original institution.
- The student must have earned a grade of "B-" or better in the course.
- The credit must not have been used to satisfy the requirements for any other degree.
- The student must furnish an official transcript to the Graduate School.
- Transfer work satisfies only the 400-level requirements for the master's degree and does not apply to the upper-level requirements.
- The transfer course work must have been taken within seven years of the award of a University of Maryland master's degree for which the student is currently enrolled (all other course work must be taken within five years of the award of master's degree.)

A student seeking acceptance of transfer credit is advised to submit the necessary transcripts and certification of program approval to the Graduate School as promptly as possible for its review and decision. It should be noted that programs may impose more stringent requirements and time limitations concerning the transfer of credits. In such cases the Graduate School must be notified accordingly. A form for Transfer or Inclusion of Credit is available online on the Graduate School's Forms webpage.

Satisfactory Progress

The admission of all graduate students is continued at the discretion of the Graduate Director of the program and the Dean of the Graduate School, consistent with the policies and practices of the Graduate School and graduate program. A student must make satisfactory progress in meeting programmatic requirements, must demonstrate the ability to succeed in his or her course of studies or research, and must attain performance minima specified by the graduate program in all or in particular courses; otherwise his or her enrollment will be terminated. Determinations of satisfactory progress occur at the graduate program level. Please contact the Graduate Director for conditions for satisfactory progress.

Graduate Student Parental Accommodation Policy

The University of Maryland Graduate Student Parental Accommodation Policy provides a period of up to six (6) weeks during which new parents may postpone completion of academic requirements. It is intended to provide graduate students with an opportunity to integrate the challenges of new parenthood with the demands of graduate-level training, scholarship, and research. In addition to providing support to young families, this policy seeks to reduce attrition and improve time to degree for students who become parents.

The Parental Accommodation Policy is not a leave of absence. This policy allows students to maintain status as full-time, registered graduate students, and thus be eligible for the rights and privileges of registered students (e.g., access to University resources) while adjusting to their new familial obligations.

During this parental accommodation period, eligible students will continue to be enrolled as fulltime graduate students and will continue to pay tuition and fees. Students also will be expected to keep the lines of communication with their departments open and demonstrate to their advisors that they are academically engaged and making progress in coursework and research, though perhaps at a slower pace.

ELIGIBILITY: To be eligible to apply for the benefits of the Parental Accommodation Policy, a new parent must (1) have been enrolled full-time for at least one full semester in a graduate program at the University, (2) be enrolled full-time at the time of application, (3) be in good academic standing, and (4) be making satisfactory progress toward degree. Any parent (regardless of gender) is eligible to apply.

In the event that both parents are eligible, each is individually entitled to a Parental Accommodation period of up to six (6) weeks. This Parental Accommodation period may be taken concurrently with or consecutively to the Parental Accommodation period taken by the other parent, with or without some overlap. The total combined Parental Accommodation period for both parents, however, may not exceed 12 weeks and must conclude 12 weeks following the child's birth or adoption.

ACCOMMODATION: Approval of a student's application for a period of Parental Accommodation allows the student, assuming the prior agreement of instructors, advisor, and academic program, to modify deadlines and academic expectations to accommodate the student's new parental responsibilities. Students may be able to postpone completion of course assignments, examinations, and other academic requirements for a period of up to six (6) weeks. Students who will be enrolled in courses during the accommodation period must meet with their instructors to develop a written plan as to how they will satisfactorily complete the course(s). These plans must be approved and signed by the instructor(s) and submitted as part of the Parental Accommodation Application form. At the end of the accommodation period, students are expected to return to graduate study and resume progress toward completion of their degree. Deadlines with regard to time to degree, time to candidacy, time to comprehensive or qualifying exams, etc. will be extended one semester per childbirth or adoption, upon the request of the student. The total additional time granted for the extension of any deadlines as a result of the student's use of the Parental Accommodation Policy, however, cannot exceed a maximum period

of one (1) year, regardless of the number of births or adoptions, or the number of times the student invokes the Parental Accommodation Policy.

The period of Parental Accommodation begins immediately upon the birth or adoption; must be taken in a consecutive block of time; and cannot extend beyond six (6) weeks. The student may not divide the accommodation period into separate periods or defer the accommodation period beyond this time limit. In the event of simultaneous multiple births or adoptions, the maximum Parental Accommodation period for which a student is eligible with respect to that event remains six (6) weeks.

APPLICATION: At least eight (8) weeks prior to the anticipated birth or adoption, students must submit a written application for Parental Accommodation signed by the Faculty Advisor, Director of Graduate Studies, and the Chair of their academic department, to the Graduate School. (In unusual or extraordinary circumstances, the Graduate School may accept applications with less than eight week's notice.)

Written plans to complete coursework, signed by the student and the instructor, must be provided for each course in which the student will be enrolled during the accommodation period. The discretion to provide an accommodation that allows a student to be away from the classroom for six weeks rests with the individual course instructor. Faculty are strongly encouraged to work with students to develop an accommodation that permits the student to fulfill academic coursework requirements while benefitting from a period of parental accommodation, and that also maintains fairness with regard to other students. In some cases such an accommodation may not be feasible. In such cases, faculty should provide a written explanation to the department's Director of Graduate Studies as to why the accommodation is not possible, and students should adjust their class schedules accordingly.

The Dean of the Graduate School will review the request and notify the student and the student's academic program if the request for a period of Parental Accommodation has been approved. The Graduate School will coordinate with academic programs to make appropriate adjustments to the student's deadlines and records. Retroactive requests will not be considered. A copy of the application form is attached.

International students should discuss plans with the Office of International Students & Scholar Services as soon as possible in order to identify and address proactively any individual or unique visa issues and/or to consider the latest applicable regulations. The intent of this policy is to permit all students to maintain their status as full-time, enrolled students during this period of accommodation. Medical complications, prior to or following the birth, are not covered by this policy. If a student is not able to return at the end of the period of accommodation, s/he should consider applying for a Leave of Absence. See the Graduate School's Registration Policies for more information.

Good Standing

In order to maintain good academic standing, every graduate student must maintain a cumulative grade point average (GPA) of 3.0 for all courses taken at the University.

Academic Probation and Dismissal

A student whose cumulative grade point average falls below 3.0 will be placed on academic probation by the Graduate School. When a student is placed on probation, the Graduate School will notify both the student and the Graduate Director of the student's program. Permission of the academic advisor and the Graduate Director will be required for a student on probation to register for courses. Probation will be lifted when the student achieves a cumulative GPA of 3.0.

A student whose cumulative grade point average falls below 3.0 will not be placed on probation until s/he completes 12 credits or two terms (semesters or 12-week), whichever comes first. A student on probation who has completed fewer than 15 credits must raise the GPA to 3.0 or above by the end of the term (semester or 12-week) in which the student completes 15 credit hours or be dismissed from the Graduate School. A student who has completed 16 or more hours of course work and whose cumulative GPA falls below 3.0 will be placed on probation and will have one term (semester or 12-week) in which to raise his or her GPA to a 3.0 or be dismissed from the Graduate School.

Time Limitations

Time Limitations for Master's Degrees and Certificates

With the exception of the six credit hours of graduate level course credits applicable for possible transfer to the master's degree and certificate programs, all requirements for the master's degree or graduate certificate must be completed within a five-year period. Time taken for an approved Leave of Absence for Childbearing, Adoption, Illness or Dependent Care does not count toward this five-year limit.

Time Limitations for Doctoral Degrees

Students must complete the entire program for the doctoral degree, including the dissertation and final examination, during a four-year period after admission to candidacy, but no later than nine years after admission to the doctoral program. Students must be advanced to candidacy within five years of admission to the doctoral program. Under certain circumstances, time extensions may be granted by the Graduate School as outlined below. Admission to the degree program terminates if the requirements are not completed in the time specified. Time taken for an approved Leave of Absence for Childbearing, Adoption, Illness or Dependent Care is not counted in these time limitations.

Time Extensions

Master's Degree and Certificate Students

A student who has failed to complete all requirements by the prescribed deadlines may petition his or her graduate program for a one-year extension of time in which to complete the outstanding requirements. This extension may be granted by the graduate program, which must then notify the

Graduate School in writing of its decision. The Graduate School will confirm this decision in writing to the student.

A student who has failed to complete all requirements for the degree following the granting of an initial time extension by his or her graduate program, and who wishes to pursue the degree, must seek an additional extension by petitioning the graduate program. If the graduate program supports the request, the request must be forwarded to the Graduate School for review with a letter of support from the Graduate Director that includes a statement that the graduate program has approved the request. Departmental approval may be either a vote of the department as a whole or of a committee designated to deal with such matters, such as the Graduate Committee. The letter must include a time table listing specific goals to be accomplished at various points during the extension period. The letter should also include a request for revalidation of courses that will be more than five years old at the time of graduation. Typically, this extension will be for a maximum of one year. The Graduate School 's decision will be communicated in writing to the petitioner and a copy will be sent to the student's graduate program.

Doctoral Students

Extensions of time for doctoral students must be requested from the Graduate School by the doctoral program. The first request for an extension of the deadline for admission to candidacy or completion of the doctoral dissertation requires a letter of support from the Graduate Director. The letter must include a timetable listing specific goals to be accomplished at various points during the extension period. Normally, the extension will be for a maximum of one year.

The request for a second extension requires a letter of support from the Graduate Director that includes a statement that the graduate program has approved the request. Departmental approval may be either a vote of the department as a whole or of a committee designated to deal with such matters, such as the Graduate Committee. The letter must include a timetable that lists specific goals to be accomplished at various points during the extension period. Typically this extension will be for a maximum of one year.

Requests for a third extension will be honored **only in rare instances** when serious and unforeseen circumstances that are not covered under the Leave of Absence for Childbearing, Adoption, Illness or Dependent Care policy have interfered with the student's normal progress toward the degree. The request for a third extension requires a letter of support from the Graduate Director that includes a statement that the program has approved the request. The letter must include a timetable listing specific goals to be accomplished at various times during the extension period. Typically, this extension will be for a maximum of one year. The third extension is the final extension. **Additional extensions will not be approved by the Graduate School.**

In the event that a graduate program wishes to continue a student in the program beyond a third extension, the following procedures must be followed:

- The student must apply to be readmitted to the graduate program. The application must be accompanied by a letter of support from the Graduate Director, which indicates the approval of the program for the readmission.

- The Graduate Director's letter must include a timetable listing specific goals to be accomplished at various points during the re-admission period.
- Doctoral students must be advanced to candidacy within one year of re-admission. No extensions will be given for this deadline.
- Doctoral students who have previously advanced to candidacy and who apply for readmission and re-advancement to candidacy must demonstrate that their knowledge is current and consistent with those standards that are in effect in the graduate program at the time that the re-advancement to candidacy is made. The program will determine what constitutes an acceptable level of current knowledge on a case-by-case basis and must include this determination in its recommendation for readmission. This could mean that the student will be required to retake the comprehensive examination or otherwise demonstrate that the student's knowledge is consistent with current standards of the graduate program.
- Re-admitted students who have been advanced to candidacy will be allowed four years to complete the dissertation. No extensions will be given after this deadline.

Graduate School Requirements Applicable to all Master's Degree Programs

Approved Program

The entire course of study undertaken for any master's degree must constitute a unified, coherent program that is approved by the student's advisor and Graduate Director and meets Graduate School requirements.

Credit Hours

A minimum of thirty credit hours in courses acceptable for credit towards a graduate degree is required (some degree programs require more than 30 credits). For a master's degree with the thesis option, six of the 30 credit hours must be thesis research credits (799). For the master's degree with the non-thesis option, a minimum of 18 credit hours in courses numbered 600 and above is required, as well as one or more scholarly papers, some portion of which must be written. In many cases, successful completion of comprehensive examinations is required by the program.

Coursework Level

The graduate program must include at least 12 hours of course work at the 600 level or higher; no fewer than 12 hours of course work credit must be earned in the major subject approved by the graduate program in which the student is enrolled.

Prerequisites and Inclusion of Credit

If the student is inadequately prepared for the required graduate courses, additional courses may be deemed necessary; such courses will not be considered part of the student's approved program of study.

Single Credit Application

Credits to be applied to a student's program for a master's degree cannot have been used to satisfy any other previously earned degrees (see policies governing the applicability of previously taken courses to University of Maryland degrees).

Graduate School Requirements for the Degrees of Master of Arts and Master of Science

A thesis must be submitted for the Master of Arts or Master of Science degrees except for those programs for which a non-thesis option has been approved by the Graduate Council. Approval of the thesis is the responsibility of an Examining Committee appointed by the Dean of the Graduate School on the recommendation of the student's advisor. The advisor is normally the chairperson of the committee, and the remaining members of the committee are members of the graduate faculty who are familiar with the student's program of study. The chairperson and the candidate are informed of the membership of the Examining Committee by the Graduate School staff on behalf of the Dean of the Graduate School.

Research Assurances

Human Subject Research

Everyone at the University of Maryland who is conducting research that involves human subjects must obtain approval in advance from the Institutional Review Board (IRB). The IRB is charged with approving the initiation of research involving human subjects and conducts periodic reviews of that research to ensure that all projects comply with Federal regulations. These regulations are strict and the Graduate School urges all graduate students to consult with the IRB before beginning any research on living subjects. For application forms and guidelines on such issues as research involving minors or prisoners, surveys, and the use of audio taping, videotaping, digital recordings and photographs, please see the Institutional Review Board's website.

Other Research

If the thesis research involves the use of vertebrate animals, animal use protocols must be approved in advance by the Animal Care and Use Committee. If the thesis research involves hazardous materials, either biological or chemical, or recombinant RNA/DNA, the research must be approved by the appropriate University committee. These research assurances must be approved prior to the initiation of any thesis-related research, and the approvals must be provided to the Graduate School at the time the student submits the Nomination of Examining Committee form.

The Master's Thesis Examination

A final oral examination of the thesis will be held when the student has completed the thesis to the satisfaction of the student's advisor, all other requirements for the degree have been completed, and a 3.0 grade point average (computed in accordance with the regulations described under "Grades for Graduate students") has been earned.

Establishment of the Thesis Examining Committee. The Thesis Examining Committee is appointed by the Dean of the Graduate School, in accordance with the policies listed below:

- **Eligibility.** A student is eligible to be examined on a thesis if the student\: (a) has met all program requirements for a thesis examination, (b) is in good standing as a graduate student at the University, (c) is registered for at least one credit, (d) has a valid Graduate School-approved Thesis Examining Committee, (e) has at least a 3.0 grade point average, and (f) if this is the second examination, the examination has been approved by the Graduate School.
- **Thesis Examining Committee Membership.** The Committee will include a minimum of three members of the Graduate Faculty, at least two of whom will be Full Members. The Chair of the Committee normally will be the student's advisor, who will be a Full or Adjunct Member of the Graduate Faculty, or who has been granted an exception to the policy by the Dean of the Graduate School.
- **Membership on a Thesis Examining Committee. R**equires nomination by the student's advisor and Graduate Director in the student's graduate program, and approval by the Dean of the Graduate School . The nomination of a Thesis Examining Committee should be provided to the Graduate School at least six weeks before the date of the expected thesis examination. The thesis examination cannot be held until the Graduate School approves the composition of the Thesis Examining Committee. Furthermore, if the Graduate Faculty status of any member of an approved Thesis Examining Committee changes, the approval of the Thesis Examining Committee may be voided, and a new Committee nomination form will be required for approval by the Graduate School.
- **Chair.** The Thesis Examining Committee will have as chair the student's advisor, who must be a Full or Adjunct Member of the Graduate Faculty or, by special permission, has been otherwise appointed by the Dean of the Graduate School. Thesis Examining Committees may have co-chairs upon the written recommendation of the Graduate Director and with the approval of the Dean of the Graduate School.

Procedures for the Oral Examination

Oral Examination Requirement. Each master's thesis student must defend orally his or her master's thesis as a requirement in partial fulfillment of the master's degree (an additional comprehensive written examination may be required at the option of the program.)

- **Committee Preparation.** The members of the Thesis Examining Committee must receive the thesis at least seven working days before the scheduled examination. Should the Thesis Examining Committee deem it reasonable and appropriate, it may require submission of the thesis more than seven working days in advance of the examination.
- **Attendance at the Examination.** Oral examinations must be attended by all members of the student's officially established Thesis Examining Committee as approved by the Dean

of the Graduate School. All examinations must be open to members of University of Maryland Graduate Faculty. Programs may wish routinely to open thesis examinations to a broader audience. In such cases, program policies must be established, recorded, and made available to all master's students. Should a last-minute change in the constitution of the Thesis Examining Committee be required, the change must be approved by the Dean of the Graduate School in consultation with the program's Graduate Director and the chair of the student's Thesis Examining Committee.

- **Remote Participation in Examinations**. The Graduate School policy is that all members of a Thesis Examining Committee must be physically present in the examination room during the entire defense and during the committee's private deliberations following the examination. Participation by telephone is not permitted under any circumstances. While re-affirming this policy, the Graduate Council approved a policy to permit remote participation by video teleconferencing under the following circumstances:

    - Permission to conduct a remote-participation defense must be obtained by the thesis chair from the Graduate School in advance. In making this request, the chair must indicate in writing that he or she has read the rules for a remote defense listed below.
    - A competent video technician must be present at both the University site and the remote location for the entire duration of the defense in the event that technical difficulties arise.
    - Only one remote site may be used during the defense.
    - The candidate and the committee chair must both be present in the examination room. Neither may be at the remote site.
    - The department/program must pay for all of the costs of the video teleconferencing arrangements.
- **Location of the Examination.** Oral examinations of theses must be held in University facilities that are readily accessible to all members of the Thesis Examining Committee and others attending the examination. The chair of the Thesis Examining Committee selects the time and place for the examination and notifies the other members of the committee and the candidate.
- **Emergency Substitutions**. The Graduate School is aware that last-minute emergencies can prevent a committee member from attending a scheduled thesis examination. We are prepared to work with the thesis supervisor and/or Graduate Director to make last-minute substitutions in committee membership to allow the defense to take place as scheduled. Please follow these steps to assure a smooth substitution.

    - The request must be sent in writing. Fax or e-mail requests are acceptable. A telephone call to the Dean of the Graduate School to alert the Dean that the emergency request is coming will facilitate the process.
    - The proposed substitute must be a member of the Graduate Faculty consistent with the rules for committee membership. Thus, if a Full Member could not attend, the substitution of an Adjunct or Special Member of the Graduate Faculty would not be acceptable.

- Once the written request has been received, the substitution will be made, usually within the hour, provided that the revised committee meets the requirements for committee membership.
- When the substitution has been made, a written confirmation, in the same format as the request was received (fax or e-mail), will be sent out, along with a telephone confirmation. The substitution is not official, however, until the written confirmation has been received in the department or program.
- A defense that is held with one or more substitute members on the committee, but without prior written confirmation from the Graduate School that the substitution(s) have been approved, will be voided and the defense will have to be repeated.
- A copy of the written request and the written confirmation will be placed in the student's file for future reference.

- **Invalidation of the Examination.** The Dean may void any examination not carried out in accordance with the procedures and policies of the Graduate School. In addition, upon the recommendation of the Thesis Examining Committee or any member thereof, the Dean of the Graduate School may rule an oral examination to be null and void.
- **Conclusion of the Examination.** After the oral examination, the student and any others who are not members of the Thesis Examining Committee will be asked to leave the room and the Thesis Examining Committee will discuss whether or not the thesis (including its examination) has been satisfactory.

  The Committee has the following options:

  - To accept the thesis without any recommended changes and sign the Report of Examining Committee.
  - To accept the thesis with recommendations for changes and, except for the chair, sign the Report of Examining Committee. The chair will check the thesis and, upon his or her approval, sign the Report of Examining Committee.
  - To recommend revisions to the thesis and not sign the Report of Examining Committee until the student has made the changes and submitted the revised thesis for the Thesis Examining Committee's approval. The Thesis Examining Committee members sign the Report of Examining Committee when they approve the revised thesis.
  - To recommend revisions and convene a second meeting of the Thesis Examining Committee to review the thesis and complete the student's examination.
  - To rule the thesis (including its examination) unsatisfactory. In that circumstance, the student fails.
- Following the examination, the chair must inform the student of the outcome of the examination. The chair signs the Report of the Examining Committee indicating which of the above alternatives has been adopted. A copy of this statement is to be included in the student's file at the graduate program office, and a copy is given to the student.
- **Passage or Failure.** The student passes if all members of the Thesis Examining Committee accept the thesis (including its examination) as satisfactory. One or more negative votes constitute a failure of the candidate to meet the thesis requirement. In cases of failure, the Thesis Examining Committee must specify in detail and in writing the

nature of the deficiencies in the thesis and/or the oral performance that led to failure. This statement is to be submitted to the program's Graduate Director, the Dean of the Graduate School , and the student. A second examination may be permitted if the student will be in good standing at the time of the proposed second examination. A second examination requires the approval of the program's Graduate Director and the Dean of the Graduate School . If the student fails this second examination, or if a second examination is not permitted, the student's admission to the graduate program is terminated.

- **The Decision to Accept the Examination as Satisfactory Must Be Unanimous**. Students may present themselves for examination only twice. The report of the committee, signed by each member, must be submitted to the Dean of the Graduate School no later than the appropriate date listed in the *Schedule of Classes* if the student is to receive a diploma at the Commencement ceremony for the semester in which the examination is held.

Submission and Publication of the Thesis

Theses are to be submitted to the Graduate School in electronic format after final approval of the document by the Thesis Examining Committee. See the University of Maryland Thesis and Dissertation Style Guide for the details of this process.

Theses submitted to the University through the ETD process will also be deposited in the UM Library's online electronic archive, DRUM (Digital Repository at the University of Maryland). This is a free public archive of academic work by University faculty and graduate students. The submission of the thesis to the University in fulfillment of degree requirements grants the University the one-time, non-exclusive right to publish the document on DRUM.

The University's Rights

The University of Maryland retains non-exclusive distribution, reproduction, and archival rights to doctoral dissertations submitted to the Graduate Faculty in fulfillment of requirements for a graduate degree. Such rights entitle the University of Maryland to reproduce, archive, and distribute dissertations, in whole or in part, in and from an electronic format, as it sees fit. Distribution is subject to a release date stipulated by the student and approved by the University.

The Student's Rights and Responsibilities

As the owner of copyright in the thesis or dissertation, students have the exclusive right to reproduce, distribute, make derivative works based on, publicly perform and display their work, and to authorize others to exercise some or all of those rights. As a condition of graduation, each student's thesis or dissertation must be published. When the student submits his or her work to the Graduate School , they will be given several options regarding access to their document via ProQuest's *Digital Dissertations* and DRUM , the Digital Repository at the University of Maryland . The student's options include:

Making the thesis or dissertation available via ProQuest and DRUM as soon as it is received

The abstract and full text of your work will be present in ProQuest's *Digital Dissertations* for purchase, and will be both freely available and searchable online via DRUM.

Restricting online publication of the thesis or dissertation for either 1 or 6 years

Students may place an embargo (a restriction) on electronic access to your document through ProQuest's *Digital Dissertations* and DRUM if there is legitimate reason to do so. Patents or future publication, for example, might be jeopardized by providing unrestricted access (see below). Should a student elect to restrict online publication of his or her work, a description of the research, including the student's name, the document's title, the advisor's name, and the abstract will be available via ProQuest and DRUM, but the actual electronic file will be unavailable for viewing or download until the selected embargo period has passed.

Restrict online publication of the thesis or dissertation indefinitely

Students may, in rare circumstances, place an indefinite embargo on access to their work. In this case, a description of the thesis or dissertation, including the student's name, the work's title, the advisor's name, and the abstract will be available via ProQuest's *Digital Dissertations* and DRUM, but the actual electronic file will be embargoed indefinitely. This option requires the written approval of the Dean of the Graduate School . This restriction can be lifted at the request of the author at a later date.

These choices only affect the *electronic* distribution of the thesis or dissertation document. A non-circulating copy of each University of Maryland thesis or dissertation will be available for consultation in Hornbake Library's Maryland Room, and print copies of the document will be made available upon request to researchers through inter-library loan.

Inclusion of One's Own Previously Published Materials in a Thesis or Dissertation

A graduate student may, upon the recommendation of the thesis director, and with the endorsement of the home graduate program Graduate Director, include his or her own published works as part of the final thesis. Appropriate citations within the thesis, including where the work was previously published, are required. All such materials must be produced in standard thesis format.

It is recognized that a graduate student may co-author work with faculty and colleagues that should be included in a thesis. In such an event, a letter should be sent to the Dean of the Graduate School certifying that the student's Examining Committee has determined that the student made a substantial contribution to that work. This letter should also note that inclusion of the work has the approval of the thesis advisor and the Graduate Director. The format of such inclusions must conform to the standard thesis format. A foreword to the thesis, as approved by the Examining Committee, must state that the student made substantial contributions to the relevant aspects of the jointly authored work included in the thesis.

Inclusion of Copyrighted Materials in a Thesis or Dissertation

Students are responsible for ensuring that their thesis or dissertation complies with copyright law. Copyright law gives the owner of a work exclusive rights to reproduce, distribute, display or perform the work publicly and to modify or adapt the work and the exclusive right to grant others permission to exercise any of those rights in the work, *subject to certain exceptions*. Students are responsible for determining if their use of another's work requires his or her permission or falls within one of the exceptions. Permission is not required to use a work when:

Students are responsible for ensuring that their thesis or dissertation complies with copyright law. Copyright law gives the owner of a work exclusive rights to reproduce, distribute, display or perform the work publicly and to modify or adapt the work and the exclusive right to grant others permission to exercise any of those rights in the work, *subject to certain exceptions* . Students are responsible for determining if their use of another's work requires his or her permission or falls within one of the exceptions. Permission is not required to use a work when:

- The work never qualified for copyright because, for example, it lacked originality or was created by Federal employees in the scope of employment.
- Copyright in the work has expired.
- The use qualifies as a fair use.

Students should consult the following documents for guidance on complying with copyright law:

Did the work ever qualify for copyright protection?

- Library of Congress, Copyright Basics
- Library of Congress, Ideas, Methods, or Systems
- Library of Congress, Blank Forms and Other Works Not Protected by Copyright and Copyright Protection Not Available for Names, Titles, or Short Phrases

Has copyright in the work expired?

- Library of Congress, Duration of Copyright
- University of North Carolina, When U.S. Works Pass Into the Public Domain
- Cornell University, Copyright Term and the Public Domain in the United States

Is the proposed use a "fair use"?

- Library of Congress, Can I Use Someone Else's Work?
- University of Washington Copyright Connection, Fair Use

Non-Thesis Option

For programs offering a non-thesis option, please see the individual program's website.

Professional Master's Degrees

The University of Maryland offers a variety of Professional Master's Degree Programs geared towards working adults. For information about any one of the Professional Master's Program, please visit the graduate programs page.

Graduate School Requirements Applicable to all Doctoral Degrees

Credit Requirements

The Graduate School requires that every student seeking the Ph.D. or D.M.A. satisfactorily complete a minimum of 12 semester hours of dissertation credits (899); a student seeking an Ed.D. must satisfactorily complete a minimum of six semester hours of dissertation credits (899). The number of research and other credit hours required in the program varies with the degree and program in question.

Advancement to Candidacy

Preliminary examinations, or such other substantial tests as the graduate programs may elect, are prerequisites for advancement to candidacy. A student must be admitted to candidacy for the doctorate within five years after admission to the doctoral program and at least six months before the date on which the degree will be conferred. It is the responsibility of the student to submit an application for admission to candidacy when all the requirements for candidacy have been fulfilled. Applications for admission to candidacy are made in duplicate by the student and submitted to the graduate program for further action and transmission to the Graduate School . Application forms may be obtained at the Graduate School, Room 2123, Lee Building, or on the web. Paperwork must be received by the Graduate School prior to the 25th of the month in order for the advancement to become effective the first day of the following month.

Doctoral candidates are automatically registered for six (6) credits of Doctoral Dissertation Research (899), for which they pay the flat candidacy tuition.

Research Assurances

Human Subject Research

Everyone at the University of Maryland who is conducting research that involves human subjects must obtain approval in advance from the Institutional Review Board (IRB). The IRB is charged with approving the initiation of research involving human subjects and conducts periodic reviews of that research to ensure that all projects comply with Federal regulations. These regulations are strict, and the Graduate School urges all graduate students to consult with the IRB before beginning any research involving living subjects. For application forms and guidelines on such issues as research involving minors or prisoners, surveys, and the use of audio taping, videotaping, digital recordings, and photographs, please see the Institutional Review Board's website.

Other Research

If the dissertation research involves the use of vertebrate animals, animal use protocols must be approved in advance by the Animal Care and Use Committee. If the dissertation research involves hazardous materials, either biological or chemical, or recombinant RNA/DNA, the research must be approved by the appropriate University committee. These research assurances must be approved prior to the initiation of any dissertation-related research, and the approvals must be provided to the Graduate School at the time the student submits the Nomination of Examining Committee form.

The Doctoral Dissertation and Examination

A dissertation is required of all candidates for a doctoral degree. The Graduate School has established the following procedures for the conduct of the doctoral dissertation examination.

- **The Dissertation.** The ability to do independent research must be demonstrated by an original dissertation on a topic approved by the graduate program in which the student is earning the degree.
- **Eligibility.** A student is eligible to defend a dissertation if the student (a) has advanced to candidacy, (b) has met all program requirements for a dissertation examination, (c) is in good standing as a graduate student at the University, (d) is registered for at least one credit, (e) has a valid Graduate School-approved Dissertation Examining Committee, and (f) if this is the second examination, the examination has been approved by the Graduate School.
- **Dissertation Examining Committee Membership.** The Committee must include a minimum of five members of the Graduate Faculty, at least three of whom must be Full Members. The Chair of the Committee normally will be the student's advisor, who will be a Full Member of the Graduate Faculty, or who has been granted an exception to the policy by the Dean of the Graduate School. Each Committee will have appointed to it a representative of the Dean of the Graduate School. The Dean's Representative may be one of the five voting members. Alternatively, the Dean's Representative may not be a voting member of the Committee. Whether the Dean's Representative votes or not is a decision made by the student, primary advisor and the Dean's Representative before the Dean's Representative is nominated for approval by the Dean of The Graduate School. In addition, the Dean will ensure that there are five voting members on the Committee. Therefore, Committees that have a non-voting Dean's Representative must have at least six members (five voting members and the non-voting Dean's Representative.)
- **Nomination of the Dissertation Examining Committee.** Membership on a Dissertation Examining Committee requires nomination by the student's advisor and the Graduate Director of the student's graduate program, and approval by the Dean of the Graduate School. The nomination of a Dissertation Examining Committee should be provided to the Graduate School at least six weeks before the date of the expected dissertation examination. The dissertation examination cannot be held until the Graduate School approves the composition of the Dissertation Examining Committee. Furthermore, if the Graduate Faculty status of any member of an approved Dissertation Examining Committee changes, the approval of the Dissertation Examining Committee may be void,

and a new Dissertation Examining Committee nomination form may be required to be approved by the Graduate School.

- **Chair.** Each Dissertation Examining Committee will have a chair, who must be a Full Member of the Graduate Faculty or, by special permission, has been otherwise appointed by the Dean of the Graduate School . Dissertation Examining Committees may be co-chaired upon written recommendation of the program's Graduate Director and with the approval of the Dean of the Graduate School; at least one of the co-chairs must be a Full Member of the University of Maryland Graduate Faculty.
- **Representative of the Dean of the Graduate School.** Each Dissertation Examining Committee will have appointed to it a representative of the Dean of the Graduate School. The Dean's Representative should have some background or interest related to the student's research. The Dean's Representative must be a tenured member of the Graduate Faculty at the University of Maryland. The Dean's Representative must be from another tenure home than the student's primary advisor, or co-advisor(s). In the case of multi-disciplinary programs, the Dean's Representative can be a member of the program, as long as they have a different tenure home from the primary advisor, co-advisor(s), or Doctoral Committee Chair (if the Doctoral Committee Chair is not a primary advisor).

  The person nominated to become the Dean's Representative may serve as a regular member of the student's Doctoral Graduate Committee from the time it is first convened. Alternatively, the person nominated to be the Dean's representative may be added to the Doctoral Graduate Committee at a later date and either take part in some Committee meetings including the qualifying examination, or only join as a Doctoral Dissertation Committee member for the final dissertation defense. In all cases, the Dean's Representative must be present for the full dissertation defense and serve to adjudicate the defense.
- **Special Members.** Individuals from outside the University of Maryland who have been approved for Special Membership in the Graduate Faculty may serve on Dissertation Examining Committees. These Special Members must be in addition to the required three Full Members of the University of Maryland Graduate Faculty. For procedures to nominate an individual for Special Membership, please refer to the section below on Graduate Faculty.
- **Service of former University of Maryland faculty members.** Graduate Faculty who terminate employment at University of Maryland (and who do not have emeritus status) retain their status as members of the Graduate Faculty for a twelve-month period following their termination. Thus, they may serve as members and chairs (but not as Dean's Representatives) of Dissertation Examining Committees during this twelve-month period if they are otherwise eligible. After that time, they may no longer serve as chairs of Dissertation Examining Committees, although, if granted the status of Special Members of the Graduate Faculty, they may serve as co-chairs.
- **Professors Emeriti and Associate Professors Emeriti** may serve on Dissertation Examining Committees provided they are members of the Graduate Faculty.

Open Dissertation Examination

The dissertation examination will consist of two parts:

- **Part 1 will be a public presentation by the candidate** on the main aspects of the research reported in the dissertation. During Part 1, questions from the audience to the candidate will be permitted. For questions from persons who are not members of the Dissertation Examining Committee, the Chair of the Dissertation Examining Committee will have discretion to decide whether such questions are germane to the topic of the dissertation and how much time will be allotted for the answers.
- **Part 2 will be a formal examination of the candidate** by the Dissertation Examination Committee. This part will be open only to the Dissertation Examination Committee, other members of the Graduate Faculty, and graduate students from the candidate's graduate program. During Part 2, only members of the Dissertation Examination Committee will be permitted to ask questions. Programs may vote to establish a policy to have Part 2 be open only to members of the Dissertation Examining Committee and members of the Graduate Faculty.
- **Attendance at the final discussion and vote** will be limited to the members of the Dissertation Examining Committee.
- **Announcements of the date, time, and location of the examination**, as well as the candidate's name and the dissertation title, will be disseminated five working days in advance to all members of the Graduate Faculty and graduate students within the graduate program in which the candidate's degree is to be awarded. Mass-distribution methods, such as e-mail, a faculty/student newsletter, or individual announcements are acceptable. Merely posting a paper notice on a corridor bulletin board will not constitute a sufficient announcement.
- Departments and graduate programs may petition the Dean of the Graduate School for exceptions to these policies.

Procedures for the Oral Dissertation Examination

- **Oral Examination Requirement.** Each doctoral candidate is required to defend orally his or her doctoral dissertation as a requirement in partial fulfillment of the doctoral degree.
- **Committee Preparation.** The members of the Dissertation Examining Committee must receive the dissertation at least ten working days before the scheduled examination. Should the Dissertation Examining Committee deem it reasonable and appropriate, it may require submission of the dissertation more than ten working days in advance of the examination.
- **Attendance at the Examination.** Oral examinations must be attended by all members of the student's officially established Dissertation Examining Committee as approved by the Dean of the Graduate School. All examinations must be open to all members of the University of Maryland Graduate Faculty. Programs may wish routinely to open dissertation examinations to a broader audience. In such cases, program policies must be established, recorded, and made available to all doctoral students. Should a last-minute change in the constitution of the Dissertation Examining Committee be required, the change must be approved by the Dean of the Graduate School in consultation with the Graduate Director of the student's graduate program and the chair of the student's Dissertation Examining Committee.
- **Location of the Examination.** Oral examinations must be held in University facilities that are readily accessible to all members of the Dissertation Examining Committee and others

attending the examination. The chair of the dissertation examining committee selects the time and place for the examination.

- **The Dean's Representative.** The Dean's Representative must be identified at the beginning of the examination. The responsibilities of the Dean's Representative include the following: ensuring that the procedures of the oral examination comply with those of the Graduate School (as described herein) and reporting to the Dean of the Graduate School any unusual problems experienced in the conduct of the examination.
- **Invalidation of the Examination.** The Dean of the Graduate School may void any examination not carried out in accordance with the procedures and policies of the Graduate School . In addition, upon recommendation of the Dean's Representative, the Dean may rule an oral examination to be null and void.
- **Emergency Substitution Procedure.** The Graduate School is aware that last-minute emergencies can prevent a committee member from attending a scheduled dissertation examination and will work with the chair of the examining committee and/or Graduate Director to make last-minute substitutions in committee membership to allow the examination to take place as scheduled.

    - The request must be sent in writing to the Dean of the Graduate School . Fax or e-mail requests are acceptable. A telephone call to the Graduate School explaining that an emergency request is coming will facilitate the process.
    - The proposed substitute must be a member of the Graduate Faculty consistent with the rules for committee membership. Thus, if the Dean's Representative (who must be a tenured faculty member) could not attend, the substitution of an untenured member of the Graduate Faculty would not be acceptable.
    - Once the written request has been received, the substitution will be made, usually within the hour, provided that the revised committee meets the requirements for committee membership.
    - When the substitution has been made, a written confirmation, in the same format as the request was received (fax or e-mail) will be sent out, along with a telephone confirmation. The substitution is not official, however, until the written confirmation has been received in the graduate program.
    - An examination that is held with one or more substitute members on the committee, but without prior written confirmation from the Graduate School that the substitution(s) have been approved, will be voided and the examination will have to be repeated.
    - A copy of the written request and the written confirmation must be placed in the student's file for future reference.
- **Remote Participation in a Dissertation Defense** All members of a Dissertation Examining Committee must be physically present in the examination room during the entire dissertation defense and during the committee's private deliberations following the examination. Participation by telephone is not permitted under any circumstances. Remote participation by video teleconferencing is permitted under the following circumstances:

    - Permission to conduct a remote-participation defense must be obtained by the dissertation chair from the Graduate School in advance. In making this request, the

chair must indicate in writing that he/she has read the rules for a remote defense listed below.
    - A competent video technician must be present at both the University site and the remote location for the entire duration of the defense in the event that technical difficulties arise.
    - Only one remote site may be used during the defense.
    - The candidate, the committee chair, and the Dean's Representative must all be present in the examination room. None of them may be at the remote site.
    - The program must pay for all of the costs of the video teleconferencing arrangements.
- **Student Presentation.** The student is permitted to present briefly a summary of the dissertation, emphasizing the important results and giving an explanation of the reasoning that led to the conclusions reached.
- **Opportunity for Questioning by Members of the Dissertation Examining Committee.** The chair invites questions in turn from each member of the Dissertation Examining Committee. The questioning may continue as long as the Dissertation Examining Committee feels that it is necessary and reasonable for the proper examination of the student.
- **Conclusion of the Examination.** After questioning has been completed, the student and any others who are not members of the Dissertation Examining Committee are asked to leave the room while the Dissertation Examining Committee discusses whether or not the dissertation and its defense are satisfactory. The Committee has the following options:

    - To accept the dissertation without any recommended changes and sign the Report of Examining Committee.
    - To accept the dissertation with recommendations for changes and, except for the chair, sign the Report of the Examining Committee. The chair will check that the changes to the dissertation have been made, and, upon his or her approval, sign the Report of Examining Committee.
    - To recommend revisions to the dissertation and not sign the Report of Examining Committee until the student has made the changes and submitted the revised dissertation for the Dissertation Examining Committee's approval. The Dissertation Examining Committee members sign the Report of Examining Committee if they approve the revised dissertation.
    - To recommend revisions and convene a second meeting of the Dissertation Examining Committee to review the dissertation and complete the student's examination.
    - To rule the dissertation (including its examination) unsatisfactory. In that circumstance, the student fails. Following the examination, the chair, in the presence of the Dean's Representative, must inform the student of the outcome of the examination. The chair and the Dean's Representative both sign a Report of the Examining Committee indicating which of the above alternatives has been adopted. A copy of this statement is to be included in the student's file at the graduate program office, and a copy is given to the student.
- **Passage or failure.** The student passes if one member refuses to sign the Report, but the other members of the Dissertation Examining Committee agree to sign, before or after the

approval of recommended changes. Two or more negative votes constitute a failure of the candidate to meet the dissertation requirement. In cases of failure, the Dissertation Examining Committee must specify in detail and in writing the nature of the deficiencies in the dissertation and/or the oral performance that led to failure. This statement is to be submitted to the program's Graduate Director, the Dean of the Graduate School, and the student. A second examination may be permitted if the student will be in good standing at the time of the proposed second examination. A second examination requires the approval of the program's Graduate Director and the Dean of the Graduate School . If the student fails this second examination, or if a second examination is not permitted, the student's admission to the graduate program is terminated.

Submission and Publication of the Dissertation

Dissertations are to be submitted to the Graduate School in electronic format after final approval of the dissertation by the Dissertation Examining Committee. See the *University of Maryland Electronic Thesis and Dissertation (ETD) website* or the University of Maryland Thesis and Dissertation Style Guide for the details of this process.

Dissertations submitted to the University through the ETD process will also be deposited in the UM Library's online electronic archive, DRUM (Digital Repository at the University of Maryland). This is a free public archive of academic work by University faculty and graduate students. The submission of the thesis to the University in fulfillment of degree requirements grants the University the one-time, non-exclusive right to publish the document on DRUM. The students' and University's rights regarding dissertation and thesis submission and publication are outlined below.

The University's Rights

The University of Maryland retains non-exclusive distribution, reproduction, and archival rights to doctoral dissertations submitted to the Graduate Faculty in fulfillment of requirements for a graduate degree. Such rights entitle the University of Maryland to reproduce, archive, and distribute dissertations, in whole or in part, in and from an electronic format, as it sees fit. Distribution is subject to a release date stipulated by the student and approved by the University.

The Student's Rights and Responsibilities

As the owner of copyright in the thesis or dissertation, students have the exclusive right to reproduce, distribute, make derivative works based on, publicly perform and display their work, and to authorize others to exercise some or all of those rights. As a condition of graduation, each student's thesis or dissertation must be published. When the student submits his or her work to the Graduate School, they will be given several options regarding access to their document via ProQuest's *Digital Dissertations* and DRUM, the Digital Repository at the University of Maryland. The student's options include:

- **Making the thesis or dissertation available via ProQuest and DRUM as soon as it is received** The abstract and full text of your work will be present in ProQuest's *Digital*

Dissertations for purchase, and will be both freely available and searchable online via DRUM.

- **Restrict online publication of the thesis or dissertation for either 1 or 6 years** Students may place an embargo (a restriction) on electronic access to your document through ProQuest's *Digital Dissertations* and DRUM if there is legitimate reason to do so. Patents or future publication, for example, might be jeopardized by providing unrestricted access (see below). Should a student elect to restrict online publication of his or her work, a description of the research, including the student's name, the document's title, the advisor's name, and the abstract will be available via ProQuest and DRUM, but the actual electronic file will be unavailable for viewing or download until the selected embargo period has passed.
- **Restrict online publication of the dissertation indefinitely** Students may, in rare circumstances, place an indefinite embargo on access to their work. In this case, a description of the thesis or dissertation, including the student's name, the work's title, the advisor's name, and the abstract will be available via ProQuest's *Digital Dissertations* and DRUM, but the actual electronic file will be embargoed indefinitely. This option requires the written approval of the Dean of the Graduate School . This restriction can be lifted at the request of the author at a later date.

Inclusion of One's Own Previously Published Materials in a Dissertation

A graduate student may, upon the recommendation of the dissertation director, and with the endorsement of the home graduate program's Graduate Director, include his or her own published works as part of the final dissertation. Appropriate citations within the dissertation, including where the work was previously published, are required. All such materials must be produced in standard dissertation format .

It is recognized that a graduate student may co-author work with faculty members and colleagues that should be included in a dissertation. In such an event, a letter should be sent to the Dean of the Graduate School certifying that the student's examining committee has determined that the student made a substantial contribution to that work. This letter should also note that inclusion of the work has the approval of the dissertation advisor and the program chair or Graduate Director. The letter should be included with the dissertation at the time of submission. The format of such inclusions must conform to the standard dissertation format. A foreword to the dissertation, as approved by the Dissertation Committee, must state that the student made substantial contributions to the relevant aspects of the jointly authored work included in the dissertation.

Inclusion of Copyrighted Materials in a Dissertation

Students are responsible for ensuring that their thesis or dissertation complies with copyright law. Copyright law gives the owner of a work exclusive rights to reproduce, distribute, display or perform the work publicly and to modify or adapt the work and the exclusive right to grant others permission to exercise any of those rights in the work, *subject to certain exceptions* . Students are responsible for determining if their use of another's work requires his or her permission or falls within one of the exceptions.

Students should consider the following questions and consult the following documents for guidance on complying with copyright law:

Did the work ever qualify for copyright protection?

- The work never qualified for copyright because, for example, it lacked originality or was created by Federal employees in the scope of employment.
- Copyright in the work has expired.
- The use qualifies as a fair use.
- Library of Congress, Copyright Basics
- Library of Congress, Ideas, Methods, or Systems
- Library of Congress, Blank Forms and Other Works Not Protected by Copyright and Copyright Protection Not Available for Names, Titles, or Short Phrases

Has copyright in the work expired?

- Library of Congress, Duration of Copyright
- University of North Carolina, When U.S. Works Pass Into the Public Domain
- Cornell University, Copyright Term and the Public Domain in the United States
- Duke University, Center for the Study of the Public Domain

Is the proposed use a "fair use"?

- Library of Congress, Can I Use Someone Else's Work?
- University of Washington Copyright Connection, Fair Use

Additional Requirements

In addition to those requirements specified above, each graduate program may impose additional requirements. For these requirements, consult the descriptions that appear under the graduate program listings or the special publications that can be obtained from the graduate programs or colleges.

Graduate School Requirements for the Degree of Doctor of Philosophy

The Doctor of Philosophy Degree is granted only upon sufficient evidence of high attainment in scholarship and the ability to engage in independent research. It is not awarded for the completion of course and seminar requirements no matter how successfully completed.

Foreign Language Requirement

Some graduate programs have a foreign language requirement for the Doctor of Philosophy degree. The student should inquire in the graduate program about this requirement. Students must satisfy the graduate program requirement before they can be admitted to candidacy for the doctorate.

Requirements for the Degree of Doctor of Education

The Ed.D. programs in the College of Education are cohort-based, admitting experienced educational practitioners to emphasize applied research and evaluation, and advanced practice. A minimum of 6-credits of 899 are required for the culminating project. Consult the Graduate Studies Office in the College of Education and the individual graduate program for additional details.

Requirements for Other Doctoral Degrees

The particular requirements for the degrees of Doctor of Musical Arts and Doctor of Audiology are given under the corresponding program description. Contact the individual graduate programs with specific questions.

Combined Bachelor's-Master's Programs

In a combined bachelor's/master's program, some graduate level courses initially taken for undergraduate credit may also be applied towards the graduate credit requirements for a master's degree program at the University of Maryland. A bachelor's/master's program may be developed for an individual student, or it may be a structured program. Only graduate programs on the semester term are eligibile for the combined degree.

Individual Student Bachelor's/Master's Program

A program may be developed by an individual student in consultation with his/her academic advisor. Such a program is available only to students whose academic performance is exceptional. It is to be developed according to the individual career interests and goals of the student and should be an integrated learning experience rather than merely the completion of a certain number of graduate and undergraduate credits. The proposed program requires the approval of the Directors of both the undergraduate and the graduate programs involved and of the Dean for Undergraduate Studies and the Dean of the Graduate School . Normally no more than nine credits of graduate courses applied to the bachelor's degree may be counted also for graduate credit in an individual student's program. Courses to be double-counted must be at the 600 level or above and must be passed with at least a "B-" grade. Individual study courses, internships, or courses given as credit by examination are not eligible. The credits to be double-counted will be designated as applicable to the graduate program of study after the student receives the bachelor's degree and matriculates in the Graduate School.

Structured Bachelor's/Master's Program

A structured bachelor's/master's program is a clearly defined curriculum combining an existing undergraduate program and an existing master's program at the University of Maryland, offered by the same or by different departments. It is designed for students whose academic performance is exceptional and should be an integrated learning experience rather than merely the completion

of a certain number of graduate and undergraduate credits. A proposal for such a program should be submitted by the colleges housing the academic programs concerned and requires the approval of the Graduate Council, the Dean of the Graduate School , the Senate PCC Committee, and the President.

Necessary features of a structured bachelor's/master's program include the following:

- Specific requirements for admission to the combined program that speak to the exceptional performance of the students to be admitted. At a minimum, students accepted for the program must be clearly admissible to the graduate program portion.
- The program should be designed so as not to unduly delay the completion of the bachelor's degree. Taking graduate credits should not unduly limit the breadth of the student's experience through premature specialization.
- All requirements of the bachelor's program and of the master's program must be completed before the student may receive both degrees. Where appropriate, graduate courses taken while an undergraduate may substitute for courses required in the undergraduate major program.
- The students may be offered deferred admission to the Graduate School at the end of the junior year program, subject to completion of the senior year program in a timely fashion and with a specified level of achievement. Formal admission to the Graduate School will require completion of all requirements for the bachelor's degree.
- The credits to be double-counted will be designated as applicable to the graduate program after the student receives the bachelor's degree and matriculates in the Graduate School .

A structured bachelor's/master's program may normally include up to nine credits of graduate level courses that are counted both for the bachelor's program and the master's program. More than nine double-counted credits may be allowed if both of the following conditions are satisfied:

- The additional graduate credits applied to the undergraduate program do not unduly limit the breadth of the student's experience through premature specialization.
- The master's program requires more than thirty credits.

Dual Graduate Degree Programs

Graduate students who are enrolled in a doctoral program in one department/program may enroll concurrently for a master's degree in a related area. Examples would be a doctoral student in PHYS enrolling concurrently for a masters in MATH or a doctoral student in ECON enrolling concurrently for a master's in BGMT.

The following rules govern the dual-enrollment process:

- The student must be in good academic standing.
- Both graduate departments/programs must agree to the dual-degree enrollment.
- The full degree requirements must be met in both programs.

- The same course cannot be applied to both programs.
- A written plan for the dual enrollment must be worked out between the two departments/programs regarding credits, advising, semester loads, etc. Copies of this plan must be placed in the student's file in each program and a copy sent to the Graduate School to be included in the student's records here.

Once the written plan is filed with the Graduate School, the student's doctoral program will be designated as the primary degree and the masters program will be designated as the secondary degree. Students and advisors should bear in mind that our present computer system has no way of knowing towards which degree a given course grade should be applied for purposes of computing the GPA. Therefore, students enrolled in dual-degree programs will only have an overall GPA, which reflects their combined performance in the two programs. We are unable to provide separate GPAs for the masters and doctoral components of the two programs. Students therefore should be advised that poor performance in their masters program would affect their overall GPA as it is calculated on their transcript.

Existing Dual Degree Programs

Please visit our dual degree programs page to find more information.

Certificate Programs

A post-baccalaureate certificate is awarded for the successful completion of a minimum of 12 credit hours of graduate-level work in a defined subject area under the following conditions:

- The program must include a minimum core requirement of nine credit hours chosen from a limited list as designated by the graduate program.
- Non-core courses must be chosen from a specific list of acceptable options.
- No fewer than nine credit hours must be earned at the 600 level and above.
- In a twelve credit certificate program three credits may be earned at the 400 level; for certificate programs requiring more than 12 credits, a maximum of six credit hours may be at the 400 level.
- All credits for a certificate must be completed at the University of Maryland.
- A minimum grade point average of 3.0 is required for the award of a graduate certificate.
- All requirements for the graduate certificate must be completed within a five-year period.

Information on active Graduate Certificates can be found on the graduate programs page.

Graduate School Field Committees

Groups of faculty who are engaged in a common research area that crosses disciplinary or sub-disciplinary lines may seek formal recognition as a Field Committee from the Graduate School. It

is assumed that these committees will find ways to sponsor collaborative scholarship by faculty and graduate students through the sponsorship of symposia and lectures, the creation of courses, the direction of graduate student research. The University of Maryland currently recognizes several official Graduate School Field Committees.

The Graduate School supports and encourages intellectual exchange and collegiality among the academic fields and disciplines. These exchanges and interactions distinguish the University from a collection of isolated teaching centers and research institutes, produce advancements in knowledge and intellectual synergy, and promote a dynamic curriculum that reflects the current development of research and scholarship. To foster these activities, the Graduate School encourages the formation of interdisciplinary Field Committees. The purpose of these committees is to enhance collaborative research, foster intellectual achievement, use the Graduate School 's resources to support advanced research, elevate the visibility of the University's expertise in interdisciplinary areas, and attract graduate students.

Requirements for Formal Recognition

- A minimum of five Full Members of the Graduate Faculty, representing at least two disciplines or sub-disciplines, must agree to participate.
- The Field Committee faculty must commit to meeting at least twice a semester.
- The Field Committee faculty must keep regular minutes of the meetings.
- The Field Committee faculty must select a spokesperson or convener for the Committee.

Requirements for Offering Courses and Advising Students:

- A set of regularly taught graduate courses must be identified in the Field Committee area.
- The department chair of each member of the Committee must agree to the faculty member's participation in the Committee.
- Approved graduate programs must be willing to admit qualified students who express a prior interest in the Committee, and departments must be willing to consider them for department/University support in an open competition.
- The spokesperson for the Committee must report each semester to the respective Graduate Program Directors on the progress of graduate students who are affiliated with the Committee.

Available Resources for Field Committees

- The Committee may request financial assistance from the Graduate School for brochures and web site development to advertise and promote the field.
- The Committee may request financial support for speakers, symposia, and other intellectual events from the Graduate School .
- The Committee may request a sum equivalent to the cost of a course buy-out for the development of a new course to be offered in the field. Funds will be available for up to two years. In order to receive Graduate School funds, a department must be willing to support the course at the end of the two-year period if student demand warrants.
- The Graduate School will list the Field Committee in the Graduate Catalog.

The Graduate School will recognize Field Committees for an initial period of five years. At the end of that period, the activities and accomplishments of the Committee will be reviewed. If the Committee members and the Graduate Dean are both satisfied that the Committee is able to foster and enhance intellectual achievements, the Committee's recognition by the Graduate School will be extended for another period of five years, at which point it will be reviewed again. The criteria for each review will be the Committee's accomplishments in enhancing collaborative research and intellectual achievement, and its success in attracting and educating graduate students.

Approved by the Graduate Council on March 15, 2005.

University of Maryland Graduate Faculty Members

The Graduate Faculty are responsible for teaching classes restricted to graduate students, designing the academic content of graduate degree programs, and supervising the writing and defense of graduate student research in the form of theses and dissertations.

Listed by Last Name

A | B | C | D | E | F | G | H | I | J | K | L | M | N | O | P | Q | R | S | T | U | V | W | X | Y | Z | All

Minimum Qualification

To qualify for appointment to the Graduate Faculty, individuals normally will hold the terminal degree in their discipline.

Membership - Graduate Faculty Categories

There are three categories of membership of the Graduate Faculty: Full Members; Adjunct Members; and Special Members. All members of the Graduate Faculty will be associated with a home unit. For Full Members of the Graduate Faculty, the home unit is the primary unit of appointment to rank. For Adjunct and Special Members of the Graduate Faculty, the home unit is the academic unit responsible for the particular graduate program initiating the request for nomination. Once appointed, members of the Graduate Faculty are available to serve across units and within multi-/cross-/interdisciplinary graduate programs.

Appointment Procedures

Full Members

Full Members of the Graduate Faculty are tenured or tenure-track faculty at the University of Maryland , College Park, with duties in teaching and research (Assistant and Associate Professors, Professors, and Distinguished University Professors); and College Park Professors. Appointment to the Graduate Faculty is automatic on appointment to the University of Maryland faculty.

Faculty awarded Emeritus status continue as Full Members of the Graduate Faculty for five years after retirement and may be reappointed for additional five-year terms thereafter, subject to nomination by the home unit.

The Nomination to the Graduate Faculty Form is available here.

Adjunct Members

Adjunct Members of the Graduate Faculty normally come from the ranks specified from the following categories in the UMCP Policy on Appointment, Promotion, and Tenure of Faculty: faculty with duties primarily in research, scholarship, or artistic creativity (Research Assistant Professor, Research Associate Professor, and Research Professor; Assistant and Associate Research Scientist, and Senior Research Scientist; Assistant and Associate Research Scholar, and Senior Research Scholar; Assistant and Associate Research Engineer, and Senior Research Engineer; Assistant and Associate Artist-in-Residence, and Senior Artist-in-Residence); field faculty (Agent, Senior and Principal Agent); faculty engaged exclusively or primarily in library service (Librarian 3 and 4); and additional faculty ranks (Adjunct Assistant and Associate Professor, and Professor; visiting appointments that correspond to eligible ranks listed above; and Professor of the Practice). Exceptionally, faculty in other ranks with appropriate terminal qualifications, expertise, and experience may be proposed for Adjunct Membership in the Graduate Faculty.

Appointment is by approval of the Dean of the Graduate School. Nomination for appointment to Adjunct Member of the Graduate Faculty is made by the Head of the home unit, on the recommendation of the Full Members of the Graduate Faculty in the unit. Each nomination will include a letter of support from the Head of the home unit, confirmation of approval of the Full Members of the Graduate Faculty in the unit, and current curriculum vitae. The term of appointment is five years and is renewable upon re-nomination by the Head of the home unit after appropriate review within the unit. The appointment is terminated upon resignation or retirement.

The Nomination to the Graduate Faculty Form is available here.

Special Members

Special Members of the Graduate Faculty are scholars who have no official affiliation with the University of Maryland.

Appointment is by approval of the Dean of the Graduate School. Nomination for Appointment to Special Member of the Graduate Faculty is made by the Head of the home unit, on the recommendation of the Full Members of the Graduate Faculty in the unit. Each nomination will include a letter of support from the Head of the home unit, confirmation of approval of the Full Members of the Graduate Faculty in the unit, and current curriculum vitae. The term of appointment is five years and is renewable upon re-nomination by the Head of the home unit after appropriate review within the unit. The appointment is terminated upon resignation or retirement.

The Nomination to the Graduate Faculty Form is available here.

Exceptional Appointments

Exceptions to the procedures listed above may be approved by the Dean of the Graduate School and will be reported to the Graduate Council at its final meeting of each academic year. Each request for an exception will include a letter of justification from the Head of the home unit, making a compelling case that the exception is necessary to fill a particular need, confirmation of approval of the Full Members of the Graduate Faculty in the home unit, and current *curriculum vitae*. All exceptions will be effective for periods of up to five years and may be re-approved for periods of up to five years based on a review in the home unit and the recommendation of the Head of the home unit. The appointment is terminated upon resignation or retirement.

Faculty of Multi-Campus Graduate Degree Programs

Exceptionally, faculty who hold appointments at other institutions of the University System of Maryland and who participate in approved multi-campus graduate degree programs may be appointed Full Members of the Graduate Faculty at the University of Maryland. Such exceptions will be proposed on an individual basis, be subject to approval by the Dean of the Graduate School, and be reported to the Graduate Council at its final meeting of each academic year. Each request for an exception will include a letter of justification from the Graduate Director of the multi-campus program, confirmation of approval of the Full Members of the Graduate Faculty in the program, and current *curriculum vitae*. All exceptions will be effective for periods up to five years, and may be re-approved for periods of up to five years based on a review by the program and the recommendation of the Graduate Director of the program. The appointment is terminated upon resignation or retirement.

Prerogatives of Membership by Category

Full Members

Full Members of the Graduate Faculty are eligible to teach courses restricted to graduate student enrollment; serve on program graduate committees; direct Master's thesis research and chair Master's thesis examining committees; direct doctoral dissertation research and chair doctoral dissertation examining committees; and vote for and serve on the Graduate Council and its committees.

Adjunct Members

Adjunct Members of the Graduate Faculty are eligible to teach courses restricted to graduate student enrollment, serve on program graduate committees, direct Master's thesis research, chair Master's Thesis Examining Committees, and co-direct doctoral dissertation research, but not direct doctoral dissertation research or chair Dissertation Examining Committees.

Special Members

Special Members of the Graduate Faculty are eligible to serve on program graduate committees and co-direct Master's thesis research, but may not direct or co-direct doctoral dissertation research or chair Master's Thesis or Doctoral Dissertation Examination Committees.

Membership of Former University of Maryland Faculty

Full Members of the Graduate Faculty who terminate their employment at the University of Maryland under honorable circumstances (and who do not have emeritus status) may for a 12-month period following their termination serve as members and Chairs of Dissertation examination committees. They may not serve as Dean's representatives.

Exceptions to Policy

Exceptions to the prerogatives listed above must be approved by the Dean of the Graduate School and will be reported to the Graduate Council at its final meeting of each academic year. In particular, the Dean of the Graduate School may authorize Adjunct and Special Members of the Graduate Faculty to chair a doctoral Dissertation or master's Thesis Examining Committee on the recommendation of the home unit that the member possesses the requisite skills and scholarly expertise. Each request for an exception will include a letter of justification from the Head of the home unit, making a compelling case that the exception is necessary to fill a particular need, confirmation of the approval of the Full Members of the Graduate Faculty in the home unit, and a current *curriculum vitae*.

Other Graduate School Policies

Waiver of a Regulation

All policies of the Graduate School have been formulated by the Graduate Council with the goal of ensuring academic quality and approved by the Provost. These policies are to be equitably and uniformly enforced. Circumstances occasionally occur that warrant individual consideration. A graduate student who believes that there are compelling reasons for a specific regulation to be waived or modified, the student should submit a written petition to the Dean of the Graduate School , Room 2125, Lee Building, explaining the facts and issues that bear on the case. In all instances, the petition must be signed by the student's Graduate Director and, if the petition involves a course, by the course instructor. If these individuals recommend approval, in writing, the petition is then forwarded to the Office of the Dean of the Graduate School for consideration. Forms for Petitions for Waivers of Regulation are available on our Graduate School website.

Application for Graduation

During the academic year, applications for graduation must be filed with the Office of the Registrar within the first ten days of the semester in which the candidate expects to obtain a degree. During the summer session, the application must be filed during the first week of the second summer session. Exact dates are noted for each semester and the summer sessions in the

Schedule of Classes and on the Graduate School website. Failure to meet specific deadlines may result in a delay of one or more semesters before graduation. In addition, the Thesis and Dissertation Manual contains a time line for completion of the master's or doctoral degree. If for any reason students do not graduate at the end of the semester in which they have applied for the diploma, the application will automatically transfer to the following semester.

Academic regalia are required of all candidates at commencement exercises. Those who so desire may purchase or rent caps and gowns at the University of Maryland student supply store. Orders must typically be filed eight weeks before the date of Commencement at the University Book Center in the Stamp Student Union.

Arbitrary and Capricious Grading Policies

Policy and Procedures for Review of Alleged Arbitrary and Capricious Grading in Courses

Arbitrary and capricious grading is constituted by the assignment of a course grade to a student on some basis other than performance in the course, or the assignment of a course grade to a student by unreasonable application of standards different from standards that were applied to other students in that course, or the assignment of a course grade by a substantial and unreasonable departure from the instructor's initially articulated standards.

A student who believes he or she has received an improper final grade in a course should inform the instructor promptly. The instructor will meet with the student at a mutually convenient time and place within ten working days of receipt of the information. The purpose of the meeting is to attempt to reach a resolution.

If the instructor has left the University, is on approved leave, or cannot be reached by the student, the student should contact the Department Chairperson. The Department Chairperson, or a designee, will meet with the student as described above to attempt to resolve the problem.

If these meetings (known as the informal process) do not resolve the problem, the student may initiate a formal appeal. This appeal must be made in writing to the Dean of the Graduate School and must contain: the course title and number; the instructor's name; and a statement detailing why the grade is believed to be arbitrary and capricious as defined in this policy, and providing all relevant supporting evidence. The appeal must be received in the Dean's Office within twenty (20) days of the first day of instruction of the next semester (excluding summer and winter semesters.) If these criteria are met, the Dean will institute a formal procedure.

Formal Procedures

Each academic unit will have a standing committee of two tenured professors and two graduate level students to hear appeals of arbitrary and capricious grading. The appeal will be heard within the academic unit offering the course. If the instructor of the course is a member of the committee, that instructor will be replaced by an alternate designated by the Department Chairperson.

Each written appeal is to be reviewed by the entire committee for a decision by the majority. The committee will either dismiss the appeal, or move it forward. Grounds for dismissal are: the student has submitted the same complaint to any other grievance procedure; the allegations, if true, would not constitute arbitrary and capricious grading; the appeal was not timely; or the informal process has not been exhausted. If the appeal is dismissed, the committee will notify the student in writing within ten days of the decision, and will include the reason or reasons for the dismissal.

If the appeal is not dismissed, the committee will submit a copy of the appeal to the instructor. The instructor must reply in writing to the committee within ten days. If, based on the instructor's reply, the committee feels there is a viable solution, that solution should be pursued with the student and the instructor. If no solution is reached, the committee shall hold a fact-finding meeting with the student and the instructor. It is to be non-adversarial and informal, with neither party represented by an advocate.

Witnesses may be asked to make statements to the committee if the committee is informed prior to the meeting. The meeting will not be open to the public. The committee will meet privately at the close of the fact-finding meeting to decide whether a majority believes the evidence supports the allegation of arbitrary and capricious grading beyond a reasonable doubt. The committee will notify the student, the instructor, and the Dean of the Graduate School of the decision in writing within five days of the meeting.

The committee has the authority to take any action that it believes will bring about substantial justice, including but not limited to directing the instructor to grade the student's work anew, directing the instructor to administer a new final exam or paper, directing the cancellation of the student's registration in the course, and directing the award of a grade of "pass" in the course. The committee does not have the authority to assign a letter grade for the course or reprimand or take disciplinary action against the instructor.

The decision of the committee is final, and binding on both parties. The decision may not be appealed to any other body within the University of Maryland or the University of Maryland System.

The Dean of the Graduate School will be responsible for implementing the decision of the committee.

For more information, please review The University Policy on Arbitrary and Capricious Grading.

Policy and Procedures for Appeals of Alleged Arbitrary and Capricious Grading of Doctoral Qualifying Examinations

The University procedures for reviewing alleged arbitrary and capricious grading of doctoral qualifying examinations envision a multi-step process. (Qualifying examinations are defined as any examinations, oral or written, that are necessary, but not sufficient, for admission to candidacy for a graduate degree.) Prior to filing a formal written appeal, the student must engage in an informal attempt to resolve the problem directly with the Chair of the Examination

Committee. The Graduate School 's Ombudsperson may be called upon to facilitate resolution if both parties agree. If these informal efforts fail, then the student may file a formal appeal to the Dean of the Graduate School. When such an appeal is received by the Graduate School, the Program will be notified and will receive a copy of the appeal letter. An Appeal Committee of faculty and students established by the Department/Program will then meet to conduct the formal appeal process.

The formal appeal process consists of four phases. In the first phase, the Committee evaluates the student's written appeal and determines, according to certain established criteria, whether it should be dismissed on procedural grounds or whether the process should move forward to the next phase. In the second phase, the appeal is sent to the Chair of the Examination Committee for a written response.

In the third phase, the Appeal Committee decides if there may be a viable informal solution and if so, pursues it with both the student and the graduate program. If the Appeal Committee does not feel that such an attempt would be feasible or if the effort is unsuccessful, the process moves to phase four, which is the fact-finding phase.

In the fact-finding phase, the student, the graduate director, and a member of the examination committee meet with the Appeal Committee. Each party may make statements to the Appeal Committee and may call witnesses. This phase, however, is both informal and non-adversarial, and neither side may be represented by an advocate. After hearing both sides, the Appeal Committee meets privately to consider the evidence and decide whether the evidence offered in support of the allegation of arbitrary and capricious grading is clear and convincing. If the Appeal Committee supports the allegation, it then has several options for resolving the issue. Whatever the decision of the Appeal Committee, it is binding on both parties and is final; i.e., it may not be appealed elsewhere in the University of Maryland or elsewhere within the University System of Maryland.

Qualifying examinations are defined as any examinations, oral or written, that are necessary, but not sufficient, for admission to candidacy for a graduate degree. Arbitrary and capricious grading applies only to the grade assigned in a doctoral qualifying examination. Arbitrary and capricious grading is defined as any of the following: a) The assignment of a grade to a student on some basis other than performance in the qualifying examination; or b) the assignment of a qualifying examination grade to a student by an unreasonable application of standards different from standards that were applied to other doctoral students, where an objective comparison of students is possible; or c) the assignment of an examination grade by a substantial and unreasonable departure from the graduate program's or the Examination Committee's initially articulated standards or requirements for the doctoral qualifying examination.

The Informal Appeal Process

Before proceeding to a formal appeal, the student should contact the Chair of the Examination Committee and meet, at least once, at some mutually convenient time and place in an attempt to resolve the issue or issues. This meeting should take place within 10 campus business days of the

Examination Committee Chair receiving the informal appeal from the student. Campus business days do not include Saturdays, Sundays, and official campus holidays.

If the Examination Committee Chair has left the university, is on approved leave, or cannot be reached by the student, the student should contact the Department/Program Chair. The Department/Program Chair, or a faculty member designated by the Chair, will to attempt to resolve the issue.

The Ombudsperson for Graduate Students and/or the Graduate Director may be called upon to facilitate resolution if both parties agree.

The Formal Appeals Process

If the informal process does not resolve the issue, the student must file a written appeal. The written appeal must be received by the Office of the Dean of the Graduate School within 20 campus business days after the first day of instruction of the following semester.

The deadline for appeals of a spring-semester examination, or an examination taken during either semester of summer session, is the 20th campus business day after the first day of instruction of the following fall semester. Appeals of a fall semester examination or a winter term examination must be made by the 20th campus business day after the first day of instruction of the following spring semester.

The letter of appeal should contain the Examination Committee Chair(s) name, the Graduate Director(s) name, the date(s) of the examination, and an explanation of why the student believes the examination result was arbitrary and capricious, as defined by the policy. Any relevant supporting evidence should be included with the letter.

Each Program should have a standing committee to hear appeals of arbitrary and capricious grading of doctoral qualifying examinations. The Appeal Committee may be the same committee formed within the Program to hear appeals of arbitrary and capricious course grades. This committee should generally be formed specifically for the purpose of hearing appeals of arbitrary and capricious grading and not a subcommittee of any other committee. The Appeal Committee should normally be appointed at the start of the academic year. The terms of its members should be for at least one academic year.

The Appeal Committee should be composed of two tenured faculty and two graduate students appointed by the Graduate Director of the Program offering the course. In addition, the Dean of the College will appoint one additional member to the Appeal Committee who is a member of the Dean's Office staff and who is also a member of the Graduate Faculty. If no such person is available from the Dean's Office staff, the Dean will appoint a committee member from a Department/Program other than that of the appellant's Department/Program within the college.

No member of the student(s Examination Committee may also be a member of the Appeal Committee. In such a situation, a substitute member should be appointed by the Graduate Director.

All actions of the Appeal Committee are by majority vote. In the event that the Appeal Committee, at any stage of the process, is unable to reach a majority decision, the Dean of the College or his/her designee, should cast the deciding vote. In the case of inter-college programs, the participating deans may decide which of them will have responsibility for casting the deciding vote.

The Initial Evaluation Phase. In this phase, the only task of the Appeal Committee is to review the letter of appeal to determine whether the appeal should be dismissed on procedural grounds or moved forward to the next phase. If any of the specified procedural grounds for dismissal are met, the appeal must be dismissed. The procedural grounds for dismissal are as follows: a) The student did not meet with the Examination Committee Chair to resolve the issue informally; or b) the appeal was not timely (i.e., it arrived later than the 20th campus business day after the first day of instruction of the following semester, as specified above); or c) the student has already submitted the same complaint through another grievance procedure; or d) the allegations, if true, would not constitute arbitrary and capricious grading of a qualifying examination.

During this initial evaluation phase, the Appeal Committee should consider only the student's letter of appeal; it should not seek or consider comments or responses from the Examination Committee, or other faculty or students. During this initial evaluation phase, the Appeal Committee is not to decide the truth of the student's allegation(s); it should accept the student's allegations at face value (i.e., assume for the moment the allegations are true.) If, based on its evaluation of the student's letter of appeal, the Appeal Committee decides that one or more of the four procedural grounds for dismissal have been met, the Appeal Committee must dismiss the appeal and the process ends. The Appeal Committee Chair should notify the student, the Examination Committee Chair, the Graduate Director, and the Dean of the Graduate School in writing within 10 campus business days if the appeal is dismissed. The Appeal Committee Chair's letter should include the reasons for the dismissal.

The Examination Committee's Response Phase. If the appeal is not dismissed, the Appeal Committee Chair should promptly submit a copy of the student's written appeal to the Chair of the Examination Committee with a copy to the Dean of the Graduate School . The Chair of the Examination Committee should submit a written response to the Appeal Committee Chair within 10 campus business days of receiving the appeal.

The Dispute Resolution Phase. If, after reviewing the Examination Committee's response, the Appeal Committee feels that a solution may be possible, the Appeal Committee should meet with the student and the Examination Committee, separately and/or jointly, to attempt to resolve the dispute. The dispute resolution phase should not generally have a duration longer than 30 calendar days from receipt of the Examination Committee's written response, unless both Committee Chairs agree in writing to continue for a further, brief, specified period. If the Appeal Committee's resolution efforts are successful, both Committee Chairs should sign a memorandum that states the agreed-upon solution. A copy of this memorandum should be placed in the student's file in the Department/Program and a copy should be sent to the Graduate School and to the student. If resolution by the Appeal Committee either is not attempted or is unsuccessful, the Department/Program Chair, the Graduate Director, the Examination Committee Chair, and the

Dean of the Graduate School should be promptly notified, and the process advances to the fact-finding phase.

The Fact-Finding Phase. If a solution is not attempted or is not reached through dispute resolution, the fact-finding meeting should be held promptly thereafter. In addition to the Appeal Committee members, the student and the Chair of the Examining Committee should be in attendance. Either party may invite witnesses to give evidence if the Appeal Committee Chair is notified prior to the meeting. The Chair of the Appeal Committee should generally be given at least 24 hours advance notice of the intention to call witnesses. During the fact-finding meeting, both the student and the Examining Committee Chair may present statements, oral or written, to the Appeal Committee as well as other documentation to support their positions. Neither party may be represented by an advocate of any kind. The meeting will not be open to the public. The Graduate School may send an administrator to observe the proceedings, but this observer should not participate substantively in the proceedings themselves. The meeting is to be both informal and non-adversarial; its purpose is to determine the relevant facts in the matter. At the close of the fact-finding meeting, the Appeal Committee will meet privately to consider the evidence presented. If the majority of the Appeal Committee believes that the student has not provided clear and convincing evidence of the allegation of arbitrary and capricious grading of a qualifying examination as defined above, the appeal must be denied. If the majority of the Appeal Committee believes that there is clear and convincing evidence that supports the allegation of arbitrary and capricious grading, the Appeal Committee will decide which of the various actions within its authority (see below) should be taken. The Appeal Committee Chair should notify the student, the Department/Program Chair, the Examining Committee Chair, the Graduate Director, and the Dean of the Graduate School in writing of the Appeal Committee's decision on the appeal within five campus business days after conclusion of the fact-finding meeting.

The Authority of the Appeal Committee. The Appeal Committee generally has the authority to take any action it believes will bring about substantial justice, except a) it may not direct that a passing grade for the qualifying examination be assigned for the student; and b) it may not reprimand or take disciplinary action against the Examination Committee or any of its members.

The following is a list of possible actions that the Appeal Committee may take. The list is not exhaustive; the Appeal Committee may take other appropriate actions in order to achieve what it believes to be substantial justice. a) The Appeal Committee may direct the Department/Program that the examination be re-graded by a new Examination Committee from within the Program. b) The Appeal Committee may direct the Program that the examination be re-graded by a new Examination Committee from outside the Program. c) The Examination Committee may be directed to administer a new examination. d) The Appeal Committee may direct that a new Examination Committee be formed from within the Department/Program which will administer and grade an entirely new examination. e) The composition of the new Examination Committee will be determined by the Appeal Committee in accordance with the prevailing rules of the Program. At the discretion of the Appeal Committee, the new Examination Committee may have one of its members from outside of the University of Maryland . f) In the event that the qualifying examination was an oral examination, a new oral examination must be administered. In the event of a combined written/oral qualifying examination, a new oral portion must be administered. The Appeal Committee may direct that this new examination be administered by an Examination

Committee that consists of some or all members of the original Examination Committee or an entirely new committee.

The Appeal Committee's Decision. The decision of the Appeal Committee is final and binding on both parties. The decision may not be appealed to any other body within the University of Maryland or within the University System of Maryland. If, as a result of this appeals process, the student's advisor no longer wishes to advise the student, the Graduate Director will act as the student's temporary advisor for a period of not more than six months to allow the student time to find a new advisor. If the Graduate Director is a member of the Examination Committee, this assignment will be carried out by the Department/Program Chair.

Implementation of the Appeal Committee's Decision. The Director of Graduate Studies and the Department/Program Chair will be responsible to the Dean of the Graduate School for implementing the decision of the Appeal Committee.

Graduate School Services

The Office of Graduate Diversity and Inclusion (OGDI)

The Office of Graduate Diversity and Inclusion is dedicated to fostering a supportive University environment for graduate students from under-represented and under-served groups. OGDI provides campus leadership for identifying, recruiting, retaining, and graduating a diverse graduate student body. The Office's programs and services aim to attract new students, to build a collaborative and cooperative community, and to promote professional development among graduate students to ensure academic success. It's initiatives include, but are not limited to: **conducting student recruitment activities**, including campus visits, supporting summer undergraduate research programs; **building a supportive community** through collaboration with graduate student organizations; **sponsoring programs and activities designed to foster professional development,** including workshops and seminars on academic and research skills, retention initiatives, and preparing graduate students for the professoriate and other careers. The Office also assists the University's various colleges and departments in creating an environment supportive of the academic success of historically under-represented and under-served graduate students. The Office can be reached at 2100B Lee Building, 301-405-0763, and by visiting the OGDI website.

Ombuds Office for Graduate Students

The Ombuds Office for Graduate Students seeks to ensure that the graduate student voice is heard and that problems receive impartial attention. The Ombuds Office is available to all graduate students with questions or concerns related to their graduate experience. The Ombuds Office provides confidential, informal, and independent assistance to resolve conflicts, and promotes fair

and equitable treatment within the University. The office can be reached at 2103 Lee Building, 301-405-3132.

Graduate Legal Aid Office

The Graduate Legal Aid Office provides free legal advice, referrals, and assistance to currently registered University of Maryland graduate students. Staff members give general legal advice on a wide variety of matters, including landlord-tenant issues, consumer problems, traffic accidents, uncontested divorces, and University-related matters. The Office provides direct legal assistance in routine matters, but cannot sue on behalf of students or represent them in court. The Office is staffed eight hours a week for student interviews; staff members see students on a walk-in basis and by appointment. Walk-in and appointment schedules are posted on the Office door. The Office cannot handle disputes between graduate students (though the Ombudsperson for Graduate Students may be consulted for assistance in these disputes) and does not provide emergency services. For more information, consult the Graduate Student Legal Aid Office website.

English Editing for International Graduate Students

The English Editing for International Graduate Students (EEIGS) program offers editing services for international graduate students who must present required seminar papers, theses and dissertations in English. This program is staffed by volunteers from the University's "Retired Volunteer Service Corps" and the Golden I. D. Group, and by volunteers from other University and non-University sources. These services are free.

The EEIGS program operates as follows:

- The names and telephone numbers of volunteer editors on whom students may call may be obtained by visiting the EEIGS website.
- The student will be responsiblie for contacting a volunteer editor to arrange for the editing services. If an arrangement does not work out satisfactorily, either the student or the volunteer editor may discontinue it. The student may then seek another volunteer editor.
- The student should allow a reasonable amount of time for the editing services. Documents cannot be edited on very short notice.
- Editing services are expected to take place on the University of Maryland campus. The student will be responsible for finding working space (for example, an empty classroom or office in the student's department).
- The student is expected to inform the Director of Graduate Studies of the department in which he or she is majoring about the aid being received through this program.

Graduate students and other members of the University of Maryland community may also offer English language services for a fee. Graduate students in the Department of English who are available for this service, for example, can be contacted through the Director of Graduate Studies, Department of English, 3101 Susquehanna Hall.

Health Insurance

Because the service provided by the Health Center is limited and many students do not have adequate health insurance coverage, a voluntary group insurance policy (United Health Care) is available to graduate students. This policy provides benefits at reasonable rates for hospital, surgery, emergency, laboratory, and x-ray services; some coverage for mental health; and contains a major hospital provision. Students may elect to have family coverage. For information on the United Health Care plan, please visit the University Health Center website. United Health Care offers online enrollment at http://www.firststudent.com/.

Teaching, research, and graduate assistants are eligible for the State Employee Insurance Plan options. Further information can be obtained from the student's graduate program payroll and benefits coordinator or the University Human Relations' Benefits Office.

Graduate fellows can apply for health insurance coverage through United Health as well. Effective Fall Semester 2005, the Graduate School will provide a reimbursement of 50% of the United Health insurance premium for individual coverage to full-time graduate students who are supported on full fellowships funded by the Graduate School through the University and Dean's Fellowship program. Subsidy of coverage for dependents will not be available. Funding for fellows' health insurance reimbursement is limited and will be provided on a first-come, first-served basis. To obtain more information, please visit our Graduate School website.

Accounting (BMAC)

Graduate Degree Program
College: Business

Abstract
The Robert H. Smith School of Business offers graduate programs leading to the degrees of Master of Business Administration (MBA), Master of Finance, Master of Science in Accounting (MS), Master of Science in Information Systems (MS), Master of Science in Marketing Analytics (MS), Master of Science in Supply Chain Management (MS), Executive MBA (EMBA), Online MBA, and Doctor of Philosophy (PhD). The school's MBA program is accredited nationally by the Association to Advance Collegiate Schools of Business (AACSB International). Only about 607 programs in the world are accredited by the AACSB, a reflection of the quality of the faculty, students, curriculum, and career management.
The Smith School of Business faculty has been recruited from the graduate programs of leading universities nationwide. They are dedicated scholars, teachers, and researchers with a strong commitment to academic excellence and the education of the professional manager and researcher. The Smith School of Business is dedicated to preparing graduates to lead organizations in an economy driven by technology, globalization, and rapid change. The Smith School curriculum integrates an in-depth education in core business functions -- accounting, entrepreneurship, finance, information technology, logistics, management, and marketing - with cross-functional e-business areas - electronic commerce, financial engineering, services marketing, and supply chain management.

Admissions Information
We strongly encourage you to visit the Robert H. Smith School of Business website at **www.rhsmith.umd.edu**. The Smith School website contains a wealth of information regarding all graduate business programs and their admissions processes.

Admissions requirements can be found here: https://www.rhsmith.umd.edu/programs/ms-accounting/admissions
MBA and MS Admissions Office: 301-405-2559
Executive MBA Admissions Office: 301-405-2386
Online MBA Admissions Information: 877-807-8741
PhD Admissions Office: 301-405-2214
Admission criteria for the MS program focusing in accounting are based on: quality of undergraduate and graduate coursework; 1 letter of recommendation; professional experience; video submission; and written essay of objectives. Prospective applicants may contact the program at (301) 405-2559 for information regarding the MS program.
Apply here: https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=rhsmith

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	Rolling	Rolling
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	Rolling	Rolling

Other Deadlines: Please visit the program website at http://www.rhsmith.umd.edu

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements	Specialization Options
Non-thesis only: 30 credits required	**All students must complete the following core courses and choose one of the three specializations offered. Additional requirements are listed under each specialization.** BUAC 765: Business Ethics for Accountants and Auditors (2 credits) BUAC 780: Financial Statement Analysis for Accountants and Auditors (2 credits) BUAC 782: Advanced Managerial Accounting and Control Systems (2 credits) BUAC 784: Business Communications for Accountants and	**1. Internal Auditing:** BUAC 720: Financial Accounting (2 credits) BUAC 721: Management Accounting (2 credits) Approved Electives (14 credits) **2. Tax** Approved Electives (18 credits)

	Auditors (2 credits) BUAC 792: Forensic Accounting/Auditing (2 credits) BUMO 794: Essentials of Negotiation (2 credits)	**3. Public Accounting** Approved Electives (18 credits)

Participants in the Master of Science in Accounting program gain the leading-edge knowledge and skills they need to bring exceptional value to their firms in today's high-stakes accounting arena - and earn an advanced accounting degree from one of the world's leading business schools. The curriculum is relevant, practical and applicable from day one, focusing on such key issues as: internal audit application and practice, current trends in corporate governance, the role of managerial accounting in overall management planning and control structure, fraud prevention, deterrence, detection, and control, and IT security, IT controls and IT auditing.

Facilities and Special Resources
The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database, which matches a Smith MBA to the right industry position. The OCS also participates in regional and national career forums and job fairs, such as the National MBA Consortium, the National Black MBA Conference, the National Hispanic MBA Conference, the National Association of Women MBA's Conference, and the Career Services Council.
The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Financial Assistance: Financial aid is available to qualified full-time and Executive MBA students in the form of fellowships, graduate assistantships, and scholarships.

Contact Statement
The Smith School of Business has available brochures that give specific degree requirements for the MBA, EMBA, and MS Programs. Program information is available online at http://www.rhsmith.umd.edu. Initial inquiries should be directed to:

Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Admissions Information
General Requirements:
- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)

Successful applicants will hold a bachelor's degree, GPA of 3.0 or better, in engineering or science from an accredited institution. Completed applications are reviewed on a case-by-case basis.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Aerospace Engineering (ENAE)

Graduate Degree Program
College: Engineering

Abstract
The Aerospace Engineering Department offers a broad program in graduate studies leading to the degrees of Master of Science (thesis and non-thesis) and Doctor of Philosophy. Graduate students can choose from the following areas of specialization: aerodynamics and propulsion; structural mechanics and composites; rotorcraft; space systems; and flight dynamics, stability and control. Within these disciplines, the student can tailor programs in areas such as computational fluid dynamics, aeroelasticity, hypersonics, composites, smart structures, finite elements, space propulsion, robotics, and human factors.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- GRE General highly recommended for applicants seeking financial support (required if international applicant)**
- 3 Letters of Recommendation
- CV/Resume
- GPA: 3.2 for M.S. and 3.5 for Ph.D.

Applicants should have a B.S. degree in Aerospace Engineering (or in a closely related field) with a recommended minimum GPA of 3.2/4.0 from an accredited institution. Applicants with a marginal academic record may be conditionally approved for admission to the M.S. program if other evidence of accomplishment is provided (i.e. publications or exceptional letters of recommendation). Admission to the Ph.D. program requires an academic record indicating promise of the high level of accomplishment required for the degree. The Graduate Record Examination (GRE) is strongly recommended for admission, but only *required* for international applicants.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	16 May	1 Nov
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	Preferred: 1 Feb / Final: 1 Mar	29 Sep

Other Deadlines: Please visit the program website at http://www.aero.umd.edu

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements	Specialization Options
Thesis option: 30 credits **Non-thesis option:** 30 credits	Minimum of 12 credits (four courses) in main study discipline (600 level or above) Maximum of nine credits (3 courses) at the 400 level, of which not more than six credits may be department courses **Thesis option:** ENAE 799: Master's Thesis Research (6 credits) is required **Non-thesis option:** Scholarly paper is required	Aerodynamics and Propulsion Structural Mechanics and Composites Rotocraft Space Systems Flight Dynamics, Stability and Control

The M.S. degree program offers both a thesis and a non-thesis option. Both options require 30 credits. At least 12 credits are to be in the main discipline. No more than 9 credits may be at the 400 level of which no more than 6 credits may be from department courses. For the thesis option, 6 credits of ENAE 799 (Master's Thesis Research) are required as well as the successful defense of the M.S. thesis. For the non-thesis option, students must write a scholarly paper.

Doctor of Philosophy (Ph.D.)

Core Requirements
1. Doctoral students are required to complete 36 credits beyond the Bachelor's degree, in addition to 12 credits of ENAE 899: Doctoral Dissertation Research. 2. Major Area Requirement: Minimum of 18 credits are required within one departmental core area of specialization (Aerodynamics and Propulsion, Flight Dynamics Stability and Control, Rotocraft, Space Systems, or Structural Mechanics and Composites. 3. Minor Area Requirement: Minimum of 6 credits are required within one of the other departmental core areas of specialization, or from another department. 4. Math/Science Requirement: Minimum of nine credits of coursework must emphasize mathematics, physical sciences, life sciences, or computer sciences. No more than 3 credits can be from the College of Engineering. The one engineering course that can count toward this requirement must not be a course that could apply to either the major or minor concentration area. At least 3 credits must be at the 600 level or higher.

For the Doctor of Philosophy degree, the department requires a minimum of 36 semester hours of coursework beyond the B.S. which should include: (1) not less than 18 hours within one departmental area of specialization, (2) at least 6 hours from among the other areas of specialization in the Department, and (3) not less than 9 hours in courses that emphasize the physical sciences or mathematics. At least 12 semester hours of credits taken to satisfy (2) and (3) must be 600 level or higher. The student must pass a written qualifying and an oral comprehensive examination and take 12 hours of dissertation credits.

Facilities and Special Resources: The departmental facilities for experimental research include the Glenn L. Martin Wind Tunnel, the Composites Research Laboratory, the Space Systems Laboratory, and the facilities of the Center for Rotorcraft Education and Research. The Glenn L. Martin Wind Tunnel, with its 8-foot high by 11-foot wide test section, has a maximum operating speed of 330 feet per second. It is used extensively for development testing by industry as well as for research. There are also two smaller subsonic tunnels and a supersonic tunnel that are used in support of departmental research programs.
The Composites Research Laboratory is located in the Manufacturing Building. Its facilities include a microprocessor-controlled autoclave, a vacuum hot press, a two-axis filament winding machine, an MTS 220 Kip uniaxial testing machine, an x-ray machine and an environmental conditioning chamber. The laboratory provides for a full spectrum of specimen and component manufacture, preparation and instrumentation, inspection, and testing. The Space Systems Laboratory performs world-class research on space operations, with particular emphasis on neutral buoyancy simulation of space robotics and human factors. The Neutral Buoyancy Research Facility is a multi-million dollar laboratory built around a 50-foot diameter by 25-foot deep water tank for simulating the microgravity environment of space. Six different telerobotic systems are currently under test in this facility, which is one of only two operating in the United States and the only neutral buoyancy facility in the world to be located at a university. The facilities of the Alfred Gessow Rotorcraft Center include two experimental rotor rigs to test articulated and bearingless rotors in hovering and in forward flight. The hover test facility can accommodate up to a 6-foot diameter rotor. In addition, the facilities include a 10-foot diameter vacuum chamber to study the structural dynamic characteristics of spinning rotors in the absence of aerodynamic loads and a three-component laser Doppler anemometer for flowfield measurements. A new 20-foot by 20-foot by 30-foot anechoic acoustic test chamber is used to carry out impulsive noise studies of rotorcraft in hover. Dynamic scaled rotor blades are built using composite facility

Financial Assistance: A number of graduate assistantships and fellowships are available for financial assistance. Graduate teaching and research assistantships are available beginning at $20,000 per year plus tuition and health benefits. In addition, a number of fellowships are available, such as Minta Martin Fellowships, Rotorcraft Fellowships, the Hokenson Fellowship, ARCS Fellowships, and various departmental fellowships and scholarships. These fellowships cover tuition in addition to a stipend. All full-time applicants are automatically considered for these fellowships.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Full admission as a degree seeking student requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in aerospace engineering or a related engineering field from an accredited institution.
- Completion of calculus I, II, and III, differential equations, and thermodynamics. Additional prerequisites are listed on the Department of Aerospace Engineering website.
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements
Master of Engineering (M.Eng.)

Total Credits	Core Requirements
Non-thesis only: 30 credits required	All courses taken must be approved by the student's advisor.

Financial Assistance
Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. International applicants should consider applying for the online programs.

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Full admission requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in aerospace engineering or a related engineering field from an accredited institution.
- Completion of calculus I, II, and III, differential equations, and thermodynamics. Additional prerequisites are listed on the Department of Aerospace Engineering website.
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	26 July	15 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	program not currently accepting applications	program not currently accepting applications

Other Deadlines: Please visit the program website at http://www.advancedengineering.umd.edu

Degree Requirements
Post-Baccalaureate Certificate (P.B.C.)

Total Credits	Core Requirements
12 credits required	Students are required to select one specialization. **General:** Choose four of the following courses and include at least one course from each of the three subgroups. ENAE 641: Linear System Dynamics (3 credits) ENAE 642: Atmospheric Flight Control (3 credits) ENAE 654: Mechanics of Composite Structures (3 credits) ENAE 655: Structural Dynamics (3 credits) ENAE 656: Aeroelasticity (3 credits) ENAE 674: Aerodynamics of Compressible Fluids (3 credits) ENAE 676: Turbulence **Rotocraft:** Choose four of the following courses. ENAE 631: Helicopter Aerodynamics I (3 credits) ENAE 632: Helicopter Aerodynamics II (3 credits) ENAE 633: Helicopter Dynamics (3 credits) ENAE 634: Helicopter Design (3 credits) ENAE 635: Helicopter Stability and Control (3 credits) **Space:** Choose four of the following courses. ENAE 601: Astrodynamics (3 credits) ENAE 602: Spacecraft Attitude Dynamics and Control (3 credits) ENAE 691: Satellite Design (3 credits) ENAE 694: Spacecraft Communications (3 credits) ENAE 696: Spacecraft Thermal Design (3 credits) ENAE 741: Interplanetary Navigation and Guidance (3 credits) ENAE 791: Launch and Entry Vehicle Design (3 credits)

Financial Assistance: Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Agricultural and Resource Economics (AREC)

Graduate Degree Program

College: Agriculture and Natural Resources

Abstract

The Department offers both M.S. and Ph.D. degrees from one of the nation's premier graduate programs in agricultural and resource economics. Both programs focus on the application of advanced microeconomic theory and econometrics to issues in environmental and resource economics, agricultural economics, and development economics. Courses are taught by leading researchers in those fields, who combine rigorous scholarship with extensive policy experience.

The Department's faculty includes internationally prominent scholars in environmental and resource economics, agricultural economics, and development economics. In recognition of their research, Department faculty members have received such international awards as Germany's Alexander von Humboldt Prize, the American Economic Association's John Bates Clark Medal, and the Agricultural and Applied Economics Association's Quality of Research Discovery and Publication of Enduring Quality Awards, among others. Several have been elected fellows of such professional associations as the Agricultural and Applied Economics Association (formerly the American Agricultural Economics Association), the Association of Environmental and Resource Economics, the Econometric Society, and the American Statistical Association. Department faculty members have served as presidents of the American Agricultural Economics Association and Association of Environmental and Resource Economists and as editors and associate editors of the Journal of Environmental Economics and Management, the American Journal of Agricultural Economics, the Journal of Public Economics, and Environment and Development Economics, among others. One faculty member is currently a research fellow of the National Bureau of Economic Research. For additional Department highlights, please visit www.arec.umd.edu/graduate/prospective-students.

The policy experience of the Department's faculty is equal to its scholarship in both quality and extent. Three have served on the staff of the President's Council of Economic Advisers. Other policy experience includes service as consultants to agencies and organizations like the U.S. Department of Justice, the U.S. Department of Agriculture, the Environmental Protection Agency, the World Bank, and the Inter-American Development Bank. The University's location in the Washington, D.C., area provides numerous opportunities for interaction with the World Bank, International Food Policy Research Institute, Resources for the Future, International Monetary Fund, U.S. Department of Agriculture, U.S. Environmental Protection Agency, U.S. Agency for International Development, Food and Drug Administration, Inter-American Development Bank, Census Bureau, and a host of other such institutions and organizations. Questions about the Department's graduate programs should be directed to the Graduate Program Coordinator at arecgradpgm@umd.edu or 301-405-1820.

Admissions Information

General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Supplementary Application

At a minimum, students entering either the Department's M.S. or Ph.D. program are expected to have the following preparation:

1. Knowledge of macroeconomic theory at the intermediate level and microeconomic theory at the advanced level.
2. Knowledge of multivariate calculus and linear algebra.
3. Knowledge of elementary statistical methods.

Additional coursework in mathematics is desirable--for example, analysis, probability, advanced statistics, or differential equations.

Students are normally admitted to the MS and PhD programs only for the fall semester, because the first year program consists of course sequences that begin only in the fall.

Transfer from M.S. to Ph.D. Program

Students enrolled in the Department's M.S. program may apply for admission to the Department's Ph.D. program by submitting a new Graduate School application, supplemental transcripts, and three letters of recommendation. The Graduate School application fee is waived if the student applies for the Ph.D. program in or before the semester in which the M.S. degree will be completed. Students within the Department's M.S. program need not submit GRE's when applying for the Ph.D. program.

The University of Maryland's Graduate School accepts applications through its ApplyYourself/Hobsons (link is external) application system. Before completing the application, applicants are asked to check the Admissions Requirements (link is external) site for specific instructions.
As required by the Graduate School, all application materials are to be submitted electronically.
The electronic submission of application materials helps expedite the review of an application. Completed applications are reviewed by an admissions committee in each graduate degree program. The recommendations of the committees are submitted to the Dean of the Graduate School, who will make the final admission decision. Students seeking to complete graduate work at the University of Maryland for degree purposes must be formally admitted to the Graduate School by the Dean.

Information for International Graduate Students
The University of Maryland is dedicated to maintaining a vibrant international graduate student community. The office of International Students and Scholars Services (link is external) (ISSS) is a valuable resource of information and assistance for prospective and current international students. International applicants are encouraged to explore the services they offer, and contact them with related questions. The University of Maryland Graduate School offers admission to international students based on academic information; it is not a guarantee of attendance. Admitted international students will then receive instructions about obtaining the appropriate visa to study at the University of Maryland which will require submission of additional documents. Please see the Graduate Admissions Process for International applicants (link is external) for more information.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	4 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	4 Jan

Other Deadlines: Please visit the program website at http://www.arec.umd.edu

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Non-thesis only (scholarly paper required): 33 credits	ECON 603: Microeconomic Analysis I (3 credits) AREC 623: Applied Econometrics I (4 credits) AREC 624: Applied Econometrics II (4 credits) AREC 620: Optimization in Agricultural and Resource Economics (3 credits) AREC 610: Microeconomic Applications in Agricultural and Resource Markets (3 credits)

The M.S. program trains students to conduct economic research in the fields of environmental and resource economics, agricultural economics, and development economics. It provides rigorous training in microeconomic theory and econometrics and in the application of microeconomics and econometrics to policy issues. Students completing their MS degrees go on to work in U.S. government agencies and international organizations.
The M.S. program requires a minimum of 33 credits of coursework (i.e., 16 credits of electives in addition to the 17 credits of required coursework) and defense of a scholarly paper. No M.S. thesis is required.
Required courses for the M.S. program consist of basic coursework in microeconomic theory and econometrics:

- The first semester of the sequence in microeconomic theory (ECON 603).
- A two-semester sequence in applied econometrics (AREC 623 and 624).
- A one-semester course on mathematical optimization (AREC 620).
- A one-semester course on applications of microeconomic theory to agricultural and resource economics (AREC 610).

  The first-year coursework normally includes these 17 credits (3 credits each for ECON 603, AREC 620, AREC 610 plus 4 credits each for AREC 623 and AREC 624).

  M.S. students fulfill additional coursework requirements by taking electives to suit their own interests during their

second year. Elective courses are normally selected from M.S. level courses (600 level or above) in AREC or ECON but may be taken in other disciplines with adviser approval. For detailed information on the scholarly paper, see the 'MS Scholarly Paper Requirement' at http://www.arec.umd.edu/graduate/ms/ms-scholarly-paper-requirement

Doctor of Philosophy (Ph.D.)

Core Requirements
1. Students must complete a minimum of 42 credits of coursework. 2. All Ph.D. candidates must also meet the course requirements for the M.S. degree, in addition to ECON 604: Microeconomic Analysis II (3 credits). 3. Six elective courses are required. At least four of those courses must be chosen from AREC 783, AREC 785, AREC 815, AREC 825, AREC 832, AREC 845, AREC 846, and ECON 781. 4. During the spring semester of their second-year, students are also required to take a 1-credit course intended to help students develop a dissertation topic, AREC 891: Introduction to Prospectus Development. 5. The final course requirement is AREC 892: Dissertation Prospectus Development (3 credits). This requirement is waived for any student who has completed a dissertation prospectus and passed a prospectus examination before the fall semester of the third year. 6. Students must complete a minimum of 12 research credits by enrolling in AREC 899: Doctoral Dissertation Research.

The Ph.D. program trains students to design, perform, lead, and implement economic research projects in the fields of environmental and resource economics, agricultural economics, and development economics. It also trains students in how to disseminate research results in the major professional media including journals, reports, conferences, and seminars. It provides rigorous training in microeconomic theory and econometrics and in the application of microeconomics and econometrics to policy issues. Students completing their Ph.D. degrees find employment in academia, U.S. government agencies, international organizations, and consulting firms.
Requirements for the Ph.D. degree include a minimum of 42 credits of coursework, completion of a four course field, 12 credits of Ph.D. dissertation research (AREC 899), development of a research paper worthy of submission to a well-regarded journal, development and defense of a dissertation prospectus, and successful defense of a Ph.D. dissertation.
The first year of the program consists of basic coursework in microeconomic theory, econometrics, and mathematical methods. It consists of the following courses: A two-semester sequence in microeconomic theory (ECON 603 and 604); A two-semester sequence in applied econometrics (AREC 623 and 624); A one-semester course on mathematical optimization (AREC 620); A one-semester course on applications of microeconomic theory to agricultural and resource economics (AREC 610).

Students must earn a 'B-' or better in each of these courses and a B (3.0) average or better in graduate coursework. If necessary, students can re-take these courses one time to achieve this standard. The first-year course requirements account for 20 credits (3 credits each for ECON 603, ECON 604, AREC 620, and AREC 610, plus 4 credits each for AREC 623 and AREC 624). First-year students are also expected to complete self-directed instruction regarding econometric software during August and January, attend additional instruction and develop qualifying paper topics during January, and participate in a paper-writing workshop in June at the end of the first year. The June workshop helps students develop their research for publication in academic journals as well as oral presentation. This workshop is useful for fostering the completion of the required research paper.
The second year of the program consists mainly of six elective courses. All students are required to take four courses from among the following courses offered in AREC: AREC 783, AREC 785, AREC 815, AREC 825, AREC 832, AREC 845, AREC 846, and ECON 781 with the remainder from that list, from graduate courses offered by the Economics Department or (with approval by the Director of Graduate Studies) from another supporting department on campus.

Facilities and Special Resources: The AREC Department provides a 15-seat computer lab for the exclusive use of our graduate students. The lab is available 24 hours a day, 365 days a year. Another 25-seat lab is available by reservation for classes, presentations, and research (e.g., experimental economics sessions). These labs are equipped with thin client devices that connect end users to desktop virtual desktops. This solution allows graduate students to remotely access a virtual desktop with all the applications listed below, as well as their files stored on the network servers. The following applications are available at this time: ArcInfo, Fortran, Mathematica, Matlab, Mozilla Firefox, MS Office, R, SAS, Stata, StatTransfer,TextPad, Lyx and WinEdt. Graduate students can access the AREC network and Internet from home via several remote access methods. A multifunction printer/scanner/copier is available in the graduate student computer lab. Wireless access is available to the campus network.

The Department offers close proximity to an incomparable array of government agencies, international institutions, and non-governmental organizations devoted to environmental issues, agricultural policy, natural resource management, and international development. Opportunities for attending stimulating seminars abound. Many students find useful work experience, access to data, and cutting-edge thesis topics as well as future employment through these organizations. These include (all within

approximately 10 miles) the U.S. Environmental Protection Agency, the U.S. Department of Agriculture and U.S. Economic Research Service, the U.S. Food and Drug Administration, Resources for the Future, the Joint Institute for Food Science and Nutrition, the Joint Global Change Research Institute, the National Center for Smart Growth Research and Education, the National Oceanic and Atmospheric Administration, the World Bank, the Inter-American Development Bank, the International Food Policy Research Institute, the Beltsville Agricultural Research Center with its National Agricultural Library, as well as the U.S. Capitol, Senate, and House of Representatives.

Financial Assistance: Graduate assistantships are offered to qualified applicants on the basis of past academic performance, research potential, and availability of funds. Many full-time students in the Department hold assistantships or some other form of financial aid. Part- time and summer work are sometimes available for students who do not have assistantships. Graduate fellowships are also available on a competitive basis. The Department offers financial assistance in the form of graduate assistantships and fellowships. All applications are consideration for financial assistance.

Graduate Assistantships: Many of our students are supported by graduate assistantships with responsibilities for either research or teaching. Graduate assistants are expected to work an average of 20 hours a week on their research or teaching duties. They must maintain at least a B average. They are considered employees of the University and are thus covered by health insurance. In addition to a competitive salary, graduate assistants receive tuition remission for up to 10 credits in the fall and spring semesters and up to 8 credits each summer semester.

Fellowships: The Department awards a number of fellowships each year to highly qualified applicants. Annual fellowship stipends are highly competitive. Fellowship awards also include tuition remission of up to twelve credits per semester. Fellowships are awarded to Ph.D. students for two (2) years. After the expiration of the fellowship, the Department expects to provide Ph.D. fellowship recipients with an additional two years of support as a graduate assistant subject to satisfactory academic progress. All applicants for financial aid are automatically considered for fellowships as well as assistantships. Financial assistance in the form of loans and work study may also be available. Interested students should contact the University's Office of Student Financial Aid.

Contact Statement: The AREC Graduate Program website at http://www.arec.umd.edu/graduate provides course requirements, examination procedures, and descriptive material for the M.S. and Ph.D. programs.

American Studies (AMST)

Graduate Degree Program
College: Arts and Humanities

Abstract
American Studies offers an interdisciplinary program of study leading to the Masters of Arts and the Doctor of Philosophy degrees. Research and teaching in the Department focus on two intellectual themes: the cultures of everyday life, and cultural constructions of identity and difference. These themes drive our examinations of multiple cultures within the U.S., across the Americas, and transnationally. They also embrace numerous cultural studies approaches, including material and visual culture, ethnography and life history, popular culture and media studies, queer studies, studies of the body and sexualities, gender studies, food studies, digital cultures, critical race studies, and cultural landscapes and geography. Students develop expertise in multiple methodologies and take courses in many departments across the University. The Department benefits from a large and diverse affiliate faculty, strong relationships with cultural institutions such as the Smithsonian museums, and ready access to many other museums in the Baltimore-Washington corridor, government agencies, archives and historical societies, and multiple local communities. Students may also take advantage of graduate certificate programs for which our courses apply, including Museum Scholarship and Material Culture, Critical Theory, Historic Preservation, and Women's Studies. The program in U.S. Latina/o Studies is contained within the Department, and we have a leadership role in developing Native American Studies.

Many admitted students have previously majored in American Studies, History, English, Ethnic Studies, Women's Studies, Anthropology, Art or Architectural History, Journalism, and Communications. However, applicants with broad backgrounds in arts and humanities and/or the behavioral and social sciences are also given serious consideration if interdisciplinary, American Studies-related subject matter or theories have been emphasized. Application requirements for both M.A. and Ph.D. programs include:

International applicants must also submit TOEFL scores. Applicants who do not yet have M.A. degrees and who desire to obtain the Ph.D. degree at Maryland should apply directly to the Ph.D. program.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements
Master of Arts (M.A.)

Total Credits	Core Requirements	Specialization Options
Thesis option: 30 credits required **Non-thesis option:** 30 credits required	AMST 601: Introductory Theories and History in American Studies (3 credits) Methods Seminar course (3 credits) AMST designated seminar courses (9 credits)	**Thesis option:** Nine additional course credits and six credits of AMST 799: Master's Thesis Research **Non-thesis option:** 15 additional course credits and completion of a scholarly paper

Students take a total of 30 credits of course work in American Studies and related disciplines and demonstrate the ability to conduct independent research by submitting an acceptable thesis or a scholarly paper in lieu of a thesis.

Doctor of Philosophy (Ph.D.)

Core Requirements
Students entering P.h.D. program with only a Bachelor's degree:
1. Minimum of 42 credits required, in addition to 12 credits of AMST 899: Doctoral Dissertation Research. 2. AMST 601: Introductory Theories and History in American Studies (3 credits); AMST 603: Introductory Theories and History in American Studies (3 credits); AMST 898: Pre-Candidacy Research (3 credits); AMST 899: Doctoral Dissertation Research (12 credits) 3. Nine credits of AMST designated seminar courses are required, in addition to a three-credit methods seminar course. 4. 18 credits of specialization courses are required, with nine credits in each.
Students entering P.h.D. program with a Master's degree:
1. Minimum of 30 credits required, in addition to 12 credits of AMST 899: Doctoral Dissertation Research. 2. AMST 601: Introductory Theories and History in American Studies (3 credits); AMST 603: Introductory Theories and History in American Studies (3 credits); AMST 898: Pre-Candidacy Research (3 credits); AMST 899: Doctoral Dissertation Research (12 credits) 3. Nine credits of AMST designated seminar courses are required, in addition to a three-credit methods seminar course. 4. 12 credits of specialization courses are required, with six credits in each.

Ph. D. students complete at least 30 credit hours that are organized around two areas of specialization. Students must also pass two comprehensive examinations (one general, the other specialized) and, after submitting a detailed prospectus, write and defend an interdisciplinary dissertation that answers significant questions about American culture(s) and experiences, past or present.

Facilities and Special Resources: The Washington, D.C. and Baltimore areas offer extraordinary research facilities for the study of past and present Americans$rsquo; experiences and culture, including the Library of Congress, the National Archives, the Smithsonian’s many institutions, the National Park Service, the Maryland Historical Society, and the Walters Art Museum

and National Gallery, and other cultural institutions. The National Archives II, National Trust Library and Library of American Broadcasting are all located on the College Park campus. There are also numerous local and regional-focused museums, collections, archives, libraries, and "think tanks" that can support students' interests in issues and topics related to identity and difference and the cultures of everyday lfe. Through consortia arrangements with universities in the area, including George Washington University and Georgetown University, students may augment their programs with courses otherwise unavailable at the University of Maryland.

Financial Assistance: A limited number of teaching assistantships are available in addition to graduate fellowships. Students who hold assistantships typically teach two sections of AMST 201, Introduction to American Studies, or AMST 205, Material Aspects of American Life.

Contact Statement: Additional information on program offerings, degree requirements and financial aid can be obtained on the department's Web site **(http://www.amst.umd.edu)** and by writing to:

Animal Sciences (ANSC)

Graduate Degree Program
College: Agriculture and Natural Resources

Abstract
The Graduate Program in the Animal Sciences offers graduate study leading to the Master of Science and Doctor of Philosophy degrees. The master's degree program does not offer the non-thesis option. Faculty research interests include: 1) Cell, molecular and developmental biology studies, gene expression of the neuroendocrine system during growth and development, molecular genetics of metal and heme homeostasis in animals, maintenance of pluripotency and cell lineage determination in early embryos and embryonic stem cells, regulation of gene expression during embryonic patterning, neuro- and reproductive endocrinology in avian species, and virology, immunology and microbial pathogenesis of significance to animal agriculture; 2) Nutrition and intermediary metabolism of ruminants and non-ruminants, regulation of milk fat production in dairy cattle, modeling for nutrient management, nutrient management in avian and other monogastric species, including forage utilization in horses; nutritional immunology, nutrient sensing, metabolic homeostasis, companion and exotic animal nutrition; 3) Aquaculture related fish physiology and cryopreservation of germ cells, and; 4) Application of computational and systems biology to quantitative genetics, genomics, epigenetics, selection theory and breeding for the improvement of domestic animals and conservation genetics.

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Thesis only: 30 credits	Students are required to complete 24 credits of coursework with at least 12 credits in ANSC designated courses, and a minimum of 12 credits in courses numbered 600 or above. The plan of study should include courses in Biochemistry, Biometrics, and a course in Research Ethics. **Required courses include:** ANSC 698: Graduate Seminar (1 credit) ANSC 799: Master's Thesis Research (6 credits)

During the first semester, the student selects an Adviser and an Advisory Committee (AC) with the approval of the Program Graduate Education Committee. By the end of the second semester, with the AC's advice, students file a proposed schedule of courses (plan of study). Committees may require that students take remedial courses if they enter with inadequate prerequisites or deficiencies in undergraduate programs. Also, by the end of the second semester a thesis research proposal must be approved by the student's AC. Course requirements comprise at least one semester of Biochemistry (3 credits; typically BCHM 463), one semester of Biometrics (4 credits; typically BIOM 601), one credit of seminar (ANSC 698) and a course in Research Ethics. Additional credits of graduate coursework should result in a total of 24 credits, of which no more than 12 credits can be at the 400 level. Furthermore, a minimum of six hours of thesis research credit (ANSC 799) is required. Towards the end of their graduate studies, students must present the results and conclusions of their research in a public seminar and successfully defend their written thesis in a final oral examination, which is given by the AC. A final copy of the thesis must be submitted to the Program Office. Students with adequate undergraduate training usually complete the master's degree within two years.

Doctor of Philosophy (Ph.D.)

Core Requirements
1. All Ph.D. candidates must also meet the course requirements for the M.S. degree. 2. PhD students are required to take a total of two credits of seminar, one of which must be ANSC 698C. ANSC 698C is required of Ph.D. students even if it was taken while in the MS program. The ANSC seminars will be taken in non-consecutive semesters. 3. Before the end of the third semester, the student will also submit to his/her Advisory Committee a dissertation research proposal. 4. During the second year of study for the Ph.D. degree (or after approximately 80 percent of the Plan of Study has been completed), a written examination and an oral comprehensive examination are required for advancement to candidacy. 5. One semester of teaching experience (8-10 hours per week) are required during study for the Ph.D. degree. 6. Students must complete a minimum of 12 research credits by enrolling in ANSC 899: Doctoral Dissertation Research.

Ph.D. students with Master's degrees from other institutions are expected to meet the requirements indicated above for the ANSC M.S. degree. The M.S. degree is not a prerequisite but is advantageous for admission to the Ph.D. program. At least two credits of Seminar (with at least one in ANSC 698) and one semester of teaching experience (8-10 hours per week) are required during study for the Ph.D. degree. In addition, a minimum of 12 research credits is required. A plan of study and a research proposal must be filed with the approval of the student's Adviser and Advisory Committee (AC) by the end of the second semester. After no more than five semesters, the student must pass the Admission to Candidacy Examination, which consists of both written and oral components and is administered by the AC. Towards the end of their studies, the candidates present the results and conclusions of their graduate research in a public seminar and defend their research in an oral examination, which is adjudicated by the student's AC. In addition to successful defense of the dissertation, it is expected that the student will publish at least one paper in a refereed scientific journal, based on the dissertation research. A final bound copy of the dissertation must be submitted to the Program Office. The Ph.D. degree is usually completed within four to six years.

Facilities and Special Resources: The Department of Animal and Avian Sciences and the nearby Gudelsky Veterinary Center housing the Virginia-Maryland Regional College of Veterinary Medicine, have extensive facilities consisting of faculty research laboratories, animal holding areas, a campus farm, aquaculture facility and outlying research farms. Additionally, the department maintains two computer laboratories with 30 workstations in the teaching laboratory, and a smaller laboratory exclusively for the use of graduate students on a 24 hour basis.

The research laboratories comprise nearly 28,000 square feet for bench work, averaging over 1000 square feet per faculty member. Over 2800 square feet of cold room and 2000 square feet of freezer rooms are integral components of the research laboratories. The laboratories are fully equipped with state-of-the-art modern instrumentation and equipment for the entire range of research carried out by the faculty, e.g. research in biochemistry, cell-molecular biology, physiology, nutrition, behavior, virology, immunology, microbial pathogenesis etc. Individual laboratories are fully self-standing units, yet there is free exchange between laboratories having shared and collaborative interests. All the laboratories and offices are networked to the campus server for direct Internet access.

Nearly 15,000 square feet of space is dedicated for animal holding in the Animal Wing of the Animal Sciences Center. This facility is capable of handling all kinds of animals such as rodents, birds, fish and large animals for research in separate rooms. A new aquaculture facility, adjoining the Gudelsky Center, is also available. The Animal Wing is under the care of trained staff and is supervised by a professional veterinarian.
Other facilities, such as the Laboratory for Biological Ultrastructure, the Visual Imaging Center, the DNA Sequencing Laboratory,the Proteomics Core Facility, etc., are available to the faculty and students as part of the Central Core Facilities on the campus.

Off Campus Research Facilities include:-
1. University of Maryland/USDA-Beltsville Animal Biotechnology Facility
An 11,000 square foot cooperative facility for research in animal biotechnology at the Beltsville Agricultural Research Center. This Center includes laboratories specifically designed for research in cloning and transgenic biology. ANSC faculty engaged in nuclear cloning, stem cell and transgenic biotechnology may use this facility to investigate genes of significance for the growth, development and physiology of domestic animals.
2. Central Maryland Research and Education Center, Clarksville, MD
This 925-acre dairy research center, located ~25 miles from the campus, houses 200 head of Holstein dairy cattle including 110 milking cows and 90 head of young stock. ANSC faculty engaged in nutrition, reproduction, physiology, herd health, behavior and management research, conduct their experiments at this facility.
3. Applied Poultry Research Laboratory, Upper Marlboro, MD
This 202-acre facility is located approximately 20 miles from the campus. It is used for conducting research in nutrition, physiology and behavior.
4. Wye Beef Cattle Research Center
This 450-acre facility is located on Maryland’s Eastern Shore near Queenstown. It has 250 registered Angus beef cows plus young stock and bulls which are direct descendants of the Wye Angus herd. The facility is used to support research associated with beef cow-calf management, pasture management and growth physiology.

Financial Assistance: A number of graduate combined research/teaching assistantships are available and awarded to students who present strong academic records and a capability and motivation to perform well in teaching or in research assignments. These assistantships are awarded on a competitive basis. Appointments are on an annual basis, with reappointment contingent on demonstration of successful progress towards the degree. Assistantships are available for up to two years for the M.S. degree and four years for the Ph.D. degree. As assistantships are generally awarded for Fall admittance, applications should be completed by the January 15 deadline for consideration.

Contact Statement: For specific information on the program, admission procedures, or financial aid, see the ANSC website (http://ansc.umd.edu/graduate) or contact the ANSC graduate program office as listed below.

Anthropology (ANTH)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The Department of Anthropology offers graduate study leading to the Master of Applied Anthropology (MAA) and the Doctor of Philosophy (PhD) degrees. Both degrees reflect the department's special interest and expertise in the applications of anthropology. Current faculty members represent the subfields of the discipline (archaeology and socio-cultural anthropology). Drawing their intellectual and applied orientations from training and application of the above subdisciplines, the department's faculty also recognize the need to identify topics or problems where the expertise of individual faculty members can be applied in a manner that integrates the subdisciplines. In this ongoing effort, the faculty has identified three areas of research concentration: Anthropology of Health, Anthropology of Environment, and Anthropology of Heritage. The areas can be thought to contain and generate research problems of interest to the faculty's experience and expertise within the subdisciplines. These problems can be addressed individually through socio-cultural anthropology and archaeology. However, the anthropological contribution to addressing these problems is enhanced by collaboration across subdiscipline interests and expertise. The Master of Applied Anthropology (MAA) is a program designed both for students interested in an anthropology career outside of academia and for those who plan on continuing to a PhD. The program has been offered at the University of Maryland since 1984, and graduates have successfully secured employment or pursued doctoral work in a variety of fields, such as working in the areas of medical and health practice, urban and regional planning and development, community development, conservation and heritage resource development, cultural resource management, and historical archaeology. The focus of the MAA program has been to participate in the building of anthropological practice. A major focus of the Doctor of Philosophy (PhD) program is to direct research scholarship and to encourage theoretical and methodological advancement in such a way as to reflect upon the specific practices of anthropology, with the aim of improving those practices and thereby increasing the value and usefulness of the discipline. Doctoral students are typically prepared for research and development careers outside of academic settings, as well as for academic careers in anthropology departments and other disciplinary settings.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Writing Sample
- Faculty of Interest (suggested for Ph.D. applicants)

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	5 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	5 Jan

Other Deadlines: Please visit the program website at http://www.anth.umd.edu

Degree Requirements

Master of Applied Anthropology (M.A.A.)

Total Credits	Core Requirements
Non-thesis only: 42 credits	**Core courses:** ANTH 601: Applied Anthropology (3 credits) ANTH 606: Qualitative Methods in Applied Anthropology (3 credits) ANTH 760: Development of Social/Cultural Theory (3 credits) ANTH 722: Ecological Anthropology (3 credits) ANTH 630: Quantification and Statistics in Applied Anthropology (3 credits) ANTH 740: Anthropological Theories of the Past (3 credits) **Internship Sequence:** ANTH 701: Internship Preparation (3 credits) ANTH 789: Internship (6 credits) ANTH 712: Anthropology Internship Analysis (3 credits) **Supporting Coursework:** (12 credits)

The program requires 42 credit hours of coursework, including a core sequence (18 credit hours), an internship sequence (12 credit hours), and a sequence of individually approved courses that are related to a chosen domain of application (12 credit hours). MAA students must satisfactorily complete an internship proposal review with their advisory committee before beginning the internship, which is normally completed during the summer term between the first and second years of the program. Students are also required to present the results of their internship in a departmental colloquium prior to graduation. There is no thesis requirement.

Master of Applied Anthropology and Master of Historic Preservation (dual degree) (M.A.A. and M.H.P.)

The Applied Anthropology and Historic Preservation dual degree takes full advantage of the diverse coursework offered at the University's School of Architecture, Planning and Preservation and the Department of Anthropology, bringing together expertise in archaeology, vernacular architecture, ethnography, cultural resource management, heritage studies and social/cultural anthropology. A total of 66 credit hours are required for the MAA/MHP dual degree including an anthropology core sequence (21 credit hours), an anthropology internship sequence (12 credit hours), an historic preservation core sequence (30 credit hours), and additional elective credits (3 credit hours).

Doctor of Philosophy (Ph.D.)

Core Requirements
Students entering the doctoral program with a Bachelor's degree must complete 72 credits, including 12 credits of ANTH 899: Doctoral Dissertation Research. Students entering the doctoral program with a Master's degree are not required to complete the 12 credit-internship sequence, and must complete 60 credits. **Course Requirements:** ANTH 601: Applied Anthropology (3 credits)

ANTH 606: Qualitative Methods in Applied Anthropology (3 credits)
ANTH 760: Development of Social/Cultural Theory (3 credits)
ANTH 722: Ecological Anthropology (3 credits)
ANTH 630: Quantification and Statistics in Applied Anthropology (3 credits)
ANTH 740: Theories of the Past and Accomplishments of Archaeology (3 credits)
Approved Electives (12 credits)
Advanced Coursework (18 credits)
Internship Sequence:
ANTH 701: Internship Preparation (3 credits)
ANTH 789: Internship (6 credits)
ANTH 712: Anthropology Internship Analysis (3 credits)

Students entering the PhD from a Bachelor's degree must normally complete all the requirements for the MAA degree indicated above, although the internship sequence can be substituted with additional coursework under approved circumstances. An additional minimum of 30 credit hours of advanced coursework is required, to include at least 12 credit hours of dissertation research. For students entering the PhD program from the MAA, an additional minimum of 30 credit hours of advanced coursework is required, to include at least 12 credit hours of dissertation research. Students entering the PhD program with a master's degree from another institution are minimally required to complete the 18 credit-hour core sequence of the MAA program and an additional minimum of 30 credit hours of advanced coursework, to include at least 12 credit hours of dissertation research. These students are not normally required to complete the internship sequence, although in some cases their doctoral committee may decide that an internship may be appropriate to enhance a student's professional experience prior to graduation. Additional supportive coursework may be required on a case-by-case basis depending on the qualifications of the student. In such cases, these expectations will be specified upon admission to the PhD program. Substitutions for courses in the MAA core sequence are rarely permitted and must be approved by the Graduate Committee and the Department Chair. Students admitted to the PhD program advance to candidacy upon completion of a written comprehensive examination and an oral defense of their dissertation proposal. An oral defense upon completion of the dissertation is also required.

Facilities and Special Resources: The Department of Anthropology has four archaeology labs: the Archaeological Heritage Lab, a lab related to the Archaeology in Annapolis project, a lab related to Irish Rural Lifeways, and a Zooarchaeology lab. Additional research facilities include the Center for Heritage Resource Studies (CHRS), which conducts and supports basic and applied research in heritage resource studies, one Ecological Anthropology lab, a Human Complexity and Modelling lab, and the Immigrant Life Course Research Program.

Financial Assistance: A limited number of Departmental Fellowships and Teaching Assistantships are available to qualified graduate students. Part-time employment related to department research is occasionally available.

Applied Anthropology and Historic Preservation (AAHP)

Graduate Degree Program
College: Behavioral and Social Sciences / Architecture

Abstract
The University of Maryland's Dual degree Master's Program in Applied Anthropology and Historic Preservation is a holistic, comprehensive primer for a professional career in the research, understanding and preservation of cultural resources and heritage. The first of its kind in the United States, the new degree prepares students for the challenges—and increasing demand—of understanding, documenting and saving a wide range buildings, landscapes, sites and communities.

Why a Dual Degree?
Despite many overlapping themes, applied anthropology and historic preservation are very specific in their scope. Yet, as issues related to global heritage grow more complex, there is an increased demand for professionals who can transcend the multiple aspects of preservation and heritage. The new degree program positions students interested in pursuing a career in cultural heritage with a unique and competitive advantage; a comprehensive insight into both tangible heritage, such as architecture, artifacts and natural forms; and the intangible resources of society and culture. The experiential foundation offered by the two programs—including regional and international field studies, excavations and the use of LiDAR technology—offers the practical knowledge needed to succeed in an increasingly competitive and changing global market.
The Applied Anthropology and Historic Preservation dual degree takes full advantage of the diverse coursework offered at the University's School of Architecture, Planning and Preservation and the Department of Anthropology, bringing together expertise in archaeology, vernacular architecture, ethnography, cultural resource management, heritage studies and social/cultural anthropology. The establishment of the dual degree forwards the University's mission of continued educational development that fosters innovation and entrepreneurship, and addresses its commitment to reducing student debt through more affordable degree options.

Admissions Information
General Requirements:

- Statement of Purpose: In addition to the stated requirements, students should discuss specific interest in pursuing a concurrent dual degree within two programs.
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Portfolio
- Writing Sample of at least 10-30 pages. This can be previous individual academic or professional work. It does not necessarily have to be related to architecture and historic preservation, however a related topic is preferred. The writing sample should demonstrate the ability to analyze a problem/question and clearly communicate your findings. Upload to the *Writing Sample* of the *Uploads Requirements* section of the online application.
- Must be admitted by both programs to pursue dual degree.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Financial Assistance: The principal form of financial aid for students in this program consists of graduate assistantships related to research and outreach activities. Assistantships are offered by both Anthropology adn Historic Preservation, and consist of tuition remission as well as a stipend. In addition, the HISP Program awards--in conjunction with local non-profit Prince George's Heritage--the Prince George's Heritage Preservation Fellowship, an annual competitive award for a HISP student or students whose Prince George's County related project is judged to be especially outstanding. Additionally, there are possibilities for paid internships and paid part-time work with a variety of national and local organizations and governmental agencies.

Applied Economics (off-campus) (MPEC)
Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The off-campus version of the Master of Professional Studies in Applied Economics program (MPEC) is a professional master's degree program designed primarilly to enhance the professional development of applied economists. The program is not

designed to prepare students for PhD programs in economics. The program prepares students to work as analysts in government agencies, private firms and non-governmental organizations.

The MPEC program is an evening program with face-to-face classes in Washington, DC. The MPEC program operates on a quarter-term academic calendar. Students can complete the 10-course MPEC program in 15 months if they take 2 courses per quarter.
The MPEC program's curriculum is identical to that of the MPEM program, but the MPEM program is located on campus in College Park, and operates on the university's standard semester-based academic calendar.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (none)
- CV/Resume
- Introductory Macroeconomics course (grade of B or higher)
- Introductory Microeconomics course (grade of B or higher)
- Calculus (grade of B- or higher)

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland.

The MPEC program offers fall and spring admission. The application deadline for fall enrollment is June 15 and the application deadline for spring enrollment is December 15.

The MPEC program cannot issue the immigration documents necessary for international students to study (F1 or J1 student visas). The on-campus version of the program (the MPEM program) is able to sponsor international student visas. Citizens of foreign countries who currently reside in the U.S. on visas which permit them to undertake part-time study are welcome to apply to either the MPEC or the MPEM program, provided that they submit a copy of the valid visa and I-94 card.

The MPEC program's standard academic admissions requirements are: Overall GPA of at least 3.0 (on a 4-point scale), grades of at least B in introductory economics courses (micro- and macroeconomics) and a grade of at least B- in introductory calculus.

Students must upload PDF copies of their transcripts, a resume, and a brief personal statement. We do not require letters of recommendation, GRE scores or GMAT scores. Students whose prior academic degrees were all earned in non-English speaking countries must submit TOEFL or IELTS scores.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements
Master of Professional Studies (M.P.S.)

Total Credits	Core Requirements
Non-thesis only: 30 credits	**Core courses:** ECON 641: Microeconomic Analysis (3 credits) ECON 642: Topics in Applied Macroeconomics (3 credits) ECON 643: Empirical Analysis I: Foundations of Empirical Research (3 credits) ECON 644: Empirical Analysis II: Introduction to Economic Models (3 credits)

	ECON 645: Empirical Analysis III: Econometric Modeling and Forecasting (3 credits) **Choose 5 Field courses:** ECON 670: Financial Economics (3 credits) ECON 671: Economics of Health Care (3 credits) ECON 672: Program Analysis and Evaluation (3 credits) ECON 673: Information, Game Theory and Market Design (3 credits) ECON 674: Economic Analysis of Law (3 credits) ECON 675: Environmental Economics (3 credits) ECON 676: Economic Development (3 credits) ECON 683: International Macroeconomics and Finance (3 credits) ECON 684: Applied Time Series Analysis and Forecasting (3 credits)

The MPEC program emphasizes quantitative applied analysis. The curriculum includes all aspects of econometric modeling (including data collection, management and analysis) and incorporates hands-on STATA exercises into instruction. Courses provide students with rigorous training in economic reasoning, and the formulation and estimation of empirical economic models, with particular emphasis on using quantitative methods to evaluate policy proposals and programs. The 10-course program includes 5 'core courses' and 5 ‘field courses’. The 5 core courses include 2 applied theory courses (micro and macro) and a 3-course empirical analysis sequence. The field courses allow students to apply the tools learned in the core courses to specific fields of economics and public policy analysis.

Facilities and Special Resources: Classes are held in the evenings in our DC classroom space, 1400 16th Street NW, # 140.

Financial Assistance: The economics department does not offer fellowships or graduate assistantships to any of the students in the MPEC program. Domestic students in the program are eligible for the US Department of Education's Federal Unsubsidized Direct Loans and Federal Grad PLUS Loans. Some of our students also have their tuition paid, at least in part, by an employer or other 3rd party. The University's Financial Services Center provides Third Party Billing when the third party requires a bill from the university. More information about financial aid is available from the University of Maryland's Office of Student Financial Aid.

Contact Statement: The MPEC program coordinator is Eileen Kramer. DCmasters@econ.umd.edu (202) 525-4308.
The program's executive director is Dr. John Straub. Straub@econ.umd.edu (301) 405-3531

Financial Assistance: The economics department does not offer fellowships or graduate assistantships to any of the students in the MPEM program. Domestic students in the program are eligible for the US Department of Education's Federal Unsubsidized Direct Loans and Federal Grad PLUS Loans. Some of our students also have their tuition paid, at least in part, by an employer or other 3rd party. The University's Financial Services Center provides Third Party Billing when the third party requires a bill from the university.

After submitting their completed application, international applicants who require a student visa will be asked to complete a "Certificate of Finances" form. The form is designed to verify that international applicants have the resources necessary to finance their pursuit of our degree if they are accepted and choose to enroll.

More information about financial aid is available from the University of Maryland's Office of Student Financial Aid.

Applied Entomology (MPAE)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The Master of Professional Studies in Applied Entomology, a 30-credit, 10-course graduate program may be completed in as little as 15 months. Offered through the convenience and flexibility of the online learning environment, students enroll in two 3-credit courses per 12-week term. In addition to the MPS in Applied Entomology, the Department of Entomology developed several fully online graduate certificate programs. Designed to offer flexibility to complete coursework in areas specific to your needs and interests (as well as to gain a valuable credential), successful completion of one or more of these programs may be used to fulfill requirements for the MPS. Each 12-credit program may be completed in one year by taking one 3-credit course per 12-week term.The Graduate Certificate programs are as follows:
Graduate Certificate in Professional Studies in Beekeeping
Graduate Certificate in Professional Studies in Integrated Pest Management (IPM)
Graduate Certificate in Professional Studies in Organic and Sustainable Agriculture
Graduate Certificate in Professional Studies in Urban Agriculture

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (2)
- Bachelor's degree a biological field (exceptions can be made with work experience in a biological field and strong letters of recommendation)
- GPA of 3.0 or higher (expectations can be made with work experience in a biological field and strong letters of recommendation)

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland.
For complete Admission Information, please visit: https://oes.umd.edu/graduates-post-baccalaureates-professionals/professional-graduate-programs/graduate-programs-applied-entomology/apply
UMD cannot issue the immigration documents necessary for international students to study (F1 or J1 student visas) in this program. International students who currently reside in the U.S. on existing visas may apply. Eligible international students have additional requirements per the Office of International Student & Scholar Services (ISSS).Additional requirements can be found here: https://oes.umd.edu/graduates-post-baccalaureates-professionals/professional-graduate-programs/graduate-programs-applied-entomology/apply#International
For more admissions information or to apply to the program, please visit our Graduate School website: https://gradschool.umd.edu/admissions

Applied Mathematics & Statistics, and Scientific Computation (AMSC)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
The interdisciplinary program in Applied Mathematics & Statistics, and Scientific Computation (AMSC) offers graduate study leading to Master of Science and Doctor of Philosophy degrees with concentrations in applied mathematics, applied statistics, and scientific computation. It also offers a Certificate in Scientific Computation to graduate students enrolled in other university Ph.D. programs. The faculty is drawn from departments throughout the university. Possible areas of application include the physical, chemical, biological, and social sciences, and engineering. The program receives substantial support from the Department of Mathematics (MATH), the Center for Scientific Computation and Mathematical Modeling (CSCAMM), and the Institute for Physical Science and Technology (IPST). AMSC offers a spectrum of courses at the forefront of computation and applications, as well as state-of-the-art computational, visualization and networking facilities.

The Concentration in Applied Mathematics trains individuals who are able to enhance their understanding of a wide spectrum of scientific phenomena through the application of rigorous mathematical analysis. At least half of the required work is expected to be in courses with primarily mathematical content; the remaining courses must apply to a field outside of the usual mathematics curriculum in the student's chosen area of application. Graduate students currently pursue studies in the applications areas such as meteorology, fluid dynamics, algorithm development, pattern recognition, operations research, mathematical finance, computational dynamics, structural mechanics, mathematical biology, and systems and control theory. Other areas of study are available through participating departments. All students must include numerical analysis or scientific computing courses in their program of study.

The Concentration in Applied Statistics emphasizes acquisition of advanced training in the area of statistical application along with statistical topics and development of mathematical and computing skills necessary for the modern applied statistician. Students are required to take a series of core statistical and computational courses with more emphasis on data analytics and presentation skills. In addition, students will take a minimum of six credits in an outside application area.

The Concentration in Scientific Computation emphasizes the application of computation to the physical sciences, life sciences, engineering, business, and social sciences. Students will receive training in the use of computational techniques and technology with correspondingly less emphasis on formal mathematical methods in comparison to the Concentration in Applied Mathematics. Every Scientific Computation student is required to apply the training in computation to a problem in a specific scientific discipline.

A master's degree program in all concentrations with an emphasis on numerical analysis, computational methods, probability and statistics is excellent preparation for industrial or government employment.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Publications/Presentations
- GRE Subject (strongly recommended/not required)
- Advanced Textbooks: Textbooks of Advanced Technical Courses taken are to be submitted in the Advanced Textbooks section of online application. Please see the AMSC website for further details.

In addition to the Graduate School requirements, applicants are required to take the GRE general examination. The applicants are encouraged to take the GRE subject examination in either mathematics or another scientific topic. Applicants should have at least a "B" average (3.0 on a 4.0 scale) and should have completed an undergraduate program of study that includes a strong emphasis on rigorous mathematics, preferably through the level of advanced calculus and linear algebra.
Admission will be based on the applicant's ability to do graduate work in either applied mathematics, applied statistics, or scientific computation as demonstrated by the letters of recommendation, grades in coursework, and program of study. In some circumstances, a provisional admission may be given to applicants whose mathematical training is not sufficiently advanced. Previous education in an application area such as physics, biology, economics or one of the engineering disciplines, and a basic competence in computational techniques will be favorably considered in a student's application, although this is not a prerequisite.

When a student has decided upon an area of specialization, an advisory committee is formed and approved by the AMSC Graduate Committee. The advisory committee is responsible for formulating with the student a course of study that leads toward the degree sought. This course of study must constitute a unified, coherent program in an acceptable field of specialization of applied mathematics, applied statistics, or scientific computation.

For more admissions information, please visit http://www.amsc.umd.edu/join_us/index.html
To apply to the program, please visit our Graduate School website: https://gradschool.umd.edu/admissions

Degree Requirements
Master of Science (M.S.)

Core Requirements
Applied Mathematics concentration:
Thesis option requires 24 credits of coursework including 12 credits at the 600-800 level, 12 credits in courses with primarily math content, three credits in Numerical Analysis, one credit of Applied Math or appropriate seminar, and six credits in an application area. Students are also required to complete six credits of AMSC 799: Master's Thesis Research. **Non-thesis option** requires 30 credits of coursework including 18 credits at the 600-800 level, 15 credits with primarily math content, three credits in Numerical Analysis, six credits in an application area, and one credit of

Applied Math or appropriate seminar. Students are also required to submit a scholarly paper, and pass the master's level Qualifying Exam Requirement.
Applied Statistics concentration:
Thesis option requires 24 credits of coursework including 18 credits of statistics core courses, six credits in an application area, and one credit of seminar. Students are also required to complete six credits of AMSC 799: Master's Thesis Research. **Non-thesis option** requires 30 credits of coursework including 18 credits of statistics core courses, six credits in an application area, six credits of electives, two credits of seminar, and one credit of AMSC 762: Data Analysis Project. Students are also required to pass three qualifying exams, and submit a scholarly paper.
Scientific Computation concentration:
Thesis option requires 24 credits of coursework including nine credits of scientific computing core courses, six credits of core science courses, and three credits of scientific computing application courses. Students must also complete six credits of AMSC 799: Master's Thesis Research. **Non-thesis option** requires 30 credits of coursework including 15 credits of scientific computing core courses, six credits of core science courses, three credits of scientific computing application courses, and six credits of electives. Students must also submit a scholarly paper.

Doctor of Philosophy (Ph.D.)

Core Requirements
Applied Mathematics concentration:
Students are required to complete 18 credits of courses with mathematical content with at least nine credits at the 600-898 level, and three credits in Numerical Analysis. Additional course requirements include six credits in an application area, nine credits of electives, two credits of approved seminars, and 12 credits of AMSC 899: Doctoral Dissertation Research.
Applied Statistics concentration:
Students are required to complete 18 credits of statistics core courses, six credits of application courses, three credits of electives, three credits of AMSC 760: Applied Statistics Practicum, two approved seminar or RIT courses, a one credit data project, and 12 credits of AMSC 899: Doctoral Dissertation Research.
Scientific Computation concentration:
Students are required to complete 15 credits of scientific computing core courses, six credits of core science courses, six credits of scientific computing application courses, nine credits of electives, and 12 credits of AMSC 899: Doctoral Dissertation Research.

For the Ph.D. degree, the student must fulfill the coursework requirement of the corresponding concentration and/or pass a set of comprehensive written examinations at the Ph.D. level. In addition, the student must pass the Oral Candidacy Examination, which tests the student on advanced material to determine if he or she is prepared to do the research for a doctoral dissertation.

Details on the level and distribution of coursework and examinations in mathematics and in the applications area are given on the program web site: http://www.amsc.umd.edu/programs/index.html

Facilities and Special Resources: There are over 25 participating departments and institutes on the College Park campus, including units in the College of Computer, Mathematical, and Natural Sciences and the School of Engineering. The university has an engineering technical library as well as a network of high performance workstations for faculty and graduate students. In addition, there are collaborations with various area research institutes such as NASA Goddard Space Flight Center, National Institutes of Health, National Institute of Standards and Technology, Naval Research Laboratory, and National Oceanic and Atmospheric Administration.

Financial Assistance: The program offers teaching assistantships in the Department of Mathematics as a source of support for graduate students. These assistantships carry a stipend with remission of tuition of up to 10 credit hours each semester. Research

assistantships are also available through participating departments and other sources, especially for students that have acquired advanced training. Assistantships are usually available only to incoming Ph.D. students; applications including letters of recommendation should be completed by January 10 for full consideration.

Contact Statement: For more specific information, visit the program FAQ or email amsc@amsc.umd.edu.

Architecture (ARCH)

Graduate Degree Program
College: Architecture

Abstract
The School of Architecture, Planning and Preservation offers a graduate program leading to the National Architectural Accrediting Board (NAAB) accredited Master of Architecture degree. The Architecture Program (ARCH) seeks to change the world through innovative architectural and urban design pedagogies, research, and practice that transforms place at all scales and improves the quality of life. In the course of our mission, we instigate change through teaching, experience, and scholarly activity, which prepares the next generation of broadly educated, highly-skilled architects and designers to be problem seekers/solvers in collaborative learning and professional environments. The Program offers a rich and demanding mix of architectural and urban design studios, architectural history and theory, and architectural science and technology. Electives in architecture and related fields are available in the curriculum.

NAAB Required Statement on Accreditation:
In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may require a pre-professional undergraduate degree in architecture for admission. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The University of Maryland School of Architecture, Planning & Preservation offers NAAB-accredited degree programs:
M.Arch (pre-professional degree + 60 graduate credits)
M.Arch (non-pre-professional degree + 105 credits)
Next accreditation visit for both programs: 2017
The School is a member of the Association of Collegiate Schools of Architecture (ACSA) and the Architectural Research Centers Consortium (ARCC).

Admissions Information

General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Portfolio

Admission to the graduate program is competitive. In addition to the Graduate School requirements, candidates must submit a portfolio. The portfolio should show evidence of creative ability in the form of a portfolio containing reproductions of creative work, which may include drawings, paintings, photographs, sculpture, sketches, and/or architectural designs. Details concerning format and content may be obtained from the School of Architecture, Planning and Preservation website

Applications from four categories will be considered for admission:
1) candidates with a four-year Bachelor of Science in architecture degree;
2) candidates with four-year baccalaureate (B.A.) in architecture, environmental design (B.A. or B.S.), or relevant discipline; and
3) candidates with four-year baccalaureate (B.A. or B.S.) in a major other than architecture who have successfully completed specified undergraduate prerequisites outlined by the School of Architecture, Planning, and Preservation*; and
4) candidates with an accredited professional degree in architecture. Students are expected to enroll on a full-time basis. For complete information on curricula requirements for these categories, visit the School of Architecture, Planning and Preservation website.

*Additional requirements include:
one (1) semester of college level calculus or successful high school advanced placement (AP) calculus; and
one (1) semester of college level physics with lab, or successful high school advanced placement (AP) in physics
One (1) course in freehand figurative drawing is recommended but not required.
For more admissions information or to apply to the program, please visit our Graduate School website: https://gradschool.umd.edu/admissions

ARCH Seminars (6 credits)	Electives (12 credits)
ARCH 798: Thesis in Architecture (3 credits)	ARCH 799: Master's Thesis Research (6 credits)

Students entering the program with a four-year Bachelor of Science degree in Architecture from an accredited college or university normally require two years of graduate study to complete the requirements for the professional Master of Architecture degree. The established curriculum requires four semesters of academic work encompassing a total of 60 credits. Additional credits may be required depending upon the admissions committee's evaluation of the individual's academic and architectural experience. Information on required courses and curriculum may be obtained from the School of Architecture, Planning and Preservation website at http://www.arch.umd.edu.

Students who enter the professional program with a B.A. or B.S. in a discipline other than architecture will normally require seven semesters of design studio and other prerequisite courses encompassing a total of 105 credits. Students may be granted advanced standing if they have completed the appropriate prerequisites. Information on required courses and curriculum may be obtained from the School of Architecture, Planning and Preservation website at http://www.arch.umd.edu.

A Graduate Certificate in Historic Preservation is available to M. Arch and M.S. in Arch candidates. The course of study includes 16 credits of required courses.

A Graduate Certificate in Urban Design is available to M. Arch and M.S. in Arch candidates. The course of study includes 15 credits of required courses.

Master of Science (M.S.)

Total Credits	Core Requirements	Specialization Options
Thesis only: 30 credits	ARCH 700: Urban Design Studio VII (6 credits) ARCH 797: Thesis Proseminar (3 credits) ARCH 798: Thesis in Architecture (3 credits) ARCH 799: Master's Thesis Research (6 credits) ARCH Elective (3 credits) Electives (9 credits)	N/A

A special option leading to the Master of Science in Architecture degree is available for those students who already possess an accredited NAAB professional degree in architecture (B.Arch. or M. Arch.) or its foreign equivalent. This option is designed to accommodate the needs of students who wish to do advanced work beyond that required for the professional degree. Applicants must specify in detail the nature of the proposed course of study for review and approval by the admissions committee prior to their admission. The School currently provides resources for advanced work in architectural design and urban design.

Facilities and Special Resources: The School of Architecture, Planning, and Preservation is ideally located between Washington, DC, and Baltimore and surrounded by a number of historic communities and a varied physical environment. The resulting opportunity for environmental design study is unsurpassed. The School’s resources include design workstations for each student, a model shop, a digital fabrication lab, and computer labs. The School’s library contains some 57,000 monographs and 6,000 current periodicals, making it one of the major architectural libraries in the nation. The National Trust Library for Historic Preservation, housed in McKeldin Library, contains 11,000 volumes and 450 periodical titles. The slide collection includes approximately 430,000 slides on architecture, landscape architecture, planning, and technical subjects. The

interdisciplinary National Center for Smart Growth Education and Research is based in the School offering perspectives and opportunities to engage important issues facing urban and regional planning.

The Architecture Program benefits from the strong support of the professional community, including practitioners who bring expertise into the architectural design studios as instructors, consultants, and critics. Many alumni are leaders in regional firms, while others practice as far away as New York, Los Angeles, Puerto Rico, Vancouver, London, and Shanghai.
The University of Maryland's team has won the ULI/Hines Competition several times, with each member of the team being awarded $10,000.

The award-winning Comprehensive Design Studio and Advanced Technology sequence (an integral component of the M. Arch curriculum) offers an innovative teaching-learning environment where students work with an array of consultants from practice, exploring relationships between conceptual and technical aspects of architectural form and its assembly.
Embracing the importance of context as an integral component of the design process and advocating urban design as an essential component of architectural education, the Program has gained national and international recognition for its work in urban design, through awards and competition performance. Interdisciplinary competitions like the Urban Land Institute (ULI) Hines Urban Design Competition give architecture students opportunities to team up with fellow graduate students in planning, historic preservation, and real estate development to address urban issues in a work environment that prepares them for the collaborative experience of professional practice. In both 2014 and 2015 the University of Maryland's ULI-Hines competition team took first place in international competition bringing back over $50,000 in scholarship monies each time. The Urban Design Studio explores relationships between individual buildings, urban spaces, and the contexts in which they reside. Studios engage projects ranging from conceptual urban interventions to projects that help communities to envision future growth.
Study abroad opportunities augment the course of study offered in College Park. Summer and Winter study abroad programs are offered to a variety of locations including Rome, Paris, Scandinavia, Great Britain, Turkey, St. Petersburg, Egypt, Peru, and Sri Lanka. Summer and winter study opportunities are also available in conjunction with the Historic Preservation, Urban Studies & Planning, and Real Estate Development programs. A Spring Semester study abroad program is available in Florence.

Financial Assistance: The School of Architecture, Planning, and Preservation offers a limited and varying number of teaching and research assistantships, scholarships, fellowships, and internships. Applicants should apply for financial assistance when submitting the application for admission**.**

Contact Statement: Find additional information on program offerings, degree requirements, admissions, and financial aid on the School's Website (www.arch.umd.edu). Schedule a visit and tour online at: http://arch.umd.edu/arch/prospective-students-arch. Sign up to receive an invitation to our Graduate Open House and recieve more information online at: http://arch.umd.edu/mapp/graduate-inquiry-form.

Architecture and Community Planning (ARCP)

Graduate Certificate Program
College: Architecture

Abstract

The dual degree combines course work from the Architecture and Urban Studies and Planning programs to enable a student to complete both the Master of Architecture and Master of Community Planning degrees with fewer credits than it would take to complete the two separately.

Students of the dual-degree program acquire specialized knowledge tailored to understanding the urban environment from several perspectives. Students learn how social, economic and political forces have led to the development of human habitats. The emphasis on urban design in the dual-degree program yields an education that is particularly applicable for persons interested in the revitalization of metropolitan areas and their center cities.

Applicants for the dual degree in Architecture and Community Planning should use the following four-letter code on the online application: ARCP

Architecture and Historic Preservation (ARHP)

Architecture and Historic Preservation
Graduate Certificate Program
College: Architecture
Admissions Information
General Requirements:

- Statement of Purpose: In addition to the stated requirements, students should discuss specific interest in pursuing a concurrent dual degree within two programs.
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)

- Graduate Record Examination (GRE)
- CV/Resume
- Portfolio
- Writing Sample of at least 10-30 pages. This can be previous individual academic or professional work. It does not necessarily have to be related to architecture and historic preservation, however a related topic is preferred. The writing sample should demonstrate the ability to analyze a problem/question and clearly communicate your findings. Upload to the *Writing Sample* of the *Uploads Requirements* section of the online application.
- Must be admitted by both programs to pursue dual degree

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	17 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	17 Jan

Other Deadlines: Please visit the program website at http://www.arch.umd.edu

Degree Requirements

Master of Architecture and Master of Historic Preservation (dual degree) (M.Arch. and M.H.P.)

Core Requirements

Path A: Advanced Standing Professional Degree Program (78 credits)

ARCH 600: Comprehensive Design Studio (6 credits)	ARCH 611: Advanced Technology (3 credits)
ARCH 601: Topical Design Studio (6 credits)	ARCH 460: Site Analysis and Design (3 credits)
ARCH xxx: Architectural History Elective (3 credits)	ARCH 700: Advanced Urban Design Studio VII (6 credits)
ARCH xxx: Elective (3 credits)	ARCH 770: Professional Practice (3 credits)
ARCH 797: Thesis Proseminar (3 credits)	ARCH 798: Thesis (3 credits)
ARCH 799: Thesis Research (6 credits)	RDEV 688E: Managing Differences, Negotiating Agreements (3 credits)
HISP 600: Introduction Seminar in Preservation (3 credits)	HISP 611: Historic Research Methods (3 credits)
HISP 630: Preservation and Planning Policy (3 credits)	HISP 640: Preservation Law (3 credits)
HISP 650: Studio (6 credits)	HISP 655: American Vernacular Architecture (3 credits)
HISP 660: Internship (3 credits)	HISP 670 Conservation of Historic Buildings (3 credits)
HISP 680: Preservation Economics (3 credits)	**78 credits total**

Path B: For students with a Baccalaureate outside of Architecture (126 credits) * Active Spring 2017

ARCH 404: Graduate Architecture Design Studio I (6 credits)	ARCH 405: Graduate Architecture Design Studio II (6 credits)
ARCH 406: Graduate Architecture Design Studio III (6 credits)	ARCH 407: Graduate Architecture Design IV (6 credits)
ARCH 425: History of Architecture I (3 credits)	ARCH 426: History of Architecture II (3 credits)
ARCH 443: Visual Communication for Architects (3 credits)	ARCH 445: Visual Analysis of Architecture (3 credits)
ARCH 460: Site Analysis and Design (3 credits)	ARCH 462: Methods & Materials of Building Construction (3 credits)
ARCH 463: Sustainable Systems in Architecture (3 credits)	ARCH 464: Architectural Structures I (3 credits)

ARCH 465: Architectural Structures II (3 credits)	ARCH 466: Environmental Systems in Architecture (3 credits)
ARCH 600: Integrated Design Studio V (6 credits)	ARCH 601: Topical Design Studio VI (6 credits)
ARCH 611: Advanced Architecture Technology (3 credits)	ARCH 654: Urban Development and Design Theory (3 credits)
ARCH 770: Professional Practice of Architecture (3 credits)	ARCH 797: Thesis Proseminar (3 credits)
ARCH 798: Thesis in Architecture (3 credits)	ARCH 799: Master's Thesis Research (6 credits)
ARCH 6xx: Architecture Elective (3 credits)	ARCH 6xx: Architecture Seminar (3 credits)
HISP 600: Introductory Seminar in Historic Preservation: Theory, History and Practice (3 credits)	HISP 611: Historical Research Methods (3 credits)
HISP 630: Preservation Policy and Planning (3 credits)	HISP 635: Social and Ethnic Issues in Historic Preservation Practice (3 credits)
HISP 640: Historic Preservation Law, Advocacy and Public Policy (3 credits)	HISP 650: Historic Preservation Studio Workshop (6 credits)
HISP 655: American Vernacular Architecture (3 credits)	HISP 660: Internship in Historic Preservation (3 credits)
HISP 670: Conservation of Historic Places: Historic Materials, Building Systems, and Conservation (3 credits)	HISP 680: Preservation Economics (3 credits)

The dual degree combines course work from the Architecture and Historic Preservation programs to enable a student to complete both the Master of Architecture and Master of Historic Preservation degrees with fewer credits than it would take to complete the two separately.

Website: http://www.arch.umd.edu

Architecture and Real Estate Development (ARDV)

Graduate Degree Program
College: Architecture

Abstract
There are several paths, depending on prior education and experience for applicants to consider for Architecture as well as for Real Estate Development. Students applying for the dual degree program will complete fewer courses (permitted overlap of courses) than if they took each degree program separately. The total number of credits for the dual degree is 75 credits for Path A architecture/real estate development dual degree students (those with undergraduate degree credits fully accepted) and is 127 credits for Path B architecture/real estate development dual degree students (those without an undergraduate degree in architecture). For the most complete information on the architecture program, also consult the catalog entry for ARCH. For the most complete information on the real estate development program, also consult the catalog entry for RDEV.

Admissions Information

General Requirements:

- Statement of Purpose: In addition to the stated requirements, students should discuss specific interest in pursuing a concurrent dual degree within two programs.
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Portfolio
- Writing Sample of 3-5 pages in business style writing related to real estate. This can be previous individual academic or professional work. Any confidential information should be redacted.

The application process consists of the following:
First, fill out the online application for the University of Maryland Graduate School. The administrative code for the dual degree in Master of Architecture degree and Master of Real Estate Development is "ARDV."

Second, submit all transcripts, three professional letters of recommendation, statement of purpose, resume, official test scores, portfolio, and writing sample as part of the application.
All applicants must have a bachelor's degree from an accredited institution. There is no restriction on the applicant's previous field of study, and indeed we encourage diversity in all senses.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	17 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	17 Jan

Other Deadlines: Please visit the program website at http://www.arch.umd.edu

Degree Requirements

Master of Architecture and Master of Real Estate Development (dual degree) (M.Arch. and M.R.E.D.)

Core Requirements	
Path A: Advanced Standing for students with a pre-professional degree in Architecture (75 credits)	
ARCH 600: Integrated Design Studio V (6 credits)	ARCH 611: Advanced Architecture Technology Seminar (3 credits)
ARCH 654: Urban Development and Design Theory (3 credits)	ARCH 601: Topical Design Studio VI (6 credits)

ARCH 600: Integrated Design Studio V (6 credits)	ARCH 601: Topical Design Studio VI (6 credits)
ARCH 611: Advanced Architecture Technology (3 credits)	ARCH 654: Urban Development and Design Theory (3 credits)
ARCH 770: Professional Practice of Architecture (3 credits)	ARCH 797: Thesis Proseminar (3 credits)
ARCH 798: Thesis in Architecture (3 credits)	ARCH 799: Master's Thesis Research (6 credits)

ARCH 6xx: Architecture Elective (3 credits)	ARCH 6xx: Architecture Seminar (3 credits)	
RDEV 688-689: Introduction to Real Estate Development: Principles, Process, and Practice (3 credits)	RDEV 688-689: Introduction to Real Estate Development: Finance (3 credits)	
RDEV 688-689: Development Law (3 credits)	RDEV 630: Fundamentals of Real Estate Development and Finance (3 credits)	
RDEV 688I: Capstone (3 credits)	RDEV xxx: Elective (3 credits)	
Cognate Courses: (15 credits)	**126 credits total**	

Students entering the program with a four-year Bachelor of Science degree in Architecture from an accredited college or university normally require two years of graduate study to complete the requirements for the professional Master of Architecture degree (Path A). The dual degree curriculum requires 75 credits which can be completed in five semesters plus one Summer and one Winter term course. Additional credits may be required depending upon the architectural admissions committee's evaluation of the individual's academic and architectural experience. Information on required courses and curriculum may be found on the School of Architecture, Planning, and Preservation website at http://www.arch.umd.edu.
Students who enter the professional program with a B.A. or B.S. in a discipline other than architecture (Path B) will normally require eight semesters plus course work in 2 summer and two winter terms in order to complete the 126 credits required for the dual degree in architecture and real estate development. Students may be granted advanced standing if they have completed certain of the required architecture prerequisites. Information on required courses and curriculum may be found on the School of Architecture, Planning, and Preservation website at http://www.arch.umd.edu.

Facilities and Special Resources: The School of Architecture, Planning and Preservation and the Colvin Institute of Real Estate Development are ideally located between Washington, DC, and Baltimore and surrounded by a number of historic communities and a varied physical environment. The resulting opportunity for real estate development and environmental design study is unsurpassed.

The School’s resources include design workstations for each architecture student, a model shop, a digital fabrication lab, and both PC and MAC computer labs with REVIT, ARGUS, GIS, Maptitude and other design programs available. The School’s library contains some 57,000 monographs and 6,000 current periodicals, making it one of the major architectural libraries in the nation. The National Trust Library for Historic Preservation, housed in McKeldin Library, contains 11,000 volumes and 450 periodical titles. The Colvin Institute holds the entire library offerings of the Urban Land Institute and access to all the case studies published by ULI. The interdisciplinary National Center for Smart Growth Research and Education, based in the School, offers perspectives and opportunities to engage important issues facing urban and regional planning.
Both the Real Estate Development and Architecture Programs benefit from the strong support of the professional community, including practitioners who bring expertise into the architectural design studios as instructors, consultants, and critics. The RDEV courses are all taught by working or retired real estate professionals giving unparalleled access for students to make connections with current practice in the industry. Many architecture alumni are leaders in regional firms, while others practice as far away as New York, Los Angeles, Puerto Rico, Vancouver, London, and Shanghai.
The ULI Hines competition is open to graduate students who are pursuing real estate-related studies at universities in the United States and Canada, including programs in real estate development, urban planning, urban design, architecture and landscape architecture. In the past six years, the University of Maryland has reached the ULI Hines finals four times, won twice (2014 & 2015) and received one honorable mention.

The award-winning Comprehensive Design Studio and Advanced Technology sequence (an integral component of the M. Arch curriculum) offers an innovative teaching-learning environment where students work with an array of consultants, exploring relationships between conceptual and technical aspects of architectural form and its assembly.
Embracing the importance of context as an integral component of the design process and advocating urban design as an essential component of architectural education, the Program has gained national and international recognition for its work in urban design, through awards and competition performance. Dual degree students are prime candidates for selection to participate in the interdisciplinary competitions supported by the School, including the national ULI Hines, the regional REIDO development competition, and the local capital area competition sponsored by NAIOP which gives the team the opportunity to present a urban (re)development solution to a large professional audience of real estate and design professions.
Study abroad opportunities augment the course of study offered in College Park. Summer study abroad programs are offered to a variety of locations including Rome, Paris, Scandinavia, Great Britain, Turkey, St. Petersburg, Egypt, Peru, and Sri Lanka. Summer and winter study opportunities are also available in conjunction with the Historic Preservation, Urban Studies & Planning, and Real Estate Development programs. A Spring Semester study abroad program is based at Kiplin Hall in Great Britain.

Dual degree students have the option to do their M.Arch thesis and MRED Capstone project in a combined fashion, with a design and development proposition supported by a committee of design and development instructors and professional advisors. These are very challenging and rewarding for students and faculty alike, but require a fair amount of advance planning on the part of both the student and faculty.

Financial Assistance: The School of Architecture, Planning, and Preservation offers a limited and varying number of teaching and research assistantships, scholarships, fellowships, and internships. Applicants should apply for financial assistance when submitting the application for admission.

The Colvin Institute provides scholarship funds to a number of highly qualified students, who may be dual degree students each term. Scholarship determinations are made at the time of application and admission. Scholarships are generally awarded on a per course basis and commitments are made at the time of admission and apply to the entire program, subject to academic performance. Periodically there are named scholarships provided by various real estate organizations or development companies. In addition, there are work opportunities both on, and off campus, and they are relatively plentiful. However, students in the dual degree program may find it impossible to complete their degree requirements timely if they are working off campus, or more than 10 hours per week. However, the MRED student listserv posts openings periodically as they are brought to the attention of the Program by alumni, friends, faculty and sponsors.
Applicants should inquire as to the availability of funding for the term they are starting. Colvin Institute scholarships are typically for a portion of tuition only, and are paid on a per course basis as students progress through the program.

Contact Statement: Find additional information on program offerings, degree requirements, admissions, and financial aid on the School's Web site (www.arch.umd.edu).

Schedule a visit and tour online at: http://arch.umd.edu/arch/prospective-students-arch. Be sure to contact the Program Director for Real Estate Development, Margaret McFarland, (mmcf@umd.edu) if you wish to attend a sampling of RDEV classes while here.

Sign up to receive an invitation to our Graduate Open House online at: http://arch.umd.edu/mapp/graduate-inquiry-form

Relationships: Historic Preservation (HISP)

Art History and Archaeology (ARTH)

Graduate Degree Program
College: Arts and Humanities

Abstract
The Department of Art History and Archaeology offers graduate study leading to the Master of Arts and Doctor of Philosophy degrees in Art History. The Program is committed to the advanced study and scholarly interpretation of works of art from the prehistoric era to the present and is grounded in the concept of art as a humanistic experience. The faculty offers expertise in all phases of the history of Western art as well as the arts of Africa, the Americas, and East Asia.

Admissions Information

General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Writing Sample (could be a research paper)
- Publications/Presentations
-

For admission to the Master's program, students should have an undergraduate degree from an accredited college or university, or its equivalent. Although the applicant must demonstrate a general knowledge of art history, an undergraduate major in art history is not required. Students are required to submit the Graduate Record Examination scores for admission.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	15 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Dec

Other Deadlines: Please visit the program website at http://www.arthistory.umd.edu

Degree Requirements

Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis only: 30 credits	ARTH 692: Methods of Research (3 credits) ARTH 799: Master's Thesis Research (6 credits) Seven graduate colloquia or seminars (3 credits each) including one course from each of the four topic areas: 1. Art before 1800 (Chronological area) 2. Art after 1800 (Chronological area) 3. Art oustide Europe and the USA (Geographical area) 4. Art from Europe and/or the USA (Geographical area) * A single course may fulfill one of the chronological areas as well as one of the geographic areas. No one course, however, can fulfill both of the chronological topic areas or both of the geographic areas.

For the Master's degree, the student will: complete 30 credit hours at the 600 and 700 levels (at least 9 of these credits must be 700 level seminars; 6 are for thesis research; and one course must be ARTH 692, Methods of Art History); pass the departmental language examination in French or German, or in a language appropriate to the area studied (such as Japanese); complete a thesis

that demonstrates competency in research and in original investigation; and successfully defend the thesis. Please consult the department's web site for information regarding course distributional requirements. A minimum grade of “B-” is required for all courses approved for graduate credit. Two grades below “B-” result in automatic dismissal from the program.

Doctor of Philosophy (Ph.D.)

Core Requirements
1. Students are required to complete 33 credits after the M.A. degree, including 12 credits of ARTH 899: Doctoral Dissertation Research and 21 credits of coursework. The 21 credits should include ARTH 692: Methods of Research if not previously taken. 2. Students who bypass the M.A. and enter directly into the doctoral program are required to complete 57 credits, including 12 credits of ARTH 899: Doctoral Dissertation Research and 45 credits of coursework. The 45 credits should include ARTH 692: Methods of Research. For coursework distributional requirements, please see the M.A. core requirements. 3. All doctoral students must pass two foreign language exams (one of these could have been taken as an M.A. student), submit a successful request for approval of doctoral exam topics, pass both the written and oral doctoral exams, successfully defend a dissertation proposal, and successfully defend a dissertation.

A total of thirty-three credit hours, after the M.A. degree, is required for the Ph.D. program. This involves seven courses (21 credit hours), including Methods of Research (ARTH 692) if not previously taken; the final twelve credit hours will be Dissertation Research (ARTH 899). For the direct Ph.D.--in which the M.A. degree is bypassed--the student must complete a total of fifty-seven credit hours, including Methods of Research (ARTH 692) and fourteen other courses; the final twelve credit hours will be Dissertation Research (ARTH 899). For coursework distributional requirements, see the department's web page. A minimum grade of "B-" is required for all courses approved for graduate credit. Two grades below "B-" result in dismissal from the program.

Facilities and Special Resources: The Michelle Smith Collaboratory for Visual Culture, part of the Department of Art History and Archaeology, is designed to foster innovation in teaching and research by combining cutting-edge visual technology with an environment that encourages collaboration among faculty, students, and external scholars. The Collaboratory combines space for work and for meetings with advanced technology and helpful staff to provide a venue in which teachers and students can gather to work, share ideas, and find the resources necessary to explore new technologies and pursue intellectual interests, as well as to promote the department’s teaching curriculum. The Department maintains its own Lloyd and Jeanne Raport study collection of some 130 objects from ancient Egypt, Greece, Rome, and the Ancient Americas.

The University Art Gallery, also located in the Parren J. Mitchell Art-Sociology Building, maintains a lively and varied exhibition schedule and has a permanent collection of twentieth-century American prints, drawings and paintings, collections of Japanese prints, and African objects.

The Art Library houses approximately 100,000 volumes as well as a vast body of auxiliary material, including about 70,000 sheets of microfiche. In addition to the University’s library resources, graduate students have access to the Library of Congress, the Archives of American Art, the libraries of Dumbarton Oaks, and other research facilities in Washington.
The University of Maryland is located in the suburbs of Washington, D.C., and is 30 minutes from the National Gallery of Art and the National Gallery’s Center for Advanced Study in the Visual Arts, the Corcoran Gallery, the Phillips Collection, the Hirshhorn Museum and Sculpture Garden, the Smithsonian American Art Museum, the Museum of African Art, the Freer and Arthur M. Sackler Galleries, which are devoted to the art of East Asia, the National Museum of Women in the Arts, and many other major art museums. The campus is a 40-minute drive from such Baltimore institutions as the Walters Art Gallery and the Baltimore Museum of Art.

In order to enhance the student’s curricular choices, the Department maintains an arrangement for course exchange with the Art History department of the Johns Hopkins University in Baltimore. To similar effect, the Department is a member of the Washington Area Art History Consortium, which unites the graduate art history departments of the greater Washington area. The Department organizes a variety of liaison activities with leading cultural institutions in the Washington-Baltimore area. The Middle Atlantic Symposium in the History of Art is sponsored jointly by the Department and the National Gallery of Art; this annual event provides the opportunity for advanced graduate students from universities in the Middle Atlantic region to present their research at a professional forum. Special seminars are frequently given by curators of such local collections as the National Gallery of Art, the Freer Gallery, or the Department of Prints and Photographs at the Library of Congress.

Financial Assistance: Fellowships are awarded on the basis of merit by the College of Arts and Humanities and by the Graduate School. Several graduate assistantships are awarded by the Department. Also, up to four Museum Fellowships are awarded each year by the Department of Art History and Archaeology for research at major museums in the Washington-Baltimore area. In

honor of its late founding chairman, the Department has established the George Levitine Art History Endowment, in support of research activities of graduate students as well as faculty. The Jenny Rhee Fellowship supports research, travel, and other educational expenses. The Department has recently received a generous gift from the Robert H. Smith family which includes three graduate fellowships. Additional fellowships are available, including travel and dissertation research awards.

Contact Statement: For more information on Departmental requirements and any other information, please view the Department's web-site, or contact the Department's Director of Graduate Studies or Coordinator of Graduate Studies.

Art Studio (ARTT)

Graduate Degree Program
College: Arts and Humanities

Abstract
The Department of Art offers a program of graduate study leading to the Master of Fine Arts degree. The program emphasizes independent and interdisciplinary work. The Graduate Faculty consists of 15 active professional artists specializing in a range of studio and post-studio practices, including painting/drawing, sculpture/installation, printmaking, digital and time-based media. The program is small and competitive, and most students receive support in the form of graduate fellowships and assistantships, which include teaching and after-hours studio monitoring.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- CV/Resume
- Digitial Submission: 15-20 digital images, website/software or videos/videos documentation indicative of current artistic practice, uploaded to umdart.slideroom.com, $10 supplemental application fee

To apply to the MFA Program applicants are encouraged to complete the Graduate School application available online at https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=umdgrad. Applicants are also required to pay the requisite appliation fee.

For admission to the graduate program, The Department of Art requires an undergraduate degree with a major in art from an accredited college or university, or its equivalent. A minimum of 30 credit hours of undergraduate work in studio courses and 12 credit hours in art history courses is recommended.

The MFA Degree is the final degree in studio art. Only the highest level of undergraduate artistic achievement is appropriate for graduate application. The Department of Art seeks students who have developed coherent bodies of work that are personal and focused. This body of art work, as professionally documented on CD's, Videos or websites is the primary basis for admittance. For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	17 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	17 Jan

Other Deadlines: Please visit the program website at http://www.art.umd.edu

Degree Requirements
Master of Fine Arts (M.F.A.)

Total Credits	Core Requirements
Thesis option only: 60 credits required	ARTT 698A: Directed Graduate Studies in Studio Art (5 credits) ARTT 698B: Directed Graduate Studies in Studio Art (6 credits) ARTT 699A: Directed Graduate Studies in Studio Art (7 credits) ARTT 699B: Directed Graduate Studies in Studio Art (4 credits) ARTT 768: Graduate Colloquium (12 credits) ARTT 798A: Directed Graduate Studies in Studio Art (5 credits) ARTT 798B: Directed Graduate Studies in Studio Art (6 credits) ARTT 799: Master's Thesis Research (9 credits) Art History or Art Theory electives (6 credits)

Candidates for the Master of Fine Arts Degree must complete a program that consists of 60 credit hours. These 60 credit hours are distributed as follows: 30-33 credits in Studio; 0-3 credits Teaching Internships; 6 credits in Art History/Art Theory; 12 credits in Graduate Colloquium; and 9 credits in Masters Thesis Research. Graduate Reviews, with committees made up of Graduate faculty members, take place at the end of each semester. Each MFA candidate in his/her final semester must select a thesis advisor and a thesis committee. Students must present their artwork in a Thesis Exhibition, usually installed in the Art Gallery at a designated time near the end of the spring semester. Students must also develop a written component to the Thesis (These have varied in length from five to 50 pages), and present an oral defense of the Thesis to the Thesis committee.

Facilities and Special Resources: Each MFA student is provided with 24-hour access to an individual studio. Each studio is approximately 400 sq. ft. The studios are adequately ventilated and meet industry standards in safety. General sculpture facilities include: Approximately 2200 sq. ft. wood shop; approx. 2200 sq.ft. steel fabrication studio; approx. 1500 sq. ft. foundry w/indoor furnace plus outdoor furnace for iron casting. There is space within the building, and outside on the grounds, for sculpture and installations. The printmaking studio (screen, intaglio, relief/litho, digital) is approximately 3000 sq. ft. There are also approx. 8000 sq. ft. of undergraduate painting and drawing studios. Digital media features up to date Macs, large format printers, a CNC router, laser cutter/engraver, and two maker-bot 3D printers. The department encourages multi-media and interdisciplinary approaches to technology.

Within the building housing the Department of Art, there are two galleries and two libraries. The University of Maryland Art Gallery, an independent unit that works closely with the Department of Art, features national and international contemporary and historical exhibitions as well as faculty and annual MFA Thesis shows. The Herman Maril Art Gallery is a student organized gallery that features student exhibitions, lectures, special projects and a space for social activities. The Art Library, separate from the large research libraries on campus, has an outstanding collection of books, catalogues, periodicals and reproductions, all indexed on computer and CD ROM systems.

Financial Assistance: The Department offers eight teaching assistantships and one fellowship. A number of Graduate School Fellowships are also available. Applications should be submitted by January 16 for consideration for a graduate assistantship or fellowship.

Contact Statement
The Department of Art website, www.art.umd.edu provides a lot of information for prospective students. For further information, contact:

Astronomy (ASTR)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
The Department of Astronomy offers programs of study leading to the Master of Science and Doctor of Philosophy degrees. A full schedule of courses covering most fields of astronomy is offered. Some areas in which the faculty focus their research efforts are comets, interplanetary dust, planetary dynamics, extrasolar planets, star and planet formation, mm wavelength astronomy, the interstellar medium, black holes, active galaxies, time-domain astronomy, galaxy formation and evolution, plasma astrophysics, high energy astrophysics, theoretical and computational astrophysics, and cosmology.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE): Please contact astr-grad@deans.umd.edu to discuss exceptions. (The University of Maryland's institution code is 5814.)
- Supplementary Application
- Description of Research: 1-2 page description of research and relevant work experience. It should include the topic of research, where it took place and who supervised it, the description of the actual activity (for example, "data reduction for a ground-based optical FTS instrument, wrote reduction software in Python"), whether there were resulting publications, what you learned from pursuing this activity, and what motivated you to pursue it. Note: Please do not upload documents for the Writing Samples. (The admissions committee will not read these.)
- Publications/Presentations
- Faculty of Interest: applicants are asked to select a minimum of 3 *tenured/tenure-track faculty members*.
- GRE Subject

Because of the large number of qualified applicants, the Department of Astronomy has had to restrict formal admission to the Graduate School to those who have shown particularly outstanding work in their undergraduate records. Students who enter the graduate program are normally expected to have strong backgrounds in astronomy, physics, and mathematics. A student with deficiencies in one of these areas may be admitted but will be expected to remedy such deficiencies as soon as possible.
Note that the Department of Astronomy accepts applications for the Ph.D. program only. (Admitted students typically receive an M.S. degree after their second year in the program.) For full details, see http://www.astro.umd.edu/graduate/admissions.html)
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	Priority Consideration: 15 Dec / Final: 17 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	17 Jan

Other Deadlines: Please visit the program website at http://www.astro.umd.edu

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Non-thesis option: 30 credits	**Non-thesis option** requires 30 credits of coursework including six of the nine principal Astronomy graduate courses, and at least 18 credits at the 600 level or above. Students must also submit a scholarly paper and pass a comprehensive final exam.
Thesis option: 30 credits	**Thesis option** requires 30 credits of coursework including six of the nine principal Astronomy graduate courses and six credits of ASTR 799: Master's Thesis Research.

Candidates for the non-thesis option of the M.S. degree are required to complete 30 credits, including six of the nine principal Astronomy graduate courses (18 credits), with the remaining 12 credits consisting of classroom courses or research credits in Astronomy or supporting fields. One or more scholarly papers are required, usually fulfilled by the 2nd-year project report. The student must also pass a written examination, normally consisting of the written part of the Ph.D. qualifying examination with appropriately chosen passing requirements.
Candidates for the thesis option of the M.S. degree (less common) are required to complete 30 credits, including 6 credits of thesis research (ASTR 799) and eight graduate courses (24 credits). At least six of the courses must come from the nine principal Astronomy graduate courses 601, 606, 610, 615, 620, 622, 630, 670, and 680. A written thesis is required and must be successfully defended in an oral examination. The student must also pass a written examination, normally consisting of the written part of the Ph.D. qualifying examination with appropriately chosen passing requirements.

Doctor of Philosophy (Ph.D.)

Core Requirements
1. Doctoral students are required to complete eight 3-4 credit graduate courses, including at least six of the nine ASTR 600 level courses routinely offered. Students must also pass a Qualifying Exam. 2. A research project is required and can be fulfilled by taking ASTR 699: Special problems in Advanced Astronomy or ASTR 898: Pre-Candidacy Research. 3. Students are also required to complete one credit of ASTR 695: Introduction to Research.

Course requirements for the PhD in Astronomy currently consist of eight courses, at least six of which must come from the nine principal Astronomy graduate courses 601, 606, 610, 615, 620, 622, 630, 670, and 680. A qualifying exam based on these courses is given in the summer after the second year. A research project is required of all students in the second year of graduate study. Admission to the PhD program is based on course work, the research project and the qualifier.
Students choose a research stream depending on their interest within the field. Courses beyond the required eight are sometimes necessary for advanced research. This will be assessed by the student's thesis committee.

Facilities and Special Resources: The Department has guaranteed observing time on the new 4.3-meter Discovery Channel Telescope through a partnership with Lowell Observatory. We have strong interactions with other major observatories, where many students and faculty maintain observing programs, and with neighboring scientific institutes, including the Naval Observatory, the Naval Research Lab, and other government agencies. We have joined with Caltech and other partners in the Zwicky Transient Facility, a time-domain survey for studying rare and exotic transient phenomena which will see first light at Palomar Observatory in 2017. Our planetary science team is heavily involved with space missions visiting solar system bodies, such as NASA’s Deep Impact, EPOXI, and Rosetta missions to study comets.

The Center for Research and Exploration in Space Science & Technology (CRESST) is the most visible of our many interactions with NASA’s Goddard Space Flight Center, located only 5 miles away. UMD researchers work together with Goddard scientists on many topics, ranging from the study of neutron stars, black holes, and extremely hot gas throughout the universe to the study

of planets in our Solar System. This partnership offers an exciting array of opportunities for graduate students to work with Goddard scientists and facilities on their Ph.D. theses.

In 2010, U. Maryland and NASA's Goddard Space Flight Center signed an agreement launching the Joint Space-Science Institute (JSI), a close collaboration between the Departments of Astronomy and Physics and NASA/Goddard. JSI's areas of investigation include black hole physics, high-energy astrophysics, and cosmology.

The Department has also established a partnership with Pontificia Universidad Catolica de Chile (PUC). PUC, one of the top two institutions for astronomy in Chile, signed an agreement with UMD in 2010 that enables astronomy graduate students at both institutions to participate in a joint Ph.D. program starting in their third year. These students split their time between both locations and conduct their thesis research under the supervision of UMD and PUC co-advisors. UMD students gain improved access to Chilean observatories, which include many of the best telescopes in the world.

The Center for Theory and Computation (CTC), a strong group of theoretical astrophysicists within the department, built and maintains a Beowulf cluster to perform computational analyses and simulations across a range of research areas. We also have access to three larger university clusters, including the world-class "DeepThought2" and "MARCC/Bluecrab", which have been invaluable to our students in completing computationally-intensive thesis projects.

In 2014, much of the Department moved to the new Physical Sciences Complex (PSC). Highlights of the building include beautiful architecture, windowed office space for grad students, a grad student lounge, and a state-of-the-art visualization lab for state-of-the-art simulations and displays of large datasets.

This Department is associated with the following research units and facilities:

- Center for Research and Exploration in Space Science and Technology (CRESST): Partnership between UMCP, UMBC, USRA, and NASA/Goddard, with an emphasis on high-energy astrophysics.
- Joint Space Science Institute (JSI): Partnership between Astronomy, Physics, and NASA/Goddard, with an initial emphasis on high energy astrophysics, especially black holes. Established 2010.
- Laboratory for Millimeter Wave Astronomy (LMA)
- Center for Theory and Computation (CTC): Astronomy Dept. center for theory- and computation-related research programs.
- Discovery Channel Telescope (DCT)
- Zwicky Transient Facility (ZTF)
-

Financial Assistance: The Department of Astronomy offers both teaching and research assistantships. Essentially all full-time graduate students receive full financial support. Most students receive research assistantships to cover the summer period. These are either with faculty in the Department or with staff members at the NASA/Goddard Space Flight Center. Some summer teaching assistantships are also available.

Atmospheric and Oceanic Science (AOSC)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
The Department of Atmospheric and Oceanic Science offers graduate study leading to the Master of Professional Studies, Master of Science, and Doctor of Philosophy degrees. Course work in atmospheric and oceanic sciences is also offered at the upper division and graduate level as a service to other campus graduate programs. The educational program is broadly based and involves many applications of the mathematical, physical and applied sciences that characterize modern atmospheric sciences and physical oceanography, including climate and earth system science, and multidisciplinary studies of the interrelationship among the atmosphere, the oceans, the land, and the biota. The Department's advanced degree programs are designed to prepare students for participation in contemporary research in the atmospheric and oceanic science. Research specializations include: atmospheric dynamics; atmospheric chemistry; physical oceanography; air pollution; atmospheric radiative transfer; remote sensing of the atmosphere, ocean, and land; climate variability and change; data assimilation; numerical weather prediction; severe storms; surface-atmosphere, ocean-atmosphere and biosphere-atmosphere interactions; and earth system modeling. The

curriculum includes a set of Core courses to provide a fundamental background in atmospheric and oceanic dynamics, physical meteorology and atmospheric chemistry, earth system science and climate, as well as advanced specialized courses. Supervised research using state-of-the-art facilities then prepares the students for future contributions in their chosen field.
The Department's close association with federal agencies in the Washington area provides graduate students with good training and opportunities in atmospheric and oceanic science. As a research assistant, the student has the opportunity to develop a close working relationship with one or more of the scientific agencies.

- CV/Resume

In addition to the requirements of the Graduate School, the department requires a Bachelors or higher degree in meteorology, oceanography, physics, chemistry, mathematics, biology, engineering or other program with suitable emphasis in the sciences. We welcome applications from those with no background in atmospheric sciences. The Core courses offered in the first year of study present students with the necessary background in atmospheric and oceanic science for the more advanced courses. The minimum undergraduate background includes 3 semesters of calculus, differential equations, linear algebra, 3 semesters of calculus-based physics, and 2 semesters of chemistry, one semester of computer programming. Scores from the GRE General Examination are also required.

For information on the Master of Professional Studies in Atmospheric and Oceanic Science, please see its listing in the Graduate Catalog.

Note: Applicants must get approval from the AOSC Department to apply to the Spring semester.
The fall admission deadline for priority/funding is January 17 for both domestic and international students. The fall admission deadline for funding is February 1 for both domestic and international students. Final fall admission deadlines are May 17 for domestic students and March 15 for international students.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Non-thesis only (scholarly paper required): 30 credits	AOSC 610: Dynamics of the Atmosphere and Ocean I (3 credits) AOSC 611: Dynamics of the Atmosphere and Oceans II (3 credits) AOSC 620: Physics and Chemistry of the Atmosphere I (3 credits) AOSC 621: Physics and Chemistry of the Atmosphere II (3 credits) AOSC 680: Introduction to Earth System Science (3 credits) AOSC 617: Atmospheric and Oceanic Climate (3 credits) Electives (12 credits) M.S. students are also required to attend the weekly department

	seminar series.

The Atmospheric and Oceanic Science Department offers a non-thesis program leading to the Master of Science Degree. The requirements include course work, a scholarly paper and presentation, and a comprehensive examination. This program provides fundamental training to prepare students for research and operational work in the atmospheric and oceanic sciences.

Each new student will be assigned to a faculty advisor whose interests parallel those of the student. The faculty advisor will assist in the development of the student's course program and will follow the student's progress thereafter. The student may select an alternate advisor at any time, although financial support is dependent upon the availability of funds.

The student must submit an M.S. degree course plan and a tentative schedule for completion by the end of the first nine credit hours. A minimum of 30 semester hours of coursework is required for the degree program. This must include 24 hours of 600-level AOSC courses, including core courses listed below. The remaining 6 semester-hours can come from additional 600-level courses, 3 of these credits can come from AOSC 798 (MS Directed Graduate Research). The purpose of the scholarly paper is to demonstrate the ability to conduct original or literature research. The paper will become part of the permanent archive of the Department. A Ph.D. dissertation prospectus will satisfy this requirement.

The Comprehensive Examination for MS seeking students consists of a written examination. The written portion is composed of questions covering the subject areas of the following Core courses: AOSC 610, 620, and 617. Students will also be expected to complete AOSC611, AOSC621, and AOSC680 with a minimum grade of 3.0 (or to demonstrate mastery of this material). AOSC 611 can be replaced by AOSC 600 for those students with a specialization in Chemistry who get approval from their advisor, the AOSC Graduate Director, and Department Chair.

All requirements for the M.S. degree must be completed within a five-year period. This time limit applies to any transfer work from other institutions to be included in the student's program. A full-time student can easily complete the M.S. degree in two years.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete the M.S. course requirements in addition to 12 credits of AOSC 899: Doctoral Dissertation Research. In addition, doctoral students are required to attend the weekly department seminar series.

The Department of Atmospheric and Oceanic Science offers a program leading to the Doctor of Philosophy Degree (Ph.D.) in atmospheric and oceanic science. This program is designed to furnish the student with the background necessary to carry out independent and original scientific research. To earn the Ph.D., the student must complete a course work requirement, pass the Candidacy Examinations, and prepare and defend a dissertation.

A student seeking a Ph.D. degree will be assigned to a faculty advisor whose interests parallel those of the student. The academic advisor will establish and chair an advising committee which will oversee the student's degree program.
The course work requirement is 30 semester hours of 600-level or above AOSC Department courses. In addition, the student must take 12 credits of AOSC 899 (Doctoral Dissertation Research). Students may wish to take a number of the core courses in order to prepare for the Qualifying Examination. In addition, there is a Minor course requirement of six semester hours of ancillary courses taken beyond the bachelor's degree in a related scientific area at the 600-level or above. These credits must have a unified or coherent theme. Students may petition the Department for a waiver of a portion of these requirements based on credits earned at another institution at the graduate level.

A student seeking the Ph.D. degree in atmospheric and oceanic science must pass the Candidacy Examinations, which are divided into two parts - The Qualifying Examination and the Specialty Examination. During the Specialty Examination, the student must present and defend a dissertation prospectus to the examination committee. Following successful defense, the student advances to candidacy. Ability to perform independent research must be demonstrated by a written dissertation. The dissertation should be an original contribution to knowledge and demonstrate the ability to present the subject matter in a scholarly style. Upon completion of the dissertation the candidate is required to present the research results at an Atmospheric and Oceanic Science Department seminar and to defend the material to the satisfaction of a Final Examining Committee appointed by the Dean for Graduate Studies.

Full-time students are expected to complete the Qualifying Examination by the end of the second year of graduate study and be admitted to candidacy by the end of the third year. Students must be admitted to candidacy within three years after admission to the doctoral program and at least six months before the date on which the degree will be conferred. The student must complete

the entire program for the degree, including the dissertation and final examination, during a four-year period after admission to candidacy.

Graduate Track for Accomplished Scientists
Graduate students with exceptional scientific achievements may, through written petition to the Graduate Director, replace the written portion of the Comprehensive Exam with a seminar followed by an oral examination. To qualify for this track, the candidate needs to meet the following requirements:

1) have an earned MS degree in atmospheric or oceanic science, or a related field, ordinarily from an accredited American university, and receive approval from the five-member Departmental Examination Committee.
2) 2) have published at least five, peer-reviewed, Science Citation Index (SCI) journal articles in atmospheric, oceanic, or a closely related science. He or she must be the lead or corresponding author of at least three of those papers.

The candidate must present an open seminar on his/her past research followed by a closed oral exam by the Examination Committee of at least three faculty plus the Graduate Director, and the Admissions Committee Chair. Two or more negative votes constitutes failure. The final decision will be subject to review by the committee of the whole.

Facilities and Special Resources: The Department participates in the Earth System Science Interdisciplinary Center (ESSIC) and the Cooperative Institute for Climate Studies (CICS). These institutions conduct research, and offer opportunities for graduate research beyond those offered by the department faculty. In addition, the Department maintains close research and teaching associations with Departments of Mathematics and Chemistry, as well as the Institute for Physical Science and Technology (IPST), Center for Scientific Computation and Mathematical Modeling (CSCAMM), and nearby government agencies including NOAA, NASA, ONR, USDA, NIST, and Marylands Department of the Environment and Department of Natural Resources. Special facilities that support the Department's teaching and research activities include sophisticated computing facilities allowing access to a variety of atmospheric and oceanographic datasets, a laboratory for atmospheric chemistry, a mobile air pollution laboratory, access to research aircraft, a variety of supercomputers, radar, windprofiler at Fort Meade, historical data. Most importantly the students are encouraged to exploit the resources of the nearby government laboratories: NASA Goddard Space Flight Center, NOAA National Centers for Environmental Prediction.

The Department maintains a specialized library with several hundred text and reference books in meteorology and allied sciences, specialized series of research reports, and many journals. The campus provides a main library as well as specialized libraries in chemistry, astronomy, and engineering. Several excellent government libraries in the area, including the Library of Congress, the NASA Goddard Space Flight Center, the National Archives, and the NOAA libraries provide unsurpassed resources.

The University of Maryland is located in an area of unparalleled professional resources. Because of its proximity to the nation's capital, The University of Maryland is able to interact closely with the many governmental groups interested in various aspects of the atmospheric, oceanic and earth system sciences. Scientists from government laboratories participate in many aspects of graduate education, such as giving lectures in classes, presenting research results in seminars, and serving on dissertation committees. Likewise, the Department faculty often attend and participate in the seminars, colloquia and scientific workshops being held at these neighboring institutions.

The Washington, D.C. chapter of the American Meteorological Society consists of about 400 members who hold professional meetings each month. The Washington, D.C. area is frequently the site of national and international conferences, most notably of the American Association for the Advancement of Science and the American geophysical Union. In addition to the various government and academic institutions, the Washington metropolitan area contains numerous well-known private contractors and consulting companies involved in meteorology and oceanography, which provide employment opportunities for students both before and after graduation.

As a member of the University Corporation for Atmospheric Research, the department enjoys the common facilities offered by the National Center for Atmospheric Research such as research aircraft and supercomputers.

Financial Assistance: Graduate research and teaching assistantships are available to qualified graduate students. Research assistants carry out research in the areas of physical and dynamic meteorology, physical oceanography, data assimilation, remote sensing, atmospheric chemistry, air pollution, climate dynamics, atmospheric radiation, severe storms, global climate change, and ocean-atmosphere and atmosphere-biosphere interactions. Fellowships are also awarded by the Graduate School to the most qualified applicants. In addition, hourly employment is available in the Department and off campus. Stipends are maintained at a competitive level**.**

Degree Requirements
Master of Professional Studies (M.P.S.)

Total Credits	Core Requirements
Non-thesis only: 30 credits	Students complete two out the following three certificate programs, plus two courses from the remaining certificate program. **Computational Methods in Atmospheric and Oceanic Science:** AOSC 630: Statistical Methods in Meteorology and Oceanography (3 credits) AOSC 652: Analysis Methods in Atmospheric and Oceanic Science (3 credits) Two additional courses approved by advisor (6 credits) **General Atmospheric and Oceanic Science:** AOSC 431: Atmospheric Thermodynamics (3 credits) or AOSC 610: Dynamics of the Atmosphere and Ocean I (3 credits)

	AOSC 432: Dynamics of the Atmosphere and Ocean (3 credits) or AOSC 611: Dynamics of the Atmosphere and Oceans II (3 credits) AOSC 617: Atmospheric and Oceanic Climate (3 credits) AOSC 670: Physical Oceanography (3 credits) **Air Quality Science and Technology:** AOSC 600: Synoptic Meteorology I (3 credits) AOSC 624: Remote Sensing of Surface Climate (3 credits) AOSC 637: Atmospheric Chemistry (3 credits) AOSC 633: Atmospheric Chemistry and Climate (3 credits)

Master of Professional Studies (MPAO) The Master of Professional Studies in Atmospheric and Oceanic Science is designed for meteorologists, oceanographers and environmental scientists who need cutting-edge skills and knowledge in atmospheric and oceanic science, in the computational methods used in our field, and in air quality science. The Director of Professional Studies will advise students in planning his or her course of study, and will provide career advice and The degree is earned by successful completion of ten 3-credit courses. Students must complete two out of the following three Certificate programs, each of which consists of four courses, plus two courses from the remaining Certificate Program. The MPAO program is designed with the needs of working professionals in mind, and can be completed on a part-time basis over no more than 5 years, or on a full-time basis in 1 year and one semester.

Behavioral and Community Health (BCHL)

Graduate Degree Program
College: Public Health

Abstract
The Department offers graduate study leading to the Master Public Health (MPH) in Behavioral and Community Health and the Doctor of Philosophy degree in Behavioral and Community Health. The graduate programs are designed to prepare behavioral and community professionals with specific skills and the ability to implement theoretical knowledge in a practical setting. The goal of the doctoral program is to develop health professionals competent in understanding the health needs of populations who are qualified to conduct research in order to implement programs and policies aimed at improving the public's health. This program is very selective and admission is competitive. The program provides students with the opportunity to develop research skills essential in making significant contributions to the scientific and professional literature in behavioral and community health.

Degree programs may be completed either full-time or part-time, although full-time is preferred. Faculty support coursework, research and practice experiences in many areas, including: health communication; health behavior; adolescent health; women's health; health literacy and health disparities. Faculty hold doctoral degrees in public health, psychology, health education, sociology and epidemiology. The Department offers excellent research and laboratory facilities including the Center for Young Adult Health and Development, Laboratory for Health Behavior Assessment and Intervention, and The Center for Health Behavior Research

Admissions Information
Admission Requirements:
- Minimum 3.0 undergraduate GPA; 3.5 graduate GPA
- GRE scores for exam taken within the last five years (UMD SPH code = 0485)
- Three Letters of recommendation that address your academic capabilities
- Statement of purpose and research interests
- Resume or CV

Program Admission Pre-Requisites:
- 6 credits Psychology or Sociology or Anthropology

For admission to the doctoral program, the Department requires an undergraduate GPA of 3.0 (if a masters degree has not been obtained) and/or a graduate GPA of 3.5. In addition, the Department requires satisfactory GRE scores, three letters of recommendation, a resume or curriculum vitae, and a statement of purpose from all applicants. Completed admission

applications (those that include all supporting materials including GRE scores and letters of recommendation) must be received by November 15th for best consideration. February 15th is the final deadline to be considered for Fall enrollment.
How to Apply: Applications should be submitted through the Schools of Public Health Application Service (SOPHAS) at www.SOPHAS.org. Remember to designate the University of Maryland School of Public Health, College Park, as one of your school choices along with your desired program. The University of Maryland School of Public Health GRE Code in SOPHAS is 0485 (the GRE is required in all applications).
For information please see http://sph.umd.edu/content/graduate-admissions.

Doctor of Philosophy (Ph.D.)

Core Requirements
Required courses: HLTH 606: Foundations of Public Health Education and Policy (3 credits) HLTH 665: Health Behavior I (3 credits) HLTH 671: Public Health Communication (3 credits) HLTH 710: Methods and Techniques of Research (3 credits) HLTH 774: Community Health Program Planning (3 credits) HLTH 776: Community Health Program Evaluation (3 credits) EPIB 610: Foundations of Epidemiology (3 credits) EPIB 650: Biostatistics I (3 credits) HLSA 601: Introduction to Health Systems (3 credits) MIEH 600: Foundations of Environmental Health (3 credits) HLTH 666: Health Behavior II (3 credits) Elective in Advanced Theory and Applications (3 credtis) HLTH 652: Quantitative Research Methods I in Public health (3 credits) HLTH 653: Quantitative Research Methods II in Public Health (3 credits) HLTH 711: Advanced Research Methods in Health (3 credits) HLTH 712: Applied Research Methods in Behavioral and Community Health (3 credits) Individualized Research Plan (15 credits minimum) HLTH 899: Doctoral Disseration Research (12 credits)

The PhD in Behavioral and Community Health is a 48 to 75 credit program depending on the number of course requirements that can or cannot be waived. This research-intensive degree includes coursework, qualifying exams, and individual research that results in a dissertation.

Facilities and Special Resources: The Department has research specializations in a variety of areas including:

- Minority health/social inequalities in health
- Alcohol and drug abuse
- Safety and health
- Sexual health
- Adolescent health and risk behavior
- Violence prevention/community violence
- Public health communication
- Health literacy
- Treatment of nicotine dependence

Specialized laboratories operating within the Department include:

- The Center for Young Adult Health and Development
- The Laboratory for Health Behavior Assessment and Intervention
- The Center for Health Behavior Research

The proximity of the nation's capital, the National Institutes of Health, the National Library of Medicine, and Food and Drug Administration, the Maryland Department of Health and Mental Hygiene, and numerous public health focused private and not-for-profit organizations/agencies render the University of Maryland unusually well suited for graduate work in behavioral and community health.

Financial Assistance: The Department offers a limited number of fellowships, and graduate teaching and research assistantships. Please contact the Director of Graduate Studies for further information.

Behavioral and Community Health (MBCH)

Graduate Degree Program
College: Public Health

Abstract
The Department offers graduate study leading to the Master Public Health (MPH) in Behavioral and Community Health and the Doctor of Philosophy degree in Behavioral and Community Health. The graduate programs are designed to prepare behavioral health professionals with specific skills and the ability to implement theoretical knowledge in a practical setting.
The mission of the MPH program is to promote the development of behavioral and community health professionals who understand the science, theory, and practice of public health and can apply this knowledge toward the enhancement of health status of communities. The MPH program is designed as a professional degree to prepare behavioral and community health professionals working in public health service as practitioners, administrators, supervisors, educators, consultants and researchers. Students will participate in both academic and applied training in program planning and implementation, program evaluation, public policy analysis, research, and management.

Degree programs may be completed either full-time or part-time. All classes are held from either 4:00pm-6:45pm or 7:00pm-9:45pm Monday through Friday. Faculty support coursework, research and practice experiences in many areas, including: health communication; health behavior; adolescent health; women's health; health literacy and health disparities. Faculty hold doctoral degrees in public health, psychology, health education, sociology and epidemiology. The Department offers excellent research and laboratory facilities including the Center for Young Adult Health and Development, Laboratory for Health Behavior Assessment and Intervention and The Center for Health Behavior Research.

Admissions Information
Admission Requirements:
- Minimum 3.0 undergraduate GPA
- GRE scores for exam taken within the past five years (UMD SPH code = 0485)
- Three Letters of recommendation that address your academic capabilities
- Statement of goals and interests

- Resume or CV

An undergraduate GPA of at least 3.0 is required for admission to the MPH program. For best consideration, completed admission applications (those that include all supporting materials including GRE scores and letters of recommendation) must be received by December 15th to be considered for Fall enrollment. The final deadline in April 15th.
How to Apply: How to Apply: Applications should be submitted through the Schools of Public Health Application Service (SOPHAS) at www.SOPHAS.org. Remember to designate the University of Maryland School of Public Health, College Park, as one of your school choices along with your desired program. The University of Maryland School of Public Health GRE Code in SOPHAS is 0485 (the GRE is required in all applications).
For information please see http://sph.umd.edu/content/graduate-admissions.

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	15 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Dec

Other Deadlines: Please visit the program website at http://www.sph.umd.edu/bch

Degree Requirements
Master of Public Health (M.P.H.)

Total Credits	Core Requirements	Specialization Options
Thesis option: 42 credits **Non-thesis option:** 42 credits	EPIB 610: Foundations of Epidemiology (3 credits) EPIB 650: Biostatistics I (3 credits) HLSA 601: Introduction to Health Systems (3 credits) HLTH 665: Health Behavior I (3 credits) MIEH 600: Foundations of Environmental Health (3 credits) HLTH 606: Foundations of Public Health Education and Policy (3 credits) HLTH 672: Public Health Informatics (3 credits) or HLTH 671: Public Health Communication (3 credits) HLTH 710: Methods and Techniques of Research (3 credits) HLTH 774: Community Health Program Planning (3 credits) HLTH 776: Community Health Program Evaluation (3 credits) HLTH 780: Community Health (3 credits) HLTH 785: Internship in Public Health (3 credits)	**Thesis option:** HLTH 799: Master's Thesis Research (6 credits) **Non-thesis option:** HLTH 786: Capstone Project in Public Health (3 credits) Students take one additional elective course (3 credits)

The MPH in Behavioral and Community Health is a 42-credit program which includes coursework, an internship, and a MPH project or a thesis. It takes 2 years to complete as a full-time student and 3.5-5.0 years to complete as a part-time student. The program cannot be completed in less than 2 years due to limited course availability. At this time, the majority of courses are held in-person on the College Park campus, a few are online.

Facilities and Special Resources:
The Department has research specializations in a variety of areas including:

- Minority health/social inequalities in health
- Alcohol and drug abuse
- Safety and health
- Sexual health
- Adolescent health and risk behavior

Biochemistry (BCHM)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
The Graduate Program in Biochemistry offers study leading to Doctor of Philosophy and Master of Science degrees. The program emphasizes intensive mentoring, formal and informal training in presentation skills, scientific writing, bioinformatics, teaching chemistry and biochemistry, and professional ethics. Research specialization is available in protein structure, dynamics, and function; protein-protein and protein-nucleic acid interaction; protein and nucleic acid biochemistry; RNA and DNA structure, dynamics, interactions, and function; macromolecular folding and supramolecular assembly; post-translational protein modification and signaling; proteomics; mass spectrometry; biomolecular nuclear magnetic resonance spectroscopy, X-ray crystallography; enzyme mechanisms; drug metabolism; carbohydrate chemistry, glycobiology; immunology; bio-organic chemistry; membrane structure and function; and metabolic regulation. Several of the biochemistry program faculty are members of the Institute for Bioscience and Biotechnology Research (IBBR) or other Related Programs and Campus Units listed below. Further information about the Biochemistry Graduate Program can be found at www.chem.umd.edu/graduateprogram/phdinbiochemistry and www.chem.umd.edu.

Admissions Information
General Requirements:
- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:
- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Description of Research/Work Experience
- GRE Subject (optional/highly recommended)

Admission to graduate study in Biochemistry at the University of Maryland requires a minimum of a Bachelor of Science (B.S.), Bachelor of Arts (B.A.) or equivalent degree. Applications are normally accepted only from Ph.D.-seeking students. The area in which the undergraduate degree has been earned need not be chemistry or biochemistry, but previous coursework must normally include a minimum of 30 semester or 40 quarter hours of chemistry, including at least 1 year of general chemistry, 1 year of

organic chemistry and 1 semester of biochemistry, as well as laboratory courses in organic chemistry and biochemistry. A course in physical chemistry and a laboratory course in analytical chemistry are also desirable. Typical overall grade point averages for successful applicants are 3.0 or greater (on a scale where the average grade is 2.0), and averages in science and math courses are generally higher than this. Three letters of reference indicating a potential for independent, creative scientific research are also required.
The competition for available space may limit admissions to persons with credentials above these minimum requirements.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	17 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	17 Jan

Other Deadlines: Please visit the program website at http://www.chem.umd.edu

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements	Specialization Options
Thesis option: 30 credits **Non-thesis option:** 30 credits	**Core courses (10 credits):** BCHM 671: Protein Chemistry and Enzymic Catalysis (3 credits) BCHM 675: Biophysical Chemistry (3 credits) BCHM 661: Nucleic Acids I (2 credits) BCHM 662: Nucleic Acids II (2 credits)	**Thesis option** requires 24 credits of coursework (including core courses) with at least 12 credits at the 600 level or higher. In addition, students must complete six credits of BCHM 799: Master's Thesis Research. Students are also required to present one seminar. **Non-thesis option** requires 30 credits of coursework (including core courses) with at least 18 credits at the 600 level or higher. This coursework should include six credits of BCHM 699: Special Problems in Biochemistry. Students are also required to submit a scholarly paper.

The M.S. degree program offers both the thesis and non-thesis options. The thesis option requires an oral defense of the thesis. Specific regulations are available from the Department of Chemistry and Biochemistry or from: www.chem.umd.edu/graduateprogram/

Doctor of Philosophy (Ph.D.)

Core Requirements
1. Doctoral students are required to complete 21 credits of coursework, with 19 credits completed by the end of the fourth semester. In addition, students must complete 12 credits of BCHM 899: Doctoral Dissertation Research. 2. Non-course requirements include an oral defense of a written research proposal, presentation of a seminar and an independent research proposal, and an oral defense of a publication-quality dissertation that advances the field. **Required courses include:** BCHM 671: Protein Chemistry and Enzymic Catalysis (3) BCHM 675: Biophysical Chemistry (3) BCHM 661: Nucleic Acids I (2) BCHM 662: Nucleic Acids II (2) BCHM 699: Laboratory rotations (2) BCHM 677: Computational Tools in Biochemistry (1) BCHM 889: Seminar (2) BCHM 698: Literature Seminar in Biochemistry (2) Electives with advisor approval (minimum of 4 credits)

Specific regulations are available from the Department of Chemistry and Biochemistry or from:
www.chem.umd.edu/graduateprogram/phdinbiochemistry/

Facilities and Special Resources: Biochemistry faculty and graduate students work in well-equipped, state-of-the-art research laboratories. Instrumentation and facilities that are available for research in biochemistry include analytical and preparative ultracentrifuges, high- and ultra-high field nuclear magnetic resonance spectrometers (600, 800, 900, 950 MHz), proteomics and genomics core facilities, mass spectrometers, X-ray diffractometers and SAXS, calorimetry, fluorescence/phosphorimagers, circular dichroism spectrometers, Sanger and next-generation DNA sequencing, microarray, quantitative PCR, electron microscopes, atomic force microscopes, confocal and TIRF fluorescence microscopes, flow cytometer, animal colony, fermentation pilot plant, high-performance computing, and a chemistry-biochemistry library.

Financial Assistance: Ph.D. candidates are normally supported on graduate teaching assistantships during their first year as graduate students. Teaching assistants usually instruct undergraduate laboratory and recitation classes and receive in return a tuition waiver of ten credits each semester, salary, and health care benefits. Ph.D. candidates are normally supported in subsequent years on graduate research assistantships. Financial support is not generally available to M.S. candidates.

Bioengineering (BIOE)

Graduate Degree Program
College: Engineering

Abstract
Welcome to the Graduate Program in the Fischell Department of Bioengineering at the A. James Clark School of Engineering, University of Maryland. Our program represents the strong intellectual interdisciplinary infrastructure and collaborative culture that links engineering, biology, and medicine at our university.
Our program provides a basic understanding of bioengineering at the molecular and cellular level, focusing on:

- biomolecular and cellular rate processes
- biomaterials and tissue engineering
- drug delivery
- cellular and tissue biomechanics
- electrophysiology of the cell
- cellular and physiological transport phenomena
- biomedical imaging
- biosensors

- medical diagnostics systems
- bio-devices
- vaccines

With strong, funded research programs and innovative partnerships with the National Institutes of Health, Food and Drug Administration, and University of Maryland School of Medicine, the Fischell Department of Bioengineering is an exciting place for graduate study.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Publications/Presentations

Admission to the Graduate Program in Bioengineering requires a bachelor of science degree in an engineering discipline from a recognized undergraduate institution. Admission also may be granted to students with a degree in another scientific discipline, such as biology, chemistry, physics, or mathematics. In some cases, students may be required to take undergraduate courses to rectify deficiencies in their background before they will be given permission to enroll in the required core graduate courses. Because of the structure of the first year curriculum, students seldom are admitted to begin the Ph.D. program in the spring semester. In addition, students are rarely admitted that only wish to pursue a master's degree. Therefore, applicants are strongly encouraged to apply for fall admission to the Ph.D. program.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	17 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	17 Jan

Other Deadlines: Please visit the program website at http://www.bioe.umd.edu

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Thesis only: 30 credits	BIOE 601: Biomolecular and Cellular Rate Processes (3 credits) BIOE 604: Cellular and Physiological Transport Phenomena (3 credits) BIOE 612: Physiological Evaluation of Bioengineering Designs (3 credits) BIOE 799: Master's Thesis Research (6 credits)

The terminal M.S. degree is intended for students who are interested in expanding their knowledge of bioengineering through research, beyond what is available at the B.S. level. Therefore, the M.S. program involves both coursework and a well-defined research project culminating in a M.S. thesis. The M.S. program may be suitable for top UMD undergraduates engaged in research via an individualized, combined B.S. / M.S. program. A combined M.D. / M.S. program is also available. It should be noted, however, that due to limited resources, the department does not actively recruit students to its M.S. program. Students interested in the M.S. program should contact the Bioengineering Graduate Office prior to submitting an application.

Doctor of Medicine and Master of Science (dual degree) (M.D. and M.S.)
The Doctor of Medicine / Master of Science (M.D. / M.S.) Program is a dual degree program offered with the University of Maryland School of Medicine. Students applying to the M.D./M.S. Program must first apply to and be admitted to the M.D. program at the School of Medicine, and should indicate their interest in the dual-degree program when applying to the Medical

School. The program is organized in the following fashion: 2 years M.D. studies + 1 year M.S. studies + 2 years M.D. studies. The objective of this program is to broaden the educational and research scope of medical doctors in bioengineering. The program should be attractive to those interested in areas including clinical research, biomaterials, biomedical imaging, medical device innovation, medical device development, and drug development. Graduates of the combined program will receive a Doctor of Medicine degree from the University of Maryland School of Medicine as well as a Master of Science degree from the A. James Clark School of Engineering at the University of Maryland, College Park.

Doctor of Philosophy (Ph.D.)

Core Requirements
1. Doctoral students must also meet the course requirements for the M.S. degree. 2. Additional course requirements include: BIOE 608: Bioengineering Seminar Series (3 credits) BIOE 605: Bioengineering Graduate Studies I (1 credit) BIOE 606: Bioengineering Graduate Studies II (1 credit) BIOE 899: Doctoral Dissertation Research (18 credits)

The educational approach of the Ph.D. program is to combine the principles and applications embedded in engineering with the sciences of biology, medicine, and health. The motivation for many of the research projects stems from the belief that developments at the interface of biology and engineering will advance the efficacy of health care by developing new paradigms for the diagnosis of disease, and the development and delivery of new therapeutics. Our bioengineering students will gain the knowledge base and skill sets to quantitatively measure, and rationally manipulate cells, tissues, and integrated systems. Bioengineers must bring problem solving skills and design methodologies to the study of biology in an effort to translate the biological sciences into medical practice in an analogous manner to the transformation of chemistry into industrial practice that occurred in the 20th century.

Doctor of Medicine and Doctor of Philosophy (dual degree) (M.D. and Ph.D.)
The Doctor of Medicine / Doctor of Philosophy (M.D. / Ph.D.) Program is a dual degree program offered with the University of Maryland School of Medicine. Students applying to the M.D./ Ph.D. Program must first apply to and be admitted to the M.D. program at the School of Medicine, and should indicate their interest in the dual-degree program when applying to the Medical School. The program is organized in the following fashion: 2 years M.D. studies + 4 years Ph.D. studies + 2 years M.D. studies. The objective of this program is to develop clinicians who are deeply involved in biomedical research. Graduates of the program are typically interested in pursuing both clinical work and bioengineering research in their future careers. Graduates of the combined program will receive a Doctor of Medicine degree from the University of Maryland School of Medicine as well as a Doctor of Philosophy degree from the A. James Clark School of Engineering at the University of Maryland, College Park.

Facilities and Special Resources: The Department has access to well-equipped bioengineering research laboratories and associated departmental facilities of its faculty. In addition, there are core facilities available for bioengineering research. Animal facilities are available if necessary.

Financial Assistance: Graduate assistantships and fellowships are available on a competitive basis to PhD students. No separate financial support application is required. Students will automatically be considered for eligible forms of support.

Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Admissions Information

General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.

Full admission as a degree seeking student requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in engineering, biology, chemistry, physics, or another technical field from an accredited institution
- Completion of calculus I, II, and III, differential equations, and engineering science (e.g. fluid mechanics, transport phenomena or thermodynamics), as well as a basic course in biology
- Applicants who do not have an adequate background in engineering science will be required to take ENPM672, Fundamentals of Thermal Systems, in their first semester.
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Other Deadlines: Please visit the program website at http://www.advancedengineering.umd.edu

Degree Requirements

Master of Engineering (M.Eng.)

Total Credits	Core Requirements
Non-thesis only: 30 credits	Modeling of Biological Systems (3 credits) Application of Biomaterials (3 credits) Biological Transport Phenomena (3 credits) Electives (21 credits) **Contingent on availability of courses. Please see advisor for further details.*

Facilities and Special Resources: Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance: Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Bioengineering (online) (Z083)

Graduate Certificate Program
College: Engineering

Abstract
The Professional Master of Engineering program is a practice-oriented part-time graduate program designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland.

Admissions Information
General Requirements:
- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:
- Two (2) Letters of Recommendation are required for anyone with an undergraduate GPA below 3.0. Anyone with a GPA 3.0 or above should contact the Office of Advanced Engineering Education with a request to waive this requirement.

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland.
General Requirements:
- Statement of Purpose
- Transcript(s)

Program-Specific Requirements:
- Two (2) Letters of Recommendation are required for anyone with an undergraduate GPA below 3.0. Anyone with a GPA 3.0 or above should contact the Office of Advanced Engineering Education with a request to waive this requirement.

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. International applicants should consider applying for the online programs.
Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.

Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.

Full admission requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in engineering, biology, chemistry, physics, or another technical field from an accredited institution
- Completion of calculus I, II, and III, differential equations, and engineering science (e.g. fluid mechanics, transport phenomena or thermodynamics), as well as a basic course in biology
- Applicants who do not have an adequate background in engineering science will be required to take ENPM672, Fundamentals of Thermal Systems, in their first semester.
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Biological Sciences (BISI)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
The Biological Sciences (BISI) Graduate Program offers a wide range of training opportunities for students interested in pursuing doctoral level research in exciting, diverse areas across the biological sciences. BISI is an interdepartmental umbrella program that consists of four Areas of Concentration:

Behavior, Ecology, Evolution, and Systematics (BEES)
Computational Biology, Bioinformatics, and Genomics (CBBG)
Molecular and Cell Biology (MOCB)
Physiological Systems (PSYS)

Graduate students in BISI are associated with one of these areas, but their interests often span multiple concentrations, which allows the development of innovative research projects across traditional disciplinary boundaries. Descriptions of each Concentration Area, faculty research interests, and more detailed programmatic information are available at bisi.umd.edu. Although the BISI Program is administered within the College of Computer, Mathematical, and Natural Sciences, it involves distinguished graduate faculty from multiple departments and Colleges at the University of Maryland as well as outstanding adjunct faculty from nearby research institutions. Students may have opportunities to work with participating scientists from - as examples - the National Institutes of Health; Smithsonian Institution, including the National Museum of Natural History, the National Zoo, and Molecular Systematics Laboratory; the Food and Drug Administration; and the U.S. Department of Agriculture. BISI students have an incomparable wealth of potential research options and collaborations that extend from Maryland's College Park campus throughout the Washington D.C. metropolitan area.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Supplementary Application
- Publications/Presentations

All students applying to the Biological Sciences Graduate Program must have a Bachelor's degree from a recognized undergraduate institution. Applicants are expected to have a strong academic record, including coursework in advanced areas of biology as well as at least one year of calculus, general chemistry, organic chemistry, and physics. Able students with deficiencies in a particular area may be admitted and the deficiency corrected after enrollment. **Students are asked to identify a concentration area and research interests on the general application.**
To explore matches of your interests with those of BISI faculty, see the BISI website, bisi.umd.edu.
For more admissions information or to apply to the program, please visit our Graduate School website: https://gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	1 Dec

Other Deadlines: Please visit the program website at http://www.bisi.umd.edu

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Thesis option: 30 credits **Non-thesis option:** 30 credits	Thesis students must complete six credits of BISI 799: Master's Thesis Research. Non-thesis students must complete a scholarly paper. All students must complete the following requirements: • Of the 30 credits required, 18 credits must be at the 600-level or above including BISI 701: Science Teaching & Professional Development for Biology (1 credit) and BISI 688B: Bioethics (1 credit). • Of the 30 credits required, 16 credits must be in Biological Sciences with at least three courses in a single area of specialization.

**Students cannot be formally admitted into the M.S. program, but can earn the M.S. along the way to the Ph.D.*

Doctor of Philosophy (Ph.D.)

Core Requirements
All students are required to complete a minimum of 12 credits in BISI 899: Doctoral Dissertation Research, in addition to three credits of graduate seminar courses, nine credits of advanced coursework, a course in Bioethics, and BISI 701: Science Teaching & Professional Development for Biology. Students have four concentration options with additional requirements in each.
Behavior, Ecology, Evolution, and Systematics (BEES) concentration:
BEES 608A: Seminar in Behavior, Ecology, Evolution and Systematics (1 credit) Approved Statistics course or quantitative course (3 credits)
Computational Biology, Bioinformatics, and Genomics (CBBG) concentration:
CBMG 688Y: Bioinformatics and Genomics (2 credits) CBMG 688P: Programming for Biology (2 credits) CBMG 699D: Bioinformatics and Computation Biology Seminar Series (2 credits) CBMG 688B: Bioethics (1 credit) Electives (5 credits)
Molecular and Cell Biology (MOCB) concentration:
CBMG 688D: Cell Biology I: Structure and Function (2 credits) BCHM 661: Nucleic Acids (2 credits) CBMG 688F: Gene Expression (2 credits) CBMG 688I: Genetic Analysis (2 credits) CBMG 688B: Bioethics (2 credits) Electives (8 credits)
Physiological Systems (PSYS) concentration:
Bioethics course (3 credits) Graduate Seminar course (1-3 credits) Three core graduate level courses (2-4 credits each) Statistics or quantitative course (3 credits)

The Ph.D. program in Biological Sciences is an interdepartmental umbrella research program that provides opportunities for students to develop scholarly, innovative, and independent work. Courses are designed to strengthen and complement the student's research. An advisory committee helps guide each student in selecting classes and other learning experiences. Students are encouraged to present their research at national and international meetings and to publish in peer reviewed journals. Seminar series featuring prominent scientists expose students to exciting topics and help students develop collaborative contacts. During the course of their studies, each student must pass a qualifying exam, complete and defend an original dissertation, and present that dissertation work in a seminar.

Facilities and Special Resources: The campus and local area provide students access to a vast array of instrumentation, equipment, facilities, and technologies to advance biological research. As examples, the college has state of the art facilities for research in all aspects of cell and molecular biology including cell and organism culturing, protein and nucleic acid analyses, peptide sequencing, oligonucleotide synthesis and sequencing, fluorescence, confocal microscopy, scanning and transmission electron microscopy, computer graphics for molecular modeling, NMR, mass-spectroscopy, and X-ray diffraction. Students have access to a laboratory for evolutionary molecular sequence analysis; gas source stable isotope mass spectrophotometer; bioacoustic lab; flume lab; GIS (graphic information systems) lab; and high-speed network access to a wide range of desktop and super-computing facilities. Greenhouses and animal care facilities are available.

We also have several state-of the-art shared instrumentation laboratories. Two center around biological imaging for both electron and light microscopy, including a field-emission scanner and an image reconstruction/deconvolution microscope. Another shared laboratory augments existing sequencing facilities on campus, enabling large-scale processing and sequencing of nucleic acids, with multiple robotic sequenators and real time PCR. Other core facilities provide instrumentation for fluorescence-activated cell sorting (FACS), NMR, mass spectrometry, and microarray technology. Equipment and analytical instruments are available in both faculty and core laboratories for the maintenance of animal and plant tissue cultures, for the production of monoclonal antibodies, for the synthesis and micro-analysis of proteins, for large-scale fermentation and cultivation of microorganisms, and for computer assisted molecular modeling. Support staffing in shared instrumentation facilities is provided by the college, and

maintenance costs have been subsidized by the college, thereby providing even occasional users with appropriate training and access, and simultaneously keeping instrument use costs low. This strategy provides exceptional opportunities for research and training, and enables graduate students to perform experiments with instrumentation that is at the leading edge of biological technology.

Students have access to the Smithsonian National Museum and USDA collections of living and preserved organisms.
Library Facilities: The library facilities on campus, as well as their online accessibility, are outstanding. In addition, there are libraries in the local area with specialized collections. The most important are the National Agricultural Library, the Library of Congress, the National Library of Medicine, and the Smithsonian Institution Library. Thus, the University of Maryland's region contains perhaps the most comprehensive collections of books and journals in the world.

Financial Assistance: Students are supported through fellowships, research assistantships, and/or teaching assistantships. Each type of funding provides a stipend, tuition remission, and access to health and dental insurance and a prescription drug plan. Historically, all students have been supported throughout their graduate careers.

Fellowships are offered on a competitive basis. There are no separate financial disclosure forms to fill out as part of the graduate application process.

Teaching assistantships require students to assist a faculty member in teaching a course or lab section(s). Benefits of teaching assistantships include building communication and organizational skills as well as resume enhancement for academic, government, or private sector jobs. It is also delightfully rewarding to explain concepts to students and then witness their excitement as ideas "click" and their questions are resolved.

Contact Statement: Students are strongly encouraged to communicate directly with faculty in the area of their interest. Additional general information may be obtained by emailing bisi@umd.edu or by calling the Biological Sciences Graduate Office at 301-405-6905.

Please visit the Biological Sciences Graduate Program website, featuring a search engine to match research interests with faculty and links to all Concentration Areas: bisi.umd.edu

The Graduate School provides detailed information on International Student Admission here: http://gradschool.umd.edu/admissions/international-admissions and additional information for international graduate students is available on the International Students and Scholars website at http://globalmaryland.umd.edu/ .

Biophysics (BIPH)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
The Biophysics Program in the Institute for Physical Science and Technology offers Ph.D. degrees in Biophysics. It is affiliated with the College of Computer, Mathematical and Natural Sciences, and the College of Engineering. Doctoral degrees are offered.
The Maryland Biophysics Program aims to train graduate students in the use of theoretical, computational, and experimental methods to gain quantitative insights into biological systems. The post genomic era is bringing tools for unprecedented characterization and control of living systems. To fully harness these tools for quantitative insights in biology, biomedicine, and bioengineering requires expertise from a number of disciplines. Thus our program includes faculty from Chemistry, Physics, Biology, Materials Science and Bioengineering. The Biophysics Program is open to students with undergraduate degrees in chemistry, physics or biology as well as students with majors in mathematics, computational science or engineering. Because student backgrounds are diverse, we tailor the curriculum to suit the needs of the individual. The online application is located at apra@umd.edu.
Research areas include Membranes and channels, Theory of molecular machines and motors, Cell mechanics, Motility and the cytoskeleton, Theoretical studies of protein and RNA folding and aggregation, Single molecule biophysics, Theory of hydrophobic and electrostatic interactions Scattering Techniques in RNA and Polymers Protein Structure, Nonlinear dynamics and biophysics of biological regulation, Mechanisms of allostery and protein assembly. The core courses that include but are not limited to Statistical Mechanics, Chemical Thermodynamics, Biophysical Chemistry, Membrane Biophysics and Cell Biology, constitute the basis for further specialization.

Admissions Information
General Requirements:

- Statement of Purpose: In addition to the questions requested by the Graduate School, applicants should include content, both backwards and forwards looking, about their interests in the University of Maryland's Biophysics Ph.D. program
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Publications/Presentations

Students dedicated to a career in experimental or theoretical biophysics are sought.

For more admissions information or to apply to the program, please visit our Graduate School website: https://gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	17 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	17 Jan

Other Deadlines: Please visit the program website at http://www.marylandbiophysics.umd.edu

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Thesis option: 30 credits required with at least 18 at the 600 level or above (including thesis research) **Non-thesis option:** 30 credits required with at least 18	**All students must complete the following requirements:** 1. Advanced biophysics lab 2. Advanced course

at the 600 level or above	3. Two semesters of seminars 4. Oral Presentation **Non-thesis students** must also submit a scholarly paper and pass the qualifying examination at the M.S. level. **Thesis students** must also complete 6 credits of BIPH 799: Master's Thesis Research and submit a written thesis.

The Master of Science offers both a thesis and non-thesis option.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to pass a qualifying exam, submit and present a candidacy paper, as well as complete the following courses: BIPH 698: Biophysics Seminar (2 credits) BIPH 699: Research in Biophysics (4 credits) BIPH 899: Doctoral Dissertation Research (12 credits)

One course, Research in Biophysics, which consists of three seven week rotations through three experimental or theoretical research groups, is required of all students. A short presentation must be made to all students at the end of each rotation. Students must meet and report their progress to a three-person mentoring committee starting with the first semester. A qualifier exam must be passed. Admission to candidacy is granted after the successful presentation of a research proposal to the Program Director and the three-member committee. A dissertation must be written and defended before a committee.

Facilities and Special Resources: Eleven of the eighteen faculty run experimental laboratories. Multiple experiments are conducted at the same time with graduate students working on the experiments. A Biophysics Seminar is run on the average of once a week, generally given by visiting scholars. For those students electing to take the Seminar for credit, one credit is offered, and these students must sign in each week. Faculty form three-person committees to mentor students, as mentioned above. Symposia consisting of about six nationally and internationally known scholars are conducted once a semester on various topics. These are well attended by students, postdocs, faculty and visitors from local institutions such as NIH and Johns Hopkins**.**

Financial Assistance: TAships, RAships, Fellowships, arrangements for support from the National Institutes of Health.

Courses: BCHM BIOE BIOL BIPH BSCI CHEM ENMA PHYS

Keywords:* Biophysics * Membranes and channels * Biological nanomachines(molecular motors, chaperones,polymerases, F1-ATPase) * Cell Mechanics and Motility, * Protein, RNA folding * Protein aggregation * Single molecule biophysics * Mechanisms of allostery and protein assembly

Relationships: Chemical Physics (CHPH), Chemistry (CHEM), Materials Science and Engineering (ENMA), Physics (PHYS)

Biostatistics (BIOS)

Graduate Degree Program
College: Public Health

Abstract
Biostatistics is a science that addresses theory and techniques for describing, analyzing, and interpreting health data. The discipline is primarily focused on applications to problems in the health, medical, and biological sciences. The MPH with a concentration in biostatistics is a 43 credit professional degree that prepares graduates to work in public health services as practitioners, researchers, administrators, and consultants. A full-time student may complete our program in 2 years. Part-time students may take up to 4 years. The majority of courses are offered in the evenings. In addition to coursework, all biostatistics masters' students are required to complete a capstone experience that occurs after all courses are completed and includes: 1) a data analysis project and 2) an internship of at least 240 hours.
Our proximity to the nation's capital offers students unparalleled opportunities for research experiences in public health, including placements at the National Institutes of Health, National Center for Health Statistics, Centers for Disease Control, Food and Drug Administration, the Maryland Department of Health and Mental Hygiene, and many other national, state, and local health agencies.

Admissions Information
Applications for the MPH program with concentration in Biostatistics are reviewed with consideration to the following criteria:

1. Minimum 3.0 undergraduate GPA; outstanding performance in quantitative-oriented courses
2. Official GRE scores taken within the past 5 years (GRE scores are required and should be requested directly from ETS for electronic transmission to SOPHAS. Use the SPH code 0485 and the Graduate School Code 5814). Scores should be at least in the 50th percentile for all sections.
3. 3 letters of recommendation that address your academic capabilities.
4. **Statement of Purpose:** Your statement of purpose should address each of the following questions:
    1. describe your specific interest in biostatistics;
    2. what previous experiences have influenced your decision to pursue a degree in biostatistics; and
    3. how do you believe UMD's program will help you reach your career goals.
5. Relevant academic/work experience, including previous coursework in mathematics, statistical methods, and/or statistical software packages.

The University of Maryland requires a Supplemental Application and a Supplemental Application Fee of $75 for each program. Applicants will receive e-mail instructions for how to complete the Supplemental Application once your SOPHAS application is complete. **Applicants to the MPH program with concentration in Biostatistics should be sure to use the major code BIOS when selecting the program on the Supplemental Application.**

How to Apply: Applications should be submitted through the Schools of Public Health Application Service (SOPHAS) at www.SOPHAS.org. Remember to designate the University of Maryland School of Public Health, College Park, as one of your school choices along with your desired program. The University of Maryland School of Public Health GRE Code in SOPHAS is 0485 (the GRE is required in all applications).

Degree Requirements
Master of Public Health (M.P.H.)

Total Credits	Core Requirements
Non-thesis only: 43 credits	EPIB 610: Foundations of Epidemiology (3 credits) EPIB 650: Biostatistics I (3 credits) HLSA 601: Introduction to Health Systems (3 credits) HLTH 665: Health Behavior I (3 credits) MIEH 600: Foundations of Environmental Health (3 credits) EPIB 641: Public Health and Research Ethics (1 credit) EPIB 651: Biostatistics II (3 credits) EPIB 652: Categorical Data Analysis (3 credits) EPIB 653: Applied Survival Data Analysis (3 credits) EPIB 655: Longitudinal Data Analysis (3 credits) EPIB 697: Public Health Data Management (3 credits) EPIB 785: Internship in Public Health (3 credits) EPIB 786: Capstone Project in Public Health (3 credits) Electives (6 credits)

Facilities and Special Resources: Our faculty in the Department of Epidemiology and Biostatistics includes individuals with multi-faceted interests in biostatistics, epidemiology, and bioinformatics. Biostatistics faculty apply statistical techniques including survival and longitudinal analysis, computational statistics, statistical analysis of genomic and proteomic data, machine learning, neuroimaging statistics, (network) meta-analysis, missing data analysis, Bayesian hierarchical methods, and bioinformatics to analyze and interpret health data. Epidemiology faculty have research interests and expertise in the epidemiology of infectious disease and chronic disease with particular focus in the areas of HIV/STIs, cancer, health disparities, cardiovascular disease, obesity/physical activity, and sexual and reproductive health. Additional areas of specialization include social and behavioral determinants of health, aging, cultural competency, and community-based interventions.

Business Administration (BMBA)

Graduate Degree Program
College: Business

Abstract
The Robert H. Smith School of Business offers graduate programs leading to the degrees of Master of Business Administration (MBA), Master of Finance, Master of Science in Accounting (MS), Master of Science in Information Systems (MS), Master of Science in Marketing Analytics (MS), Master of Science in Supply Chain Management (MS), Executive MBA (EMBA), Online MBA, and Doctor of Philosophy (PhD). The school's MBA program is accredited nationally by the Association to Advance Collegiate Schools of Business (AACSB International). Only about 607 programs in the world are accredited by the AACSB, a reflection of the quality of the faculty, students, curriculum, and career management.
The Smith School of Business faculty has been recruited from the graduate programs of leading universities nationwide. They are dedicated scholars, teachers, and researchers with a strong commitment to academic excellence and the education of the professional manager and researcher. The Smith School of Business is dedicated to preparing graduates to lead organizations in an economy driven by technology, globalization, and rapid change. The Smith School curriculum integrates an in-depth

education in core business functions -- accounting, entrepreneurship, finance, information technology, logistics, management, and marketing -- with cross-functional e-business areas -- electronic commerce, financial engineering, services marketing, and supply chain management.

Admissions Information

We strongly encourage you to visit the Robert H. Smith School of Business website at **www.rhsmith.umd.edu**. The Smith School website contains a wealth of information regarding all graduate business programs and their admissions processes.

Admissions requirements can be found here: https://www.rhsmith.umd.edu/programs/full-time-mba/admissions

MBA and MS Admissions Office: 301-405-2559
Executive MBA Admissions Office: 301-405-2386
Online MBA Admissions Information: 877-807-8741
PhD Admissions Office: 301-405-2214
Admission criteria for the MBA program are based on: quality of undergraduate and graduate coursework; score on the GMAT or GRE; 1 letter of recommendation; professional experience; and written essay of objectives. Prospective applicants may contact the program at (301) 405-2559 for information regarding the MBA program.

Degree Requirements
Master of Business Administration (M.B.A.)

Core Requirements
Students are required to complete **54 total credits**. Part-time MBA students complete the **BUSI** designated courses. Full-time MBA students complete the **BUSM** designated courses.
BUSI 610/BUSM 602: Introduction to Financial Accounting (2 credits) BUSI 611/BUSM 616: Managerial Accounting (2 credits) BUSI 621/BUSM 621: Strategic and Transformational IT (2 credits) BUSI 630/BUSM 606: Data Models and Decisions (2 credits) BUSI 634/BUSM 624: Operations Management (2 credits) BUSI 640/BUSM 610: Financial Management (2 credits) BUSI 650/BUSM 612: Marketing Management (2 credits) BUSI 662/BUSM 600: Leadership and Teamwork (2 credits) BUSI 681/BUSM 604: Managerial Economics and Public Policy (2 credits) BUSI 683/BUSM 626: The Global Economic Environment (2 credits) BUSI 690/BUSM 614: Strategic Management (2 credits) Electives approved by advisor (32 credits)

The Robert H. Smith School of Business offers an MBA program designed to provide the educational foundation for those students with the potential to exhibit the highest degree of excellence in future careers as professional managers. The MBA program requires 54 credits of coursework, which is normally four semesters for a full-time student. There is no thesis requirement. Successful students in the program are expected to demonstrate the following: (1) a thorough and integrated

knowledge of the basic tools, concepts, and theories relating to professional management; (2) behavioral and analytical skills necessary to deal creatively and effectively with organizations and management problems; (3) an understanding of the economic, political, technological, and social environments in which organizations operate; (4) a sense of professional and personal integrity and social responsibility in the conduct of managerial affairs both internal and external to the organization.
Students whose cumulative grade point average falls below 3.0 will be placed on probation and will be given a specified amount of time to raise the average to a 3.0. Failure to do so will result in academic dismissal from the program.
Maryland MBA graduates obtain employment in a wide spectrum of organizations at highly competitive starting salaries.

Facilities and Special Resources: The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database, which matches a Smith MBA to the right industry position. The OCS also participates in regional and national career forums and job fairs, such as the National MBA Consortium, the National Black MBA Conference, the National Hispanic MBA Conference, the National Association of Women MBA's Conference, and the Career Services Council.

The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Financial Assistance: Financial aid is available to qualified full-time and Executive MBA students in the form of fellowships, graduate assistantships, and scholarships.

Contact Statement: The Smith School of Business has available brochures that give specific degree requirements for the MBA, EMBA, and MS Programs. Program information is available online at http://www.rhsmith.umd.edu. Initial inquiries should be directed to:

Business Administration (Executive) (CMBA)

Graduate Degree Program
College: Business

Abstract
The Robert H. Smith School of Business offers graduate programs leading to the degrees of Master of Business Administration (MBA), Master of Finance, Master of Science in Accounting (MS), Master of Science in Information Systems (MS), Master of Science in Marketing Analytics (MS), Master of Science in Supply Chain Management (MS), Executive MBA (EMBA), Online MBA, and Doctor of Philosophy (PhD). The school's MBA program is accredited nationally by the Association to Advance Collegiate Schools of Business (AACSB International). Only about 607 programs in the world are accredited by the AACSB, a reflection of the quality of the faculty, students, curriculum, and career management.
The Smith School of Business faculty has been recruited from the graduate programs of leading universities nationwide. They are dedicated scholars, teachers, and researchers with a strong commitment to academic excellence and the education of the professional manager and researcher. The Smith School of Business is dedicated to preparing graduates to lead organizations in an economy driven by technology, globalization, and rapid change. The Smith School curriculum integrates an in-depth education in core business functions -- accounting, entrepreneurship, finance, information technology, logistics, management, and marketing -- with cross-functional e-business areas -- electronic commerce, financial engineering, services marketing, and supply chain management.

Admissions Information
We strongly encourage you to visit the Robert H. Smith School of Business website at **www.rhsmith.umd.edu**. The Smith School website contains a wealth of information regarding all graduate business programs and their admissions processes.

Business Administration (online) (OMBA)

Graduate Degree Program
College: Business

Abstract
The Robert H. Smith School of Business offers graduate programs leading to the degrees of Master of Business Administration (MBA), Executive MBA (EMBA), Online MBA, Master of Finance, Master of Science in Accounting (MS), Master of Science in Information Systems (MS), Master of Science in Marketing Analytics (MS), Master of Science in Supply Chain Management (MS), and Doctor of Philosophy (PhD). The school's MBA program is accredited nationally by the Association to Advance

Collegiate Schools of Business (AACSB International). Only about 607 programs in the world are accredited by the AACSB, a reflection of the quality of the faculty, students, curriculum, and career management.
The Smith School of Business faculty has been recruited from the graduate programs of leading universities nationwide. They are world-renowned scholars whose teaching and research equips students with the wisdom of business scholarship rooted in the experiential lessons of the marketplace.
In addition to mastering core functional business knowledge, Smith students develop sophisticated analytical skills and an "integrative" systems understanding of the way the functional aspects of organizations interact. Students learn how to leverage big data for better decision-making, and explore their career options in a tight-knit community that encourages intelligent risk-taking, not cutthroat competition. Class sizes are small and the faculty are supportive, challenging and invested in student success.

Select an MBA specialization in Finance, Supply Chain Management, Information Systems and Business Analytics, Accounting or Marketing, or choose the general track that introduces you to the core concepts of each specialization. Earn your MBA online

in as few as under 2 years while remaining active in your current career. Engage in education online through a flexible, user-friendly learning environment recognized as one of the best in the marketplace.
Note: Curriculum and course offerings are subject to change.

Facilities and Special Resources: The Office of Career Services (OCS) serves as partner for students future success. Whether it's advancing confidently through a student's current organization or taking the leap to transition careers, Smith's OCS is here to help. The OCS provides students with access to:

- One-on-one career coaching: Appointments are available throughout the lunch hours and into the evening to accommodate our busy professionals' work schedules. Students have the option of meeting in person or remotely to cover a wide range of career-related topics.
- Assessment tools to identify career interests and strengths, and provide insight into development needs and potential business career options.
- Career exploration resources including a library of industry-specific videos and webinars, as well as business directories, articles and career guides with insider information.
- The UMD Alumni Network
- An automated job posting, application and interview scheduling system, and access to MBA-Exchange, which provides information on MBA-level opportunities throughout the country and globally.
- Opportunities to network with students and alumni from the broader Smith MBA community, and more!
- Note: OCS services may be subject to change.

Financial Assistance: Financial support may be available to qualified online MBA students in the form of scholarship.

Core Requirements
Students complete **66 total credits** including 36 credits of Business courses and 30 credits of Information Systems courses. Part-time MBA students complete the **BUSI** designated courses. Full-time MBA students complete the **BUSM** designated courses.
BUSI 610/BUSM 602: Introduction to Financial Accounting (2 credits) BUSI 611/BUSM 616: Managerial Accounting (2 credits) BUSI 621/BUSM 621: Strategic and Transformational IT (2 credits) BUSI 630/BUSM 606: Data Models and Decisions (2 credits) BUSI 634/BUSM 624: Operations Management (2 credits) BUSI 640/BUSM 610: Financial Management (2 credits) BUSI 650/BUSM 612: Marketing Management (2 credits) BUSI 662/BUSM 600: Leadership and Teamwork (2 credits) BUSI 681/BUSM 604: Managerial Economics and Public Policy (2 credits) BUSI 683/BUSM 626: The Global Economic Environment (2 credits) BUSI 690/BUSM 614: Strategic Management (2 credits) MBA Electives approved by advisor (14 credits) Information Systems core courses (12 credits) Information Systems specialization courses (18 credits)

The Robert H. Smith School of Business is a global leader in integrating business management and technology. Smith MBAs can take advantage of this strength in the joint MBA/MS degree program and leverage their managerial skills with studies that develop research and technological skills in finance, accounting, information systems, or supply chain management. Students may apply for admission to the MBA/MS degree program at the beginning of the application process or at the end of their first year in the MBA program. Students must complete all required courses for both programs and reach a total of 66 credits.

Facilities and Special Resources
The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database, which matches a Smith MBA to the right industry position. The OCS also participates in regional and national career forums and job fairs, such as the National MBA Consortium, the National Black MBA Conference, the National Hispanic MBA Conference, the National Association of Women MBA's Conference, and the Career Services Council.
The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Business Administration and Marketing Analytics (BAMA)

Graduate Degree Program
College: Business

Abstract
The Robert H. Smith School of Business offers graduate programs leading to the degrees of Master of Business Administration (MBA), Master of Finance, Master of Science in Accounting (MS), Master of Science in Information Systems (MS), Master of Science in Marketing Analytics (MS), Master of Science in Supply Chain Management (MS), Executive MBA (EMBA), Online MBA, and Doctor of Philosophy (PhD). The school's MBA program is accredited nationally by the Association to Advance Collegiate Schools of Business (AACSB International). Only about 607 programs in the world are accredited by the AACSB, a reflection of the quality of the faculty, students, curriculum, and career management.
The Smith School of Business faculty has been recruited from the graduate programs of leading universities nationwide. They are dedicated scholars, teachers, and researchers with a strong commitment to academic excellence and the education of the professional manager and researcher. The Smith School of Business is dedicated to preparing graduates to lead organizations in an economy driven by technology, globalization, and rapid change. The Smith School curriculum integrates an in-depth education in core business functions -- accounting, entrepreneurship, finance, information technology, logistics, management, and marketing - with cross-functional e-business areas - electronic commerce, financial engineering, services marketing, and supply chain management.

Admissions Information
We strongly encourage you to visit the Robert H. Smith School of Business website at **www.rhsmith.umd.edu**. The Smith School website contains a wealth of information regarding all graduate business programs and their admissions processes.

Business Administration and Pharmacy (BPHR)

Graduate Degree Program
College: Business

Abstract
The Robert H. Smith School of Business offers graduate programs leading to the degrees of Master of Business Administration (MBA), Master of Finance, Master of Science in Accounting (MS), Master of Science in Information Systems (MS), Master of Science in Marketing Analytics (MS), Master of Science in Supply Chain Management (MS), Executive MBA (EMBA), Online MBA, and Doctor of Philosophy (PhD). The school's MBA program is accredited nationally by the Association to Advance Collegiate Schools of Business (AACSB International). Only about 607 programs in the world are accredited by the AACSB, a reflection of the quality of the faculty, students, curriculum, and career management.
The Smith School of Business faculty has been recruited from the graduate programs of leading universities nationwide. They are dedicated scholars, teachers, and researchers with a strong commitment to academic excellence and the education of the professional manager and researcher. The Smith School of Business is dedicated to preparing graduates to lead organizations in an economy driven by technology, globalization, and rapid change. The Smith School curriculum integrates an in-depth education in core business functions -- accounting, entrepreneurship, finance, information technology, logistics, management, and marketing - with cross-functional e-business areas - electronic commerce, financial engineering, services marketing, and supply chain management.

Admissions Information
Students must apply to each institution for admission. The Smith School of Business and the School of Pharmacy will use separate application processes for admission purposes. Students must meet the entrance requirements of both institutions. Furthermore, once admitted into the program, students will be subject to the rules and conditions of both institutions about acceptable academic performance, reasonable progress toward completion of the degree, and standards of ethical conduct.

We strongly encourage you to visit the Robert H. Smith School of Business website at **www.rhsmith.umd.edu**. The Smith School website contains a wealth of information regarding all graduate business programs and their admissions processes.

Business Administration and Public Policy (BMPO)

Graduate Degree Program
College: Business / Public Policy

Abstract
The School of Public Policy is one of the nation's leading graduate programs devoted to the study of public policy, management and international affairs, with particular expertise in the fields of environmental policy, energy policy, international development, international security and economic policy, health policy, education policy, social policy, non-profit management, public management and leadership,acquisitions, and public finance. The School offers a wide variety of master's programs, joint degree programs, graduate certificate programs, and one of the nation's premier doctorate programs. The School's location just outside of Washington, D.C. attracts a stellar faculty of scholar-practitioners who are experts in the theory and practice of public policy and management and influential participants in the nation's policy-making process. The location and faculty in turn attract outstanding students by providing them, not only an in-depth, rich curriculum, but extensive exposure to and interaction with the real-life world of policy-making, the federal government, the international diplomatic community, state and local governments, and a host of non-governmental and multinational organizations. It is one of the few policy schools to combine state, national and international policy study under one roof, and to take into account policy interests in all sectors of the economy, thus allowing both faculty and students to study the full range of issues in all courses and in all research.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) or Graduate Management Admissions Test (GMAT)
- CV/Resume
- Supplementary Application

Degree Requirements

Master of Business Administration and Master of Public Policy (dual degree) (M.B.A. and M.P.P.)

Core Requirements
Students complete **66 total credits** including at least 30 credits of Business courses, and at least 30 credits of Public Policy courses. Part-time MBA students complete the **BUSI** designated courses. Full-time MBA students complete the **BUSM** designated courses.
BUSI 610/BUSM 602: Introduction to Financial Accounting (2 credits) BUSI 611/BUSM 616: Managerial Accounting (2 credits) BUSI 621/BUSM 621: Strategic and Transformational IT (2 credits) BUSI 630/BUSM 606: Data Models and Decisions (2 credits) BUSI 634/BUSM 624: Operations Management (2 credits) BUSI 640/BUSM 610: Financial Management (2 credits) BUSI 650/BUSM 612: Marketing Management (2 credits) BUSI 662/BUSM 600: Leadership and Teamwork (2 credits) BUSI 681/BUSM 604: Managerial Economics and Public Policy (2 credits) BUSI 683/BUSM 626: The Global Economic Environment (2 credits) BUSI 690/BUSM 614: Strategic Management (2 credits) Electives approved by advisor (8-14 credits)

The University of Maryland Robert H. Smith School of Business and the School of Public Policy (both located in Van Munching Hall) offer a dual program of studies leading to both the MPP and MBA degrees in less time (typically 5 or 6 semesters) and at less cost than if the degrees were obtained separately.
Candidates must separately apply to the dual degree program in both the business school and the policy school. If admitted by only one program, the student may enroll in that program.
For further discussion of admission and degree requirements, students may consult each school's website.

Business Administration and Real Estate Development (MBRE)

Graduate Degree Program
College: Business / Architecture

Abstract
The dual degrees combines course work from the Graduate real estate and business management programs to enable a student to complete both the Master of Business Administration and Master of Real Estate Development degrees with fewer total credits than it would take to complete the two separately and sequentially.

Admissions Information: Applications for the dual degree program, will have their application assessed by each program individually, and may be admitted to one or the other, but not necessarily both programs. If both programs review committees agree to offer admission to their program than a student could proceed on the dual degree track.
For current students enrolled in either program, contact your applicable program director for directions on how you might proceed to enroll in the dual degree program.

School of Business admissions requirements can be found **here:** https://www.rhsmith.umd.edu/programs/full-time-mba/admissions Please contact Margaret McFarland at **mmcf@umd.edu** for the School of Architecture, Planning, and Preservation's admissions requirements.

The Robert H. Smith School of Business offers graduate programs leading to the degrees of Master of Business Administration (MBA), Master of Finance, Master of Science in Accounting (MS), Master of Science in Information Systems (MS), Master of Science in Marketing Analytics (MS), Master of Science in Supply Chain Management (MS), Executive MBA (EMBA), Online MBA, and Doctor of Philosophy (PhD). The school's MBA program is accredited nationally by the Association to Advance Collegiate Schools of Business (AACSB International). Only about 607 programs in the world are accredited by the AACSB, a reflection of the quality of the faculty, students, curriculum, and career management.
The Smith School of Business faculty has been recruited from the graduate programs of leading universities nationwide. They are dedicated scholars, teachers, and researchers with a strong commitment to academic excellence and the education of the professional manager and researcher. The Smith School of Business is dedicated to preparing graduates to lead organizations in an economy driven by technology, globalization, and rapid change. The Smith School curriculum integrates an in-depth education in core business functions -- accounting, entrepreneurship, finance, information technology, logistics, management, and marketing - with cross-functional e-business areas - electronic commerce, financial engineering, services marketing, and supply chain management.

Admissions Information
We strongly encourage you to visit the Robert H. Smith School of Business website at **www.rhsmith.umd.edu**. The Smith School website contains a wealth of information regarding all graduate business programs and their admissions processes.

Business and Management (BPHD)

Graduate Degree Program
College: Business

Abstract
Founded in 1856, the University of Maryland is located on 1,250-acre suburban campus eight miles from Washington, D.C. and 35 miles from Baltimore. Washington, D.C. and the surrounding region offers unparalleled professional opportunities as well as a rich culture and recreational resources. This region is home to numerous federal agencies, universities, global corporations, and national and international nonprofit organizations. Robert H. Smith School of Business is one of 13 schools and colleges at the University of Maryland - one of the top-20 public research universities. This powerful combination makes Smith the ideal place to pursue a business doctoral degree.

The primary mission of Smith PhD is to produce individuals who will contribute to the discovery and dissemination of scientific knowledge through continued careers in research, publishing, and teaching at high quality research-oriented universities and research-oriented non-academic institutions throughout the world. In carrying out this mission, it is recognized that we operate in a knowledge-based economy that is being transformed by information technology.

We offer 9 fields of study, which require individual application:

- Accounting and Information Assurance
- Finance
- Information Systems
- Managerial Economics
- Marketing (Behavioral and Quantitative)
- Organizational Behavior/Human Resource Management
- Operations Management/Management Science
- Supply Chain Management
- Strategic Management & Entrepreneurship
-

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)

- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) or Graduate Management Admissions Test (GMAT)
- CV/Resume
- Writing Sample(s) (optional)
- Publications/Presentations (optional)

Prospective applicants may call (301) 405-2214 or email businessphd@rhsmith.umd.edu for information regarding the Ph.D. program.
For more admissions information or to apply to the program, please visit our Graduate School

website: www.gradschool.umd.edu/admissions

Degree Requirements
Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 42 credits of coursework, in addition to 12 credits of BMGT 899: Doctoral Dissertation Research. **Coursework is outlined as follows:** Major field courses: 18 credits Research Tools courses: 12 credits Minor field courses: 12 credits

Smith PhD is a full-time program designed to produce outstanding scholars in management-related disciplines. The primary goal is to place graduates in academic tenure-track faculty position at research academic institutions. Thus, a strong research philosophy pervades the entire program. The low student-to-faculty ratio fosters a high degree of interaction between faculty and students on research projects of mutual interest, frequently culminating in journal articles. Students whose career aspirations are congruent with the program's research orientation can look forward to a learning experience that is not only demanding but also stimulating and enriching.

Students should complete course work within 2 years of the program and sit for a qualifying or comprehensive exam (or both) within those 2 years. Course requirements total 42 credits. The exam will determine whether the student should continue in the program. Students must successfully pass their exams, paper requirements and complete all course work before they are eligible for advancement to candidacy. Students will complete 2 teaching requirements (as instructor) upon completion of course work. Additionally, students must propose their dissertation no later than May 31st of their fourth year, which designates the fifth year for the job market and completion of the dissertation.

98% of our students receive funding from Smith PhD. Students not funded by the program are typically funded by government or military scholarships, which are guaranteed for five years. Applications are considered first for quality with the assumption that funding is required from Smith PhD. Only after rendering an admissions decision will funding be considered and evaluated. Information about financial support is located on our website.
Graduates of the program have accepted positions at various academic institutions including: Boston College, College of William and Mary, Cornell University, Columbia University, Georgetown University, Georgia Institute of Technology, Harvard, Hong Kong University of Science and Technology, Indiana University, Instituto de Empresa (Madrid), Lehigh University, McGill University, National Taiwan University, National University of Singapore, Notre Dame, Penn State University, Rensselaer Polytechnic Institute, Southern Methodist University, Syracuse University, Texas A & M University, University of

Houston, University of California (Davis), University of California (Los Angeles), University of Southern California, University of Texas, University of Washington, University of Wisconsin, and Vanderbilt University.
For more information about each field of study please visit the website.

Facilities and Special Resources: The Robert H. Smith School of Business offers a PhD Program Suite, where every student has access to office space and supplies. Students have access to software and research computing tools.

Financial Assistance: Financial support is available to doctoral students in the form of fellowships, graduate assistantships, and scholarships.

Degree Requirements
Master of Business Administration and Juris Doctorate (dual degree) (M.B.A. and J.D.)

Core Requirements
Students complete **109 total credits** including 33 credits of Business courses. The remaining coursework is completed at the University of Maryland, Baltimore. Part-time MBA students complete the **BUSI** designated courses. Full-time MBA students complete the **BUSM** designated courses.
BUSI 610/BUSM 602: Introduction to Financial Accounting (2 credits) BUSI 611/BUSM 616: Managerial Accounting (2 credits) BUSI 621/BUSM 621: Strategic and Transformational IT (2 credits) BUSI 630/BUSM 606: Data Models and Decisions (2 credits) BUSI 634/BUSM 624: Operations Management (2 credits) BUSI 640/BUSM 610: Financial Management (2 credits) BUSI 650/BUSM 612: Marketing Management (2 credits) BUSI 662/BUSM 600: Leadership and Teamwork (2 credits) BUSI 681/BUSM 604: Managerial Economics and Public Policy (2 credits) BUSI 683/BUSM 626: The Global Economic Environment (2 credits) BUSI 690/BUSM 614: Strategic Management (2 credits) Electives approved with advisor (11 credits)

The Robert H. Smith School of Business and the University of Maryland School of Law in Baltimore offer a joint program of studies leading to MBA and JD degrees. Under the terms of the joint program, a student may earn both degrees in four academic years. The accelerated program is possible because some courses can be credited toward both degrees. Candidates must apply for admission to the Law School as well as to the MBA program at College Park and must be admitted to both programs. Information about the JD program can be found at http://www.law.umaryland.edu/index.html.

Twenty-one credits of law will be substituted for MBA elective coursework. Grade point averages in each program will be computed separately and students must maintain minimum standards in each school to continue in the program. The Graduate School will not accept transfer credit from coursework taken outside the joint program. A student must complete both programs satisfactorily in order to receive both degrees. The MBA and the JD degrees must be awarded simultaneously. A student whose enrollment is terminated in one program may elect to complete work for the degree in which he or she remains enrolled, but such completion must be upon the same conditions as required of regular (nonjoint program) degree candidates. Student programs must be approved by the law school adviser for the joint program and the Associate Dean for Masters Programs. For further discussion of admission and degree requirements, students should see the above and consult the entry in the University of Maryland School of Law catalog.

Facilities and Special Resources: The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database, which matches a Smith MBA to the right industry position. The OCS also participates in regional and national career forums and job fairs, such as the National MBA Consortium, the National Black MBA Conference, the National Hispanic MBA Conference, the National Association of Women MBA's Conference, and the Career Services Council.

The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Chemical and Biomolecular Engineering (PMCH)

Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Admissions Information

General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.

Full admission as a degree seeking student requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in engineering, computer science, physics, applied mathematics, physical sciences, or a closely related field from an accredited institution
- Completion of calculus I, II, and III, differential equations, thermodynamics*, fluid mechanics*, and heat transfer* (**CHBE 301, 302, 422, 424 are equivalent.)*
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School

website: www.gradschool.umd.edu/admissions

Chemical and Life Sciences (CLFS)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
The Master of Chemical and Life Sciences is an online content-based masters program for high school science teachers that provides in depth knowledge of current research areas in the biological, biochemical and biomedical sciences. The courses cover subject matter as diverse as genetic engineering and gene therapy to chemistry, ecology and the concepts of biocomplexity. University faculty who are experts in the field will lead discussion sessions on topics of current interest with significant social impact. Topic examples include the positive and negative aspects of genetically engineered foods and their safety , the development of new energy sources and the ethical and moral issues involved in cloning and the handling of genetic information. The program also provides a set of laboratory experiences that facilitates the presentation of many of these concepts

in the classroom. Aside from the laboratory experiences, all courses will be offered exclusively through distance education as online courses. Our infrastructure provides a web based asynchronous program. Teachers who desire to update and advance their knowledge or who must complete an advanced degree or graduate courses, will find that this program meets their needs. In addition to our general program we offer focused Areas of Concentration in Biology and in Chemistry. During the course of studies towards a degree students may earn Credentials by taking a series of focused courses.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (none)
- CV/Resume
- Supplementary Application
- Science undergraduate degree: The undergraduate degree must be in biological science, chemistry, biochemistry or science education
- Teaching Experience: The applicant must demonstrate one year minimum teaching experience

Application deadlines:
• Fall: July 27
• Winter: November 8
• Spring: January 31
• Summer: May 9

Admission Information for the Master of Chemical and Life Sciences can be found here: https://oes.umd.edu/graduates-post-baccalaureates-professionals/professional-graduate-programs/master-chemical-life-sciences-mclfs/apply. UMD cannot issue the immigration documents necessary for international students to study (F1 or J1 student visas) in this program. International students who currently reside in the U.S. on existing visas may apply. Eligible international students have additional requirements per the Office of International Student & Scholar Services (ISSS). Additional requirements can be found here: https://oes.umd.edu/graduates-post-baccalaureates-professionals/professional-graduate-programs/master-chemical-life-sciences-mclfs/apply#International
In addition to a suitable undergraduate education and experience admission to the degree program requires the successful completion of either CLFS 510, Concepts of Modern Biology, or CLFS 520, Concepts in Modern Chemistry, gateway review classes; or a passing grade of B or better on either of the admissions exams based on CLFS 510 and CLFS 520. Suitable GRE scores will also be accepted to satisfy admission requirements (GRE scores are not required!). Upon application and the submission of documentation all applicants will be granted Provisional Admission to the program while they satisfy other admission requirements.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	26 July / Winter Admission deadline: 8 Nov	31 Jan / Summer Admission deadline: 9 May
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	26 July / Winter Admission deadline: 8 Nov	31 Jan / Summer Admission deadline: 9 May

Other Deadlines: Please visit the program website at http://mclfs.umd.edu/

Degree Requirements
Master of Chemical and Life Sciences (M.C.L.F.S.)

Total Credits	Core Requirements

Non-thesis only (scholarly paper required): 30 credits	CLFS 710: Experimental Biology (6 credits) CLFS 608: Graduate Seminar in Chemical and Life Sciences (3 credits) Course selection (21 credits)

Students with a thorough and up to date understanding of biology or chemistry, and who are admitted without condition*, may elect to take the appropriate Admission Exam. The Admission Exams are generally based on the content of CLFS 510, Concepts in Modern Biology or CLFS 520, Concepts in Modern Chemistry. Students who feel that they can benefit from a review may take CLFS 510, Concepts in Modern Biology or CLFS 520, Concepts in Modern Chemistry. A passing grade (B) on either the Admission Exam or CLFS 510/520 is sufficient for admission to the MCLFS program as a degree-seeking student. *Students with undergraduate grade point averages below 3.0, who have not previously demonstrated superior performance in graduate courses, will be required to take CLFS 510 or CLFS 520. (Note: as a 500-level course this cannot be used to meet the credit requirements of the MCLFS program.) Students may take individual courses in the MCLFS program as Advanced Students. Up to 12 credits may be taken in this way. A maximum of six credits from other institutions may be transferred in with approval of the Director. (See: Transfer Form) The program's curriculum consists of 30 credit hours selected from the list below (not including CLFS 510 or CLFS 520). Included in the 30 hours are 6 credits of CLFS 710, Experimental Biology, or CLFS 720, Experimental Chemistry, or the equivalent, and the completion of a scholarly paper. No more than six hours of CLFS 608 Seminar credits may be counted towards the required 30 credits.

Chemical Engineering (ENCH)

Graduate Degree Program
College: Engineering

Abstract
The Chemical and Biomolecular Engineering Department offers educational opportunities leading to a Doctor of Philosophy degree or Masters of Science degree in Chemical Engineering. Both degrees require a written thesis and an oral examination on the thesis. Our faculty research interests cover a wide array of subject matter and is well-equipped for graduate research in; aerosol science and engineering, biochemical engineering, computational modeling, fluid mechanics and mixing, fuel cell technology, metabolic engineering and systems biology, nanoparticle technology, polymer processing and characterization, polymer reaction engineering, process control, thermodynamics and transport phenomena, and systems research. The Department maintains a distributed computing network consisting of research laboratories and a PC laboratory. Major research facilities including electron microscopy, X-ray diffraction, X-ray photoelectron spectroscopy, and NMR are coordinated through a variety of laboratories.

Admissions Information: The programs leading to the Master of Science and Doctor of Philosophy degrees are open to qualified students holding the Bachelor of Science degree. Admission may be granted to students with degrees in other engineering and science areas from accredited programs, and it may be necessary in some cases to require courses to establish an undergraduate Chemical Engineering background. The general regulations of the Graduate School apply in reviewing applications.
General Requirements:

- Statement of Purpose
- Transcipt(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)

Total Credits	Core Requirements
Thesis only: 30 credits	ENCH 609: Graduate Seminar (2 credits) ENCH 610: Chemical Engineering Thermodynamics (3 credits) ENCH 620: Methods of Engineering Analysis (3 credits) ENCH 630: Transport Phenomena (3 credits) ENCH 640: Advanced Chemical Reaction Kinetics (3 credits) ENCH 799: Master's Thesis Research (6 credits)

A minimum of 30 credit hours of course work in technical areas relating directly to chemical engineering is required for the M.S. degree, 6 of which are devoted to thesis research. All students seeking graduate degrees in Chemical Engineering must enroll in ENCH 610, 620, 630, and 640 if they have not completed equivalent courses. In addition to Graduate School regulations, special degree requirements (including core course GPA requirements) are described at the Chemical Engineering Department website: www.ench.umd.edu.

Doctor of Philosophy (Ph.D.)

Core Requirements
1. Doctoral students must complete the M.S. core course requirements. 2. Minimum of 45 credits beyond the Bachelor's degree is required with at least 27 credits, other than research, numbered 600 or above. 3. 18 credits of research are required with at least 12 credits of ENCH 899: Doctoral Dissertation Research. The remaining six credits may be either ENCH 899 or ENCH 898: Pre-Candidacy Research.

The Doctor of Philosophy degree is granted only upon sufficient evidence of high attainment in scholarship and the ability to engage in independent research. The Chemical Engineering Department requires minimum of 45 semester hours of course work beyond the B.S. degree. A minimum of 18 credit hours of Thesis Research is required; students in the PhD program can register only for ENCH 899 Thesis Research. In addition to Graduate School regulations, special degree requirements include a research aptitude Ph.D. qualifying examination and a research proposal including an oral presentation covering the projected Ph.D. dissertation. All Ph.D. graduate students are required to serve as Teaching Assistants for two semesters. Other requirements, incluidng CORE course GPA requiremtns are found on the Department website: www.ench.umd.edu.

Facilities and Special Resources: A number of special facilities are available for graduate study and research and are coordinated through the Polymer Reaction Engineering Laboratory, the Chemical Process Systems Laboratory, the Laboratory for Mixing Studies, the Thermophysical Properties Laboratory, the Laboratory for Biochemical Engineering and the Biochemical Reactor Scale Up Facility. These laboratories contain advanced process control computers, polymer processing equipment and polymerization reactors, polymer characterization instrumentation, fermentors, a laser Doppler anemometry facility, and an aerosol characterization facility.

Financial Assistance: Graduate research assistantships typically support qualified Ph.D. students. Graduate fellowships are available on a competitive basis to both entering and continuing Ph.D. students. Typically only those Ph.D. students who enter the program in the Fall semester are eligible for fellowships. We are unable to provide financial support to students in our masters degree program.

Chemical Physics (CHPH)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
The Chemical Physics Program is a program of study and research leading to Master of Science and Doctor of Philosophy degrees for students who wish to enter professional careers requiring an in-depth knowledge of both physics and chemistry. Students can choose research topics across many disciplines including biophysics, chemistry, physics, chemical engineering, electrical engineering, materials and nuclear engineering, mechanical engineering and meteorology.

The Chemical Physics Program is designed for students with undergraduate degrees in physics, chemistry, or engineering who are sufficiently well prepared in mathematics and the physical sciences to undertake graduate training in physics and physical chemistry. Formal course offerings in quantum mechanics,quantum chemistry, spectroscopy, thermodynamics, electricity and magnetism, statistical mechanics and biophysics prepare a student to explore the broad range of research topics at the University of Maryland. Research areas of the Chemical Physics faculty include: the study of single molecules as well as gases, surfaces, solids and polymers by means of laser-light, electron scattering, and nanomicroscopies; the study of dynamic phenomena from atom-molecule collisions to protein-folding and hydrodynamics; thermodynamics from phase transitions and critical phenomena to combustion; the statistical mechanical theory of phase transitions, fluid dynamics and non-equilibrium phenomena; the quantum mechanical theory of molecules and molecular dynamics; atmospheric physics and chemistry; and biophysics.
The Chemical Physics Program is sponsored by the Institute for Physical Science and Technology and seven academic departments: Chemistry and Biochemistry, Physics, Electrical and Computer Engineering, Chemical Engineering, Materials and Nuclear Engineering, Mechanical Engineering, and Meteorology. Formal arrangements with the National Institute of Standards and Technology (NIST) and the National Institute of Health (NIH) allow students to perform research off campus under the supervision of a government scientist associated with the program and a Chemical Physics faculty member. The Chemical Physics Committee oversees the program and is made up of representatives from the sponsoring units with the Program Director as chair. The Chemical Physics Program Office administers the program and is affiliated with the Institute for Physical Science and Technology. A booklet describing Chemical Physics at Maryland, College Park, can be obtained from the Chemical Physics office upon request.

Admissions Information: The program is for students with undergraduate degrees in chemistry, physics or engineering. For those students with degrees in other disciplines, knowledge of calculus, differential equations, and vector algebra, as well as introductory mechanics, electricity and magnetism, and quantum mechanics is ordinarily expected.

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Thesis option: 30 credits **Non-thesis option:** 30 credits	**Thesis option** requires 24 credits of coursework including an advanced laboratory course. In addition, students must complete six credits of CHPH 799: Master's Thesis Research and submit a scholarly paper. **Non-thesis option** requires 30 credits of coursework. Students must pass a written qualifying exam at the M.S. level and submit a scholarly paper.

Admission to the program is limited to Ph.D. students. Students can earn a thesis or a non-thesis M.S. degree while working towards the Ph.D. degree. In order to earn a non-thesis M.S. degree in Chemical Physics, students must pass the written Qualifying Examination at the M.S. level, maintain a B average, scholarly paper, 30 graduate credits of which 24 must be course credits including: 1. Advanced laboratory course 2.Two credits of seminar, can be included in the non-course credits 3. Advanced course at the 600 level or above.

The Examining Committee consists of at least two faculty members, who will read the scholarly paper and attend the oral presentation. The paper should provide an informative review of the research topic selected by the candidate in consultation with his/her academic and research advisors. The bibliography is a particularly important part of the paper and should include the most significant references to the topic. The length of the paper is expected to be approximately 20 double space pages (12-point font) with 1-inch margins. The presentation is to last approximately one hour and can be part of regularly scheduled seminar series such as the Informal Statistical Mechanics Seminar or the Nonlinear Dynamics Seminar. Two faculty must be present and there should be sufficient time for questions and discussion.

For the thesis M.S. degree, students must complete a written masters thesis, maintain a B average, a scholarly paper and complete 30 graduate credits including: 1. Six credits of CHPH799 - (M.S. thesis research) 2. 24 course credits 3. Two credits of seminar, can be included in the non-course credits 4. Advanced laboratory course 5. Advanced course at the 600 level or above.

The Thesis Examining Committee is to consist of at least three faculty members including the research advisor. The Examination Committee will review the M.S. thesis, attend the oral presentation and participate in the defense of the thesis. The thesis is to consist of an introduction to the field of research with which the student is engaged, a clear statement of the problem under study, the objectives of the research, the approach taken, original results, interpretation, discussion, and conclusions. A concise review of the literature, and a bibliography of the most important literature should also be included. The M.S. thesis has no set length, but is typically 30 to 40 pages. The format of the thesis (font, margins, etc.) must follow the University of Maryland Thesis and Dissertation Style Guide.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 24 credits of coursework, in addition to 12 credits of CHPH 899: Doctoral Dissertation Research. Students must also pass a qualifying examination, and submit a scholarly paper. **Required courses include:** PHYS 622: Introduction to Quantum Mechanics I (4 credits) PHYS 623: Introduction to Quantum Mechanics II (3 credits)

CHEM 691: Quantum Chemistry II (3 credits) Ethics course (3 credits) Advanced laboratory course (3 credits) Advanced course (3 credits) Seminar courses (2 credits) Two Laboratory Rotations (1 credit per rotation, 2 credits total)

Students must pass the written Qualifying Examination passed at the Ph.D. level, normally taken at the beginning of the second year. Maintain a B average, present a scholarly paper research presentation, 24 graduate course credits including: 1. Two credits of seminar, 2. Advanced laboratory course, 3. Advanced course outside of the student's main field of study at the 600 level or above. In order to advance to Ph.D. candidacy, the student must submit a scholarly paper and make an oral presentation. The paper and presentation are evaluated by a candidacy committee consisting of at least two faculty members, generally including the advisor and a member of the advisory committee. Students with a well-developed thesis topic and research results are expected to include these results together with further research plans in their paper and presentation. Students less far along with research will present background material and summaries of the research areas in which they will be working. A concise review of the literature is expected, along with a bibliography of the most important literature. The length of the paper is expected to be between approximately 20 double space pages (12-point font) with 1-inch margins. The paper is to be submitted to the candidacy committee at least two weeks before the date of the oral presentation. The presentation is to last approximately 50 minutes and can be part of regularly scheduled seminar series such as the Informal Statistical Mechanics Seminar or the Nonlinear Dynamics Seminar. Two members of the candidacy committee must be present and there should be sufficient time for questions and discussion. Within 12 to 18 months after beginning Ph.D. research, the student is to select a Ph.D. Thesis Examination Committee. 12 credits of CHPH899 (Ph.D. dissertation research, only available after advancement to Ph.D. candidacy) Written Ph.D. dissertation. The format of the dissertation (font, margins, etc.) must follow the University of Maryland Thesis and Dissertation Style Guide.

Facilities and Special Resources: Incoming students are provided with private desk space and up to date computer facilities. There is a wide array of advanced equipment associated with the various research groups in the Program including scanning probe microscopes, high resolution spectrographs, ultra-short high-power lasers, multi-coincidence electron scattering spectrometers, and a fully equipped light-scattering laboratory**.**

Financial Assistance: Teaching and research assistantships are available for qualified students. There are also University and Chemical Physics Fellowships and fellowships in Biophysics (in cooperation with the National Institutes of Health) and Atomic, Molecular and Optical Science (in cooperation with the National Institute of Standards and Technology).

Chemistry (CHEM)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The Department of Chemistry and Biochemistry offers graduate study leading to the PhD degree in Chemistry. Our PhD program in Chemistry has a strong core in the traditional fields of chemistry, including analytical chemistry, chemical physics (in cooperation with the Institute of Physical Sciences & Technology), environmental chemistry, inorganic chemistry, nuclear chemistry, organic chemistry and physical chemistry. In addition to these traditional areas we also have interdisciplinary programs in contemporary areas such as nanoscience, chemical biology, energy sciences, materials chemistry, theoretical chemistry, and supramolecular chemistry.

Admissions Information
Admission to graduate study at the University of Maryland requires a minimum of a Bachelor of Science (B.S.), Bachelor of Arts (B.A.) or equivalent degree. Previous coursework must normally include a minimum of 30 semester or 40 quarter hours of chemistry, with at least 1 year of physical chemistry, 1 year of organic chemistry and 1 semester of inorganic chemistry, as well as laboratory courses in organic chemistry and physical chemistry. A laboratory course in analytical chemistry is also preferred. The following application materials are required: 1) Graduate application; 2) personal statement; 3) general Graduate Record Examination (GRE) scores; 4) grade transcripts; 5) 3 letters of reference. The chemistry subject GRE score is not required but it can be helpful for a complete evaluation. Applicants from non-English speaking countries must also present the results of the Test of English as a Foreign Language (TOEFL) and the Test of Spoken English (TSE).

General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Description of Research/Work Experience
- GRE Subject (optional/highly recommended)

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	17 Jan	17 Oct

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements	Specialization Options
Thesis option: 30 credits **Non-thesis option (scholarly paper):** 30 credits	CHEM 611: Professional Skills for New Graduate Students (1 credit) CHEM 612: Scientific Presentations (1 credit)	**Thesis option:** At least 12 of the 24 credits of coursework must be in Chemistry or Biochemistry numbered 600 or higher. In addition, students are required to complete six credits of CHEM 799: Master's Thesis Research. **Non-thesis option:** At least 18 of the 24 credits of coursework must be in Chemistry or Biochemistry, of which at least 14 credits must be at or above the 600 level. In addition, students are required to complete six credits of CHEM 699: Special Problems in Chemistry, and submit a scholarly paper.

The M.S. degree program offers both the thesis and non-thesis options. Twenty-four course credits, two of which may be seminar credits, and 6 research credits are required for either option. The thesis option requires a seminar presentation and an oral defense of the thesis. The non-thesis option requires writing a 'scholarly paper' that is reviewed by a committee of 3 faculty

members. Copies of specific regulations are available from the Department of Chemistry and Biochemistry or on the internet at: www.chem.umd.edu.

Doctor of Philosophy (Ph.D.)

Core Requirements
1. Doctoral students must complete 21 credits of coursework, including the M.S. core requirements. Two credits of CHEM 889: Seminar are required. One credit of CHEM 889 can be counted towards the 21 credit requirement but only if that one credit is earned during the semester that the student presents a formal seminar. 2. At least 12 of the 21 credits of coursework must be in Chemistry or Biochemistry courses numbered 600 or higher. 3. In addition to the 21 credit requirement, 12 credits of CHEM 899: Doctoral Dissertation Research are required.

Twenty-one course credit hours, with twelve credits of research (Chem 898 and Chem 899 are counted), two seminar presentations, an oral exam for advancement to candidacy, and a dissertation defense are required for the doctoral degree.

Facilities and Special Resources: The Department has state-of-the-art research facilities to support research in the fields listed above. Facilities include "clean" rooms for environmental sample analysis, X-ray crystallographic instrumentation, numerous mass spectrometers, numerous NMR spectrometers including 400, 500, 600 and 800 MHz Fourier-transform NMR spectrometers; an XPS spectrometer, Atomic Force Microscopes, ultracentrifuges, analytical optical spectrometers, and a state-of-the-art computer graphics facility.

Departmental research is supported by a departmental server and many individual faculty work stations. The Department has access to electronics shop and campus machine shops. The Chemistry Library has an extensive collection in chemistry, biochemistry and other fields. Electronic access to journals and literature search databases is available. A Macintosh workstation facility (25 units) is available in the Department for student/faculty use.

Financial Assistance: Ph.D. candidates are normally supported on graduate teaching assistantships during their first year in graduate school as long as they are in good standing. Teaching assistants usually instruct undergraduate laboratory and recitation classes and receive in return a tuition waiver of ten credits each semester, a salary and health care benefits. In subsequent years, Ph.D. candidates are typically supported on graduate research assistantships or fellowships. Financial assistance is not typically available to M.S. candidates.

Civil and Environmental Engineering (ENCE)

Graduate Degree Program
College: Engineering

Abstract

The Department of Civil and Environmental Engineering offers graduate courses leading to the Master of Science and Doctor of Philosophy degrees. All programs are planned on an individual basis by the student and an adviser taking into consideration the student's background and special interests. Areas of concentration at both the master's and doctoral levels include: transportation engineering, environmental engineering, water resources engineering, structural engineering, geotechnical engineering, civil systems, and project management.

Admissions Information
Applicants for admission should hold a B.S. degree in civil engineering. However, applicants with undergraduate degrees in other disciplines may be accepted with the stipulation that deficiencies in prerequisite undergraduate coursework be corrected before enrolling in graduate courses. In addition to the requirements set forth by the Graduate School, applicants must have a minimum GPA of 3.0 to apply to the Master's Program, and a minimum GPA of 3.5 to apply to the Doctoral Program. Applicants with lower GPA's may be considered and accepted in a provisional basis if other indicators of ability are exceptional (letters of recommendation, GRE scores, prior experience ...). Applicants are also required to submit results from the Graduate Record Examination. There are no entrance examinations required for the program.

General Requirements:
- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements	Specialization Options
Thesis option: 30 credits **Non-thesis option (scholarly paper):** 30 credits	**Thesis option:** At least 24 credits of coursework are required beyond the B.S. degree, including a minimum of 18 credits at the 600 level or above. In addition, six credits of ENCE 799: Master's Thesis Research are required. **Non-thesis option:** At least 30 credits of coursework are required beyond the B.S. degree, including a minimum of 24 credits at the 600 level or above. In addition, students are required to complete a scholarly paper.	1. Environmental 2. Civil Systems 3. Geotechnical 4. Project Management 5. Structures 6. Transportation 7. Water Resources

The M.S. degree program offers a thesis option and very rarely a non-thesis option. Applicants who do not wish to complete a thesis are encouraged to consider the Professional Master of Engineering (ENPM) degree instead:
http://www.gradschool.umd.edu/catalog/programs/enpm.htm
The Department's policies and requirements are the same as those of the Graduate School.

Doctor of Philosophy (Ph.D.)

Core Requirements
1. Doctoral students are required to complete 36 credits beyond the Bachelor's degree, which would include the credits earned in the completion of a Master's degree. 2. A qualifying examination is required in order to advance to candidacy. A doctoral student who passes the qualifying exam is admitted to candidacy will automatically be registered for 6 credits of ENCE 899: Doctoral Dissertation Research. A minimum of 12 credits must be taken in ENCE 899. 3. Specialization options include Environmental, Civil Systems, Geotechnical, Project Management, Structures, Transportation, and Water Resources.

The requirements for the Ph.D. degree are also the same as those of the Graduate School. The student will work closely with an adviser to develop an approved program of study suited to his or her individual needs. Before admission to candidacy, the student must pass a qualifying examination, which is normally taken after the coursework is at least 75 percent completed. There is no language requirement for the Ph.D.

Facilities and Special Resources: Departmental research facilities include laboratories in the following areas: transportation, systems analysis, environmental engineering, hydraulics, remote sensing, structures, and soil mechanics. Graduate students have convenient access to a spectrum of computer facilities, including networked personal computers and workstations, specialized computer-aided design, graphics, and visualization laboratories, campus mainframe computers, and remote supercomputer facilities.

The Washington and Baltimore metropolitan areas are easily accessible for data, field studies, library access, contacts with national organizations, and attendance at national meetings. The location of the University of Maryland offers a unique opportunity to obtain an advanced degree in civil engineering.

Financial Assistance: Research assistantships may be available from individual faculty members, depending on available resources. Only a limited number of teaching assistantships are available. Part-time work as grading assistants may be available as well.

Civil and Environmental Engineering (PMCE)

Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Admissions Information
General Requirements:

- Statement of Purpose

- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.

Full admission as a degree seeking student requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in engineering, preferably civil and environmental engineering, from an accredited institution
- Completion of calculus I, II, and III and differential equations
- Specific prerequisite requirements for specialization:
    - **Environmental & Water Resources:** Thermodynamics, Fluid Mechanics, Heat Transfer, ENCE 310, 411, 412, 431, 432
    - **Geotechnical & Pavements:** ENCE 340, 441, 447
    - **Structures**: ENCE 353, 454, 455
    - **Transportation**: ENCE 370, 470, 472
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements
Master of Engineering (M.Eng.)

Total Credits	Core Requirements
Non-thesis only: 30 credits	**Geotechnical and Pavements:** Courses must be approved by advisor. **Structures:** Courses must be approved by advisor. **Transportation:** Courses must be approved by advisor. **Project Management:** Courses must be approved by advisor. **Environmental and Water Resources:** Courses must be approved by advisor.

Facilities and Special Resources: Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance: Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. Tuition and fees are subject to change.

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Facilities and Special Resources: Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance: Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. Tuition and fees are subject to change.

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Classics (CLAS)

Graduate Degree Program
College: Arts and Humanities

Abstract
The Department of Classics offers a graduate program of study with specializations in Latin or Latin and Greek, leading to the Master of Arts degree. The program provides students with advanced study of the Latin and/or Greek languages and literatures in the context of a broader and deeper knowledge and understanding of Greek and Roman culture and civilization. In addition to advanced courses in language, each student will be required to take coursework in related disciplines outside of the Classics Department. Some individual programs may require more than 30 hours. Students may choose one of two tracks toward the degree: Latin or Latin and Greek.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- CV/Resume
- Writing Sample
- Second Writing Sample (optional)
- Supplementary Application
- Publications/Presentations

In addition to the general requirements for admission established by the Graduate School (see "General Information" section in this catalog), applicants must demonstrate a proficiency in translating the ancient language(s) at the advanced undergraduate level.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Latin track: 30 credits **Latin and Greek track:** 33 credits	**Latin track:** LATN 472 or LATN 672: Historical Development of the Latin Language (3 credits) Two courses may be in CLAS, HIST or an allied field Two of the remaining courses may be LATN 4xx; the others must be LATN 6xx **Latin and Greek track:** LATN 472 or LATN 672: Historical Development of the Latin Language (3 credits) GREK 472 or GREK 672: Historical Development of the Latin Language (3 credits) One course may be in CLAS, HIST or an allied field One of the remaining courses may be LATN 4xx; two of the remaining courses may be GREK 4xx; the others must be LATN 6xx or GREK 6xx
Assessment requirements	
All students must pass a proficiency exam, submit a Scholarly Article Analysis, commentary, and present at the Classics department research conference.	

Facilities and Special Resources: The Baltimore-Washington, D.C., area boasts of several outstanding classical libraries. Located in Washington, D.C., are the Center for Hellenic Studies, the Byzantine Library of Dumbarton Oaks, and the Library of Congress. Students may also use the Eisenhower Library on the campus of the Johns Hopkins University in Baltimore.

Financial Assistance: Teaching assistantships and several categories of fellowships are available for outstanding applicants. Contact the graduate director or the department chair for details.

Clinical Audiology (CAUD)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
Advanced graduate study in clinical audiology available through the Department of Hearing and Speech Sciences within the College of Behavioral and Social Sciences, consists of the Doctor of Audiology program (CAUD) in which students earn the Au.D. degree. This doctoral program is available to post-baccalaureate or post-masters students. A "fast-track" Au.D. option (CAUD) is available to post-masters students meeting certain criteria specified below. The CAUD program provides a curriculum designed to meet the educational and clinical experiences required to obtain the Certificate of Clinical Competence in Audiology (CCC-A) of the American-Speech-Language-Hearing Association and Board Certification in Audiology by the American Board of Audiology (ABA). A Ph.D. in Clinical Audiology is also available to those students who have already completed a graduate degree in Audiology (i.e., Au.D. degree or M.A. degree). A dual-degree program is available to CAUD

students, in which they earn the Au.D. degree and continue their study immediately for the Ph.D. degree. Those students in the program who wish to pursue the dual-degree program will earn the Au.D. at the point in doctoral training when they have completed all of the academic, clinical, and research requirements for this first professional degree.
(Note: Applicants for the M.A. program in Speech-Language Pathology, please see SPLA; Applications for the Hearing and Speech Sciences Ph.D., please see HESP).

- Graduate Record Examination (GRE)
- CV/Resume
- Supplemental Application
-

Admissions to the graduate program in Clinical Audiology is on a very competitive basis. Students admitted to the Au.D. (post-B.A. or post M.A.) or Clinical Ph.D. program in Audiology (post-M.A. or post-Au.D.) must have a minimum grade point average of 3.2 from a graduate degree program, or 3.4 from a baccalaureate program in hearing and speech sciences, or related discipline. In addition to the Graduate School requirements, the Department requires all applicants to furnish scores on the Graduate Record Examination. Admission to both programs is confined to fall matriculation, Prospective applicants should note that decisions on admissions are made in early March. Students must submit application materials for the fall semester by January 5. Applicants with a background in the hearing and speech sciences or a related field are considered for admission to the Au.D. and Dual Degree (Au.D./Ph.D.) programs, which usually require four and six years of graduate study, respectively. As of the fall of 2015, we will no longer be accepting students who have not fulfilled their undergraduate requirements. For more information on the prerequisite course requirements, please see our website: hesp.umd.edu. A "fast track" of the Doctor of Audiology (Au.D.) program is available to practicing audiologists who have previously earned their M.A. Applicants to this fast track must have a graduate degree in Audiology with a minimum grade point average of 3.2 in graduate work, and either the ASHA Certificate of Clinical Competence in Audiology (CCC-A) or a valid state license to practice audiology. Admissions requirements further include a minimum of two years of full time (32 hrs/week) post-masters professional audiological experience during the two years immediately preceding the application to the program and three letters of recommendation supporting these experiences. Students may enroll in the post-M.A. Au.D. program on a part-time basis.
All applicants to the CAUD graduate program are required to furnish GRE scores taken within the last five years, three letters of recommendation, official transcripts from all undergraduate and graduate studies, and a statement of purpose. Additionally, professional audiologists applying to the post-MA program must also submit evidence of ASHA certification or state licensure, and evidence of two years of full-time professional work as a clinical audiologist.
FAQs about the application and admissions process can be found at the link below:

Degree Requirements
Doctor of Audiology (Au.D.)

Core Requirements

Doctoral students are required to complete 93 credits including 61 credits of coursework and 32 credits of Clinical Registration requirements.

Coursework:

HESP 600: Instrumentation in Hearing and Speech Sciences (3 credits)	HESP 634: Anatomy and Physiology of the Auditory and Vestibular Systems (3 credits)
HESP 722: Psychoacoutics (3 credits)	HESP 724: Research Design (3 credits)
HESP 606: Basic Hearing Measurements (3 credits)	HESP 630: Electrophysiological Measurements (3 credits)
HESP 632: Medical Audiology (3 credits)	HESP 635: Aural Rehabilitation/Habilitation (3 credits)
HESP 636: Geriatric Audiology (3 credits)	HESP 645: Pediatric Audiology (3 credits)
HESP 704: Audiology Practice Management (3 credits)	HESP 700: Hearing Aids (3 credits)
HESP 701: Hearing Aids II (3 credits)	HESP 706: Advanced Clinical Audiology (3 credits)
HESP 710: Industrial and Environmental Noise Problems (3 credits)	HESP 730: Vestibular-ocular Assessment and Management (Electrophysiologic Measures II) (3 credits)
HESP 712: Cochlear Implants and Other Implantable Technologies (3 credits)	HESP 615: Counseling in Communicative Disorders (3 credits)
EDMS 645: Quantitative Research Methods I **or** PSYC 601: Quantitative Methods I (3 credits)	HESP 849: Capstone Research I (2 credits)
HESP 859: Capstone Research II (2 credits)	**61 credits subtotal**

Clinical Registration requirements:

HESP 649A: Clinical Practice in Audiology: Diagnostic Procedures (8 credits)	HESP 649B: Clinical Practice in Audiology: Aural Rehabilitation credits)
HESP 729: Advanced Clinical Practice in Audiology (4 credits)	HESP 829: Clinical Internship Residency (18 credits)

The Au.D. program for post-BA students requires 57 credit hours of graduate coursework, 4 credit hours for a doctoral capstone research project, 14 credit hours of clinical practicum registration, and 18 credit hours of full-time clinical internship registration, for a total of 93 credit hours. The Au.D. curriculum meets requirements specified in the Standards for the Certificate of Clinical Competence in Audiology of the American Speech-Language-Hearing Association, as well as those required for Board Certification in Audiology from the American Board of Audiology. Au.D. students must pass comprehensive examinations and complete a capstone research project. Full-time students are expected to complete the program in four years. The Au.D. program for returning students who already possess an M.A. degree in Audiology requires 30 credit hours of graduate coursework and 4 credit hours for a capstone research project. There is no minimum requirement of supervised clinical practicum experience, although clinical practicum will be available to students as needed.

Combined Doctor of Audiology and Doctor of Philosophy (Au.D./Ph.D.)

Core Requirements

Doctoral students are required to complete 110 credits including 78 credits of coursework and 32 credits of Clinical Registration requirements. Students must also successfully pass the comprehensive exams.

Coursework:

HESP 600: Instrumentation in Hearing and Speech Sciences (3 credits)	HESP 634: Anatomy and Physiology of the Auditory and Vestibular Systems (3 credits)
HESP 722: Psychoacoutics (3 credits)	HESP 724: Research Design (3 credits)
HESP 606: Basic Hearing Measurements (3 credits)	HESP 630: Electrophysiological Measurements (3 credits)
HESP 632: Medical Audiology (3 credits)	HESP 635: Aural Rehabilitation/Habilitation (3 credits)
HESP 636: Geriatric Audiology (3 credits)	HESP 645: Pediatric Audiology (3 credits)

HESP 700: Hearing Aids (3 credits)	HESP 701: Hearing Aids II (3 credits)
HESP 706: Advanced Clinical Audiology (3 credits)	HESP 730: Vestibular-ocular Assessment and Management (Electrophysiologic Measures II) (3 credits)
BIOL 600: Ethics in Scientific Research (2 credits)	EDMS 645: Quantitative Research Methods I and EDMS 646: Quantitative Research Methods I (6 credits total) **or** PSYC 601: Quantitative Methods I and PSYC 602: Quantitative Methods II (credits total)
Electives (10 credits)	HESP 898: Pre-candidacy Research (6 credits)
HESP 899: Doctoral Dissertation Research (12 credits)	**78 credits subtotal**

Clinical Registration Requirements:

HESP 649A: Clinical Practice in Audiology: Diagnostic Procedures (8 credits)	HESP 649B: Clinical Practice in Audiology: Aural Rehabilitation credits)
HESP 729: Advanced Clinical Practice in Audiology (4 credits)	HESP 829: Clinical Internship Residency (18 credits)

The Dual-degree (Au.D./Ph.D.) program requires 60 credit hours of graduate coursework, 6 credit hours of pre-candidacy research, 12 credit hours of dissertation research, 14 credit hours of clinical practicum registration, and 18 credit hours of full-time clinical internship registration, for a total of 110 credit hours. The Dual-degree program is designed to meet requirements specified in the Standards for the Certificate of Clinical Competence in Audiology of the American Speech-Language-Hearing Association and in the Handbook for Board Certification in Audiology of the American Board of Audiology. The program also meets all requirements of the Graduate School. Ph.D. students must develop an individual study plan with the approval of a faculty Program Planning Committee, pass comprehensive examinations, and complete a dissertation and oral defense. Full-time students are expected to complete the program in approximately 6 years. Students will earn an Au.D. degree on the way to the Ph.D. degree after they have successfully completed academic coursework, pre-candidacy research, clinical practicum, the 4th-year clinical externship, and comprehensive examinations. The Department of Hearing and Speech Sciences also offers the traditional Doctor of Philosophy degree, with major emphasis in either speech, language or hearing, for those students seeking careers in research or higher education without clinical training. For information about the Ph.D. in Hearing and Speech Sciences, please see HESP.

Facilities and Special Resources: The Department's facilities include numerous modern research laboratories equipped to support research in the areas of: acoustic phonetics, psychoacoustics, cochlear implants, hearing aids, infant and adult speech perception, neuropsychology, language, voice, fluency and electrophysiology. There are multiple sound-attenuating chambers and one electrically-shielded chamber devoted to research with humans, which are all integrated with computers and peripheral equipment for acoustic signal development, signal analysis, presentation and on-line data collection. The Department also houses the Hearing and Speech Clinic at UMCP: this clinic serves as the initial practicum site for all students pursuing clinical training. The Clinic includes multiple audiological test suites equipped for diagnostic testing, a complete hearing aid dispensary, a group rehabilitation room, and state-of-the-art equipment for behavioral and electrophysiological diagnostic testing, as well as hearing aid selection and fitting. Ten speech and language diagnostic and therapy rooms are integrated with observation areas; and an on-site language pre-school (LEAP, the Language-Learning Early Advantage Program), also equipped for observation. Students pursuing clinical training in Audiology will also have access to the Audiology Service, Division of Audiology-Head and Neck Surgery, of the University of Maryland and University Hospital in Baltimore (UMB), for part-time clinical rotations or full-time clinical externships. This Service provides a full range of auditory and vestibular diagnostic and rehabilitative services in a large metropolitan hospital setting. Students also engage in clinical activities in the Audiology Section of the Clinical Center as well as intramural research programs of the National Institute on Deafness and Other Communication Disorders of the National Institutes of Health. All of the clinical and research facilities are potentially available for the conduct of student-directed research projects, or for student participation in faculty-initiated research projects. Additional research and clinical opportunities are available at Walter Reed National Military Medical Center, the Johns Hopkins University School of Medicine, and at other facilities in the Washington and Baltimore metropolitan areas. The Library of Congress, the National Library of Medicine and the libraries of various medical schools in the Washington-Baltimore area supplement the University's extensive libraries at College Park. The Department of Hearing and Speech Sciences participates in the Center for the Comparative and Evolutionary Biology of Hearing Training Program(C-CEBH), the Neuroscience and Cognitive Sciences graduate program (see NACS), and the Maryland Language Science Center, and has ties to the Center for the Advanced Study of Language (CASL); these connections afford students the opportunity to work with faculty in other departments at the University of Maryland, College Park, or at UMB.

Financial Assistance: A limited number of graduate assistantships are available through the Department. Assistantships that carry teaching, research or clinical responsibilities are awarded on a competitive basis. Students may also seek assistantships from other units on campus or scholarships sponsored by Federal agencies (e.g., NIDCD) or private foundations (e.g., American Speech-Language-Hearing Foundation; American Academy of Audiology Foundation).

Clinical Psychological Science (MPPS)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The University of Maryland is proud to offer a Master of Professional Studies (MPS) in Clinical Psychological Science, the only master's-level degree that focuses explicitly on clinical psychological science. The goal of the MPS program is to provide rigorous training in clinical psychology, including coursework in evidence-based psychological assessment and interventions, as well as state-of-the-art research methods and critical thinking skills. Students take 10 courses (two per term) over the course of 15 months. Courses are taught in the evenings at the College Park campus and are designed for working professionals who desire advanced knowledge in clinical science to enter, advance, or expand their career options in the mental health field.

- Admissions Interview

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland.
The Masters in Clinical Psychological Science program offers Fall admissions only. The application deadline for Fall enrollment is the March 1 prior to the Fall enrollment date. International student application materials are due February 1. Invitations to interview for the program will be sent to select students by late March. UMD cannot issue the immigration documents necessary for international students to study (F1 or J1 student visas) in this program. International students who currently reside in the U.S. on existing visas may apply. Eligible international students have additional requirements per the Office of International Student & Scholar Services (ISSS). Additional Requirements can be found here: https://oes.umd.edu/graduates-post-baccalaureates-professionals/professional-graduate-programs/clinical-psychological-science/apply#International
Applicants are asked to submit an essay, undergraduate transcripts, two letters of recommendation, and a resume or CV. GRE scores are not required.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Communication (COMM)

Graduate Degree Program
College: Arts and Humanities
Abstract
The Department of Communication takes as its intellectual focus the strategic use of discourse in the public sphere. Faculty members and graduate students in the Department pursue and produce research that spans a wide range of the Communication discipline, generally focused in three broad curriculum areas: Communication Science & Social Cognition, Public Relations & Strategic Communication, and Rhetoric & Political Culture. The Department encourages applications for graduate study from students wishing to pursue interests identified within these foci. The graduate program in Communication is designed for students whose educational objective is the Ph.D. degree (currently the program does not admit students whose degree objective is the M.A.) Most graduates of the doctoral program pursue academic careers; however, some work in public policy research and other professions requiring highly developed research skills.
Admissions Information
General Requirements:

- Statement of Purpose

- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)* For this program, the TOEFL/IELTS is required of all international applicants (except applicants from the United Kingdom, Commonwealth Caribbean, Ireland, Canada, Australia, or New Zealand whose first language is English).

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Writing Sample: This could be a research paper.
- Description of Research Interests: Describe in detail your primary research interests with reference to specific studies you have conducted in the past and/or plan to carry out in the future; discuss your future career goals; 2-4 pages; upload to the Uploads Requirements section.

Students must hold a Bachelor's or Master's degree (or the equivalent) prior to enrollment in the Ph.D. program. Although most applicants to the program will have earned a degree in the communication field, others with an interest in studying communication may be admitted (with the possibility of additional courses assigned to remedy deficiencies). Admission to the Ph.D. program is based on the student's prior academic record, GRE scores, letters of recommendation, statement of purpose and research interests, sample of scholarly writing, and other information relevant to the applicant's likelihood of successfully completing the program.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	9 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	9 Jan

Degree Requirements

Master of Arts (M.A.)

The Department of Communication is not currently admitting students whose terminal degree objective is the M.A.

Doctor of Philosophy (Ph.D.)

Core Requirements
Requirements for Students entering with a B.A./B.S. in Communication (51 credits) *Active Fall 2017
COMM 700: Introduction to Graduate Study in Communication (3 credits) COMM 899: Doctoral Dissertation Research (12 credits) Cognate Area Outside Department (6 credits) Area of Specialization (15 credits) **One of the following courses (3 credits):** COMM 602: Communication Theory (3 credits) COMM 630: Seminar in Public Relations Management (3 credits) COMM 652: Contemporary Rhetorical Theory (3 credits) **One of the following course sequences (12 credits):** *Quantitative* - COMM 701: Quantitative Methods in Communication Research (3 credits), plus nine additional credits in quantitative methods and statistics *Historical/Critical* - COMM 711: Historical/Critical Methods in Communication Research (3 credits) and COMM 712: Advanced Historical/Critical Methods in Communication Research (3 credits), plus six additional credits in methods and foundations *Qualitative* - COMM 714: Introduction to Qualitative Methods in Communication Research (3 credits) and COMM 715: Advanced Qualitative Methods in Communication Research (3 credits), plus six additional credits in methods and foundations

Requirements for Students entering with a M.A. in Communication (39 credits) * Active Fall 2017
COMM 899: Doctoral Dissertation Research (12 credits) Cognate Area Outside Department (6 credits) Area of Specialization (9 credits) **One of the following course sequences (12 credits):** *Quantitative* - COMM 701: Quantitative Methods in Communication Research (3 credits), plus nine additional credits in quantitative methods and statistics *Historical/Critical* - COMM 711: Historical/Critical Methods in Communication Research (3 credits) and COMM 712: Advanced Historical/Critical Methods in Communication Research (3 credits), plus six additional credits in methods and foundations *Qualitative* - COMM 714: Introduction to Qualitative Methods in Communication Research (3 credits) and COMM 715: Advanced Qualitative Methods in Communication Research (3 credits), plus six additional credits in methods and foundations

The Ph.D. requires (1) course work to prepare the student for a research program in communication, including work in a cognate discipline, and research methods; (2) a comprehensive examination that certifies mastery of disciplinary knowledge and preparation for independent research; and (3) completion and successful defense of a dissertation that advances knowledge of communication.

Facilities and Special Resources: The Department of Communication houses a Center for Health and Risk Communication (http://www.healthriskcenter.umd.edu); a Center for Political Communication and Civic Leadership (http://www.comm.center.umd.edu); and an Oral Communication Center (https://www.comm.umd.edu/undergraduate/OCC). The campus provides extensive computer resources and excellent library collections in communication. In addition, the Washington metropolitan area provides research and laboratory facilities for studying communication unmatched by other departments in the discipline**.**

Financial Assistance: Most departmental financial aid is in the form of graduate assistantships. However, a limited number of fellowships are available.

Community Planning (CMPL)

Graduate Degree Program
College: Architecture

Abstract
The Urban Studies and Planning Program offers graduate study leading to the Master of Community Planning (MCP) degree. (The School of Architecture, Planning and Preservation, in which the MCP program is located, offers a Ph.D. in Urban and Regional Planning and Design -- see URPD for details). The MCP Program is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning. Dual Masters degrees in Planning and Architecture, Planning and Historic Preservation, and Planning and Landscape Architecture are offered. There is a transfer of credit agreement with the School of Law on the Baltimore campus as part of a joint JD and MCP program. There is also a cooperative program with the PhD program in Policy Sciences at the UMBC campus. Entering students have diverse academic backgrounds, such as architecture, fine arts, English, history, business, geography, sociology, economics, and political science. The Program's faculty specialize in metropolitan and regional planning, housing, transportation planning, environmental and land use planning, social policy, quantitative planning methods, urban design, and economic development planning. Employment opportunities remain strong for graduates in a highly competitive field. The Baltimore-Washington metropolitan region offers diverse employment potential in urban planning and program management in the public, private, and non-profit sectors.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume

The application process consists of the following:
First, fill out the on-line application for the University of Maryland Graduate School. The administrative code for the Community Planning program is "CMPL."
Second, submit all transcripts, three professional letters of recommendation, statement of purpose, resume, official GRE test scores, and portfolio as part of the application.
All applicants must have a bachelor's degree from an accredited institution. There is no restriction on the applicants' previous field of study, and indeed we encourage diversity in all senses
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	17 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	17 Jan

Other Deadlines: Please visit the program website at http://www.arch.umd.edu
Degree Requirements
Master of Community Planning (M.C.P.)

Total Credits	Core Requirements	Specialization Options
Non-thesis only (capstone project required): 48 credits	URSP 600: Research Design and Application (3 credits) URSP 601: Research Methods (3 credits) URSP 603: Land Use Planning: Concepts and Techniques (3 credits) URSP 604: The Planning Process (3 credits) URSP 605: Planning History and Theory (3 credits)	Local and Regional Economic Development Land Use and Environmental Planning Transportation Planning

	URSP 606: Planning Economics (3 credits) URSP 673: Social Planning (3 credits) or URSP 688Z: Planning and Design in the Multicultural Metropolis (3 credits) URSP 688L: Planning Technology (3 credits) URSP 708: Community Planning Studio (6 credits) URSP 709: Field Instruction (no credits) Area of specialization (9 credits) Electives (9 credits)	

Graduation requires satisfactory completion of 48 credits of course work. The 24 credits in core courses introduce students to the foundations of city and regional planning, research methods, planning process, planning history and theory, and the physical and socio-economic functions of cities and regions. Nine additional credits are required for a specialization. Specializations include community development, housing, economic development, international planning, land use / environmental planning, social planning, historic preservation, and transportation planning. A studio and internship are required. Courses are listed under URSP. The MCP program accepts up to nine credits from other graduate programs. Applicants to this program should use the CMPL program code.

Facilities and Special Resources: The University of Maryland is an excellent location for the pursuit of community planning, and graduate students are encouraged to take advantage of the opportunities. The university is eight miles from the incomparable library and research facilities of Washington, D.C. In the nations's capital, UMCP graduate students have access to, among other resources, the Library of Congress, the specialized collections of professional associations and international organizations, and agencies at all levels of government. The College Park campus is a 45-minute drive from Baltimore City, whose planning programs have gained national attention. At least two planning studio courses are offered each year, in either Baltimore, the Washington metropolitan area, or an international setting. Baltimore city and Washington, D.C. are ideal laboratories for students interested in research on urban issues and planning.
Urban Studies and Planning is one of five graduate degree programs in the University's School of Architecture, Planning, and Preservation. The School administers the National Center for Smart Growth Research and Education, which involves faculty and graduate students from several campus units in: multi-disciplinary research on the fiscal, environmental and social impacts of alternative development patterns; evaluation of growth management strategies (with a focus on Maryland's Smart Growth programs); technical assistance to state agencies and local jurisdictions; and training programs for federal program managers and state and local officials.

Financial Assistance: Aside from student loans through the university, MCP students are eligible to apply for graduate assistantships with URSP and the National Center for Smart Growth Research and Education. MCP applicants who are also Peace Corps veterans are eligible to apply for the Shriver Peaceworker fellowship program that is administered by the University of Maryland Baltimore County. Please note that competition is high for these financial awards. The program also maintains a list of internships, and many of our students work in part- or full-time jobs while completing the program. Program classes are scheduled to begin at 4:00 p.m. and 7:00 p.m. to accommodate our working students.

Relationships: Architecture (ARCH)

Community Planning and Historic Preservation (CPHP)

Graduate Degree Program
College: Architecture

Abstract
The dual degree combines course work from the Historic Preservation and Urban Studies and Planning programs to enable a student to complete both the Master of Historic Preservation and Master of Community Planning degrees with fewer credits than it would take to complete the two separately.
Students of the dual-degree program are ideally prepared to practice at the intersection of planning and preservation, disciplines that have long had close ties. For example, the Maryland Historical Trust, Maryland's State Historic Preservation Office is housed with the state's planning department. Similarly, preservation is imbedded in the planning offices in Baltimore City, and county's such as Prince Georges and Montgomery. Graduates of this program are prepared to practice in either discipline (a strength in times of economic recession) and, more importantly, are able to bring their special knowledge and understanding to preservation planning issues in communities across the state and nation.

Admissions Information
General Requirements:

- Statement of Purpose: In addition to the stated requirements, students should discuss specific interest in pursuing a concurrent dual degree within two programs.
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Writing Sample: A writing sample of at least 10-30 pages. This can be previous individual academic or professional work. It does not necessarily have to be related to historic preservation or community planning, however a related topic is preferred. The writing sample should demonstrate the ability to analyze a problem/question and clearly communicate your findings. Upload to the Writing Sample of the Uploads Requirements section of the online application.
- Must be admitted by both programs to pursue dual degree.

The administrative code for the dual degree of Master of Community Planning and Master of Historic Preservation is "CPHP."
Applicants must be admitted by both programs to pursue this dual degree but only one application is required.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	17 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	17 Jan

Other Deadlines: Please visit the program website at http://www.arch.umd.edu

Degree Requirements

Master of Community Planning and Master of Historic Preservation (dual degree) (M.C.P. and M.H.P.)

Total Credits	Core Requirements
Non-thesis only: 60 credits required	HISP 600: Introductory Seminar in Historic Preservation: Theory, History and Practice (3 credits) HISP 611: Historical Research Methods (3 credits) HISP 630: Preservation Policy and Planning (3 credits) HISP 640: Historic Preservation Law, Advocacy and Public Policy (3 credits) HISP 670: Conservation of Historic Places: Historic Materials, Building Systems, and Conservation (3 credits) HISP 680: Preservation Economics (3 credits)

	HISP 710: Final Project in Historic Preservation I (1 credit) HISP 711: Final Project in Historic Preservation II (2 credits) URSP 600: Research Design and Application (3 credits) URSP 601: Research Methods (3 credits) URSP 603: Land Use Planning: Concepts and Techniques (3 credits) URSP 604: The Planning Process (3 credits) URSP 605: Planning History and Theory (3 credits) URSP 606: Planning Economics (3 credits) URSP 688Z: Planning and Design in the Multicultural Metropolis (3 credits) or URSP 673: Social Planning (3 credits) HISP 650: Historic Preservation Studio Workshop (6 credits) or URSP 708: Community Planning Studio (6 credits) HISP 660: Internship in Historic Preservation (3 credits) or URSP 709: Field Instruction (3 credits) Electives (9 credits)

Facilities and Special Resources: The School of Architecture, Planning and Preservation is ideally located between Washington, DC, and Baltimore and surrounded by a number of historic communities and a varied physical environment. The resulting opportunity for community planning and historic preservation is unsurpassed.
The School's library contains some 57,000 monographs and 6,000 current periodicals, making it one of the major architectural libraries in the nation. The National Trust Library for Historic Preservation, housed in McKeldin Library, contains 11,000 volumes and 450 periodical titles. The Colvin Institute holds the entire library offerings of the Urban Land Institute and access to all the case studies published by ULI. TThe interdisciplinary National Center for Smart Growth Education and Research is based in the School offering perspectives and opportunities to engage important issues facing urban and regional planning as well as historic preservation.

Financial Assistance: The School of Architecture, Planning, and Preservation offers a limited and varying number of teaching and research assistantships, scholarships, fellowships, and internships. Applicants should apply for financial assistance when submitting the application for admission**.**

Scholarship determinations are made at the time of application and admission. Scholarships are generally awarded on a per course basis and commitments are made at the time of admission and apply to the entire program, subject to academic performance. Periodically there are named scholarships provided by various organizations or companies.
In addition, there are work opportunities both on, and off campus, and they are relatively plentiful. However, students in the dual degree program may find it difficult to complete their degree requirements timely if they are working off campus, or more than 10 hours per week.

Applicants should inquire as to the availability of funding for the term they are starting.

Contact Statement: Find additional information on program offerings, degree requirements, admissions, and financial aid on the School's Web site (www.arch.umd.edu).

Comparative Literature (CMLT)

Graduate Degree Program
College: Arts and Humanities

Abstract
A small, elite PhD degree program housed in the Department of English, the Comparative Literature Program is committed to the comparative and transnational study of literature and other media. Combining its own dynamic resources with those of the English Department and other units in the College of Arts and Humanities, the Program supports a wide range of interests, including Western Hemispheric and Transatlantic Studies, Film, Early Modern Studies, Classical Reception, and Diasporic and Postcolonial Studies. Students in the Program work in at least two languages and national literatures, one of them Anglophone. The Comparative Literature PhD Program complements the current PhD Program in English, giving students a place to pursue true comparative studies. Students seeking admission to the PhD Program in Comparative Literature must demonstrate advanced language proficiency before entry into the Program, and commit themselves to achieving a high degree of intellectual expertise in two or more languages and national literatures. Graduates are as likely to find academic positions in departments of foreign languages as they are to find them in English. A doctoral degree in Comparative Literature can uniquely prepare them for a profession that more and more studies literatures and cultures within a globalized, transnational context. Students are admitted to CMLT with a Masters degree in a language or literature in hand. Exceptional candidates without the MA may be admitted to the program with the understanding that once they complete an MA degree at UMD (in the English Department or in another relevant language department) they will be directly admitted to the program in CMLT.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- Academic CV
- Writing Sample: A single sample of critical writing of approximately 12-20 pages. While we encourage you to submit your best writing sample, we prefer a writing sample in your declared field of interest. The writing sample should include an updated works cited page to help us evaluate your critical and theoretical familiarity with a field, a period or a genre. (uploaded to the Uploads Requirements section of the application)
- Supplementary Application
- Master's degree

Applicants should have a strong background in arts and humanities. Students will not be admitted to the program without demonstrated proficiency in English and at least one other language. Each student must submit a critical writing sample (in English), three letters of recommendation, evidence of language proficiency, and GRE scores. International applicants must also submit TOEFL scores. **Students are admitted to CMLT with a Masters degree in a language or literature in hand. Exceptional candidates without the MA may be admitted to the program with the understanding that once they complete an MA degree at UMD (in the English Department or in another relevant language department) they will be directly admitted to the program in CMLT.**

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	15 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Dec

Other Deadlines: Please visit the program website at http://www.english.umd.edu

Degree Requirements

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete a total of 30 credits, including 12 credits of CMLT 899: Doctoral Dissertation Research. **Required courses include:** ENGL 602: Critical Theory and Literary Criticism (3 credits) ENGL 611: Approaches to College Composition (3 credits) Four additional courses (12 credits)

The Ph.D. degree normally entails at least 18 credits of course work (beyond M.A. courses) and 12 credits of dissertation research. Students take one course in Methodology (3 credits); one course in Theory (3 credits); two courses in Early Modern Literature (6 credits); and two courses in Modern Literature (6 credits). The designations early modern and modern remain flexible to accommodate different literary histories. In each of the two general periods, at least one course must be taken in the English Department in Anglophone or Comparative Literature and at least one course outside of the English Department in another language/literature. Students can use six credits of MA work to satisfy distribution requirements (though not total credit number requirements). Advising will address the depth, breadth, and coherence of each student's course plan and, if necessary, coordination among different histories of the early modern and modern.

Facilities and Special Resources: The Comparative Literature Program combines the benefits of a small department with the opportunities available at a large research university located in suburban Washington, D.C. Students have access to such University resources as the rare books and special collections of McKeldin Library, the Program for Africa and Africa in the Americas, the Women's Studies Graduate Certificate program, and the Meyerhoff Center for Jewish Studies. Area resources include the extensive archival collections of the Library of Congress, the U.S. Archives, and the Folger Institute, as well as museums, galleries, embassies and cultural institutions in the Washington area and in the Baltimore-Philadelphia-New York corridor.

Financial Assistance: Comparative Literature students are eligible for graduate assistantships and university fellowships. Depending on available resources and the student's own expertise, teaching and research assistantships may be available either in Comparative Literature or in an affiliated department.

Post-Baccalaureate Certificate (P.B.C.)
The Norbert Wiener Center offers a specific Graduate Certificate concentration in Computational Harmonic Analysis. This 12-credit program is tailored to working engineers and scientists wishing to advance their understanding of the latest Fourier, Wavelet, and Time-Frequency Harmonic Analysis methods and algorithms. The program will include the following courses: MAIT 633 Applied Fourier Analysis; MAIT 623-624 Modern Mathematical Methods of Signal and Image Processing; and a fourth elective selected with the approval of the student's advisor. Coursework must be completed with a GPA of 3.0 or higher.

Computer Science (CMSC)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
The Computer Science Department's graduate program is ranked among the top in the nation and in the top ten among public universities. Both M.S. and Ph.D degrees are offered, and almost all full-time students receive financial aid in the form of assistantships, fellowships, and grants. The Department has strong research programs in the following areas: artificial intelligence, computer systems and networking, database systems, programming languages, software engineering, scientific computing, algorithms and computation theory, computer vision, geometric computing, graphics, human-computer interaction, and bioinformatics.

Admissions Information
General Requirements:

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements	Specialization Options
Thesis option: 30 credits **Non-thesis option (scholarly paper):** 30 credits	A total of 30 credits is required, including at least four M.S. qualifying computer science courses at the 600-800 level in four of the eight areas of study. A total of 21 credits in CMSC courses must be taken.	**Thesis option:** Students must also take six credits of CMSC 799: Master's Thesis Research. **Non-thesis option:** Students must complete a scholarly paper.

The master's program offers two options: 1) 24 hours of coursework and completion of a thesis, or 2) 30 hours of coursework, comprehensive examinations, and completion of a scholarly paper.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete six 600-800 level courses spread over at least four areas, with no more than three in any one area. Two additional 600-800 level courses are required, as well as one credit of CMSC 798F:

How to Conduct Great Research. Twelve credits of CMSC 899: Doctoral Dissertation Research must also be completed.

The program milestones include a six-course qualifying sequence plus two electives, a preliminary oral examination on a dissertation proposal and reading list in three related areas, and the dissertation defense. The number and variety of courses offered each semester enable students and their advisors to plan individualized programs.

Facilities and Special Resources
The computer science department, located in the A.V. Williams building, provides general purpose computing support to advance the academic and research mission of the department. The department operates a data center in the AV Williams building with multiple 10 Gbps connections to the campus and national research networks. In addition to the primary data center, the department oversees a co-location facility for research groups wanting hands-on management of their own specialized equipment.

General purpose computing is provided via a RedHat Enterprise Virtualization environment. The system provides four compute nodes, each with at least 16 cores and 128GB of RAM. The cluster has 14 TB of shared disk. Nodes are connected to each other and the file system by multiple 10 Gbps Ethernet links.
Financial Assistance: Financial aid, in the form of teaching assistantships, research assistantships, and fellowships, is offered to qualified applicants. Almost all full-time students receive some type of financial aid.

Consecutive Interpreting (Z080)

Graduate Certificate Program
College: Arts and Humanities

Abstract
The Graduate Certificate of Professional Studies in Consecutive Interpreting (GCPS in Consecutive Interpreting) is designed to equip you with the knowledge and skills required for entry-level work in the interpreting profession. Examples include serving as dialogue interpreters for non-specialized content in community, health, legal, and political settings. You will begin to develop high-level skills in consecutive interpreting (oral rendering after the speaker pauses) and will be grounded in the tenets of the profession, including professional conduct and ethics, as you are guided through the steps needed to advance your professional skill set.

	Two languages track only - Up to 4 credits of the following electives:		
	COMM 629: Introduction to Simultaneous Interpretation	(1 credit)	not required
	COMM 730: Seminar in Health Communication (if not taken to fill requirement)	(3 credits)	not required
	COMM 762: The Rhetoric of Political Institutions (if not taken to fill requirement)	(3 credits)	not required

The Graduate Certificate of Professional Studies in Consecutive Interpreting (GCPS in Consecutive Interpreting) is designed to equip you with the knowledge and skills required for entry-level work in the interpreting profession. Examples include serving as dialogue interpreters for non-specialized content in community, health, legal, and political settings. You will begin to develop high-level skills in consecutive interpreting (oral rendering after the speaker pauses) and will be grounded in the tenets of the profession, including professional conduct and ethics, as you are guided through the steps needed to advance your professional skill set.

The GCPS in Consecutive Interpreting is a one-year 21-credit program offering instruction in the fundamental skills of consecutive interpreting in interpreting studies, the interpreting profession, and intercultural communication.

Corporate Innovation (MPCI)

Graduate Degree Program
College: Engineering

Abstract
The Master of Professional Studies in Corporate Innovation (MPS-CI) prepares graduates to apply newly gained insights and acquired competencies to real-world innovation management challenges, enabling students to navigate the innovation value chain from idea generation to product development and commercialization. MPS-CI is offered through an online learning environment within a 12-week calendar format benefitting working professionals with flexibility, convenience, and accessibility.

MPS-CI's curriculum delivers an incubator experience grounded in sound theory and rigorous analysis associated with high quality graduate education. The program offers a continuum of new venture creation within established companies and large organizations, including iterating ideas, testing business models, and launching high-potential ventures.

MPS-CI is a 30-credit, 10-course graduate program that may be completed in 15 months by enrolling in two 3-credit courses over the course of five 12-week terms. Students are admitted as a cohort and follow the plan of study as outlined below.

The MPS-CI prepares students to:

- Think beyond current paradigms in order to discover innovation needs and envision impact through strategic idea and concept development (Term 1).
- Leverage their ideas for new corporate ventures to create sustainable business models aligned with customer needs and wants in competitive marketplaces (Term 2).
- Understand the value of data collection and analysis for decision making, and how to translate product and service ideas into marketable solutions (Term 3).
- Understand how to manage commercialization challenges efficiently and effectively through negotiations and problem solving (Term 4).
- Understand how to lead the creation and launch of corporate ventures through appropriate business development, risk management, financing, and value extraction strategies (Term 5).

Counseling Psychology (COCP)

Graduate Degree Program
College: Education

Abstract
The graduate programs in Counseling Psychology, School Psychology, and Counselor Education (CoPE) include several distinct areas of specialization that are designed to provide the knowledge and skills needed for practice and scholarship in counseling and related human service professions. These fields are concerned with assisting people individually, in groups, and in organizations to attain their optimal level of personal, social, educational, and career functioning. Graduates are employed in a variety of settings including schools, colleges and universities, mental health agencies, business and industry, government agencies, and other community service and practice facilities. Depending on the specific area of specialization and level of training, program graduates may serve as researchers, educators, supervisors, psychologists, counselors, or program administrators.

Master's level professional entry-level training is offered in the School Counseling program, which prepares students to become school counselors in elementary, middle, and high school settings. School counselors are leaders, advocates, and systemic change agents who provide individual and group counseling to school-aged children, develop and implement comprehensive developmental school counseling programs, and collaborate with all key stakeholders, including classroom teachers, school administrators, parents, and community members, to ensure the academic, personal-social, and college-career development of students.

The Ph.D. degree is offered in two areas of specialization: Counseling Psychology (in collaboration with the Psychology Department) and School Psychology. Doctoral studies prepare students to achieve exceptional competence in the theory and practice of their field; to develop a high level of skills as researchers, educators and administrators; and to assume positions of leadership in relevant settings. Students in the specialization of Counseling Psychology are prepared to work as researchers, educators, psychologists, and supervisors in such settings as academic departments, college and university counseling centers, and community mental health agencies. Doctoral-level school psychologists serve as researchers, university faculty, supervisors, administrators, and advanced level practitioners. Program accreditation within CoPE includes: The School Psychology and Counseling Psychology doctoral programs are accredited by the American Psychological Association (APA). The School Psychology doctoral program is approved by the National Association of School Psychologists (NASP), and is also approved for certification by the Maryland State Department of Education. The School Counseling masters program is approved by the Maryland State Department of Education.

Note that, since 2012, the CoPE graduate programs have been part of a new department, the Department of Counseling, Higher Education, and Special Education. The CoPE programs were previously housed in the Department of Counseling and Personnel Services.

The **Counseling Psychology** program at the University of Maryland is a joint program between the Department of Counseling and Personnel Services and the Department of Psychology. Our Counseling Psychology Program has been continuously accredited by the American Psychological Association since 1953. In ratings evaluating Counseling Psychology over the past three decades, the University of Maryland is always among the very top ranked programs in the United States. Our faculty represent a broad range of research interests, including psychotherapy process and outcome research, multicultural psychology, vocational psychology, and interpersonal relationships.

Applicants for regular admission to master's degree programs must have an undergraduate GPA of at least B (3.0 on a 4.0 scale) and must submit their scores on the Graduate Record Examination. Applicants for admission to Ph.D. programs should check specific admissions criteria on the program's website. Applicants' undergraduate programs should ordinarily include at least 15 semester hours of coursework in behavioral science fields (e.g., anthropology, education, psychology, sociology, statistics). Selective screening of qualified applicants is necessary in order to limit enrollments to a size that guarantees high quality professional preparation and a close working, professional relationshp between faculty and students.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements
Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis only: 30 credits required	Statistics courses (6 credits) EDCP or PSYC 799: Master's Thesis Research (6 credits) Remainder of coursework (18 credits)

Students pursing doctoral degrees may earn the M.A. with thesis within the doctoral program while progressing to the Ph.D. The applicant should consult the web page associated with specific CoPE program areas of specialization for further information concerning the relevant entry-level requirements and curriculum.

Doctor of Philosophy (Ph.D.)

Core Requirements	
Students must complete courses in the following five areas: 1. *Individual Differences:* PSYC 611: Advanced Developmental Psychology, PSYC 612: Affective Science Perspectives on Temperament & Personality, or EDHD 720: Social Development and Socialization Processes 2. *Biological Bases of Behavior:* PSYC 606: Human Biopsychology or EDHD 775: Human Development and Neuroscience 3. *Cognitive or Affective Bases of Behavior:* PSYC 607: Advanced Topics in Human-Learning and Cognitive PsychologY, EDHD 721: Cognitive Development and Learning: An Introduction, or EDHD 760: Advanced Educational Psychology 4. *Social Bases of Behavior:* PSYC 604: Fundamentals of Social Psychology 5. *History and Systems:* PSYC 610: Historical Viewpoints and Current Theories in Psychology or EDCP789F: History of Mental Health and Psychological Science	
Remainder of coursework:	
EDMS 646: Quantitative Research Methods II (3 credits	EDMS 651: Applied Multiple Regression Analysis (3 credits)

PSYC 629: Clinical Laboratory or EDCP 789: Advanced Topics in Counseling (variable credits)	PSYC 638: Externship in Professional Psychology or EDCP 888: Apprenticeship in Counseling and Personnel Services (variable credits)
PSYC/EDCP 680: Basic Didactic Practicum in Counseling Psychology (3 credits)	PSYC/EDCP 682: Didactic - Practicum in Group Interventions (3 credits)
PSYC/EDCP 685: Didactic - Practicum in Counseling Supervision (3 credits)	PSYC/EDCP 686: Didactic - Practicum in Career Interventions (3 credits)
PSYC/EDCP 690: Research in Counseling Psychology I (3 credits)	PSYC/EDCP 691: Research in Counseling Psychology II (3 credits)
PSYC/EDCP 692: Assessment in Counseling Psychology I (3 credits)	PSYC/EDCP 693: Assessment in Counseling Psychology II (3 credits)
PSYC/EDCP 695: Ethical and Professional Issues in Counseling Psychology (3 credits)	PSYC/EDCP 697: Multicultural Issues in Counseling Psychology (3 credits)
PSYC/EDCP 698: Advanced Didactic-Practicum in Counseling Psychology (3 credits)	PSYC/EDCP 700: Theories and Strategies of Counseling Psychology (3 credits)
PSYC/EDCP 799: Master's Thesis Research (at least 6 credits required)	PSYC/EDCP 898: Pre-Candidacy Research (variable credits)
PSYC/EDCP 899: Doctoral Dissertation Research (after candidacy; 12 credits minimum)	PSYC 639 or EDCP 889: Internship in Counseling Psychology (2-3 credits)

Ph.D. students are expected to attain advanced skills as both practitioners and researchers in their area of specialization. All doctoral students are required to take advanced courses in statistics and research design. Because of the highly specialized nature of each of the doctoral programs, applicants should consult the web page for specific areas of specialization. These pages describe specific course and fieldwork requirements, the nature of the comprehensive examination required for completion of the program, and the dissertation requirements.

Facilities and Special Resources: All master's, A.G.S., and doctoral students are required to include supervised fieldwork experiences in their degree programs. The Counseling Psychology area of concentration has excellent cooperative relationships with on-campus facilities, such as the Counseling Center and Health Center. Fieldwork may also be done at a wide variety of school systems, colleges and universities, and counseling services and mental health agencies in the Baltimore/Washington metropolitan area, or nationally.

In addition to campus and program resources, students utilize the many major research and professional institutions that are easily accessible to the campus. These include the Library of Congress, the National Library of Medicine, the National Institutes of Health, the Institute of Education Sciences, professional associations such as the American Counseling Association, the American Psychological Association, and the National Association of School Psychologists.

Financial Assistance: The Department of Counseling, Higher Education, and Special Education offers graduate research, teaching, and administrative assistantships on a selective basis to both masters and doctoral students. The Department also assists its students in finding assistantship placements with a variety of on-campus and off-campus units. In addition, a small number of new Ph.D. students are offered highly selective fellowships funded jointly by the Department and the University.

Couple and Family Therapy (FCFT)

Graduate Degree Program
College: Public Health

Abstract
The mission of the CFT Master's program is to prepare competent, effective therapists for clinical practice and advancement of the marriage and family therapy discipline. The program seeks to train professionals who demonstrate superior therapeutic skills, ethical integrity, intellectual curiosity, and a sincere commitment to working with families from diverse populations.

The M.S. in Couple and Family Therapy (CFT) provides students with the coursework and supervised clinical training typically required in states with Marriage and Family Therapy licensure. The program is accredited by the Commission on Accreditation for Marriage and Family Therapy Education of the American Association for Marriage and Family Therapy (AAMFT). The Couple and Family Therapy M.S. program requires 48 credits for the non-thesis option and 51 credits for the thesis option. Completion of the program, which includes the 2-year internship, generally requires 2 years.

The Department of Family Science prepares students to describe, explain, and improve the quality of life through applied research, education, therapy, human services, policy analysis, and advocacy. The approach is interdisciplinary, emphasizing individual, interpersonal, and social change. The program of study is based on a systems or ecological paradigm, combining the perspectives of interrelated professional fields of family science, maternal and child health, couple and family therapy, family policy, behavioral science, and human services. Graduates are prepared for careers in the public, non-profit and private sectors, including university teaching, research, family policy analysis, and administrative positions in human services and public health programs.

Degree Requirements

Master of Science (M.S.)

Core Requirements	
Thesis students must complete a total of 51 credits including six credits of FMSC 799: Master's Thesis Research and successuflly pass an examination of the thesis. Non-thesis students must complete a total of 48 credits including three credits of FMSC 789: Non-thesis Researc successfully pass the written and oral case presentation.	
All students must complete the following core courses:	
FMSC 600: Family Theories (3 credits)	FMSC 610: Research Methods in Family Science (3 credits)
FMSC 640: Family Therapy: Theory and Techniques (3 credits)	FMSC 641: Couples Therapy, Theory, and Techniques (3 cre
FMSC 642: Normal and Abnormal Individual and Family Development (3 credits)	FMSC 645: Sexuality: Issues in Family Therapy and Service Delivery (3 credits)
FMSC 650: Ethical, Legal, and Professional Principles in Marriage and Family Therapy (3 credits)	FMSC 651: Psychopathology in the Family Context (3 credits
FMSC 652: Diagnosis and Treatment of Mental and Emotional Disorders in Family Systems (3 credits)	FMSC 653: Advanced Application of MFT Models and Techn (3 credits)
FMSC 654: Clinical Marriage and Family Therapy Practice (3 credits)	FMSC 658: Supervised Clinical Practice of Marriage and Fam Therapy (9 credits total)
FMSC 745: Gender and Ethnicity in Family Therapy and Service Delivery (3 credits)	**45 credits subtotal**

The CFT curriculum has three parts: didactic coursework, clinical practica, and supervised client contact. The minimum total credits required are 48 for the non-thesis option and 51 for the thesis option. Didactic coursework is taken in conjunction with 15 credits of clinical practicum seminars and 9 credits of supervision of clinical work. In the clinical practicum, theory is applied to specific case material, with faculty supervision providing support and oversight of assigned cases.

Supervised client contact begins in the student's first semester. Clinical students are required to gain 400 hours of face-to-face client contact, and 250 of these hours must be relational (with couples or families). The Center for Healthy Families, the couple and family therapy clinic operated by the Department, offers the opportunity to gain these hours. Clinical students receive 100 hours of supervision, both individual and group, for their client contact hours. Supervision in the Department's clinic is provided through a range of techniques including case discussion, one-way mirror observation, video review, co-therapy, and telephone consultation during live sessions. Students may choose to do some of their clinical work in a variety of available externship sites in the local area.

Couple and Family Therapy students may pursue the thesis or non-thesis option. For thesis option students, 6 semester hours are thesis research credits taken as FMSC 799. The thesis must be approved and then defended in an oral examination. Non-thesis option students take the 3 credit FMSC 789. Non-thesis students must complete a written and oral therapy case presentation.

Facilities and Special Resources: Center is the training and research arm of the Couple and Family Therapy Program in the Department of Family Science. Departmental graduate students and faculty provide clinical and educational services to families from surrounding communities in this state-of-the-art facility. Master's and doctoral students use data collected at the Center for research projects.

The University's close proximity to the nation's capital, the state capital in Annapolis, federal executive departments, and headquarters of national professional and public interest associations provide research and internship placements for studying family policy unmatched by any other graduate program in the discipline. The Washington-Baltimore metropolitan area offers rich opportunities for research on culturally and socioeconomically diverse families. The campus and department have excellent computer facilities. Students have ready access to the University's extensive library systems, as well as holdings from the Library of Congress, the National Institutes of Health, National Library of Medicine, National Archives, and many other library collections.

Financial Assistance: Graduate Assistantships are available to students admitted into the CFT program.

Creative Writing (CRWR)

Graduate Degree Program
College: Arts and Humanities

Abstract
The MFA in Creative Writing provides a professional course of study for graduate students seeking to perfect their ability to compose poems, stories, and novels. While primarily affording students intensive studio or practical work within their chosen genre, the MFA in Creative Writing requires that students incorporate such work with a traditional study of literature. The goal of the MFA in Creative Writing is to provide an atmosphere in which students can both hone their skills as writers and gain a theoretical and historical understanding of their craft.

The Department of English also offers graduate study leading to the Master of Arts and Doctor of Philosophy degrees in English Language and Literature. Please visit the English Language and Literature listing for more information.

Degree Requirements
Master of Fine Arts (M.F.A.)

Total Credits	Core Requirements
36 credits required	**Poetry or Fiction concentration must complete the following:** ENGL 688: Poetry Workshop (12 credits) Four English Literature Courses (12 credits) Humanities elective (3 credits) ENGL 799: Master's Thesis Research (6 credits) **Poetry concentration** students must take ENGL 788: Studies in Poetic Form (3 credits) **Fiction concentration** students must take ENGL 789: Form and Theory in Fiction (3 credits)

The M.F.A. degree program requires 36 credit hours of graduate work. The program balances courses in literature with writing workshops (30 hours), and requires a creative thesis (six hours). It offers concentrations in fiction and in poetry.

Facilities and Special Resources: Resources for research in the College Park and Washington, D.C. area are unsurpassed. The university's libraries hold over 2,000,000 volumes. In addition to the outstanding holdings of the Library of Congress, the area also offers the specialized resources of the Folger Shakespeare Library, Dumbarton Oaks, the National Archives, the Smithsonian Institution, and the National Center for the Study of the Visual Arts. The university recently partnered with the Phillips Collection to create the University of Maryland Center for Art and Knowledge, a dynamic collaboration that includes new curriculum, experimental and community-focused education programs, a new Phillips Collection gallery and an open storage facility in College Park.

UMCP is a member of the Consortium of Institutions in the Washington area, which permits graduate students at College Park to enroll in courses at other universities for graduate credit at UMCP. Graduate students in English also may take courses for graduate credit at the Folger Institute of Renaissance and Eighteenth-Century Studies, which runs a series of seminars by distinguished scholars each year.

Financial Assistance: Each year, the program accepts 8 applicants (4 fiction writers and 4 poets), who are fully funded by Teaching Assistantships, and, this current admissions cycle, we were able to enhance all 8 Teaching Assistantships with additional fellowship support. Our aid packages are typically 2-year agreements. As Teaching Assistants, our MFA students teach one class during their first year (in the spring semester) and three classes during their second year. Although a great deal of this teaching is Academic Writing (English 101), our MFA students are guaranteed at least one chance to teach an undergraduate creative writing workshop or to serve as a teaching assistant in an undergraduate literature course.

Criminology and Criminal Justice (CRIM)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The program of graduate study leading to a Traditional Master of Arts and Doctorate of Philosophy degrees in the area of Criminology and Criminal Justice is intended to prepare students for research, teaching and professional employment in operational agencies within the field of criminal justice. This program combines an intensive background in a social science discipline such as criminology, criminal justice, sociology, psychology and public policy with graduate-level study of selected aspects of crime and criminal justice.

In addition, the Department offers a joint J.D./M.A. degree with the University of Maryland Francis King Carey School of Law, located in Baltimore.

A recent study of Department M.A. and Ph.D. alumni reveals that master's degree graduates have found employment in both public and private institutions in virtually every kind of activity associated with the criminal justice system: research; teaching; federal, state and local law enforcement; courts; corrections; private security; and funded programs. Ph.D. graduates have found employment mostly in teaching, research, and government agency administration.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Writing Sample

In addition to the general Graduate School rules, special admission requirements include a major in a social science discipline and nine hours of coursework in appropriate areas of criminal justice.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	15 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Dec

Other Deadlines: Please visit the program website at https://ccjs.umd.edu/landing/Graduate

Degree Requirements

Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis only: 30 credits required	CCJS 600: Criminal Justice (3 credits) CCJS 610: Research Methods in Criminal Justice and Criminology (3 credits) CCJS 620: Fundamentals of Criminological Research (3 credits) CCJS 621: General Linear Models in Criminal Justice Research (3 credits) CCJS 651: Seminar in Criminology (3 credits) CCJS 799: Master's Thesis Research (6 credits) Electives (9 credits)

For the M.A. applicant, the undergraduate major must have included at least one course each in theory, statistics and research methods. The general plan of study for the Traditional M.A. is as follows: 30 semester hours of courses consisting of: 1) five required courses that must be passed with a 'B' or better (including two statistics courses); 2) six hours of thesis credit; and 3) three elective courses.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students who enter the program with a B.A. or B.S. must complete the master's requirements in addition to the doctoral level requirements. Students who enter with a M.S. or M.A. are required to complete only the doctoral level requirements. **Doctoral level requirements:** CCJS 650: Research Practicum (3 credits) CCJS 654: History of Criminological Thought (3 credits) CCJS 700: Advanced Research Methods in Criminology and Criminal Justice (3 credits) CCJS 710: Advanced Statistics Methods - Limited Dependent Variables (3 credits) CCJS 720: Criminal Justice System Planning: Policy Analysis for Crime Control (3 credits) Electives, one of which taken outside of department (15 credits) Advanced Statistics course (3 credits) CRIM 899: Doctoral Dissertation Research (12 credits)

Students whose highest degree is a BA/BS may choose to apply for entry either into the Traditional Masters program or directly into the Ph.D. program. Students admitted directly into the Ph.D. program will complete the requirements of the Traditional Masters program before beginning Ph.D.-level work.
In addition to the general Graduate School requirements, competence in research methodology and in quantitative techniques is expected for the completion of the Ph.D. degree, as well as competence in theory and the criminal justice field. The necessary coursework is determined on the basis of the student's previous preparation, needs and interests. The candidate is also required to pass a clinical assessment before advancing to candidacy.

Facilities and Special Resources: The Department has various opportunities for graduate students to participate in current projects. Recent students have worked in research centers at the Maryland State Commission on Criminal Sentencing Policy, National Consortium for the Study of Terrorism and Responses to Terrorism (START), and the National Institute of Justice. In addition, our faculty maintain an array of ongoing, funded research projects where students can assist. These resources provide numerous opportunities for students to engage in policy development, research, and professional activities.

Financial Assistance: Graduate research assistantships, teaching assistantships, scholarships, and fellowships are available to select individuals applying to our doctoral program. In recent years many admitted doctoral students receive funding through assistantships, and some may be awarded supplemental scholarships or fellowships offered by the Department, the BSOS Dean’s Office, or The Graduate School. Applications should be received by December 1st of the preceding Fall term for best consideration.

Critical Theory (Z017)

Graduate Certificate Program
College: Arts and Humanities

Abstract
The Graduate Certificate in Critical Theory is an integrated curriculum offering students the opportunity to gain advanced knowledge, expertise, and certification in the interdisciplinary and international field of critical theory. Students enrolled for the M.A. or Ph.D. degree within any department at the University of Maryland at College Park may apply to participate. The Certificate is presently administered through the Department of English and the Program Coordinator is Professor Christina Walter (cmwalter@umd.edu).

Admissions Information
Please contact Professor Christina Walter (cmwalter@umd.edu) for admissions information.

Curation and Management of Digital Assets (online) (Z093)

Graduate Certificate Program
College: Information Studies

Abstract
The Curation and Management of Digital Assets (CMDA) Certificate is a post-master's program that focuses on instruction about and research into the creation, management, and use of digital assets, and the long-term preservation and current and future access to those assets in a variety of disciplines and sectors of the economy. This four-course, fully online certificate designed for working professionals who need training in next-generation cloud computing technologies, tools, resources, and best practices to help them evaluate, select, and implement digital curation solutions.

In the Washington, D.C.-Maryland-Virginia region, across the nation, and around the world, the need for professionals to manage and curate digital assets is acute. Major corporations, government agencies, international organizations, universities, cultural heritage institutions, and scientific organizations need information professionals with the knowledge, skills, and abilities to manage, preserve, and curate digital resources.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (1): Letter of recommendation needs to come from a supervisor or someone who can speak to the applicant's capacity for successfully completing the certificate program.
- CV/Resume
- Master's degree in library/information science; or Master's degree in related area/relevant experience

Application Submission Requirements for International Graduate Students
The University of Maryland is dedicated to maintaining a vibrant international graduate student community. The office of International Students and Scholars Services (ISSS) is a valuable resource of information and assistance for prospective and current international students. International applicants are encouraged to explore the services they offer and contact them with related questions. Please also visit the Graduate Admissions Process for International applicants for more information.

Help with the Application
Those who have begun the application process are encouraged to contact the Hobson's helpdesk for any technical issues. Students who have not started the application process should direct questions related to the ApplyYourself application process to the Graduate School.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements
Post-Masters Certificate (P.M.C.)

Total Credits	Core Requirements
12 credits required	INST 640: Principles of Digital Curation (3 credits) INST 641: Policy and Ethics in Digital Curation (3 credits) INST 742: Implementing the Curation and Management of Digital Assets (3 credits) INST 744: Solving Problems in Digital Curation - Capstone Course (3 credits)

The Curation and Management of Digital Assets (CMDA) Certificate is a post-master's program that focuses on instruction about and research into the creation, management, and use; the long-term preservation; and the current and future access to digital assets in a variety of disciplines and sectors of the economy. It is a four-course, fully online certificate designed for working professionals who need training in next-generation cloud computing technologies, tools, and resources to help them evaluate, select, and implement digital curation solutions.

The CMDA Certificate requires the completion of four courses, with a minimum 3.0 GPA. The following courses are taken in sequence within one calendar year.

- INST 640: Principles of Digital Curation (3 credits)
- INST 641: Policy Issues in Digital Curation (3 credits)
- INST 742: Implementing Digital Curation (3 credits)

- INST 744: Solving Problems in Digital Curation (Capstone Course) (3 credits)

Facilities and Special Resources: The Digital Curation Innovation Center (DCIC) is a leader in research and education in digital curation. The Center fosters interdiciplinary partnerships in Big Records and archival analytics through public / industry / government partnerships. DCIC sponsors interdisciplinary projects that explore the integration of archival research data, user-contributed data, and technology to generate new forms of analysis and historical research. Curriculum and Instruction (EDCI)

Graduate Degree Program
College: Education

Abstract
The Department of Curriculum and Instruction (EDCI) merged with the Department of Education Policy Studies (EDPS) to form the Department of Teaching and Learning, Policy and Leadership (TLPL). For more detailed and up-to-date information about programs and resources see the TLPL website at http://education.umd.edu/TLPL.
The programs related to Curriculum and Instruction (EDCI) offer graduate study leading to the following degrees and certificates: Master of Arts (thesis and non-thesis), and Master of Education (M.Ed.). The Department offers a variety of programs individually designed to meet graduate students' personal and professional goals which may include educational research, teaching, supervising, providing leadership as curriculum specialists within the disciplines, teacher education or consulting at all levels of instruction: elementary, secondary and higher education.

Areas of concentration include art education (M.Ed. only), elementary/middle school education, history/social studies education, English education, Applied Linguistics and Language Education (ALLE) - world languages education and teaching English as a second language (TESOL), mathematics education, minority and urban education, teacher education/professional development (doctoral only), reading education, and science education. The Department also supports three master's degree programs for candidates who have a bachelor's degree in fields other than education and wish to become certified teachers. In addition, there is a six-course Post-Baccalaureate Certificate in literacy coaching designed to prepare experienced, highly qualified middle and high school teachers to serve as literacy coaches in low performing middle and high schools.

NOTE: This section includes information about the M.A. and M.Ed. programs previously associated with the Department of Curriculum and Instruction; students interested in these programs should apply to EDCI, though TLPL now sponsors these programs. Students interested in the Department's new Ph.D. program should go to Education: Teaching and Learning, Policy and Leadership (TLPL) in the graduate catalog.

Admissions Information
• M.A. admissions requirements
• M.Ed. admissions requirements
• M.Ed. (with certification) admissions requirements
See the description of the EDCI programs and admissions overview on the TLPL website for more detailed information: http://www.education.umd.edu/TLPL/.
Admissions and Deadline Notes:
Applications for the **TESOL and Minority and Urban Education (MUE) M.Ed. programs** are accepted for **Fall only**. **Summer admission** is available for the **MCERT** program **ONLY**. For information about MCERT, please visit www.education.umd.edu/MCERT.
Applications for all other master's programs are accepted for the fall or spring.
Information related to our PhD program is now listed under Education: Teaching and Learning, Policy and Leadership (TLPL) in the graduate catalog
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	1 Mar	Please visit the program website
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	1 Feb	Please visit the program website

Other Deadlines: Please visit the program website at http://www.education.umd.edu/tlpl
Degree Requirements
Post-Baccalaureate Certificate (P.B.C.)
The Post-Baccalaureate Certificate in Literacy Coaching is a six week program designed to prepare experienced, highly qualified middle and high school teachers to serve as literacy coaches in low performing middle and high schools. It is a joint program between the University of Maryland (UM)/Baltimore City Public Schools (BCPS City Schools)/Montgomery County Public Schools (MCPS)/Prince George's County Public Schools (PGCPS) serving cohorts of selected middle and high school teachers.

Master of Education (M.Ed.)

Specialization Options
Students can obtain Master's Certification in the following Master of Education specializations under the Curriculum and Instruction program. 1. Elementary Education: 42 credits required 2. Middle School Education: 42 credits required 3. Secondary English: 42 credits required 4. Secondary Social Studies: 42 credits required 5. Secondary Mathematics: 42 credits required 6. Secondary Sciences: 42 credits required 7. PreK-12 Art: 42 credits required 8. PreK-12 World Languages: 42 credits required 9. PreK-12 TESOL: 42 credits required 10. PreK-12 Physical Education: 42 credits required 11. Pre-K-12 Dance: 42 credits required **Other certification options:** 1. Teaching English to Speakers of Other Languages (TESOL) with K-12 certification: 42 credits required 2. Reading Education with Reading Specialist Certification: minimum of 30 credits required

Beyond the successful completion of courses, students must demonstrate high standards of scholarship and the ability to engage in independent research. Students must either write and defend a research thesis, complete a seminar paper (non-thesis option) or a professional portfolio--requirement varies by specialization. Your faculty advisor will help you develop a program of study that is consistent with Departmental and University guidelines.

Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis option: 30 credits required **Non-thesis option:** 30 credits required	**Students choose one of the following specializations and complete the required coursework for that area.** 1. English and Literacy Education: thesis or non-thesis options 2. Mathematics Education: thesis only 3. Minority and Urban Education: non-thesis only 4. Science Education: non-thesis only

Master's degree requirements vary according to the area of concentration and the type of degree. Typically, programs require 30 to 33 credit hours, which includes a core research requirement and possible comprehensive examination.
Beyond the successful completion of courses, students must demonstrate high standards of scholarship and the ability to engage in independent research. Students must either write and defend a research thesis, complete a seminar paper (non-thesis option) or a professional portfolio--requirement varies by specialization. Your faculty advisor will help you develop a program of study that is consistent with Departmental and University guidelines.

Facilities and Special Resources: Faculty and students in the department work closely with area schools, colleges, universities, associations and other education-related organizations. Extensive resources in the Washington, D.C., area, including embassies and other international organizations, provide exceptional opportunities for internships and field experiences, research, and materials to enhance formal course experiences. Facilities that support graduate study include the Center for Mathematics Education, the Center for Science and Technology in Education, the Multicultural Research Center, and the Maryland Equity Project. Additional facilities in the College of Education include the Educational Technology Services Center and numerous Professional Development Schools in local school districts.

Financial Assistance: A variety of sources are available for seeking financial assistance in the way of graduate assistantships, scholarships, fellowships and financial aid loans. For more information visit http://www.education.umd.edu/TLPL/admissions/financiad.html **.**

Cybersecurity (online) (MECY)

Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. For anyone needing these documents, consider applying for the campus programs.
Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
We recognize that technical experts working in Cybersecurity have diverse academic and professional backgrounds. Therefore, our admissions requirements allow for diversity but also must ensure that qualified students are prepared to succeed in this highly technical academic program.
We offer three levels of admission depending upon the academic background, academic performance, and professional experience of the applicant. Please note that three letters of recommendation (preferably professional letters) are required for admission.

- Prerequisite requirement: ENEE 150 or equivalent.
- **Full Admission:** Applicants must have a bachelor's degree, GPA of 3.0 or better, in engineering, computer science, applied mathematics, or physics from an accredited institution.
- **Provisional Admission:** Applicants must have a degree, GPA of 3.0 or better, in a closely related field of study, such as information technology, information assurance, and computer information systems and must also possess at least one of the following certifications: 1) CompTIA Security+, 2) GIAC GSEC, 3) Certified Ethical Hacker certification. Applicants admitted with provisional admission will need to complete two core courses with at least a B or better in each course.
- **Advanced Special Student Admission:** Applicants must have a bachelor's degree, GPA of 3.0 or better, in other fields of study closely related to information technology, information assurance, or computer information systems, one of the above mentioned certifications, and at least two years of post-graduate work experience in IT or a related field. To qualify for this admission, applicants must submit a detailed description of their technical work experience as a personal

statement attached to the Supplementary Application section of the application. This option is based on an individual's application. Applicants admitted as advanced special students will need to complete two core courses with at least a B or better in each course in order to be considered for provisional admission later.

- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admission

Master of Engineering (M.Eng.)

Total Credits	Core Requirements
Non-thesis only: 30 credits	ENPM 685: Security Tools for Information Security (3 credits) ENPM 686: Information Assurance (3 credits) ENPM 691: Programming in C for Cybersecurity Applications (3 credits) ENPM 693: Network Security (3 credits) ENPM 694: Networks and Protocols (3 credits) ENPM 695: Secure Operating Systems (3 credits) Electives approved by advisor (12 credits)

Facilities and Special Resources: Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students**.**

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance: Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged**.** Tuition and fees are subject to change.

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

12 credits required	**Choose four of the following courses:** ENPM 686: Information Assurance (3 credits) ENPM 691: Programming in C for Cybersecurity Applications (3 credits) ENPM 693: Network Security (3 credits) ENPM 695: Secure Operating Systems (3 credits) ENPM 694: Networks and Protocols (3 credits) ENPM 685: Security Tools for Information Security (3 credits)

Facilities and Special Resources

Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Cybersecurity Engineering (online) (Z092)

Cybersecurity Engineering (online)
Graduate Certificate Program
College: Engineering

Abstract
The Professional Master of Engineering program is a practice-oriented part-time graduate program designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland.

Admissions Information

General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Two (2) Letters of Recommendation are required for anyone with an undergraduate GPA below 3.0. Anyone with a GPA 3.0 or above should contact the Office of Advanced Engineering Education with a request to waive this requirement.

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland.

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.

Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.

We recognize that technical experts working in Cybersecurity have diverse academic and professional backgrounds. Therefore, our admissions requirements allow for diversity but also must ensure that qualified students are prepared to succeed in this highly technical academic program.

We offer three levels of admission depending upon the academic background, academic performance, and professional experience of the applicant. Please note that three letters of recommendation (preferably professional letters) are required for admission.

- Prerequisite requirement: ENEE 150 or equivalent.
- **Full Admission:** Applicants must have a bachelor's degree, GPA of 3.0 or better, in engineering, computer science, applied mathematics, or physics from an accredited institution.
- **Provisional Admission:** Applicants must have a degree, GPA of 3.0 or better, in a closely related field of study, such as information technology, information assurance, and computer information systems and must also possess at least one of the following certifications: 1) CompTIA Security+, 2) GIAC GSEC, 3) Certified Ethical Hacker certification. Applicants admitted with provisional admission will need to complete two core courses with at least a B or better in each course.
- **Advanced Special Student Admission:** Applicants must have a bachelor's degree, GPA of 3.0 or better, in other fields of study closely related to information technology, information assurance, or computer information systems, one of the above mentioned certifications, and at least two years of post-graduate work experience in IT or a related field. To qualify for this admission, applicants must submit a detailed description of their technical work experience as a personal statement attached to the Supplementary Application section of the application. This option is based on an individual's application. Applicants admitted as advanced special students will need to complete two core courses with at least a B or better in each course in order to be considered for provisional admission later.
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Dance (DANC)

Graduate Degree Program
College: Arts and Humanities

Abstract
The School of Theatre, Dance, and Performance Studies offers a Master of Fine Arts degree in Dance, focusing on developing highly skilled teaching artists with concentrations in either performance or choreography. The program is designed to give outstanding students advanced training, experience in teaching, and opportunities for creative growth. The School also offers MA, MFA, and PhD degrees in theatre. For more information visit the School website at http://tdps.umd.edu.
Aimed primarily at modern or contemporary dancers with a high skill level and background in creating and performing at a professional level, the MFA Dance program integrates studio, theory, and pedagogical practices, culminating in the third year in both a shared concert of original work(s) and an off-campus internship in a professional organization, agency, company, or school.
The competencies that students learn during the program will allow them to teach a broad range of dance and dance-related subjects after they graduate. They will be able to produce and present dance in a number of contexts and modalities, on campus, in professional and site-specific venues, and in the community.
The program provides many performance opportunities, which are directed by faculty members, visiting guest artists and fellow students. Important emphasis is given to dance theory and practices in western and world dance and to the study of current issues. We wish our graduates to exhibit a high degree of insight into the cultural contexts in which dance has developed in the past and continues to develop today.
Students are expected to spend a significant amount of time learning about technical aspects of dance as well as promotion and house management and the myriad of other organizational details that go into producing a dance performance. They will be actively involved in the practical application of this knowledge as part of their training.
The program is highly selective (four students per year) and auditions are required. The MFA is a full time three-year program. Financial support is available for each student selected.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- CV/Resume

- Sample of Work: A 10-15 minute video, providing example of applicant's choreography with a description to includename of the work, performers and other choreographers, either on the applicant's professional website or through a Vimeo/YouTube link entered into the Multimedia Requirements section of the application

Applicants should have a strong undergraduate preparation in technique and dance composition. They should have completed the following undergraduate courses or their equivalent: improvisation, kinesiology, dance teaching methods, dance production, Laban Movement Analysis, and two semesters of dance history or one semester of history and one of dance philosophy, ethnology or aesthetics. Undergraduate deficiencies will be considered on an individual basis.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	24 Jan

Degree Requirements
Master of Fine Arts (M.F.A.)

Total Credits	Core Requirements
60 credits required	**The following courses are required. Students should check with their advisor to determine the remainder of their coursework.** DANC 600: Introduction to Graduate Studies in Dance (3 credits) DANC 604: Dance Pedogogy (2 credits) DANC 608: Choreography I (3 credits) DANC 610: Workshop in the Direction of Dance Production (3 credits) DANC 611: Dance Technology and Media (3 credits) DANC 708: Choreography II (3 credits) DANC 719: Choreographic Project (3 credits) DANC 766: Movement Observation and Analysis (2 credits) DANC 784: Dance in a Global Context (3 credits)

Students enrolled in the program must complete a total of 60 credit hours of study with a minimum cumulative grade point average of 3.0 to graduate and will be assessed on a regular basis to determine their progress. Graduation from the program requires the successful completion of a final project demonstrating a synthesis of craft and artistic understanding as well as professional competence in the area of concentration. Final projects consist of: (1) the thesis project consisting of the public presentation of a body of dance works choreographed by the candidate, along with written documentation of the project as agreed upon with the thesis adviser; (2) the presentation of an online portfolio of selected indicators of artistry and pedagogy. The thesis project work may be presented in one or more publicly attended events, in a shared capacity with another MFA candidate. Candidates are responsible for the organization of all production elements involved in the presentation of the project.

Facilities and Special Resources
The location of campus, eight miles away from Washington D.C., places the School a half hour away from America's arts district where one may study and enjoy a wide variety of offerings of ballet, modern and world dance. Washington D.C. is also a center for policy and participation in the public discourse about the arts.

Financial Assistance
Four candidates are admitted each Fall, and each of the four are offered financial support through teaching assistatnship appointments, or if available, fellowships. Assistantships are never guaranteed and funding can change year to year. All qualified applicants may be nominated for Graduate School fellowships; the deadline for all applications is posted on the TPDS website annually. For more information, visit http://tdps.umd.edu or call 301-405-6694.

Data Science (Z104)

Graduate Certificate Program
College: Computer, Mathematical, and Natural Sciences

Abstract
Data Science is an emerging field encapsulating interdisciplinary activities used to create data-centric products, applications or programs that address specific scientific, socio-political, or business questions. Data Science is also commonly referred to as big data analytics, predictive analytics, advanced analytics, etc. It is making deep inroads in industry, government, health, and journalism, and many other disciplines. The Harvard Business Review has called "Data scientist" the "sexiest job of the 21st century", and due to the growing need for data science, there is a significant shortage of trained data scientists.

Offered by the nationally ranked Department of Computer Science, the University of Maryland's **Graduate Certificate of Professional Studies in Data Science**, provides a broad introduction to the field of Data Science, including how to extract and clean data, how to store and manage large volumes of data, and how to analyze such data and extract insights from it. Data Science requires the ability to integrate data, operate on data at scale, analyze data, make predictions, find patterns and form and test hypothesis. It incorporates practices from a variety of fields in computer science, chiefly Machine Learning, Statistics, Databases, and Visualization.

Digital Studies (Z110)

Graduate Certificate Program
College: Arts and Humanities

Abstract
Digital Studies in the Arts and Humanities (DSAH) is an interdisciplinary Graduate Certificate at the University of Maryland.
It offers graduate students a chance to combine the critical study of new forms of digital media and identity with creative and analytical practices utilizing digital media as well as the application of computational tools and techniques to traditional areas of humanistic study. While it is often hands-on or applied, Digital Studies also encourages—indeed demands—work that is primarily critical, theoretical, or experimental in nature.
Broadly speaking then, Digital Studies is a critical, scholarly, and creative response to the widespread influence of digital media across nearly every aspect of contemporary life; more specifically, it recognizes that teaching, research, and scholarship in the arts and humanities cannot remain isolated from the networks, platforms, and new media all around us. Scholars and practitioners of the arts and humanities should play an active critical and creative role in shaping both reception and development of digital media, both in our disciplines and in society at large.

Admissions Information
General Requirements:

- Statement of Purpose

- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (2)
- CV/Resume

Application for admission to the Certificate is currently available on a rolling basis to any matriculated graduate student in the College of Arts and Humanities (ARHU) at the University of Maryland's College Park campus.
Admission is selective, and will be offered at the discretion of the program Director and the Advisory Board. Considerations in admissions decisions will include the student's current academic standing, the extent to which students can demonstrate that their research or professional plans are compatible with the goals and objectives of the program, and—vitally—diversity.
We regret that we cannot offer admission to candidates who are not currently graduate students already enrolled in an ARHU department or program on the College Park campus, though enrollment in the Colloquium or other individual courses may be possible subject to instructor approval.

Economic Analysis (off-campus) (Z074)

Graduate Certificate Program
College: Behavioral and Social Sciences

Abstract

The off-campus Graduate Certificate in Economic Analysis (Z074) is conferred to students who graduate after successfully completing the 5 core courses of the off-campus Master of Professional Studies in Applied Economics program (MPEC). Classes meet weeknights in Washington, DC.

The Z074 Graduate Certificate requirements are identical to those of the Z098 Graduate Certificate, but the Z098 certificate is conferred to students who graduate after successfully completing the 5 core courses of the on-campus MPEM program.

Post-Baccalaureate Certificate (P.B.C.)

Total Credits	Core Requirements
15 credits	ECON 641: Microeconomic Analysis (3 credits) ECON 642: Topics in Applied Macroeconomics (3 credits) ECON 643: Empirical Analysis I: Foundations of Empirical Research (3 credits) ECON 644: Empirical Analysis II: Introduction to Economic Models (3 credits) ECON 645: Empirical Analysis III: Econometric Modeling and Forecasting (3 credits)

The Graduate Certificate in Economic Analysis (Z074) is awarded to students who have successfully completed the five core courses of the MPEC program.

Facilities and Special Resources: Classes meet at 1400 16th Street, NW, suite 140 in Washington, DC.

Financial Assistance: The economics department does not offer fellowships or graduate assistantships to any of the students in the Z074 Graduate Certificate program. To be eligible to receive any type of Federal Student Financial Aid, the student must:

1. be a U.S. citizen, U.S. Permanent Resident, or other eligible non-citizen
2. register with the Selective Service Administration (unless exempt). Students are exempt if they are female, under 18, born before 1960, on active duty in the U.S. Armed Forces, citizens of the Federated State of Micronesia or The Marshall Islands, or permanent residents of the Trust territory of the Pacific Islands (Palau).
3. enroll at a college or university that participates in the Federal Student Financial Aid Programs. These programs include the Federal Pell Grants (Pell Grants), Federal Supplemental Educational Opportunity Grants (FSEOG), Federal Subsidized and Unsubsidized Direct Loans, Federal Perkins Loans, and Federal Work-Study (FWS).
4. be working toward a degree or certificate.
5. be making Satisfactory Academic Progress.
6. not owe a refund on any federal grant, must not have borrowed federal student loans in excess of annual or aggregate loan limits, and must not be in default on any federal student loan unless satisfactory payment arrangements have been made.
Some of our students also have their tuition paid, at least in part, by an employer or other 3rd party.

The University's Financial Services Center provides Third Party Billing when the third party requires a bill from the university. More information about financial aid is available from the University of Maryland's Office of Student Financial Aid.

Economics (ECON)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The Economics Program offers graduate study leading to the Doctor of Philosophy degree. During the course of study toward the Ph.D., doctoral students also have the opportunity to obtain a Master of Arts degree. Areas of specialization include: Advanced Macroeconomics, Advanced Microeconomics, Behavioral and Experimental Economics, Comparative Institutional Economics, Econometrics, Economic Development, Economic History, Environmental and Natural Resource Economics, Industrial Organization, International Finance and Macroeconomics, International Trade, Labor Economics, Political Economy, and Public Economics.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s): Transcripts from all institutions attended after high school or secondary school whether or not a degree was received. Fall term transcripts need to be included for anyone still attending an institution.
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Supplementary Application
- Supplementary Application Two

By the application deadline, applicants should have completed advanced undergraduate courses in microeconomics, macroeconomics, and econometrics. Applicants are also expected to have completed the equivalent of three semesters of calculus, a semester of linear algebra, and a semester of differential equations. The majority of admitted students have also completed course work in real analysis or other upper-level mathematics. The Graduate Record Examination (GRE) Aptitude test is required. Submitted GRE scores must be valid through January 5, 2018. All of the Department's graduate students are full-time students.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements

Master of Arts (M.A.)
Our department offers admission only to students interested in earning a Ph.D. Our program is not designed for students who are interested only in a Master's degree. However, our Ph.D. students may obtain an M.A. degree during their program, either as a terminal degree for students leaving the Ph.D. program, or as an intermediate sign of achievement for students who are continuing in the Ph.D. program. For students who are interested in applied economics, but are not pursuing a Ph.D., the University of Maryland offers a professional masters in applied economics. This program is designed for working professionals;

it is not appropriate for a Ph.D. in economics. Contact masters@econ.umd.edu or visit http://masters.econ.umd.edu for more information

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete a minimum of 33 credits, including 12 credits of ECON 899: Doctoral Dissertation Research. **Course requirements are as follows:** ECON 623: Econometrics I (3 redits) ECON 624: Econometrics II (3 credits) **Two of the following workshops, each in a different semester:** ECON 808: Workshop on Macroeconomics and Growth (2 credits) ECON 828: Workshop in Econometrics (2 credits) ECON 848: Workshop in International Development, and Comparative Economics (2 credits) ECON 868: Workshop in Industrial Organization (2 credits) ECON 878: Workshop in Labor Economics (2 credits) **Remaining coursework:** • Three courses in a major field and two courses in a minor field (average grade of B+ or better) • A supporting course at the 600-level or above (grade of B- or better)

The Department of Economics at the University of Maryland prepares graduate students for careers in teaching, research, and government service. The course of study provides a solid foundation in economic theory, econometrics and applied fields. The Ph.D. program requires: (1) written examinations in microeconomic and macroeconomic theory, taken during the summer after the first year of study, (2) completion of a three-course sequence and a written examination or field paper in a major field, (3) completion of a two-course sequence in a minor field, (3) completion of an econometrics sequence, (4) an additional supporting course in a theoretical or applied field, and (5) a dissertation. In the third year, students begin directed research by participating in workshops appropriate to their dissertation research.

Financial Assistance: Many students entering our graduate program receive financial aid. Some students receive graduate assistantships, requiring about 15 hours of teaching or research service per week. Graduate assistantships provide a stipend and a very attractive package of fringe benefits that include medical insurance and full tuition remission. Other students receive first-year fellowships. These fellowships also include a stipend, medical insurance and tuition remission, but do not require students to work as a teaching or research assistant. In most cases, fellowships convert to assistantships beginning in the second year. Students who enter our program with financial aid are guaranteed financial aid for two years in all cases, and for five years conditional on satisfactory progress in the program.

Electrical and Computer Engineering (ENEE)

Graduate Degree Program
College: Engineering

Abstract
The Department of Electrical and Computer Engineering (ECE) at the University of Maryland, College Park offers one of the strongest and most highly-ranked programs in the nation. Led by 89 full-time and affiliate faculty members and 50 research faculty and postdocs, the research programs of the department cover a wide spectrum of activities in the areas of:

- Communications and Networking
- Signal Processing
- Control, Robotics, and Dynamical Systems
- Computer Engineering
- Optics and Photonics
- Circuits and Systems
- Electronic Materials and Devices
- Bioelectronics and Systems
- Applied Electromagnetics

Our close affiliation with a number of research institutes such as the Institute for Systems Research, the Institute for Advanced Computer Studies, the Institute for Research in Electronics and Applied Physics, the Institute for Physical Science and Technology, and the Maryland Center for Integrated Nano Science and Engineering provides to our students and researchers the opportunity for team-oriented, cross-disciplinary research and access to the institutes' state-of-the-art laboratories.

ECE is a large department that offers a broad range of programs and research opportunities. Its research innovations are aimed at helping government and industry face today's most difficult global challenges. Employers and peer institutions recognize the prestige of Maryland's engineering programs.

Maryland's proximity to Washington, DC, offers unique research opportunities with national and government laboratories such as NASA's Goddard Space Flight Center, the National Institutes of Health, the National Institute of Standards and Technology, and the Army and Navy Research Labs. No other top Engineering program in the U.S. can provide such close proximity and access to national laboratories, federal government, and the Department of Defense.

The Department of Electrical and Computer Engineering offers graduate study leading to the Master of Science and Doctor of Philosophy degrees.

For additional information about the department's programs and research, please visit ece.umd.edu.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Publications/Presentations (optional)

For the most current and detailed information regarding ECE graduate admissions and deadlines, please refer to our ECE Graduate Admissions web page. Applicants must follow all instructions detailed on this web page.
For admission to the graduate programs in electrical and computer engineering, students must hold an undergraduate degree in electrical or computer engineering or related field (math, computer science, physics, or other areas of engineering) and have an overall grade point average of B+ or better. In exceptional cases, students with a lower GPA may also be admitted. Other criteria include overall academic record, strength of recommendations, GRE score, and adequacy of preparation. Applicants are competitively judged by a faculty committee.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	15 May
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Mar

Other Deadlines: Please visit the program website at http://www.ece.umd.edu
Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Thesis option: 30 credits **Non-thesis option (scholarly paper):** 30 credits	**Thesis option:** Three ENEE core courses are required in addition to six credits of ENEE 799: Master's Thesis Research. **Non-thesis option:** Four ENEE core courses are required. The non-thesis option also requires the completion of a scholarly paper.

The M.S. program offers the thesis and non-thesis options. Students must satisfy a course requirement and complete either a thesis or scholarly paper. For complete details, see the ECE Graduate Handbook.

Doctor of Philosophy (Ph.D.)

Core Requirements
1. Doctoral students must complete six ENEE lecture courses including three credits of ENEE 698: Graduate Seminar. These courses must be at the 600 level or above, not including ENEE 698, 699, 799, 898, and 899. 2. In addition, students are required to complete two approved non-ENEE lecture courses. 3. Students must complete 12 research credits by enrolling in ENEE 899: Doctoral Dissertation Research.

Students in the Ph.D. program must complete a course requirement, satisfy a Ph.D. qualifying requirement, pass an oral Ph.D. research proposal examination, and write and successfully defend a Ph.D. dissertation. For complete details, see the ECE Graduate Handbook.

Facilities and Special Resources: For detailed information on the department's research institutes and laboratories, please see the ECE Research Overview.

Financial Assistance: Financial aid is available to graduate students in the form of research assistantships, teaching assistantships, and fellowships. Details are available in the ECE Graduate Handbook. Applicants for admission are automatically considered for these packages provided they mark "yes" for financial assistance on the application form and submit their materials by the preferred deadline.

Electrical and Computer Engineering (PMEE)

Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Full admission as a degree seeking student requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in electrical or computer engineering from an accredited institution
- Completion of calculus I, II, and II and differential equations
- Specific prerequisite requirements for specializations:
    - **Communications & Signal Processing:** ENEE 204 OR 205, ENEE 322, 324, ENEE 420 & 425
    - **Computer Engineering:** ENEE 150, ENEE 244, ENEE 350, ENEE 440 & 446
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring

Type of Applicant	Fall	Spring

Degree Requirements
Master of Engineering (M.Eng.)

Total Credits	Core Requirements
Non-thesis only: 30 credits	Students complete six core courses and four electives. All electives must be approved by the student's advsior. Two available focus areas include Computer Engineering (1) and Communication and Signal Processing (2).
	Computer Engineering: Students can take all six of the following core courses or five of these core courses and one from the Communication and Signal Processing area or the Software Engineering academic option. ENEE 645: Compilers and Optimization (3 credits) ENPM 607: Computer System Design and Architecture (3 credits) ENPM 609: Microprocessor-Based Design (3 credits) ENPM 610: Digital VLSI Design (3 credits) ENPM 615: Embedded Systems (3 credits) ENPM 675: Operating System Design (3 credits) **Communication and Signal Processing:** Students can take all six courses from this area, or a minimum of four courses from this area and up to two courses from either Computer or Software Engineering. ENPM 600: Probability and Stochastic Processes for Engineers (3 credits) ENPM 601: Analog and Digital Communication Systems (3 credits) ENPM 602: Data Networks (3 credits) ENPM 603: Theory and Applications of Digital Signal Processing (3 credits) ENPM 604: Wireless Communication Networks (3 credits) ENPM 605: Information Theory and Coding (3 credits)

The student chooses an area of concentration offered by an engineering department and completes 30 credit hours of approved coursework with an average grade of B. The coursework, which allows up to 12 credits at the 400-level, must be approved by the program's departmental faculty advisor.

Facilities and Special Resources: Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance: Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. Tuition and fees are subject to change.

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Abstract
The Professional Master of Engineering program is a practice-oriented part-time graduate program designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland.

Admissions Information
The program is open to qualified applicants holding a regionally accredited baccalaureate degree in engineering or a related field.
Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Admission Requirements:
Full admission as a degree seeking student requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in engineering; Civil and Environmental, Mechanical, Chemical and Biomolecular, from an accredited institution.
- Courses in mathematics (Calculus I, II, III, & Differential Equations), and Thermodynamics, Fluid Mechanics, and Heat Transfer.
- Completed applications are reviewed and considered for admission on a case-by-case basis.

Master of Engineering (M.Eng.)

Total Credits	Core Requirements
Non-thesis only: 30 credits	Students select five core courses from the Energetic Concepts core curriculum, and five elective courses approved by the student's advisor. ENME 707: Combustion and Reacting Flow (3 credits) ENPM 681: Shockwave Physics I (3 credits) ENPM 682: Shockwave Physics II (3 credits) ENPM 683: Chemistry of Energetic Materials (3 credits) ENPM 684: Rocket Propulsion (3 credits) ENPM 630: Fundamentals of Solid-Propellant Combustion (3 credits) Electives approved by advisor (15 credits)

Facilities and Special Resources: Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance: Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change**.

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Energetic Concepts Engineering (online) (Z072)

Graduate Certificate Program
College: Engineering

Abstract
The Professional Master of Engineering program is a practice-oriented part-time graduate program designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland.

Admissions Information
The program is open to qualified applicants holding a regionally accredited baccalaureate degree in engineering or a related field.

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.

Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.

Admission Requirements:
Full admission as a degree seeking student requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in engineering; Civil and Environmental, Mechanical, Chemical and Biomolecular, from an accredited institution.
- Courses in mathematics (Calculus I, II, III, & Differential Equations), and Thermodynamics, Fluid Mechanics, and Heat Transfer.
- Completed applications are reviewed and considered for admission on a case-by-case basis.

Application Deadlines

Energy Systems Management and Policy (Z107)

Graduate Certificate Program
College: Engineering

Abstract
The Professional Master of Engineering program is a practice-oriented part-time graduate program designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing

business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Two (2) Letters of Recommendation are required for anyone with an undergraduate GPA below 3.0. Anyone with a GPA 3.0 or above should contact the Office of Advanced Engineering Education with a request to waive this requirement.

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. International applicants should consider applying for the online programs.
Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Full admission requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in engineering from an accredited institution
- Completion of calculus I, II, and III, differential equations, linear algebra, thermodynamics, fluid mechanics, and heat transfer
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

English Language and Literature (ENGL)

Graduate Degree Program
College: Arts and Humanities

Abstract
The Department of English offers graduate study leading to the Master of Arts and Doctor of Philosophy degrees; particular strengths of the department include early British literature; American literature; literature of the African diaspora; postcolonial and transnational literary studies; digital humanities; feminist theory and gender studies; and composition and rhetoric. The Department also offers a Master of Fine Arts degree in Creative Writing (See listing for Creative Writing). Most students enrolled in graduate programs in English Language and Literature seek employment in higher education, but many also seek non-academic employment in publishing, business and technical writing, administration, and personnel management. To assist with placement, the department has a Placement Director and the university has a Career Development Center.

Admissions Information
General Requirements:

1. Statement of Purpose: Your statement of purpose should address the intended focus of your graduate studies and how your past educational experiences have prepared you for this course of study. If applicable, this statement would also be the place to address any unusual challenges that you may have faced during your academic career and/or the formative nature of any extracurricular activities (i.e. outreach activities, clubs, etc.) that may have had an impact on your intellectual development. (If you are applying to the PhD program but would like to be considered for the MA in the event that a PhD spot is unavailable, please also indicate that here.)
2. Transcript(s)
3. TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

1. Letters of Recommendation (3)
2. Graduate Record Examination (GRE)
3. Academic CV
4. Writing Sample: A single sample of critical writing of approximately 12-20 pages. While we encourage you to submit your best writing sample, we prefer a writing sample in your declared field of interest. The writing sample should include an updated works cited page to help us evaluate your critical and theoretical familiarity with a field, a period or a genre. (Uploaded to the Upload Requirements section of the application).

In addition to fulfilling Graduate School requirements, applicants to the M.A. degree program should present a 3.5 GPA in English and 24 hours of upper-level English courses. Applicants to the Ph.D. degree program should present at least a 3.7 GPA and a B.A. degree, normally in English Language and Literature. All M.A. and Ph.D applicants should submit a single critical writing sample of 12-20 pages as indicated on the application guidelines. General GREs are also required. For best consideration, complete applications for all degree programs should be submitted by December 8. Applications are not accepted after December 8. The Admissions Committee will begin reviewing applications immediately. Admission is for the Fall semester only.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Degree Requirements

Master of Arts (M.A.)

Total Credits	Core Requirements	Specialization Options
Thesis option: 30 credits **Non-thesis option:** 30 credits	**Concentration in Literature** ENGL 601: Literary Research and Critical Contexts (3 credits) or ENGL 602: Critical Theory and Literary Criticism (3 credits) One course in Critical Theory, Genre, or Rhetoric (3 credits) **One course in each of the following areas (12 credits):** Medieval and Early Modern The Long 18th-century The Long 19th-century Modern and Contemporary **Concentration in Writing Studies and Rhetoric** ENGL 607: Readings in the History of Rhetorical Theory to 1900 (3 credits) ENGL 775: Seminar in Composition Theory (3 credits) or ENGL 776: Seminar in Modern Rhetorical Theory (3 credits) Four additional ENGL designated courses (12 credits)	**Thesis option:** Electives (6 credits) ENGL 799: Master's Thesis Research (6 credits) **Non-thesis option:** Literature concentration: Writing Project (12 credits of electives) Writing Studies and Rhetoric concentration: Capstone Project (12 credits of electives)

The M.A. degree program requires 30 credit hours of graduate work distributed to assure coverage of major historical fields. The student either may take 24 hours of coursework and write a thesis for the other six hours, or may take 30 hours of coursework and do a capstone writing project. The department also offers a special M.A. with a Concentration in Composition and Rhetoric; this degree program requires 30 credit hours of graduate work, provides thesis and non-thesis options, and balances courses in literature with courses in the theory of composition and rhetoric.

Doctor of Philosophy (Ph.D.)

Core Requirements
A minimum of 36 credits of coursework is required for students entering the doctoral program without an M.A. A minimum of 27 credits of coursework is required for students entering the doctoral program with an M.A. **Requirements include:** ENGL 601: Literary Research and Critical Contexts (3 credits) ENGL 602: Critical Theory and Literary Criticism (3 credits) ENGL 611: Approaches to College Composition (3 credits) ENGL 899: Doctoral Dissertation Research (12 credits) Five 700-level seminars Four additional courses 600-700 level (12 credits) Reading knowledge of one language other than English

The Ph.D. degree program requires a total of 36 credit hours of graduate work. PhD students must also 1) pass a qualifying examination in their areas of specialization; 2) demonstrate, through examination or coursework, evidence of reading competence in a foreign language related to their areas of specialization; and 3) complete a dissertation.

Applicants to the Ph.D. program normally must have a B.A in English Language and Literature. Applicants who wish to pursue a Ph.D. but who do not have a B.A.in English Language and Literature may apply to the M.A. program. In exceptional cases the Admissions Committee may decide to admit a student with a B.A. degree other than in English Language and Literature with the requirement that the student complete extra course work as deemed necessary.

Facilities and Special Resources: Resources for research in the College Park and Washington, D.C. area are unsurpassed. The university's libraries hold over 2,000,000 volumes. In addition to the outstanding holdings of the Library of Congress, the area also offers the specialized resources of the Folger Shakespeare Library, Dumbarton Oaks, the National Archives, the Smithsonian Institution, and the National Center for the Study of the Visual Arts among others.

UMCP is a member of the Consortium of Institutions in the Washington area, which permits graduate students at College Park to enroll in courses at other universities for graduate credit at UMCP. Graduate students in English also may take courses for graduate credit at the Folger Institute, which runs a series of seminars by distinguished scholars each year.
Financial Assistance: The English Department, in conjunction with the College of Arts and Humanities and the Graduate School, awards a combination of fellowships and teaching assistantships to admitted PhD candidates. Limited financial aid (usually in the form of teaching assistantships) is available to some incoming MA students.

Courses: **ENGL**
Keywords: English and American Literature. Concentration is available in Rhetoric and Composition. A Master's in Creative Writing is offered (See listing for Creative Writing).
Relationships: **Comparative Literature (CMLT)**, **Creative Writing (CRWR)**

Entomology (ENTM)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
The Department of Entomology offers Doctor of Philosophy and Master of Science degrees. Graduate students may conduct research in a range of both basic and applied topics, including insect ecology and behavior, physiology, morphology, evolution and biosystematics, insect pathology, molecular biology and genetics, aquatic entomology, pollinator biology and apiculture, and integrated pest management.
Employment opportunities for graduates exist in industry; academia and extension; federal, state and local governments; private and non-profit arenas; and in international and national spheres.

Admissions Information
General Requirements:
- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:
- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Description of Research

Students applying for graduate work in entomology are expected to have a strong background in the biological or agricultural sciences, chemistry, genetics, and mathematics. An undergraduate degree in entomology is not required, but a strong basic preparation is preferred for admission to the program.

Admission is granted on the basis of the following criteria by the Graduate Affairs Committee: Analysis of transcripts, including course selection and GPA, letters of recommendation, statement of purpose for pursuing the degree, GRE scores, and acceptance by a graduate faculty advisor. International applicants must also submit proof of English proficiency (TOEFL, iBT or IELTS scores). Acceptance by an advisor is absolutely required; thus, it helps to make contact with faculty when applying.
Upon admission to the M.S. or Ph.D. program, the student's study committee suggests a program of course work and approves a detailed research proposal.
Applicants are encouraged to contact Entomology faculty with shared research interests. To explore matches of your interests with those of ENTM faculty, see the Entomology website.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	15 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Dec

Other Deadlines: Please visit the program website at http://www.entm.umd.edu
Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Thesis only: 30 credits	BSCI 481: Insect Diversity and Classification (4 credits) ENTM 699W: Insect Physiology and Molecular Biology (3 credits) Three topic seminars, one of which must be in Bioethics (credits may vary) ENTM 799: Master's Thesis Research (6 credits)

In the M.S. program, the student is given latitude in the selection of the advisory study committee, the choice of a study area, and the selection of a research program. The student must take core courses and specific courses required by the study area committee. The M.S. degree is awarded following the successful completion of course work (24 credits), thesis research (6 credits) and thesis defense.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 28 credits of coursework including, three core courses and five topic seminars (ENTM 798). In addition, students are required to complete 12 credits of ENTM 899: Doctoral Dissertation Research, pass a qualifying exam, and attend all Entomology Colloquium sessions. **Required core courses:** BSCI 480: Arthropod Form and Function (4 credits) BSCI 481: Insect Diversity and Classification (4 credits) ENTM 699W: Insect Physiology and Molecular Biology (3 credits)

The Ph.D. program provides diverse opportunities for the selection of a dissertation question, composition of advisory committee, and selection of an area of specialization. In addition to core course requirements, course work (28 credits) and dissertation research (12 credits), targeting an area of specialization is determined by the advisory study committee. Following completion of most course work, the student must pass a proposal defense and oral qualifying examination for advancement to candidacy. The degree is awarded after successful completion of the dissertation defense exam.

Facilities and Special Resources: The department is housed in a modern research facility on campus, where state-of-the-art offices, laboratories, environmental growth chambers, multimedia classrooms, and lecture halls provide an excellent environment for research and teaching. Students have individual work stations and access to sophisticated computer graphic facilities. The department also shares extensive technical expertise and scientific equipment with other departments on campus. The university's strategic location in the Washington, DC area provides many opportunities for students to conduct research and gain hands-on experience in federal facilities, such as the Smithsonian Institution, USDA-ARS Beltsville Agricultural Research Center, Walter Reed Army Institute of Research, and NIH. Vast resources are available in the university's library system and

nearby federal libraries. The USDA's National Agriculture Library at Beltsville is only four miles from the campus, and the Library of Congress is in nearby Washington, DC. Besides the main campus, the Maryland Agriculture Experiment Station has Research and Education Centers in the state where field and laboratory work is carried out on urban and agricultural insects. Land use and technical services at these centers are available to faculty and students.

Financial Assistance: Graduate students are supported primarily in two ways. Many students are supported by extramural funding sources, usually obtained by the student's faculty advisor or student for research on a specific topic. The second type of support is provided by the department from internal funds via university and departmental fellowships, and teaching and research assistantships. Teaching and research assistantships are available on a competitive basis. Teaching assistants usually instruct undergraduate laboratory and recitation classes and receive in return a tuition waiver of ten credits each semester. Those students whose records indicate superior academic achievement and promise may also be competitive for university and departmental fellowships. Several part-time employment opportunities are also available in governmental and private research and developmental laboratories in the area. Regardless of the initial source of funding, the department makes a financial commitment to each graduate student. In the case of master's students, support is provided for the first three years of the program only. In the case of doctoral students, five years of support is provided but must be used during the first six years of the student's program. Support is usually for the full 12 months per year.

Degree Requirements

Master of Engineering (M.Eng.)

Total Credits	Core Requirements
Non-thesis only: 30 credits required	Students complete seven of the following core courses plus three technical electives. All electives must be approved by their advisor. ENCE 630: Environmental and Water Resource Systems I (3 credits) ENPM 621: Heat Pump and Refrigeration Systems Design Analysis (3 credits) ENPM 622: Energy Conversion I - Stationary Power (3 credits) ENPM 623: Control of Combustion Generated Air Pollution (3 credits) ENPM 624: Renewable Energy Applications (3 credits) ENPM 625: Heating, Ventilation and Air Conditioning of Buildings (3 credits) ENPM 626: Waste to Energy Conversion (3 credits) ENPM 627: Environmental Risk Analysis (3 credits) ENPM 635: Thermal Systems Design Analysis (3 credits) ENPM 636: Unit Operations of Environmental Engineering (3 credits) ENPM 651: Heat Transfer for Modern Application (3 credits) ENPM 653: Environmental Law for Engineers and Scientists (3 credits)

Facilities and Special Resources: Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance: Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Two (2) Letters of Recommendation are required for anyone with an undergraduate GPA below 3.0. Anyone with a GPA 3.0 or above should contact the Office of Advanced Engineering Education with a request to waive this requirement.

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. International applicants should consider applying for the online programs.
Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Full admission as a degree seeking student requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in civil and environmental, mechanical, or chemical and biomolecular engineering from an accredited institution
- Completion of calculus I, II, and III, differential equations, and thermodynamics, fluid mechanics, and heat transfer
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements
Post-Baccalaureate Certificate (P.B.C.)

Total Credits	Core Requirements
12 credits required	**Choose four of the following courses:** ENPM 621: Heat Pump and Refrigeration Systems Design Analysis (3 credits) ENPM 622: Energy Conversion I - Stationary Power (3 credits) ENPM 623: Control of Combustion Generated Air Pollution (3 credits) ENPM 624: Renewable Energy Applications (3 credits) ENPM 625: Heating, Ventilation and Air Conditioning of Buildings (3 credits) ENPM 626: Waste to Energy Conversion (3 credits) ENPM 627: Environmental Risk Analysis (3 credits) ENPM 635: Thermal Systems Design Analysis (3 credits) ENPM 651: Heat Transfer for Modern Application (3 credits) ENPM 653: Environmental Law for Engineers and Scientists (3 credits) ENCE 736: Theory of Aqueous and Solid Waste Treatment and Disposal (3 credits)

Facilities and Special Resources: Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance: Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines

Environmental Health Sciences (MIEH)

Graduate Degree Program
College: Public Health

Abstract
The Maryland Institute for Applied Environmental Health (MIAEH) offers a **Master of Public Health (MPH)** degree with a concentration in Environmental Health Sciences. Environmental Health Science is a discipline that investigates biological, chemical, and physical factors that affect the health of human beings and their communities. Focusing on interrelationships between people and their environments, the discipline seeks to translate environmental health research into effective public health practice; promote human health and well-being; and foster safe and healthy environments. Environmental public health scientists address issues such as the control of epidemic diseases, food and water safety, treatment and disposal of liquid and airborne wastes, elimination of workplace stressors, and the role of environment in chronic illnesses. Environmental health sciences professionals also tackle the effects of long-range problems, including the effects of toxic chemicals and radioactive waste, acidic deposition, depletion of the ozone layer, and global warming on human health. The program additionally seeks to understand the effects of adverse built environments and environmental injustice in its approach to interventions promoting applied environmental health for all.

MIAEH also has a **PhD program in Toxicology and Environmental Health.** Additionally we support students interested in a **PhD in Environmental Epidemiology**.

Admissions Information
Applications should be submitted through the Schools of Public Health Application Service, (SOPHAS), at www.SOPHAS.org. The 2016-2017 application cycle opens in SOPHAS in September and all application documents must be submitted via SOPHAS. Remember to designate the **University of Maryland School of Public Health, College Park** (SOPHAS Code 0485) as one of your school choices along with your desired program. SOPHAS will verify submission, and if complete, SOPHAS will inform the University of Maryland Graduate School. The verification process can take 4-6 weeks to complete. We do not accept materials outside of the SOPHAS process. The University of Maryland Graduate School requires a Supplemental Application and a Supplemental Application Fee of $75 for each program. This request will be made by the Graduate School once your SOPHAS information is verified by SOPHAS. MIAEH will be able to review ONLY after both stages above are complete, thus there may be a some delay in you submitting and getting a final decision.

TOEFL or IELTS scores are required for some international students; see the Graduate School web site for further details and minimum requirements for admission
http://www.gradschool.umd.edu/admissions/international-admissions
The School of Public Health has an Open House Event where you can meet faculty and students from MIAEH. For Further details contact Dr Evelyn C. King-Marshall (eckm@umd.edu(link sends e-mail)). Other events will be posted throughout the fall semester.
MPH Admissions Criteria:
Minimum 3.0 undergraduate GPA; outstanding performance in quantitative-oriented courses
Official GRE scores taken within the past 5 years (GRE scores are required and should be requested directly from ETS for electronic transmission to SOPHAS. The school code is 0485). ***Students with an existing graduate degree should contact the department to discuss GRE requirements.***
Three letters of recommendation that address your academic capabilities
Your statement of purpose should address each of the following questions: 1) describe your specific interest in Environmental Health Sciences; 2) what previous experiences have influenced your decision to pursue a degree in Environmental Health Sciences; and 3) how do you believe UMD's program will help you reach your career goals.
Discuss any relevant academic/work experience, including previous coursework in public health, climate change, environmental science, environmental justice, chemistry and statistical methods.

Environmental Science and Technology (ENST)

Graduate Degree Program
College: Agriculture and Natural Resources

Abstract
The Department of Environmental Science and Technology (ENST) offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. ENST students can choose to work within one of four specializations: Soil and Watershed Sciences; Ecological Technology Design; Wetland Science; Ecosystem Health and Natural Resource Management.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Supplementary Application
- Publications/Presentations

Students seeking admission should have strong training in the basic sciences and mathematics. To be admitted with full admission status, a student must have completed a minimum of one semester of Calculus and a total of at least 20 credits in some combination of basic level Chemistry, Physics, Biology or Mathematics (beyond Calculus I). It is also helpful for applicants to have completed other courses in science and engineering. Applicants to the M.S. program must have earned a B.S. degree in a related field with an undergraduate cumulative GPA of 3.0 or higher. Applicants to the Ph.D. degree program must have earned an M.S. Degree in a closely related field. In special cases students may be admitted to a Ph.D. program without first completing an M.S. degree provided these students have: 1) an exceptional academic record and test scores; and 2) have demonstrated significant research experience during their B.S. program (such as completion of a research based honors thesis.) Graduate Record Examination scores (GRE - General Test) are required of all applicants. International applicants must also submit TOEFL scores
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Thesis only: 30 credits	ENST 602: Research Principles and Methodology in Environmental Science and Technology (3 credits) ENST 702: Environmental Science and Technology: Communication and Professional Development (2 credits) ENST 798: Graduate Seminar (2 credits) ENST 799: Master's Thesis Research (6 credits) One graduate level statistics course (3-4 credits)
Specialization Options	
Soil and Watershed Sciences: Complete 12 credits of graduate level soil science courses among any four of the following five areas: soil chemistry, soil physics, pedology, soil biology, soil fertility. **Ecological Technology Design:** Complete six credits of graduate level courses in ecology and six credits of graduate level courses in ecological design or related engineering courses. **Wetland Science:** Complete 12 credits from a list of approved graduate level courses. A minimum of three credits must be earned from each of these groups: Ecology, Soil Science, and Hydrology. **Ecosystem Health & Natural Resource Management:** Complete 12 credits of graduate level courses, including ENST604 (3 credits) and nine additional credits in Ecosystem Health and Natural Resource Management.	

Doctor of Philosophy (Ph.D.)

Core Requirements
1. All ENST Ph.D. students are expected to complete a minimum of 50 credits beyond the B.S. degree (in addition to research credits). 2. Students must complete a minimum of 12 research credits by enrolling in ENST 899: Doctoral Dissertation Research. 3. In addition to the M.S. course requirements, P.h.D. students must complete a total of two graduate level statistics courses, if not already completed in the M.S. program. 4. All M.S. specialization requirements must be met for P.h.D. students in that particular specialization. Additional requirements for P.h.D. students are as follows: **Soil and Watershed Sciences:** Complete one semester of graduate level physical chemistry or biochemistry and at least one additional graduate level course in chemistry, biochemistry, physics, mathematics, engineering, or computer science. **Ecological Technology Design:** Complete one semester of graduate level systems modeling and one additional graduate level course in ecology, ecological design or ecological engineering. **Wetland Science:** Complete one graduate level course in modeling; two additional graduate level courses from within the areas of Ecology, Soil Science, or Hydrology. **Ecosystem Health and Natural Resource Management:** Complete three additional graduate level courses in Ecosystem Health and Natural Resource Management.

1. Graduate School Requirements: To earn a Ph.D. degree, the University of Maryland Graduate School requires that the student complete a minimum of 12 credits of dissertation research (899) and complete and successfully defend a dissertation based on original research.
2. ENST Departmental Core Requirements: All ENST Ph.D. students are expected to complete a minimum of 50 credits beyond the B.S. degree (in addition to research credits 898 and 899) and are required to complete ENST 602, 702 and two graduate level statistics courses (these can be taken during either the M.S. or Ph.D. program), and two semesters of Graduate Seminar (ENST 798).
3. Specialization Requirements: ENST Ph.D. students are expected to have completed all of the M.S. requirements for the particular specialization chosen. In addition to having met the M.S. requirements: the **Soil and Watershed Sciences** specialization requires that Ph.D. students complete one semester of graduate level physical chemistry or biochemistry and one additional graduate level course in chemistry, biochemistry, physics, mathematics, engineering, or computer science; the **Ecological Technology Design** specialization requires that Ph.D. students complete one semester of graduate level systems modeling, and one additional graduate level course in ecology, ecological design or ecological engineering; the **Wetland Science** specialization requires that Ph.D. students complete one graduate level course in modeling, and two additional graduate level courses from within the areas of Ecology, Soil Science, or Hydrology; the **Ecosystem Health and Natural Resource Management** specialization requires Ph.D. students to complete three additional graduate level courses in Ecosystem Health and Natural Resource Management.

Facilities and Special Resources: The Department has many well-equipped laboratories designed to carry out basic and applied research in Soil and Watershed Sciences, Ecological Technology Design, Wetland Science, and Ecosystem Health and Natural Resources Management. Laboratories are located on the College Park campus in H.J. Patterson Hall and the ANSC/AGEN Building. Greenhouse facilities are available on campus and a statewide network of research and education centers as well as our proximity to Chesapeake Bay provide access to a wide range of environmental conditions for research. Students have access to computer resources in the department and a comprehensive computer center located on campus. The University Libraries on campus and the National Agricultural Library located nearby, supplemented by the Library of Congress, make the library resources accessible to students among the best in the nation. Many ENST projects are conducted in cooperation with other departments on campus and with professionals at various scientific centers in the area. Scientists at the USDA-ARS, US Geological Survey, the National Academy of Sciences, NASA, National Institutes of Health, Department of Energy, Smithsonian, and National Park Service, US Fish & Wildlife Service, as well as other agencies, have cooperated with ENST faculty on various projects. Scientists from some of these agencies have adjunct appointments in the Department, have taught special courses at the University, and participate on graduate committees.

Financial Assistance: ENST offers a number of graduate assistantships to qualified applicants that are awarded on a competitive basis. To apply, use the form for requesting financial assistance included in the Graduate School application packet. In addition to a competitive stipend, graduate assistants receive tuition remission and are offered excellent health benefits by the University of Maryland.

Epidemiology (EPID)

Graduate Degree Program
College: Public Health

Abstract
The Department of Epidemiology and Biostatistics offers a Ph.D. program in Epidemiology. Students in the PhD program in Epidemiology master core knowledge in epidemiologic and biostatistical methods related to the design, implementation and evaluation of public health studies surrounding psychosocial, behavioral, biological, and cultural factors. Students may work with their advisor to design their own research specialization or they may apply to one of our two specializations: 1) Social Epidemiology or 2) Environmental Epidemiology.

Our students have full access to faculty who will guide you through all phases of the program to ensure your educational goals are met. Our Washington, DC area location provides unparalleled opportunities for research experiences in public health, including placements at the U.S. Department of Health and Human Services (e.g., National Institutes of Health, National Center for Health Statistics), Children's National Medical Center, the Maryland Department of Health and Mental Hygiene, and many other national, state, and local health agencies.

Admissions Information
Applications should be submitted through the Schools of Public Health Application Service, SOPHAS at www.SOPHAS.org. The 2015-2016 application cycle opens in SOPHAS in September and all application documents must be submitted via SOPHAS. Remember to designate the University of Maryland School of Public Health, College Park, as one of your school choices along with your desired program.

The University of Maryland requires a Supplemental Application and a Supplemental Application Fee of $75 for each program. Applicants will receive e-mail instructions for how to complete the Supplemental Application once your SOPHAS application is complete. The doctoral program in Epidemiology accepts only full-time students.

Applications for the doctoral program in Epidemiology are reviewed with consideration to the following criteria:

1. Master's Degree (MPH, MHS, MA, MS)
2. Minimum 3.0 undergraduate GPA
3. Undergraduate and graduate transcripts
4. Official GRE scores taken within the past 5 years (GRE scores are required and should be requested directly from ETS for electronic transmission to SOPHAS.Use the SPH code 0485 and the Graduate School Code 5814). Scores should be at minimum in the 50th percentile for each section.
5. 3 letters of recommendation that address the applicant's academic capabilities and probability of success in graduate school
6. **Statement of Purpose:** the statement of purpose should address each of the following questions:
    1. describe your specific areas of interest within epidemiology;
    2. which primary faculty members in the Department of Epidemiology and Biostatistics do you think most closely share your areas of interest;
    3. what previous experiences have influenced your decision to pursue a degree in epidemiology;
    4. how do you believe UMD's program will help you reach your career goals; and
    5. how do you see yourself using this degree in the five years following graduation?
7. Relevant academic/work experience, including previous coursework in human biology or physiology, demonstration of proficiency in statistical methods and statistical software, and research presentation or publication experience.

Applicants are strongly recommended to communicate with the epidemiology faculty member in their area(s) of interest before applying. Applicants should also be sure to use the major code EPID when selecting the program on the Supplemental Application.

Degree Requirements
Doctor of Philosophy (Ph.D.)

Core Requirements
The PhD in Epidemiology requires a minimum of 64 credits beyond the master's degree in epidemiology or public health, including 12 credits of EPIB 899: Doctoral Dissertation Research. Students are also required to complete a minimum of 12 credits in a specialization cognate area, included in the 64 credit total. **Core courses:** EPIB 612: Epidemiologic Study Design (3 credits) EPIB 620: Chronic Disease Epidemiology (3 credits) or EPIB 621: Infectious Disease Epidemiology (3 credits) EPIB 641: Public Health and Research Ethics (1 credit) EPIB 652: Categorical Data Analysis (3 credits) EPIB 653: Applied Survival Data Analysis (3 credits) or EPIB 655: Longitudinal Data Analysis (3 credits) EPIB 710: Epidemiologic Research Methods (3 credits) EPIB 660: Epidemiologic Methods for Primary Research (3 credits) EPIB 788: Critical Readings in Epidemiology and Biostatistics (3 credits) EPIB 740A: Advanced Methods in Epidemiology (3 credits) EPIB 740B: Advanced Methods in Epidemiology (3 credits) Independent Study (3 credits)

The PhD in Epidemiology requires a minimum of 64 credit hours beyond the master's degree in epidemiology or public health, including 12 credit hours of dissertation research. If an entering student does not have an MPH degree prior to entering the program they will have to complete 21 additional credits for these fundamental courses. Students entering the program with a master's degree in a field other than epidemiology are required to take MPH courses in epidemiology and biostatistics to gain competency in these content and method areas. A minimum of 12 credit hours in a specialization cognate area (e.g. Social Epidemiology) is required for specialization (included in the 64 credits).

Students admitted to the Ph.D. program advance to candidacy upon completing required coursework and passing a written comprehensive examination with an oral defense. After advancement to candidacy, students must complete a dissertation proposal and oral defense, followed by successful completion of the doctoral dissertation and oral defense.

Area of Specialization. Student may design their own area of specialization in the program or select from two designated specializations; social epidemiology or environmental epidemiology.

Social Epidemiology: Students in the Social Epidemiology specialization master core knowledge in social and behavioral epidemiologic methods including the design, implementation and evaluation of studies and interventions focused on understanding psychosocial, behavioral, cultural, and community factors. Students also receive training in biostatistical methods most relevant to epidemiologic research.

Environmental Epidemiology: The Environmental Epidemiology specialization is a cross-disciplinary program between the Department of Epidemiology and Biostatistics and the Maryland Institute for Applied Environmental Health. Students will gain training and experience in state of the art methods for examining the human health impacts of environmental exposures from air, water, food and the built environment. The concentration also provides knowledge and skills in the application of environmental epidemiology to occupational health, community health, risk assessment, environmental justice, health disparities, and global health.

Facilities and Special Resources: The Department of Epidemiology and Biostatistics faculty includes individuals with multi-faceted interests in both epidemiology and biostatistics. Our faculty have research interests and expertise in the epidemiology of infectious disease and chronic disease with particular focus in the areas of HIV/STIs, cancer, health disparities, cardiovascular disease, obesity/physical activity, and sexual and reproductive health. Additional areas of specialization include social and behavioral determinants of health, aging, cultural competency, and community-based interventions. Biostatistics faculty apply statistical techniques including survival and longitudinal analysis, computational statistics, statistical analysis of genomic and proteomic data, machine learning, neuroimaging statistics, (network) meta-analysis, missing data analysis, Bayesian hierarchical methods, and bioinformatics to analyze and interpret health data.

Financial Assistance: The Department offers a limited number of fellowships, and graduate teaching and research assistantships.

Epidemiology (EPDM)

Graduate Degree Program
College: Public Health

Abstract
Epidemiology is the study of the distribution and determinants of disease and injuries, and other health states in human populations. As the fundamental science of public health practice, epidemiology provides the conceptual and applied tools necessary for the study of public health problems. The MPH with a concentration in Epidemiology is a 43-credit professional degree that prepares graduates to work in public health services as practitioners, researchers, administrators, and consultants. A full-time student may complete our program in 2 years. Part-time students may take up to 4 years to complete the program. The

majority of courses are offered in the evenings. In addition to coursework, all epidemiology masters' students are required to complete a capstone experience that occurs after all courses are completed and includes: 1) a project (usually data analysis or a comprehensive literature review); and 2) an internship of at least 240 hours.

Our proximity to the nation's capital offers students unparalleled opportunities for research experiences in public health, including placements at the National Institutes of Health, National Center for Health Statistics, Centers for Disease Control, Food and Drug Administration, the Maryland Department of Health and Mental Hygiene, and many other national, state, and local health agencies.

Admissions Information
Applications should be submitted through the Schools of Public Health Application Service, SOPHAS, at www.SOPHAS.org. The 2015-2016 application cycle opens in SOPHAS in September, 2014, and all application documents must be submitted via SOPHAS. Remember to designate the University of Maryland School of Public Health, College Park, as one of your school choices along with your desired program.

The University of Maryland requires a Supplemental Application and a Supplemental Application Fee of $75 for each program. Applicants will receive e-mail instructions for how to complete the Supplemental Application once your SOPHAS application is complete.

Applications for the MPH program with concentration in Epidemiology are reviewed with consideration to the following criteria:

1. Minimum 3.0 undergraduate GPA; outstanding performance in quantitative-oriented courses
2. Undergraduate transcripts
3. Official GRE scores taken within the past 5 years (GRE scores are required and should be requested directly from ETS for electronic transmission to SOPHAS. Use the SPH code 0485 and the Graduate School Code 5814). Scores should be at least in the 50th percentile for all sections.

Additional areas of specialization include social and behavioral determinants of health, aging, cultural competency, and community-based interventions. Biostatistics faculty apply statistical techniques including survival and longitudinal analysis, computational statistics, statistical analysis of genomic and proteomic data, machine learning, neuroimaging statistics, (network) meta-analysis, missing data analysis, Bayesian hierarchical methods, and bioinformatics to analyze and interpret health data.

Ethnomusicology (MUET)

Graduate Degree Program
College: Arts and Humanities

Abstract
The School of Music offers programs of study leading to the Master of Arts degree with areas of specialization in ethnomusicology, music history and literature (musicology), music education, and music theory; the Master of Music degree with areas in performance, composition, conducting, and music education; the Doctor of Philosophy degree with areas of specialization in ethnomusicology, musicology, music education, and music theory; and the Doctor of Musical Arts degree with areas of specialization in composition, performance, and conducting.

Admissions Information
General Requirements:
- Statement of Purpose: The statement of purpose and three letters of recommendation will be required to be uploaded in the Supplementary Application (Acceptd), not the Graduate School's application.
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:
- Letters of Recommendation: The statement of purpose and three letters of recommendation will be required to be uploaded in the Supplementary Application (Acceptd), not the Graduate School's application.
- Graduate Record Examination (GRE)
- Supplementary Application

Admission to the graduate degree programs in music is highly selective. It is determined primarily by a performance audition, tapes and scores of original compositions, scholarly research papers, letters of recommendation, and/or successful teaching

experience. All non-native English-speaking students must achieve a score of 575/233/100 on the TOEFL to be invited for audition/admission (see the School of Music's admission website for detailed English language requirements).

We require a passing TOEFL score (minimum 100 IBT, 233 CBT, 575 PBT) for all applicants whose primary language is not English before we will process your application or consider you for a live audition. The requirement will be waived for applicants who have earned an undergraduate degree from an institituion in the United States or another approved English-speaking country. Waivers will only be granted if at least three years of the undergraduate education or at least two years of the graduate education in a non-performance related field took place at an English-speaking institution. Graduate degrees in performance-related fields or performance certificates or diplomas will not exempt an applicant from submitting a passing TOEFL score.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	1 Dec

Other Deadlines: Please visit the program website at http://www.music.umd.edu

Degree Requirements

Master of Arts (M.A.)

Total Credits	Core Requirements	Specialization Options
Thesis option: 35 credits **Non-thesis option (scholarly paper):** 35 credits	MUSC 632: The Anthropology of Music (3 credits) MUSC 633: Field Methods in Ethnomusicology I (3 credits) MUSC 676: Historical Theory and Method in Ethnomusicology (3 credits) MUSC 677: Current Theory and Method in Ethnomusicology (3 credits) MUSC 438X: Area Studies in Ethnomusicology (3 credits) MUSC 646: Introduction to Musicology (3 credits) MUSC 629X: Performance electives (2 credits) Other Studies in Music (9 credits minimum) Students are also required to have knowledge of one language other than their native language, and be involved in one of the School of Music's World Music Ensembles for four semesters.	**Thesis option:** MUSC 799: Master's Thesis Research (6 credits) **Non-thesis option:** Two seminar courses, two scholarly papers (6 credits)

The Master of Arts Degree (Thesis Option in Ethnomusicology, Music Education, Music History and Literature [Musicology], or Music Theory; Non-Thesis Option in Ethnomusicology or Music History and Literature [Musicology]) requires a minimum of 30 credit hours (35 for Ethnomusicology), with a minimum of 12 credit hours in Major Studies, 9 credit hours in Studies in Areas Supportive of the Major (14 for Ethnomusicology), and 9 credit hours in Other Studies in Music. In addition, a grade of B- or better is required in all courses used to fulfill requirements for the degree; a Thesis must be written (Ethnomusicology Non-Thesis Option requires two scholarly research papers), an oral defense of the Thesis (or research papers) must be passed; and a written comprehensive examination must be passed. Specific courses are required in each area of specialization.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 36 credits, including 12 credits of MUSC 899: Doctoral Dissertation Research. In addition, students are required to pass a foreign language exam. **Required courses include:** MUSC 620: Analysis of World Music (3 credits) MUSC 679: Seminar in Ethnomusicology (3 credits) MUSC 679: Seminar in Ethnomusicology (3 credits) MUSC 438X: Area Studies in Ethnomusicology (3 credits)

Electives (12 credits)

The Doctor of Philosophy degree requires the satisfactory completion of a significant body of coursework that, in the student's and Graduate Advisor's judgement, prepares the student for the preliminary examination that leads to admission to candidacy, as well as certain specific courses required in each area of specialization. A grade of B- or better is required in all courses used to fulfill requirements for the degree. A dissertation (whether written, or in project form) is required for all doctoral degrees in music. A Principal Advisor for the dissertation will be chosen by the student and the academic advisor; the Principal Advisor and the student will then nominate the remaining members of the dissertation committee. The student must submit a detailed Prospectus of the dissertation to the members of the dissertation committee and the Graduate Director, and must be admitted to candidacy prior to the approval of the dissertation committee by the Graduate School. The dissertation must be successfully defended before the entire dissertation committee. The Doctor of Philosophy degree requires a Written Dissertation.

Facilities and Special Resources: The University of Maryland is one of the nation's leading public universities. The School of Music's home, The Clarice Smith Performing Arts Center, serves as a laboratory for the arts with six performance halls, The Michelle Smith Performing Arts Library, specialized rehearsal rooms, classrooms and more. The Clarice's presenting arm, The Artist Partner Program (APP), provides School of Music students with the opportunity to collaborate and learn from internationally recognized artists and scholars. Recent APP artists-in-residence include the Spektral Quartet, the St. Lawrence String Quartet, eighth blackbird, Brad Meldau and Tia Fuller**.**

The Michelle Smith Performing Arts Library (MSPAL) in The Clarice ranks among the top twenty university music libraries in the United States, and it offers a variety of archives, special collections, and other research resources that give it international stature among scholars in a broad spectrum of music disciplines. The total music collection includes approximately 50,000 books, 150,000 scores, 140,000 recordings, and 4,500 linear feet of archival materials. The International Piano Archives at Maryland (IPAM) is the only institutional collection in existence devoted to historic piano performance. IPAM contains 40,000 recordings, 8,500 music scores, 2,500 books, and a collection of reproducing pianos with 8,000 piano rolls. To date, IPAM has acquired the collections of more than 40 eminent pianists. The MSPAL Special Collections in Performing Arts embrace a growing number of national and international music organization archives representing music education, band history, solo and ensemble instrumental performance, music librarianship, and ethnomusicology. Materials in these archives include papers, music scores, recordings, books, magazines, photographs, and oral histories. MSPAL also features important archival and manuscript collections on music criticism and American music, the Charles Fowler Papers supporting the study of arts education, a significant Leopold Stokowski Collection, the Jacob Coopersmith Collection of Handeliana, the Radio Station WOR/Alfred Wallen stein Collection of 26,000 orchestral scores, and the performance parts of the Andre Kostelanetz Orchestra.

Within a few miles of the College Park campus are research opportunities offered by Dumbarton Oaks, the Enoch Pratt Free Library of Baltimore, the Folger Shakespeare Library, the Library of Congress, the National Archives, the Smithsonian Institution, and many other specialized libraries.

The School of Music's lively concert season provides music majors with numerous performance opportunities. With approximately 300 public performances each year - showcasing student recitalists and more than 30 ensembles - our students keep a high profile. The surrounding DC-Baltimore region offers additional opportunities to concertize, teach and engage with the community. Our students can be seen performing at major venues such as The John F. Kennedy Center for the Performing Arts, Strathmore Hall and Phillips Collection, and in intimate community spaces such as Riversdale Mansion and the historical Greenbelt Theatre.

Financial Assistance: A number of competitive fellowships, graduate assistantships, teaching assistantships, operatic assistantships, and orchestral assistantships are available. Preference for financial assistance will be given to those who have filed an application for admission to the University and the School of Music Supplemental Application by December 1 (for performance programs) and January 15 (for Music Education only) and have been officially admitted.

Contact Statement: School of Music: The Academic Handbook is available online and provides descriptive information, details of course requirements, examination procedures, and graduation requirements for the M. A., M. M., D. M. A., and Ph. D. degree programs. International students should read the information contained in the International Applicants section of the Graduate Admission Application.

Executive Public Policy (EXPM)

Graduate Degree Program
College: Public Policy

Abstract
The School of Public Policy is one of the nation's leading graduate programs devoted to the study of public policy, management and international affairs, with particular expertise in the fields of environmental policy, energy policy, international development, international security and economic policy, health policy, education policy, social policy, non-profit management, public management and leadership,acquisitions, and public finance. The School offers a wide variety of master's programs, joint degree programs, graduate certificate programs, and one of the nation's premier doctorate programs. The School's location just outside of Washington, D.C. attracts a stellar faculty of scholar-practitioners who are experts in the theory and practice of public policy and management and influential participants in the nation's policy-making process. The location and faculty in turn attract outstanding students by providing them, not only an in-depth, rich curriculum, but extensive exposure to and interaction with the real-life world of policy-making, the federal government, the international diplomatic community, state and local governments, and a host of non-governmental and multinational organizations. It is one of the few policy schools to combine state, national and international policy study under one roof, and to take into account policy interests in all sectors of the economy, thus allowing both faculty and students to study the full range of issues in all courses and in all research.

Admissions Information
General Requirements:

Degree Requirements
Master of Public Management (M.P.M.)

Total Credits	Core Requirements
Non-thesis only: 30 credits required	PUAF 711: Public Management and Leadership OR equivalent (3 credits) PUAF 692: Leadership Principles and Practices OR equivalent (3 credits) PUAF 650: Moral Dimensions of Public Policy OR equivalent (3 credits)

	PUAF 670: Public Budgeting & Financial Management OR equivalent (3 credits) Electives (18 credits) **Core courses can be substituted with other Public Policy courses with advisor's approval.*

The Executive Master of Public Management (EMPM/EXPM) program is for professionals with at least 5 years of policy and/or management experience. It consists of 30 credits of prescribed courses in the arts of public management and policy analysis. Students move through the program as members of a cohort at a designated site, either off-campus or on-campus on alternating weekends (Friday evenings/Saturday days).
Additional information on the curriculum and admissions policies of this program is available on the School's website.

Family Science (FMSC)

Graduate Degree Program
College: Public Health

Abstract
The Doctor of Philosophy (Ph.D.) program in Family Science provides and interdisciplinary, research-oriented approach to the discovery and application of knowledge about families. This exciting program examines both internal family processes and the dynamic interaction of families with the biological, psychological, social, political, and economic aspects of their environment. Graduates are prepared for a number of careers in the public, non-profit, and private sectors, including university teaching, research, family policy analysis, and administrative positions in human service programs.

The Ph.D. program adopts an ecological or systems approach to the study of families and the problems they face in today's society. The program of study provides doctoral students with a broad knowledge of family theory, research methodology, family policy, family programs, ethnic families, and major issues confronting contemporary families. Students also learn to design, implement, and evaluate culturally-sensitive interventions addressing family needs and to analyze the consequences of public/private policies on family well-being.

Students applying to the PhD program in Family Science should have a Master's degree in Family Science or a related behavioral or social science. It is possible for a limited number of students to be accepted into the Family Science Ph.D. program with only a Bachelor's degree, but they must complete a Master of Science (M.S.) degree in Couple and Family Therapy en route to the Ph.D. MCH applicants must have a Master's Degree in Public Health (MPH) or a Master's in applied behavioral or biological science. MCH students must complete missing MPH core courses (biostatistics, epidemiology, environmental health sciences, health services administration, and health behavior) within one academic year of program entry.

The Department of Family Science prepares students to describe, explain, and improve the quality of family life through applied research, education, therapy, human services, policy analysis, and advocacy. The approach is interdisciplinary, emphasizing individual, interpersonal, and social change. The program of study is based on a systems or ecological paradigm, combining the perspectives of interrelated professional fields including family science, couple and family therapy, maternal and child health, family policy, behavioral science, and human services. Graduates are prepared for careers in the public, non-profit and private sectors, including university teaching, research, family policy analysis, and administrative positions in human service and public health programs.

Admissions Information
The Department seeks students who are imaginative, intelligent, and highly motivated men and women with a desire for challenge, a commitment to excellence, and a well-developed sense of social responsibility. Most applicants have degrees in the applied behavioral or social sciences. However, the Department invites application from those in non-allied fields who have a proven record of occupational and/or volunteer experience in the family field. We are fortunate to attract gifted students who are concerned about social and ethical issues and who view their future profession in a broad context.
Students are selected on the basis of:

- performance in previous undergraduate and/or graduate coursework
- the strength of GRE scores taken within the last five years
- letters of recommendation
- quality of the empirical Master's Thesis (for those with a Master's degree)
- relevant work experience

- professional goals congruent with those of the program

The Family Science Ph.D. program considers applications from students with a Master's or Bachelor's degree in family science, public health, or a related discipline. Students admitted to the Ph.D. program in Family Science with a baccalaureate degree must complete the M.S. in Couple and Family Therapy with a thesis en route to the Ph.D.

The Ph.D. program in Family Science admits students for fall semester only. **All application materials are due December 15.** Students who wish to apply for the Ph.D. program must complete the University of Maryland Graduate School Application, which includes 3 letters of recommendation, the statement of goals and research interests, and official transcripts from all institutions attended.

- Go to http://www.gradschool.umd.edu/welcome/apply_now-H.html
- Complete the online application (a $75 fee will be processed with your application)
- Mail all transcripts reflecting all undergraduate and graduate work completed or in progress to:
  University of Maryland at College Park
  Enrollment Services Operations
  Application for Graduate Admission
  0130 Mitchell Building
  College Park, MD 20742
- Standardized test scores (GREs) are to be sent directly from Educational Testing Service (if no category exists on ETS form, please fill in 'other' and write FMSC, code 5814).
- GREs must be taken in time to reach our department before the December 15th deadline. - Allow 2 weeks to receive your scores.
- Letters of recommendation are to be submitted online with your graduate application or mailed directly to Graduate Admissions.
- Applicants should also have a minimum undergraduate GPA of 3.0 and a minimum graduate GPA of 3.0.
- All information provided in this application will be directly sent by Graduate Admissions to the Department of Family Science for review (you do not need to mail additional hard copies of the graduate school application to the department).
-

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	15 Dec

Other Deadlines: Please visit the program website at http://www.sph.umd.edu

Degree Requirements

Master of Science (M.S.)

Students interested in the M.S. degree should see the Couple and Family Therapy program page.

The CFT curriculum has three parts: didactic coursework, clinical practica, and supervised client contact. The minimum total credits required are 48 for the non-thesis option and 51 for the thesis option. Didactic coursework is taken in conjunction with 15 credits of clinical practicum seminars and 9 credits of supervision of clinical work. In the clinical practicum, theory is applied to specific case material, with faculty supervision providing support and oversight of assigned cases.

Supervised client contact begins in the student's first semester. Clinical students are required to gain 400 hours of face-to-face client contact, and 250 of these hours must be relational (with couples or families). The Center for Healthy Families, the couple and family therapy clinic operated by the Department, offers the opportunity to gain these hours. Clinical students receive 100 hours of supervision, both individual and group, for their client contact hours. Supervision in the Department's clinic is provided through a range of techniques including case discussion, one-way mirror observation, video review, co-therapy, and telephone consultation during live sessions. Students may choose to do some of their clinical work in a variety of available externship sites in the local area.

Couple and Family Therapy students may pursue the thesis or non-thesis option. For thesis option students, 6 semester hours are thesis research credits taken as FMSC 799. The thesis must be approved and then defended in an oral examination. Non-thesis option students take the 3 credit FMSC 789. Non-thesis students must complete a written and oral therapy case presentation.

Doctor of Philosophy (Ph.D.)

Core Requirements

Doctoral students must complete 51 credits beyond the master's degree. Students must also complete a research internship, pass a qualifying exam, and complete a dissertation and oral defense.

Required courses:

FMSC 606: Ethnic Families and Health Disparities **or** FMSC 660: Program Planning and Evaluation in Family Science (3 credits)	FMSC 689: Research Internship (3 credits)
FMSC 745: Gender and Ethnicity in Family Therapy and Service Delivery (3 credits)	FMSC 750: Family and Health Policy (3 credits)
FMSC 760: Legal Issues & Families (3 credits)	FMSC 780: Qualitative Methods in Family and Health Research (3 credits)
FMSC 810: Theory in Family Systems and Family Health (3 credits)	FMSC 850: Maternal & Child Health Epidemiology (3 credits)
EPIB 650: Biostatistics I (3 credits)	EPIB 651: Biostatistics II (3 credits)
Electives approved by Graduate Director (9 credits)	FMSC 899: Doctoral Dissertation Research (12 credits)

The Family Science Ph.D. program requires 51 graduate credit hours beyond the master's degree, including 27 core credits (theory, issues, research methodology, statistics), 9 elective credits, 3 research internship credits, and 12 dissertation credits. All Ph.D. students must complete foundation coursework required for a master's degree in Family Science. At the discretion of the Department's Graduate Committee, students entering the Ph.D. program with a master's degree in a related discipline may make up deficiencies in coursework through classes taken at the beginning of the program. Ph.D. students must also pass a qualifying examination and complete a dissertation and oral defense.
Students admitted full-time to the Ph.D. program post-master's can complete this program within three years. Students with only a baccalaureate degree have the option of applying as a dual degree candidate (master's in Couple and Family Therapy, and doctorate in Family Science) requesting admission to both programs simultaneously.

Facilities and Special Resources: The University's close proximity to the nation's capital, the state capital in Annapolis, federal executive departments, and headquarters of national professional and public interest associations provide research and internship placements for studying family policy unmatched by any other graduate program in the discipline. The Washington-Baltimore metropolitan area offers rich opportunities for research on culturally and socioeconomically diverse families. The campus and department have excellent computer facilities. Students have ready access to the University's extensive library systems, as well as holdings from the Library of Congress, the National Institutes of Health, National Library of Medicine, National Archives, and many other library collections.

Center for Healthy Families: This Center is the training and research arm of the Couple and Family Therapy Program in the Department of Family Science. Departmental graduate students and faculty provide clinical and educational services to families from surrounding communities in this state-of-the-art facility. Master's and doctoral students use data collected at the Center for research projects.

Financial Assistance: Fellowships and Graduate Assistantships are available to students admitted into the Family Science Ph.D. program.

Finance (BMFN)

Graduate Degree Program
College: Business

Abstract
The Robert H. Smith School of Business offers graduate programs leading to the degrees of Master of Business Administration (MBA), Master of Finance, Master of Science in Accounting (MS), Master of Science in Information Systems (MS), Master of Science in Marketing Analytics (MS), Master of Science in Supply Chain Management (MS), Executive MBA (EMBA), Online MBA, and Doctor of Philosophy (PhD). The school's MBA program is accredited nationally by the Association to Advance Collegiate Schools of Business (AACSB International). Only about 607 programs in the world are accredited by the AACSB, a reflection of the quality of the faculty, students, curriculum, and career management.
The Smith School of Business faculty has been recruited from the graduate programs of leading universities nationwide. They are dedicated scholars, teachers, and researchers with a strong commitment to academic excellence and the education of the professional manager and researcher. The Smith School of Business is dedicated to preparing graduates to lead organizations in an economy driven by technology, globalization, and rapid change. The Smith School curriculum integrates an in-depth education in core business functions -- accounting, entrepreneurship, finance, information technology, logistics, management, and marketing -- with cross-functional e-business areas -- electronic commerce, financial engineering, services marketing, and supply chain management.

Admissions Information:
We strongly encourage you to visit the Robert H. Smith School of Business website at **www.rhsmith.umd.edu**. The Smith School website contains a wealth of information regarding all graduate business programs and their admissions processes.

Admissions requirements can be found here: https://www.rhsmith.umd.edu/programs/master-of-finance/admissions
MBA and MS Admissions Office: 301-405-2559
Executive MBA Admissions Office: 301-405-2386
Online MBA Admissions Information: 877-807-8741
PhD Admissions Office: 301-405-2214
Admission criteria for the Master of Finance are based on: quality of undergraduate and graduate coursework; GMAT or GRE score, 1 letter of recommendation; professional experience; video submission; and written essay of objectives. Prospective applicants may contact the program at (301) 405-2559 for information regarding this Masters program.

Degree Requirements
Master of Finance (M.Fin.)

Total Credits	Core Requirements	Specialization

		Options
Non-thesis only: 30 credits required	**All students must complete the following core courses and complete an additional 18 credits in one of the four specializations.** BUSI 640: Financial Management (2 credits) BUFN 740: Capital Markets (2 credits) BUFN 750: Valuation in Corporate Finance (2 credits) BUFN 758: Special Topics in Finance (4 credits) BUFN 761: Derivative Securities (2 credits)	1. Corporate Finance 2. Asset Management 3. Risk Management 4. General Finance

The Master of Finance program provides students with the knowledge and skills necessary to succeed in the complex and networked world of finance.

Facilities and Special Resources: The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database, which matches a Smith MBA to the right industry position. The OCS also participates in regional and national career forums and job fairs, such as the National MBA Consortium, the National Black MBA Conference, the National Hispanic MBA Conference, the National Association of Women MBA's Conference, and the Career Services Council.

The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Financial Assistance: Financial aid is available to qualified full-time and Executive MBA students in the form of fellowships, graduate assistantships, and scholarships.

Contact Statement: The Smith School of Business has available brochures that give specific degree requirements for the MBA, EMBA, and MS Programs. Program information is available online at http://www.rhsmith.umd.edu. Initial inquiries should be directed to:

Fire Protection Engineering (ENFP)

Graduate Degree Program
College: Engineering

Abstract
The Department of Fire Protection Engineering (FPE) offers a world-class environment for advanced graduate study and research in the broad area of fire safety. The department offers a Master of Science (M.S) degree and a Master of Engineering (M.Eng.) degree. The mission of the FPE Department is to reduce the burden of fire losses on life and property by providing the highest quality of scientifically-based education, research and outreach in fire protection engineering, and in fire-related safety, health and environmental issues. The FPE graduate program provides the unique interdisciplinary academic foundation and scholarly training needed to address complex engineering problems with emphasis on advancing the field of fire protection engineering.
The educational objectives of the FPE M.S. and M.Eng degree programs are to produce graduates who:

- Have the technical knowledge and skills needed to practice fire protection engineering locally, nationally and internationally in a variety of modern professional settings;
- Have the ability to understand and communicate societal, environmental, economic and safety implications of engineering decisions on the local and global communities;
- Are prepared to participate in the development and promotion of fire protection engineering and assume technical and/or business leadership positions.

Some additional educational objectives specific to the FPE M.S. degree program are to produce graduates who:

- Appreciate the importance of scientific research as a mechanism to strengthen the technical basis of fire protection engineering.
- Have the basic competencies needed to pursue advanced studies (e.g., Ph.D.) in fire protection engineering or related fields.

The program is designed to stimulate intellectual growth, increase the level of objective understanding of the physical world and further develop capabilities for analysis and synthesis in order to produce premier fire safety engineers and/or researchers.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume

The M.S. and M.Eng. programs are open to qualified students holding a Bachelor of Science (B.S.) degree in engineering, or a related field from an accredited institution. Applicants should have taken the following 4 prerequisite courses: differential equations, fluid mechanics, heat transfer, structural mechanics (or strength of materials). Applicants who have not completed all prerequisites may still be admitted on a provisional basis if they demonstrate satisfactory academic performance in a related field and/or relevant work experience; these applicants may then be asked to complete the prerequisite courses during their first semester at the University of Maryland. In most cases, the application process requires scores from the Graduate Record Examination (GRE).
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	29 Jun	1 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Mar	29 Sep

Other Deadlines: Please visit the program website at http://www.enfp.umd.edu
Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Thesis only: 30 credits	**Students with a B.S. in UMD's FPE program:** Eight approved courses (24 credits) ENFP 799: Master's Thesis Research (6 credits) **Students without a B.S. in UMD's FPE program:** ENFP 651: Advanced Fire Dynamics (3 credits) Seven additional approved courses (21 credits) ENFP 799: Master's Thesis Research (6 credits)

The Master of Science (M.S.) degree program requires a research thesis and completion of a minimum of 24 credit hours of approved courses. Individual coursework plans are determined by the student, his or her advisor and the department. The M.S. research thesis should make a contribution to the advancement in the state-of-the-art of fire safety science and/or engineering. In addition to a M.S. degree, the department also offers a Master of Engineering (M.Eng.) degree which requires 30 credit hours of approved courses in major and minor core areas. The M.Eng. degree does not include a research thesis. The department's degree requirements are given in detail in its graduate guide, see http://www.fpe.umd.edu/grad.

Facilities and Special Resources
See http://www.fpe.umd.edu/research/labs for a description of the experimental and computer laboratories available in the Department of Fire Protection Engineering.
Financial Assistance
The department of Fire Protection Engineering offers several types of financial support through various research or teaching assistantships. Students are also encouraged to seek other external funding opportunities, for instance via University of Maryland work-study programs and internships available in fire laboratories and FPE consulting companies in the Baltimore-Washington area. For more details, see the department's graduate guide available at http://www.fpe.umd.edu/grad.
Contact Statement
Further information is readily available via our FPE web site at http://www.fpe.umd.edu.

Fire Protection Engineering (PMFP)

Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Admissions Information
General Requirements:
- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:
- Letters of Recommendation (3)

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Full admission as a degree seeking student requires the following prerequisites:
- A bachelor's degree, GPA of 3.0 or better, in engineering or a related field from an accredited institution
- Courses in structural mechanics, differential equations, fluid mechanics and heat transfer
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions
Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	26 July	15 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Mar	29 Sep

Other Deadlines: Please visit the program website at http://www.advancedengineering.umd.edu

Degree Requirements

Master of Engineering (M.Eng.)

Total Credits	Core Requirements
Non-thesis only: 30 credits required	Students taking courses on campus for the Master of Engineering Degree work with an advisor to identify a course of study based on the student's professional interests. Students are required to complete 10 approved courses, including a minimum of six fire protection engineering courses.

Facilities and Special Resources: Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance: Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. Tuition and fees are subject to change.

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

French Modern Studies (FRMS)

Graduate Degree Program
College: Arts and Humanities

Abstract
The Ph.D. in French Modern Studies encompasses the Renaissance to the present. The diversity of the Graduate Faculty makes it possible for students to specialize in a wide variety of areas in French language, literature, film, and culture. The Department is part of a larger School of Languages, Literatures and Cultures that encourages and facilitates interdisciplinary scholarship, particularly in Film Studies and in Cultural Studies. Through consortia arrangements with universities in the area, including George Washington University and Georgetown University, students may augment their programs with courses otherwise unavailable at the University of Maryland.

Degree Requirements
Doctor of Philosophy (Ph.D.)

Core Requirements
All doctoral students are required to complete 24 credits beyond the M.A. in addition to 12 credits of FREN 899: Doctoral Dissertation Research. Students must also demonstrate reading knowledge of one other foreign language in addition to French. **Coursework must include:** History of Ideas course (3 credits) Issues in Literature course (3 credits) History of the French Language course (3 credits) **Teaching Assistants must complete the following:** FREN 709: College Teaching of French (1 credit) FREN 611: The Structure of the French Language (3 credits)

Ph.D. students are required to take for credit a minimum of 8 courses beyond the M.A. at the 600-level or above. They are also required to pass two Qualifying Examinations consisting of a two-part Comprehensive Examination (first written, then oral, taken over two consecutive days by the end of the third semester in the PhD program) and the defense of a written Dissertation Prospectus (scheduled by the end of the fourth semester in the PhD program) before being advanced to candidacy. Ph.D. candidates then go on to write and defend a dissertation that explores significant questions about French-language literature and culture, past or present, hexagonal or extra-hexagonal.
All Ph.D. students are required to demonstrate a sound reading knowledge of one other foreign language in addition to French. A student having a recognized degree or diploma in a subsidiary area such as Music, Economics, Political Science, etc, and who plans to make substantial use of this body of knowledge for the dissertation may be permitted, with the approval of the Graduate Programs Committee, to substitute such degree or diploma for the additional foreign language requirement.
All requirements for the Ph.D. degree, except the dissertation, must be completed within five years of admission to the program. The dissertation must be completed no more than four years after advancement to candidacy. (See department website for additional information)

Facilities and Special Resources: With a total student enrollment of over 35,000, the University of Maryland is supported in its academic endeavors by the University Libraries, a system of eight libraries and more than three million volumes. Other area research facilities include two of the worlds outstanding libraries: the Library of Congress and the Folger Library, both of which have extensive holdings in French. The School of Languages, Literatures and Cultures, the Women's Studies Program, and the David C. Driskell Center For The Study of The Visual Arts and Culture of African Americans and The African Diaspora, among other campus units, offer seminars, lectures, and symposia on a wide variety of topics relevant to graduate students in French.

Financial Assistance: **G**raduate applicants can request to be considered for Teaching Assistantships and Graduate Fellowships. Graduate Teaching Assistantships carry ten-month stipends for a total of four years (provided that the student remains in good standing), plus remission of all fees (10 credits) other than those for registration and health facilities.

Degree Requirements
Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis option: 30 credits **Non-thesis option:** 30 credits	**Thesis option:** Theory or history of ideas course (3 credits) French linguistics course (3 credits) Three culture/literature courses from three different periods (9 credits) French studies courses (9 credits) FREN 799: Master's Thesis Research (6 credits) **Non-thesis option:** Theory or history of ideas course (3 credits) French linguistics course (3 credits) Three culture/literature courses from three different periods (9 credits) French studies courses (15 credits) Non-thesis students must also present a Qualifying Paper
Teaching Assistant Requirement	
All Teaching Assistants are required to take SLLC 601: Teaching Foreign Languages in Higher Education for one credit. This course counts towards the total credits required.	

The M.A. without thesis requires a minimum of 30 credits, of which at least 18 must be selected from courses numbered 600 or above. In lieu of a thesis, students must present a Qualifying Paper of between 25 and 30 pages in length as evidence of their ability to do independent research. The M.A. with thesis requires a minimum of 24 credits, of which not less than 12 must be selected from courses numbered 600 or above. A further six credits (thesis research/French 799) are required. The M.A. thesis committee consists of 2 faculty members in addition to the student's thesis director, who serves as chairperson. There is an oral examination on the thesis, which should be a minimum of 80 pages in length. (See department website for complete information)

Facilities and Special Resources: With a total student enrollment of over 35,000, the University of Maryland is supported in its academic endeavors by the University Libraries, a system of eight libraries and more than three million volumes. Geographical Sciences (GEOG)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The Department of Geographical Sciences offers graduate study leading to the Doctor of Philosophy, Master of Professional Studies in Geospatial Information Sciences, and five year, combined Bachelors of Science and Masters of Science in Geographical Sciences degrees.
The specific research specializations represented by the faculty include:
Human Dimensions of Global Change: Coupled Human and Natural Systems. The Departments ultimate research goal is to advance an integrated understanding of the coupled Earth system including spatially distributed human processes. Our research addresses both fundamental and applied issues in coupled human and natural systems, such as population, socio-economic development, consumption and production, poverty, climate impacts and adaptation, vulnerability and mitigation, as well as the examination of policy options and trade-offs on sustainability. Our scientists investigate both the human socio-economic system and the climate system, and their linkages.
Land Cover,Land Use Change. Land cover and land-use change is a key interface between human and natural systems. Our scientists are world leaders in the remote sensing of land-cover changes. This information is actively combined with human socio-economic data to study past land cover and land use change and to inform advanced modeling of spatially-explicit future scenarios. These methods are actively being used to simultaneously address social, economic, carbon, climate, biodiversity and other aspects of land-use changes. We develop agricultural monitoring systems and look at societal impacts, adaptions and vulnerability to fire, droughts, floods, desertification, and other catastrophic events.
Geospatial Information Sciences and Remote Sensing. Collecting and interpreting geospatial data is central to everything we do as geographers, whether on computers or in the field. From local events to multi-scale processes, our faculty are developing and applying advanced remote sensing capabilities and GI Science that will help us to develop the next generation of GI technologies and understanding of the worlds geography. Our strengths include advanced computer modeling, scientific and geographic visualization, sensor calibration and design, image processing, geocomputing, spatial statistics, and semantic learning.

Carbon, Vegetation Dynamics and Landscape-scale Processes. The department carries out a broad array of research focused on monitoring vegetation dynamics, with a particular focus on mapping and studying human and natural disturbances and their landscape-scale impacts, as well as changes to the earth surface as a result of climate variability. This research involves integration of field-based research with remotely-sensed observations to address key scientific uncertainties. Alterations to the global carbon cycle are changing atmospheric composition and climate with implications for human well-being and a particular focus of our research is on monitoring and modeling the terrestrial carbon cycle with unprecedented sophistication and resolution.

The Department contains several specialized groups, including the Global Land Cover Facility, as well as several smaller groupings of research interests. The Department also has close ties with cross-campus research initiatives, including the Earth Systems Science Interdisciplinary Center (ESSIC) and the Joint Global Change Research Institute (JGCRI). ESSIC is an initiative that brings together the Departments of Geography, Geology and Atmosphere and Ocean Science in a Research Institute to further encourage interdisciplinary studies to address contemporary questions in Earth Systems Science. JCGRI is a collaboration between the University of Maryland and the Pacific Northwest National Laboratory and is dedicated to understanding the problems of global climate change and their potential solutions.

Admissions Information

General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- Supplementary Application
- Supplementary Application Two
- CV/Resume
- Publications/Presentations
- Writing Sample

The Department offers courses of study leading to the Ph.D. degree and the MPS (masters in professional studies in geospatial information sciences). The MPS program is administered separately and has different admission deadlines and requirements than the Ph.D. program. See the MPS GIS Program. The Department no longer offers an M.A. option. All students are admitted directly to the Ph.D. program.

Ph.D. Program

The Department admits students to our doctoral program that have already completed a masters degree and exceptionally well qualified students who have only completed a bachelor's degree. Admitted students are required to either possess or shall develop a strong foundation in the discipline of Geography. Admission to the Ph.D. program is not limited to students with a Geography degree. Those with degrees in related disciplines such as environmental, physical or biological sciences, anthropology, economics, history and social science are encouraged to apply but may be required to undertake additional background study. Some knowledge of data processing and statistics is necessary for all applicants.

Applicants proposed program of study must clearly draw on the research strengths of existing faculty members. All applicants are strongly encouraged to contact individual faculty members (in person, by phone, or by email) to discuss their research interests and to identify potential advisors, as they will need a faculty to sponsor them for admission.

In general, the Department admits between 10-15 students each year into the Ph.D. program. Virtually all students accepted are fully-funded through assistantships and fellowships. While there is no longer a formal M.S. program, a terminal masters degree may be received for qualified students who are unable to complete the Ph.D. program.

Combined BS/MS Program

The Masters of Science degree is only earned through the Department's combined five year BS/MS program. The combined BS/MS program enables some of the better performing students pursuing an undergraduate Geographical Sciences major to earn both their BS and their MS in five years by counting up to 8 credits of their Geographical Sciences graduate courses towards both degrees, thus significantly reducing both the time and cost of earning both degrees.

Most students apply to the program at the end of their Junior year to begin graduate courses and be part of the program as of their Senior year. Admission into the program is strongly competitive. Students will be admitted with an undergraduate degree in Geographical Sciences, including those with an ENSP concentration in Geographical Sciences. Minimum requirements are: 3.5 GPA overall, three letters of recommendation, and a statement of research.

Applicants' proposed statement of research must clearly align with the research strengths of existing faculty members. All applicants are strongly encouraged to contact individual faculty members (in person, by phone, or by email) to discuss their research interests and to identify potential advisors, as they will need a faculty member to sponsor them for admission.

In general, the Department admits between 5-10 students each year into the combined BS/MS program. There is no Departmental funding available.

Ph.D. Program
Admission into the program is strongly competitive. Students may be admitted with either an undergraduate or masters level degree. Minimum requirements are:

- GPA B (3.0) average in junior and senior year;
- A combined total GRE score of 320;
- three letters of recommendation, preferably from academic reviewers.

For international students, the following additional minimum test scores apply: Test of English as a Foreign Language (TOEFL) [internet-based test total 100]. International students who are applicants for teaching assistantships must also pass an International Teaching Assistant Oral Evaluation by the University's Maryland English Institute (MEI).
Closing date for applications into the Ph.D. program is **December 15**. Applications are reviewed from December to February for Fall entry; there is no Spring entry. The Graduate School will accept applications up to May 1 for certain visa categories. However, applications received by the Department after December 15 have a reduced chance of being considered for Fall entry and financial aid. The following are required for application into the program:

1. GRE General
2. 3 Letters of Recommendation
3. Undergrad and Grad transcripts
4. Statement of Goals and Research Interests and Statement of Experiences
5. International applicants: TOEFL or IELTS (also MEI oral exam for TAs)

In addition we strongly encourage the following: evidence of contact with faculty members, an example of writing or scholarship, and a current CV.

B.S./M.S. Program
Closing date for graduate school applications into the combined Bachelor of Science and Master of Science program is **December 15** for Fall entry; there is no Spring entry. The following are required for application into the program:

1. 3 Letters of Recommendation
2. Undergrad transcripts
3. Statement of Goals and Research Interests and Statement of Experiences

In addition we strongly encourage the following: evidence of contact with faculty members, an example of writing or scholarship, and a current CV.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	15 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Dec

Other Deadlines: Please visit the program website at http://www.geog.umd.edu

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Non-thesis only: 30 credits required	GEOG 601: The Nature and Practice of Science (3 credits) GEOG 606: Quantitative Spatial Analysis (3 credits) GEOG 789: Independent Readings (6 credits) GEOG 798: Selected Topics in Geography: Seminar Series (3 credits) GEOG 6xx: Technical Elective (3 credits) GEOG 6xx: Physical Elective (3 credits) GEOG 6xx: Human Elective (3 credits) GEOG 6xx: Electives (6 credits) *Students are also required to complete a scholarly project.

The combined BS/MS degree is only granted to students who have successfully completed the 120 hours of undergraduate coursework, 30 hours of graduate coursework, and a scholarly paper. For more information in the course sequencing and credits applicable to both the undergraduate and graduate degrees, see the Department's website: http://geog.umd.edu/combined-bsms-program.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete a set of coursework and dissertation research. In addition, students must pass a portfolio assessment. Students without a Geography background should complete an additional 9 credits in the following areas: Environmental and Biological Aspects of Earth Systems Science, Human Dimensions of Global Change, and Geospatial Information Sciences. **Required courses:** GEOG 601: The Nature and Practice of Science (3 credits) GEOG 606: Quantitative Spatial Analysis or GEOG 636: Qualitative Methods in Geography (3 credits) GEOG 608: Comprehensive Portfolio Assessment Summary (1-3 credits) GEOG 788D: Selected Topics in Geography (3 credits) GEOG 798: Selected Topics in Geography: Seminar Series (2 credits) GEOG 899: Doctoral Dissertation Research (12 credits)

For those entering with a Master's degree in Geography, the PhD should be completed withing 4 years; For those entering with Bachelor's or without a Geography background, the PhD should be completed within 5 years. Part-time study takes longer, but at least 1 year full-time attendance is required. Students entering with a B.A. or without a Geography background will take one course each in the following areas: Human, Physical, and Methods. See the PhD Handbook for further details.

Facilities and Special Resources:
The Washington, D.C. metropolitan area is an exceptional location in which to pursue geographic research. Many national and international agencies are within a short distance of the campus, including the NASA Goddard Space Flight Center, the USDA Beltsville Agricultural Research Center, the National Archives, Bureau of the Census, National Institutes of Health, USGS, National Geospatial Imaging Agency, Smithsonian Institution, and NOAA. International and non-governmental agencies are located within easy reach, including the National Geographic Society, the Nature Conservancy, World Wildlife Fund, World Bank, and many others. Corporations, businesses and nonprofit organizations that use geographical applications are also well represented. Libraries on campus and nearby are unrivaled elsewhere in the world. The University is also located in a region of extraordinary geographic diversity, including two major urban centers (Baltimore and Washington, D.C.), and the superb, continuous section from the Appalachian mountains, through the Piedmont, Coastal Plain, and Chesapeake Bay to the Atlantic Coast.

Many opportunities exist for students to participate in externally funded research projects. Graduate students find these research programs a rich source of ideas for dissertations as well as providing opportunities to join projects as paid research assistants and, often, identifying openings for employment on completion of their studies.
The Department is housed in over 35,000 sq. ft. on the main College Park campus. Teaching laboratories include facilities for cartography, GIS, and the Turner laboratories dedicated to computer-based instruction, while other facilities needed for virtually any type of investigation are available through collaborations with other departments. There are two primary computer environments, namely PC and UNIX, with over 100 machines dedicated to teaching and graduate research. The research laboratories support UNIX, Linux, and high-end PC machines, including very high performance processors and peripherals and large volume RAID arrays. There are a large number of printers, magnetic disk farms, tape libraries, etc. An extensive range of software is available, including satellite data processing, image analysis, and ESRI GIS packages. Field research, remote sensing, global positioning systems, and other types of equipment are available.

Financial Assistance
Teaching Assistantships, Research Assistantships, and various Fellowships are available. Salary is for 9.5 months per year. Assistants work 20 hours per week. Fellowship recipients have no work assignment. Depending upon resources, the department will provide up to four years of funding, provided the student meets the department's benchmarks (see the PhD Handbook). Applications are made on the University Graduate Admission Application and further information about Financial Aid is given in the Application. Note, residents of certain Southern States without equivalent Geography graduate programs may be eligible to receive tuition at the lower, in-state fee rates.
Funding is not available for students in the combined BS/MS program.

Courses: GEOG

Keywords: Earth Systems Science; Human Dimensions of Global Change, Cultural, Social, Population, Transportation, and Urban Geography. Geographic Information Systems, Remote Sensing, Digital Cartography and Spatial Analysis, Land Use, Land Cover, Carbon Cycle, Vegetation Dynamics.

Geology (GEOL)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
The Department of Geology offers programs leading to the M.S. and Ph.D. degrees. On a full time basis, the M.S. normally requires two to three years of work, which includes courses, the completion of an M.S. research thesis, and an oral defense of the thesis. On a full time basis, the Ph.D. commonly requires three to four years of work, if conducted after the completion of an M.S. program, or four to five years from the time of admission if pursued directly from the Bachelor level. The Ph.D. program normally includes course work, a qualifying examination and proposal defense, a dissertation, and an oral defense and examination of the dissertation.

Our students are required to engage in independent and original research under a mentoring program that promotes creative thinking. This is most commonly achieved via the collaboration between students and faculty in ongoing research programs. Geology is concerned with the Earth, its origin and evolution and the origin of life, and the processes by which Earth's atmosphere, surface and interior have been and continue to be modified. To pursue these topics we have developed research strengths in four themes: Geochemistry, which involves investigations of low- to high-temperature processes operating from Earth's surface to it's core and within the Solar System; Solid Earth Science, which is the study of the minerals, rocks, and structures that constitute Earth, and the tectonic and other processes by which they are formed and altered; Surficial Processes and Environments, which involves the study of active and past fluxes (and reservoirs) of water, dissolved components, and sediment on Earth's surface and the interactions of these fluxes with the biosphere and atmosphere; and, Geophysics, which includes investigations of Earth's interior structure and dynamics, as well as planetary physics. These areas are not mutually exclusive, and students are encouraged to develop a program that suits their interests. Developing areas within the Department include planetary geology and forensics.

Although students will choose an advisor within the Department of Geology, they may also wish to take advantage of research opportunities provided by collaboration with other departments on campus, such as Mathematics, particularly the Applied Mathematics and Scientific Computation Program (AMSC), Atmospheric and Oceanic Science, Physics, Geography, and Chemistry, as well as other institutions in the area including the Smithsonian Institution, United States Geological Survey, NASA, Department of Terrestrial Magnetism, Geophysical Lab and National Institute of Standards and Technology. The Earth System Science Interdisciplinary Center is a collaborative venture between the Departments of Geography, Geology and Atmospheric and Ocean Science on Campus, and the Earth Sciences Directorate at NASA Goddard. This wealth of in-house and collaborative resources positions our graduate students with an unmatched spectrum of opportunities and gives them access to a strong multi-disciplinary program of international stature.

Our current student demographics are diverse, with an approximate 50:50 mix of male and female students of which 10-20% are minority students. Approximately 60% of our graduate students are Ph.D. candidates (the remaining are M.S. students), and some of the M.S. students will petition to become Ph.D. candidates following the successful completion of their M.S. degree program. Other M.S. candidates are focused solely on the M.S. degree, which is the commonly held degree for practicing professionals in government and industry.

Our graduate students benefit from the opportunities of working within an advanced graduate program. Our graduates go on to distinguished post-doc, research and applied positions in academic, government and industrial settings. We proudly acknowledge

having placed our students into prestigious post-doc positions and government laboratories and we highlight their publications (see https://www.geol.umd.edu/graduate/gradpubs.php), presentations at national and international meetings (see https://www.geol.umd.edu/graduate/gradpresentations.php) and awards (see https://www.geol.umd.edu/graduate/gradfunding.php).

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)

Qualified students with a B.S. degree in geology, physics, mathematics, chemistry, biology, engineering or other related sciences are invited to apply for admission to the graduate programs. Our graduate degree program in geophysics welcomes students with undergraduate degrees in physics and or astronomy having little to no background in geology. Coursework expectations for students applying to the program is at least a year of calculus, a semester of physics for science majors, and for those in the in geology and geochemistry track a year of chemistry or its equivalent. All students must submit the Graduate Record Examination scores to be considered for admission.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	12 Jan	15 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	12 Jan	29 Sep

Other Deadlines: Please visit the program website at http://www.geol.umd.edu
Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Thesis only: 30 credits	Students are required to complete 30 credits, including at least 18 credits from the Department of Geology and at least 12 credits at the 600 level or higher. Six credits of GEOL 799: Master's Thesis Research is also required as part of the 30 credit total.

The Department of Geology offers a Master of Science degree. There is no single prescribed curriculum. Although 24 credit hours of course work and 6 credit hours of thesis research are required, the entire course of study is individually developed for each student by his/her graduate program committee as approved by the Director of Graduate Studies. The M.S. degree is awarded following the successful completion of the course requirements, defense of a proposal, submission of a satisfactory thesis, and an oral defense of the thesis. The M.S. normally requires two years of work.

Doctor of Philosophy (Ph.D.)

Core Requirements
Students who enter the doctoral program with an M.S. degree are required to complete 12 credits of coursework with at least nine credits at the 600 level or above. Students who enter the doctoral program without an M.S. are required to complete 30 credits of coursework with at least 21 credits at the 600 level or above. All students are required to complete 12 credits of GEOL 899: Doctoral Dissertation Research.

Students who have an M.S. degree must normally complete a minimum of 12 credits of coursework applicable to a graduate degree with at least 9 credits at the 600 level or above. Coursework requirements for students who do not

hold an M.S. degree will be established by the Director of Graduate Studies after discussion with the student's advisor but normally will be 30 credits of coursework applicable to a graduate degree, 21 of which must be at the 600 level or above, and normally 24 credits must be from the Department of Geology, or in the case of an interdisciplinary study, an appropriate program approved by the Director of Graduate Studies. The Ph.D. degree requirements include satisfactory completion of course work, defense of a research proposal, an oral candidacy and research proposal examination, and a successful dissertation defense. The Ph.D. commonly requires three to four years of work, if conducted after the completion of an M.S. program, or four to five years from the time of admission if pursued directly from the bachelor level.

Facilities and Special Resources: The Department maintains a suite of state-of-the-art facilities and equipment for research, including: three solid source mass spectrometers, six gas source mass spectrometers, with inlet devices for inorganic and organic isotope analyses, single and multicollector inductively-coupled plasma mass spectrometers (ICP-MS), three UV lasers for in situ analyses with gas-source and plasma mass spectrometer, two chemical clean labs, with ion chromatographic facilities, JEOL 8900 superprobe with an Oxford instrument mini-cathodoluminescence detector, Scanning and Transmission Electron Microscopes, color image analysis system, fluid inclusion stage, high temperature and high pressure equipment for dry or hydrothermal experiments, diamond anvil cell facilities, including laser heating and external heating, two triaxial deformation apparatii with flow through capacity and acoustic emission recording, flame and graphite furnace atomic absorption equipment, spectrophotometers, HPLC with fluorescence detector, UV lamps and monochronometer for photochemistry, anoxic chamber, Geographic Information Systems (GIS) computational laboratory, electromagnetic and acoustic doppler velocity meters, laboratory and field hydrogeology equipment, campus drill rig, microstructures and fabrics analysis instruments, research microscopes with reflectance capabilities, rock preparation and mineral separation laboratories, computer network with direct access to supercomputer facilities, nitrogen Permeameter 400, helium Porosimeter 300, Solaris Impedance Meters.
Further information is found at the following URL http://www.geol.umd.edu/labs.htm
Financial Assistance: Graduate students are eligible for Departmental teaching assistantships, Graduate School fellowships and grant-supported fellowships and research assistantships. In addition, some curatorial, library and other part-time work is sometimes available.

Contact Statement
See the Department of Geology Web page at URL http://www.geol.umd.edu for additional information. The Department's Graduate Studies in Geological Sciences also provides additional information on the requirements, examinations, faculty research interests and publications, research facilities and financial aid. Courses: GEOL
Keywords: Structural, geochemical, and petrologic investigations of tectonic and metamorphic processes; mechanisms of sediment transport; sedimentary cycling; surface, near-surface, and deep-crustal fluid flow; laboratory, geochemical and field studies of magmatic and ore-forming processes; and geochemical investigations of early solar system evolution

Geospatial Information Science (with Nanjing Normal University) (MPGC)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The **Master of Professional Studies in Geospatial Information Sciences Program (MPS degree (31 Credits)** is dedicated to providing the most up-to-date education on geospatial technology, theory and applications. The courses cover spatial analysis, statistics, programming, databases, modeling, remote sensing, Internet GIS, Mobile GIS, and Open Source GIS.

Admissions Information
General Requirements:

- Statement of Purpose*
- Transcript(s)*
- TOEFL/IELTS/PTE (international graduate students): TOEFL/IELTS/PTE or successful in person exam/video.

Program-Specific Requirements:

- Letters of Recommendation (2)
- CV/Resume
- Official Copy of diploma/certificate of graduation*

**Transcripts, diplomas and certificates of graduation must be In the original language with literal English translation.*
The Graduate School requires all admitted graduate students to have a baccalaureate degree from a regionally accredited college or university in the United States, or the equivalent of a baccalaureate degree in another country. A GPA of 3.0 is normally required for admission into this program. Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Geospatial Intelligence (Z109)

Graduate Certificate Program
College: Behavioral and Social Sciences
Abstract
The **Graduate Certificate in Professional Studies in Geospatial Intelligence (GCPS GEOINT)** is dedicated to providing workforce-focused training at graduate level in ways that can nimbly respond to developments in what is often a rapidly shifting landscape of applied problem-sets, analysis schemes, big and growing data-sets, and software platforms that characterize today's geospatial intelligence.

The MPS GEOINT program encompasses a 12-credit (4 units of 3-credit courses) course structure comprising two core courses and a selection of two courses among electives. The courses cover spatial analysis, remote sensing, big data analytics,geovisualization, programming in web and mobile GIS, geospatial intelliegence in various fields, etc.

The **Master of Professional Studies in Geospatial Intelligence (MPS GEOINT)** is also offered, which entails 30 credits from 10 courses (five core and five elective courses). The credits earned from a GCPS GEOINT can be transferred towards the MPS GEOINT.

Facilities and Special Resources: New classroom facilities are provided for GEOINT programs as part of the development of the Center for Geospatial Information Science. A dedicated set of server and high-performance computing clusters are also provided from CGIS for teaching GEOINT courses. Students also have full access to the resources (e.g. computer labs, software applications, seminars, etc) in the Geographical Sciences Department as regular graduate students. All registered students have full access to the facilities and resources (e.g. libraries, gym, computer labs) on campus.

Our local surroundings play host to *the* center of influence for the geospatial intelligence industry in the United States. The National Geospatial-Intelligence Agency employs 8,500 people at the third largest federal building in the D.C. region at nearby Springfield, VA. The NASA Goddard Space Flight Center in nearby Greenbelt, and the United State Geological Survey in nearby Reston, VA serve as the nexus for the nation's earth science geospatial intelligence. The U.S. Census Bureau in nearby Suitland, MD is tasked with a decennial nationwide data collection exercise that mobilizes a huge workforce to perform geospatial intelligence gathering year-round.
Financial Assistance: Teaching Assistantships are offered depending on availability and students' qualifications.

Geospatial Intelligence (MPGI)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The **Master of Professional Studies in Geospatial Intelligence (MPS GEOINT)** is dedicated to providing workforce-focused training at graduate level in ways that can nimbly respond to developments in what is often a rapidly shifting landscape of applied problem-sets, analysis schemes, big and growing data-sets, and software platforms that characterize today's geospatial intelligence.

The MPS GEOINT program encompasses a 30-credit (10 units of 3-credit courses) course structure comprising five core courses and a selection of five courses among electives. The courses cover spatial analysis, remote sensing, big data analytics,geovisualization, programming in web and mobile GIS, geospatial intelliegence in various fields, etc.

The **Graduate Certificate in Professional Studies in Geospatial Intelligence (GCPS GEOINT)** program is also offered, which entails 12 credits from four courses (two core and two elective courses). The credits earned from a GCPS GEOINT can be transferred towards the MPS GEOINT.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (2)
- CV/Resume
- Prerequisites: Introductory Courses in GIS, Remote Sensing, and Statistics or permission of program administrator.

The Graduate School requires all admitted graduate students to have a baccalaureate degree from a regionally accredited college or university in the United States, or the equivalent of a baccalaureate degree in another country. A GPA of 3.0 is normally required for admission into this program. Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis.
Applicants with foreign credentials must submit academic records in the original language with literal English translations.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

The MPS GEOINT program encompasses a 30-credit (10 units of 3-credit courses) course structure comprising five core courses and a selection of five courses among electives. Students are required to accomplish an averge grade of B to receive a degree.

Facilities and Special Resources: New classroom facilities are provided for GEOINT programs as part of the development of the Center for Geospatial Information Science. A dedicated set of server and high-performance computing clusters are

also provided from CGIS for teaching GEOINT courses. Students also have full access to the resources (e.g. computer labs, software applications, seminars, etc) in the Geographical Sciences Department as regular graduate students. All registered students have full access to the facilities and resources (e.g. libraries, gym, computer labs) on campus.

Our local surroundings play host to *the* center of influence for the geospatial intelligence industry in the United States. The National Geospatial-Intelligence Agency employs 8,500 people at the third largest federal building in the D.C. region at nearby Springfield, VA. The NASA Goddard Space Flight Center in nearby Greenbelt, and the United State Geological Survey in nearby Reston, VA serve as the nexus for the nation's earth science geospatial intelligence. German Literature and Language (GERS)

Graduate Degree Program
College: Arts and Humanities

Abstract
The German Program of the Department of Germanic Studies offers graduate study leading to the M.A. and Ph.D. degrees. The main focus is on Modern German Studies combining both discipline-based and interdisciplinary courses. The intellectual focus of the degrees is German-speaking Europe from the Enlightenment to the present, as represented in literary and non-literary texts, and other cultural productivity.
The degrees reflect the paradigm shift within the field of German language and literature expanding the focus of Germanistik to a broader concentration on cultural studies which include gender studies, film studies, and postcolonial theory.
A concentration in Medieval Studies is also offered on an interdepartmental basis.

Degree Requirements

Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis option: 30 credits **Non-thesis option:** 30 credits	**Thesis option:** GERM 620: Methods of German Literary Studies (3 credits) German courses at the 600-800 level (15 credits) Electives (5 credits) GERM 799: Master's Thesis Research (6 credits) Students must also pass an oral defense and a written Master's comprehensive exam **Non-thesis option:** GERM 620: Methods of German Literary Studies (3 credits) German courses at the 600-800 level (15 credits) Electives (11 credits) Students must also pass a written Master's comprehensive exam
Teaching Assistant Requirement	
All Teaching Assistants are required to take SLLC 601: Teaching Foreign Languages in Higher Education for one credit. This course counts towards the total credits required.	

The M.A. degree program offers both a thesis and non-thesis option. For the thesis option, the student must complete 24 hours of coursework, the thesis with oral defense and a written comprehensive examination. The non-thesis option requires 30 hours of coursework, a mini-thesis with oral defense and a written comprehensive examination. For both options the comprehensives consist of two three-hour examinations based on the coursework and the M.A. reading list.

Doctor of Philosophy (Ph.D.)

Degree requirements for the Ph.D. are as follows: 1) completion of at least 24 hours of coursework beyond the master's degree over a period of at least one year at the University of Maryland and a further 12 hours of dissertation research; 2) a reading skill examination in a language other than English or German, which may be another Germanic language or a language related to the candidate's research; 3) comprehensive written examinations; 4) presentation of the dissertation, an original study in the field of specialization on a topic approved by the advisor and the examining committee; and 5) the oral defense of the dissertation (one to two hours).

Facilities and Special Resources: In addition to its course offerings listed below, the German Program of the Department of Germanic Studies sponsors the German Club, the University of Maryland Chapter of Delta Phi Alpha (the national German language honors society). The department participates in the University Honors Programs and has a departmental honors program. Distinguished scholars and lecturers as well as visiting professors visit the metropolitan area and campus regularly. College Park's proximity to Washington, D.C., facilitates participation in the many cultural functions of the capital with its wealth of German and Scandinavian social groups and national societies: the Embassies of Austria, Denmark, Germany, Norway, Sweden, Switzerland; the German Historical Institute, and the Goethe Institute.

Financial Assistance: The German Program offers graduate fellowships and teaching assistantships, and the Graduate School offers**, on a competitive basis, fellowships, and grants.**

Global Health (Z070)

Graduate Certificate Program
College: Public Health

Abstract
The Graduate Certificate in Global Health is designed to provide basic knowledge in global health delivery to those employed or seeking employment in positions requiring this knowledge or to individuals who desire this added credential. The Global Health Certificate provides knowledge of issues, policies, and practices in global health that enables individuals (many of whom do not have public health backgrounds) to work effectively in agencies and programs providing global health services. As an area for study, research, and practice, global health emphasizes translational health issues, synthesizing population-based prevention with evidenced based, community supported initiatives.

The Global Health Certificate requires completion of four courses (12 credits), three of which are required and a fourth of which is an elective. The core curriculum includes foundational aspects of global health, communication and promotion, and program planning and evaluation. The elective topics include history, diplomacy and/or social marketing in Public Health. A blended learning format featuring seminar-style, face-to-face instruction and online learning is offered at the College Park campus. Course descriptions can be found here: http://sph.umd.edu/department/miaeh/certificate-global-health

The Global Health Certificate is offered through the University of Maryland's School of Public Health, a leader in the discovery, application, and dissemination of public and global health knowledge in the state of Maryland, the nation, and the world. The School of Public Health has specifically targeted programs, curricula, service and research dedicated to the understanding and improvement of global health.

Program-Specific Requirements:

- Letters of Recommendation (1): The letter of recommendation needs to be an academic reference.
- CV/Resume

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland.
Non-UMD students who would like to pursue the Certificate in Global Health should visit the UMD Graduate School Admissions page for detailed application steps. http://gradschool.umd.edu/admissions
UMD cannot issue the immigration documents necessary for international students to study (F1 or J1 student visas) in this program. International students who currently reside in the U.S. on existing visas may apply. Eligible international students have additional requirements per the Office of International Student & Scholar Services (ISSS). For additional requirements, please see: http://oes.umd.edu/professional-programs/global-health/gh-admission-information#international
Current graduate students within the School of Public Health may enroll in courses that fulfill the requirements of the Certificate in Global Health. Please contact your Graduate Director or the certificate program for more information.

Government and Politics (GVPT)

Graduate Degree Program
College: Behavioral and Social Sciences
Abstract
The Department of Government and Politics offers a Ph.D. degree in political science, intended primarily for those planning academic careers. Students can specialize in American politics, comparative politics, international relations, and political theory. In addition, students can study in depth more specialized fields such as public law, national security, public policy, political psychology, international and inter-ethnic conflict, international political economy, urban politics, post-Soviet and post-communist studies, East-Asian studies, environmental politics, and the politics of advanced industrial societies.

The Department recruits highly qualified students, and admits only a limited number of the strongest applicants. The Admissions Committee rarely grants provisional or conditional admission to the graduate program. The Department does not usually admit M.A. applicants. Only students whose ultimate objective is the Ph.D. should apply for direct admission to that program. Admission is granted only for the Fall Semester.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements
Master of Arts (M.A.)

Total Credits	Core Requirements
30 credits required	Students must complete 10 courses, pass a comprehensive exam, and complete two seminar papers.

Master of Arts (M.A.) The graduate program in the Department of Government and Politics is designed for doctoral students. Except for students participating in our dual-degree program with the United States Naval Academy, we do not accept students for the sole purpose of acquiring a Master's degree. Doctoral students may obtain a Master of Arts Degree during their course of doctoral study once they have satisfied the requirements associated with the Master's degree.

Doctor of Philosophy (Ph.D.)

Core Requirements
Students are required to complete 42 credits of coursework, in addition to 12 credits of GVPT 899: Doctoral Dissertation Research. Students are also required to complete two comprehensive exams, a third year paper, and pass the Prospectus Defense. **Required courses:** GVPT 622: Quantitative Methods for Political Science (3 credits) GVPT 700: Scope and Method of Political Science (3 credits) GVPT 741: Ancient and Medieval Political Philosophy, GVPT 742: Modern Political Theory, or GVPT 743: Contemporary Political Theory (3 credits) **Students must choose one of the following fields to complete the remaining coursework:** 1. American Politics: GVPT 770: Seminar in American Political Institutions (3 credits) and GVPT 771: Seminar in American Political Behavior (3 credits), and 27 additional credits of GVPT courses at the 600 level or above 2. International Relations: GVPT 708A: Seminar in International Relations Theory (3 credits) and 30 additional credits of GVPT courses at the 600 level or above 3. Comparative Politics: GVPT 780: Seminar in the Comparative Study of Politics (3 credits) and 30 additional credits of GVPT courses at the 600 level or above 4. Political Philosophy / Normative Political Theory: 33 credits of GVPT courses at the 600 level or above

The doctoral program is intended to provide students with the knowledge, methodological skills and research experience appropriate for persons who intend to enter the discipline of political science. Students must complete 42 hours of graduate work including courses in political theory and research methods and pass written comprehensive examinations in two fields. Although formal coursework and field examinations are important components of the doctoral program, the research component, especially in the form of the dissertation is paramount. Consequently students who are able to demonstrate an interest in quality research activities and desire to become creators as well as consumers of knowledge are appropriate for the doctoral program.

Facilities and Special Resources: Graduate students in the department participate in the activities of the Public Service Intern Program, Project ICONS, the Center for International Development and Conflict Management, the Center for the Study of American Politics and Citizenship, the Center for the Study of Post-Communist Societies, The Committee on the Political Economy of the Good Society, and the Harrison Program on the Future Global Agenda.

Financial Assistance: In addition to fellowships and teaching assistantships, the Department also has a public service intern program for students interested in State government. There are also a limited and variable number of research positions available.

Health Administration (HLSA)

Graduate Degree Program
College: Public Health

Abstract
The Master of Health Administration (MHA) program at the University of Maryland, College Park offers students a rigorous, multi-disciplinary program with courses in public health services administration, epidemiology, environmental health, biostatistics, health behaviors and determinants, health policy, health law and ethics, health economics and analysis, strategic management of human resources, health service information systems, financial management of health organizations, marketing for competitive health service, quality assessment and evaluation, and health care leadership and communications. The 46-credit professional degree will prepare graduates to manage the many complex health-related organizations including hospitals, long term care facilities, managed care organizations, rehabilitation agencies, public health clinics, state agencies, among others. With the impending retirement of the first wave of baby boomers, public health and health care organizations face large scale losses of middle and executive level administrators. Public health and health services now comprise the largest industry in the United States, producing nearly one seventh of the United States' gross national product. According to the World Health Report 2000, the health care system should be conceptualized as including not only health services, but also public health and social welfare activities. The Department of Health Services Administration adopts this integrated approach to address current health needs, provide leadership in a rapidly evolving health care industry, and anticipate future health challenges in an expanding global economy. The MHA program is considered to be equivalent to the MPH and is accredited by the Council on Education for Public Health (CEPH).

Admissions Information
Applications to the MHA program in the University of Maryland School of Public Health are processed through the Schools of Public Health Application Service (SOPHAS).
Applications for the MHA program are reviewed with consideration to the following criteria:

1. Minimum 3.0 undergraduate GPA
2. Undergraduate and graduate transcripts (if applicable)

3. GRE scores taken within the past 5 years
4. 3 letters of recommendation that address the applicant's academic capabilities and probability of success in graduate school
5. Statement of professional goals and interests and their congruence with those of the program
6. Relevant academic and work experience

Applicants for the Master of Health Administration degree should be sure to the use the HLSA major code when selecting the program on the Graduate School application.

Health Equity (HLEQ)

Graduate Degree Program
College: Public Health

Abstract

The Master of Public Health (MPH) degree with a concentration in Health Equity is a 43-credit interdisciplinary professional degree. It is a school wide program, currently administered by the Department of Health Services Administration.
The MPH program in Health Equity is designed to train students as public health scientists and practitioners that focus practice and/or research activities on the recognition, description and elimination of health disparities. Health disparities exist across several groups such as race/ethnic groups, geographic residence, gender, sexual orientation, age, and disability status. Public health and health care practitioners and researchers play a critical role in the identification and amelioration of health disparities and in working towards achieving health equity.

The MPH program in Health Equity is a unique and interdisciplinary program with students taking courses across all departments at UMD-SPH and across the UMD campus. The expertise gained through the MPH in Health Equity prepares students for careers that involve integrating health equity into public health practice at various levels. Various agencies in the

state (e.g., county and state health departments) and across the nation (e.g., NIH and CDC), including colleges/universities, health-related agencies, community groups, and even large corporations (hospitals and insurance plans), employ public health professionals with a deep understanding of health disparities in order to design, implement, evaluate, and monitor interventions and policies to improve the health of their constituents by working towards health equity.

To accommodate a variety of career pursuits, students have flexibility in designing their course structure. Once a foundational knowledge is acquired through the MPH program's core requirements, students are encouraged to take electives across a range of disciplines. A large number of elective courses are available within the existing graduate curriculum across all departments in the School of Public Health as well as across other UMD colleges and DC area institutions. Students will be advised to work with SPH faculty for recommendations about how certain elective courses will best support particular career aspirations.
The curriculum is adaptable to both a full and part-time student status.

Please see our website for updated information on the program sph.umd.edu/department/hlsa/master-public-health-mph-program-health-equity

Admissions Information
Applications to the MPH program in the University of Maryland School of Public Health are processed through the Schools of Public Health Application Service (SOPHAS).
Applications for the MPH program are reviewed with consideration to the following criteria:

1. Minimum 3.0 undergraduate GPA
2. Undergraduate and graduate transcripts (if applicable)
3. GRE scores taken within the past 5 years
4. 3 letters of recommendation that address the applicant's academic capabilities and probability of success in graduate school
5. Statement of professional goals and interests and their congruence with those of the program
6. Relevant academic and work experience

Applicants for the MPH in Health Equity degree should be sure to the use the HLEQ major code when selecting the program on the Graduate School application.

Health Policy Analysis and Evaluation (HPAE)

Graduate Degree Program
College: Public Health

Abstract
The Master of Public Health (MPH) degree with a concentration in Health Policy Analysis and Evaluation is a 43-credit professional degree offered by the Department of Health Services Administration.

The MPH program in Health Policy Analysis and Evaluation is designed to train students as public health scientists and practitioners that focus practice and/or research activities on the understanding, analysis, evaluation, and development of health policy. Various agencies in the state (e.g., county and state health departments) and across the nation (e.g., NIH and CDC), including colleges/universities, health-related agencies, community groups, and even large corporations (health care systems and insurance plans), employ public health professionals with a deep understanding of health policy in order to design, implement, analyze and evaluate policies to improve the health of their constituents. This program prepares graduates to take leadership positions in government agencies, consulting companies, health care organizations such as hospitals, community clinics, or health systems corporations, as well as health policy research organizations.

The MPH concentration in Health Policy Analysis and Evaluation at UMD-SPH is unique in that it focuses not only on health care policies but on the analysis and evaluation of all policies that affect the public's health such as policies related to public health organizations and other public policies in education, housing, nutrition, and environmental pollution, among others that have an impact on population health. Students in the program benefit from UMD-SPH location in the DC area, with its proximity to federal government and agencies tasked with developing and implementing health policies such as the Centers for Medicare & Medicaid Services, in particular the Center for Medicare & Medicaid Innovation, The Agency for Healthcare Policy and Research, the Environmental Protection Agency and Health Resources and Services Administration, as well as top private and non-profit research institutions such as RAND, Mathematica, The Urban Institute, and The Brookings Institution, which conduct high-quality, independent research and provide innovative, practical recommendations to health policy makers. Faculty in the HLSA department has active collaborations with several of these agencies and institutions and students in the department have access to internships, capstone projects and post-graduation positions at these organizations. In addition, students in the program benefit for the HLSA department's close links with the State of Maryland legislature and students have interned with General Assembly members; in those experiences, they have conducted research on legislative issues, co-authored legislation, assisted in preparation for hearings, and other policy related tasks.

The curriculum is adaptable to both a full and part-time student status.
Please see up-to-date information on the program at our website:
sph.umd.edu/department/hlsa/master-public-health-mph-program-health-policy-analysis-and-evaluation

Admissions Information
Applications to the MPH Health Policy Analysis and Evaluation program in the University of Maryland School of Public Health are processed through the Schools of Public Health Application Service (SOPHAS).
Applications for the MPH program are reviewed with consideration to the following criteria:

1. Minimum 3.0 undergraduate GPA
2. Undergraduate and graduate transcripts (if applicable)
3. GRE scores taken within the past 5 years
4. 3 letters of recommendation that address the applicant's academic capabilities and probability of success in graduate school
5. Statement of professional goals and interests and their congruence with those of the program
6. Relevant academic and work experience

Applicants for the MPH Health Policy Analysis and Evaluation degree should be sure to the use the HPAE major code when selecting the program on the Graduate School application.

Health Services (PHHS)

Graduate Degree Program
College: Public Health

Abstract
The goal of this program is to provide interdisciplinary training in research, practice, and policy analysis relevant to the planning, administration, management, and evaluation of health and public health programs. The degree program will prepare students to advance research, policy, and practice to order to improve access, cost, and quality of health services, with a particular emphasis on federal, state, and local health policy. The PhD in Health Services requires a minimum of 50 credits organized in four modules. After module 1 (required core health services research courses), students select a cognate area or track. Potential tracks are: health economics, health policy, health equity/sociology of health, and an interdisciplinary track (developed with advisor's approval). Together with their advisor, students select 5 elective courses in the track of which 2 must be methods courses relevant to the cognate area. After completing the track coursework, students must pass a qualifying exam. All students must take an ethics course, a proposal development course and must pass an oral proposal defense to be admitted to candidacy. After candidacy, students take a graduate seminar, and dissertation credits which culminate in a doctoral dissertation and an oral dissertation defense. For further information go to http://sph.umd.edu/department/hlsa/doctoral-program-health-services-phd

Admissions Information
Applications to the Health Services PhD program in the University of Maryland, School of Public Health are processed through the Schools of Public Health Application Services (SOPHAS).
Applications for the doctoral program in Health Services are reviewed with consideration to the following criteria:

1. Minimum 3.0 undergraduate GPA
2. Undergraduate and graduate transcripts

3. GRE scores taken within the past 5 years
4. 3 letters of recommendation that address the applicant's academic capabilities and probability of success in graduate school
5. Statement of professional goals and interests and their congruence with those of the program
6. Relevant academic and work experience

Applicants to the Ph.D. program in Health Services should be sure to use the PHHS major code when seleting the program on the Graduate School application.

Hearing and Speech Sciences (HESP)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The Department of Hearing and Speech Sciences provides the opportunity for advanced graduate study in the communication sciences and disorders. The department offers three degrees; this entry is for the Ph.D. program, with a concentrations in Hearing, Speech or Language. Students applying to the Ph.D. program can opt to receive an MA in Speech-Language Pathology en route to the final degree.
Students interested in the clinical MA degree in Speech-Language Pathology should see SPLA and use this code when applying for admission to study; students interested in a clinical doctorate in Audiology should see CAUD and use this code when

applying for admission to study). At the doctoral level, the Ph.D. is offered in Hearing and Speech Sciences, with concentrations in Hearing, Speech or Language.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Supplemental Application
- Writing Sample: Writing Sample should be recent, 5-10-page scholarly writing, such as a first-authored peer-reviewed publication or other scholarly assignment – uploaded to the Uploads Requirements section of the application.

Admission to the doctoral programs is on a very competitive basis. Our program is a mentoring-based program; we only accept doctoral students for whom there is an obvious mentor who is willing to work with that student. Students typically have high GPA and GRE scores, excellent letters of recommendation and statements of purpose, and a high-quality writing sample. Admission is currently confined to fall matriculation; early application is encouraged.
Admission to the Ph.D. degree program may be offered to applicants with either a Bachelor's or Master's degree. Clinical certification is not required for the degree, although a clinical graduate degree may be needed in addition to the Ph.D. degree for employment in some university settings. Students who wish to receive both degrees can apply to the Ph.D. program and receive a clinical MA while working towards the doctoral degree. Requirements for completion of a program of doctoral study are dependent on a student's prior background in the communication sciences and disorders.
Applicants interested in pursuing an integrated research-clinical doctorate in speech-language pathology (M.A./Ph.D.) should apply to the Ph.D. program and indicate their intention in the Statement of Purpose. Applicants interested in pursuing the dual-degree path in Audiology (Au.D.-Ph.D.) should apply to the Au.D and indicate their intention in the Statement of Purpose. Students may enter the Ph.D track towards the end of their 2nd year, pending decision of the departmental admissions committee.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Other Deadlines: Please visit the program website at http://www.hesp.umd.edu

Degree Requirements
Master of Arts (M.A.)
The Department of Hearing and Speech Sciences offers the Master of Arts degree with major emphasis in Speech-Language Pathology with either the thesis or the non-thesis option.The Master's degree is required by national credentialing standards for individuals intending to practice as speech pathologists in schools, hospitals, rehabilitation facilities, hearing and speech centers or in other clinical settings. Academic course work, which includes a minimum of 36 credits, is supplemented by additional credit registrations in supervised clinical practica in the University Speech and Hearing Clinic and in selected outside clinical facilities so that the graduate will meet the academic and practicum requirements for the Certificate of Clinical Competence (C.C.C.) issued by the American Speech-Language-Hearing Association, and be eligible for licensure in the State of Maryland and other jurisdictions. The Master's degree program is accredited by the Council on Academic Accreditation, the national accrediting agency which oversees graduate programs in Speech-Language Pathology and Audiology. A full description of the Master's degree program is available at our web site, listed below.

Doctor of Audiology (Au.D.)

The Department of Hearing and Speech Sciences offers two doctoral degree options for individuals seeking a clinical doctorate in Audiology. See CAUD for more details. The Au.D. curriculum meets requirements specified in the Standards for the Certificate of Clinical Competence in Audiology (CCC-A) of the American-Speech-Language-Hearing Association. The CCC-A is the minimum qualification for practice in Audiology required by most states and jurisdictions. The Au.D. program for post-BA students requires 57 hours of graduate coursework, 4 credit hours for a capstone research project, 14 hours of clinical practicum registration and 18 credit hours of full-time clinical internship registration, for a total of 93 credit hours. Au.D. students must pass comprehensive examinations and complete a capstone research project. Full-time students are expected to complete the program in 4 years. The Au.D. 'fast-track' program for returning students who already hold an M.A. degree in Audiology and Clinical Certification requires 30 credit hours of graduate coursework and 6 credit hours for a doctoral research project. There is no minimum requirement of supervised clinical practicum experience, although clinical practicum will be available to students as needed. The dual degree Au.D./Ph.D. track in Audiology is designed for students wishing to be trained as scientist-practitioners. The dual degree program requires 60 credits of graduate coursework, 6 credit hours of pre-candidacy research, 12 credit hours of dissertation research, 12 credit hours of clinical practicum registration, and 18 credit hours of full-time clinical internship registration, for a total of 108 credit hours. The Au.D./Ph.D. curriculum is designed to meet requirements specified in the Standards for the Certificate of Clinical Competence in Audiology (CCC-A) of the American Speech-Language-Hearing Association, and by the Graduate School. Ph.D. students must develop an individual study plan with the approval of a faculty Program Planning Committee, pass comprehensive examinations, and complete a dissertation and oral defense. Full-time students are expected to complete the dual-degree program in approximately 6 years.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 32 credits of coursework, in addition to 18 credits of research requirements. Students are also required to participate in a Professional Development Seminar each year for five years, complete a teaching portfolio, and pass a comprehensive exam. **Required Research courses include:** HESP 898: Candidacy Research Project (6 credits) HESP 899: Doctoral Dissertation Research (12 credits)

The Department also offers the Doctor of Philosophy degree with a major emphasis in speech, language or hearing. Students with a B.A. or M.A. are considered for admission to the doctoral program. Matriculated doctoral students will choose within their major a special interest area, which may focus on the normal aspects of their major or disorders related to the major. A student must also select a minor area of study either from within or outside departmental offerings. There are no foreign language requirements, but advanced courses in statistics and experimental research design are required for the degree. Course programs are planned by the student and a committee of at least four faculty members. All doctoral students are expected to participate in varied research activities within the Department for academic credit. Students must take written and oral comprehensive examinations for admission to candidacy after completing formal academic course work. Doctoral students must register for at least 12 semester hours of dissertation research credit before completing the degree. A full description of the Doctoral program, as well as listings of faculty research expertise, can be found at the Departmental web site, listed below.

Facilities and Special Resources

The Department’s facilities include (1) numerous modern research laboratories equipped to support research in the areas of: acoustic phonetics, psychoacoustics, infant and adult speech perception, neuropsychology, language and language development, voice, fluency and electrophysiology. There are multiple sound-attenuating chambers and one electrically-shielded chamber devoted to research with humans, which are all integrated with computers and peripheral equipment for acoustic signal development, signal analysis, presentation and on-line data collection; (2) the Hearing and Speech Clinic at UMCP: this clinic serves as the initial practicum site for all students pursuing clinical training. The Clinic includes multiple audiological test suites equipped for diagnostic testing, a complete hearing aid dispensary, a group rehabilitation room, and state-of-the-art equipment for behavioral and electrophysiological diagnostic testing, as well as hearing aid selection and fitting. Ten speech and language diagnostic and therapy rooms are integrated with observation areas; and (3) an on-site language pre-school (LEAP, the Language-Learning Early Advantage Program), also equipped for observation. Students pursuing clinical training in Audiology will also have access to the Audiology Service, Division of Audiology-Head and Neck Surgery, of the University of Maryland and University Hospital in Baltimore (UMB), for part-time clinical rotations or full-time clinical externships. This Service provides a full range of auditory and vestibular diagnostic and rehabilitative services in a large metropolitan hospital setting. Externally-funded research projects are an integral part of the activities at UMB. All of the clinical and research facilities are potentially available for the conduct of student-directed research projects, or for student participation in faculty-initiated research projects. Additional research and clinical facilities are available in the Washington and Baltimore metropolitan areas. The Library of Congress, the National Library of Medicine and the libraries of various medical schools in the Washington-Baltimore area supplement the University’s extensive libraries at College Park.

The Department of Hearing and Speech Sciences participates in the Neuroscience and Cognitive Sciences graduate program (see NACS), the Comparative and Evolutionary Biology of Hearing Training Grant, and the Maryland Language Science Center, and has ties to the Center for Advanced Study of Language (CASL); these connections afford students the opportunity to work with faculty in other departments at the University of Maryland, College Park, or at UMB.

Financial Assistance
A limited number of graduate assistantships and fellowships are available through the Department. Assistantships that carry teaching, research or clinical responsibilities are awarded on a competitive basis. The Department also recommends outstanding students for Graduate School Fellowships; many of these fellowships have early deadlines for recommendations, so students are encouraged to submit their applications to the department early to ensure full consideration for funding. Students may also seek assistantships elsewhere on campus (such as through the Dean's office or through other departments) or doctoral fellowships sponsored by Federal agencies (e.g., NIH or NSF) or private foundations (e.g., American Speech-Language-Hearing Foundation).

Higher Education (HIED)

Higher Education
Graduate Degree Program
College: Education

Abstract
Higher Education is an area of concentration within the Higher Education, Student Affairs, and International Education (HESI) program at the University of Maryland. As a nationally recognized graduate area of concentration, Higher Education at Maryland prepares students for leadership positions in higher education institutions and policy organizations, as well as engagement in scholarship. Alumni of the Higher Education concentration work as mid- and senior-level college administrators, higher education policy makers and analysts as well as university faculty.

It is important to note that while being a concentration in HESI, the Higher Education concentration is a distinct program with its own admission criteria and requirements. Students can take courses in the following areas: Policy and Finance; Diversity and Student Experiences; Leadership and Organization; and Academic Professions. In addition, in conjunction with their faculty advisor, students can design an area of specialization to meet their individual needs. Higher Education students can also take courses in areas such as business, public affairs, and the social sciences. Programs of study are individually designed by students in consultation with their faculty advisor. Department courses are usually offered in the afternoon and evening.

Doctoral students with an interest in student personnel services can take courses in the Student Affairs concentration. The two concentrations offer distinct degrees but cooperate closely on course offerings. Because the University of Maryland is located close to the nation's capital, masters and doctoral students also have access to many seminars and presentations by higher education leaders and public policy makers in the Washington DC area.

Additionally, the Higher Education concentration is in a unique position to also offer students opportunities that enable them to gain practical experience in the form of internships at federal government agencies, public policy think tanks, and higher

education advocacy organizations throughout the Washington DC area. In the past, in addition to interning at offices on campus and the University System of Maryland, students have interned at the US Senate, National Center for Education Statistics, American Council on Education, and the Institute of Higher Education Policy.

Admitted students to the Higher Education concentration are invited to our Preview Program each spring in order to interview for assistantships across Academic Affairs, Student Affairs and other administrative offices. Nine-and twelve-month assistantships are available. Some doctoral applicants may be recommended for fellowships by our admissions committee.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) or MAT
- CV/Resume
- Writing Sample

To be recommended for full admission to a doctoral or master's program, a minimum undergraduate grade point average of 3.0 is required. A minimum graduate grade point average of 3.5 is required for doctoral programs. Of the three scores on the Graduate Record Examination (verbal, quantitative, analytic), at least one should be at the 70th percentile or higher for PhD applicants (40th percentile or higher for master's applicants) and none should be under the 40th percentile for PhD applicants. If the Miller Analogies Test is used, the score should be at least at the 70th percentile for PhD applicants (40th percentile for master's applicants). Students who do not meet one of these requirements, but show other evidence of outstanding potential, may be considered for provisional admission. For more information on admissions please refer to our website at http://www.education.umd.edu/CHSE/admissions/overview/ and click on prospective students.
It is recommended that, if possible, prospective students talk with concentration coordinators and faculty, and visit classes, to help determine if a particular concentration is appropriate to their academic interests and professional goals.
For detailed information about our programs please visit our website at http://www.education.umd.edu/CHSE/admissions/admission_criteria/.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	1 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	1 Dec

Other Deadlines: Please visit the program website at http://www.education.umd.edu/chse
Degree Requirements
Master of Arts (M.A.)

Total Credits	Core Requirements
Non-thesis only: 36 credits required	EDHI 650: Professional Seminar in Higher and Adult Education (3 credits) EDHI 652: Higher Education in American Society (3 credits) EDHI 666: The Academic Profession (3 credits) EDHI 754: Higher Education Finance (3 credits) EDHI 672: Modes of Inquiry in Education Research (3 credits) Quantitative Research course (3 credits) Qualitative Research course (3 credits) EDHI xxx Electives (9 credits) EDHI 489: Internship in Higher Education (3 credits) EDHI 679: Master's Seminar (3 credits)

Doctor of Philosophy (Ph.D.)

Core Requirements
Students are required to complete 90 credits beyond the Bachelor's degree, including 12 credits of EDHI 899: Doctoral Dissertation Research. **Course requirements are as follows:** EDCP 870: Professional Issues Seminar (3 credits) EDHI 672: Modes of Inquiry in Education Research (3 credits) EDHI 895: Research Critique Seminar (3 credits) Quantitative Research course (3 credits) Qualitative Research course (3 credits) Two additional Research courses (6 credits) Cognate courses (24 credits) Domain Knowledge courses (18 credits) Disciplinary Perspectives (15 credits)

Ph.D. students in Higher Education are required to take a minimum of 90 credits beyond the bachelor's degree, some of which may be satisfied by prior study.

Facilities and Special Resources: Faculty and students in the Department work closely with area schools, colleges, universities, associations and other education-related organizations. Extensive resources in the Washington, D.C., area, including international agencies and non-governmental organizations, provide exceptional opportunities for internships, field experiences, and research to enhance formal course experiences.

Financial Assistance: The Department has a very limited number of merit-based fellowships and graduate assistantships available to students. Fellowships are awarded to doctoral students in March only for the following fall semester. Assistantships are also awarded in the spring for the following fall semester, but occasionally an assistantship may become available at another time of year. A large number of assistantships are also available throughout campus, and many students regularly find assistantships in other departments and offices on campus. Both fellowships and assistantships are awarded on a competitive basis. It is to the student's advantage to apply well before the published application deadlines and to submit a complete application package if they intend to be considered for a fellowship, assistantship, or other form of financial aid. It is a requirement that a student be admitted as a condition of eligibility. International students' applications are not considered complete and are not reviewed by the Department until they have received clearance from the Office of International Student and Scholar Services (ISSS), which can take additional time.

If you need information about ISSS clearance visit the ISSS website at http://www.umd.edu/ies. For more information on financial assistance, see the department web site: http://www.education.umd.edu/chse/admissions/finance.

Historic Preservation (HISP)

Graduate Degree Program
College: Architecture

Abstract
Based in the School of Architecture, Planning, and Preservation, the Historic Preservation Program is a collaboration of faculty from across the University--from the departments of American Studies, Anthropology, Architecture, History, Landscape Architecture, Real Estate Development, and Urban Studies and Planning, as well as the National Trust Library. Our shared goal is educating professionals for work in a wide range of preservation organizations. Research on historic preservation issues is also a focus of the Program, pursued through faculty and student projects, in partnership with preservation organizations and University partners. With many preservation organizations and agencies in the DC area, you will learn from well-connected faculty and challenging internships that will allow you to expand and apply your knowledge and skills. You will experience two great laboratories in Baltimore and Washington; places and spaces where you can explore gentrification, sustainability and other pressing issues. We also sit within a broad cultural landscape that extends from the Atlantic coast to the mountains of Appalachia.

The Historic Preservation Program offers a Master of Historic Preservation (MHP) degree, a graduate Certificate, and several dual degrees (with Architecture, Planning, Real Estate Development, and Anthropology). The MHP is designed as a full-time, two-year curriculum leading to a professional degree. The 45-credit MHP curriculum includes core courses, an internship, an interdisciplinary studio course, a final project, and a large selection of electives to stimulate each student's particular interests. Students will be admitted to the program with a variety of backgrounds but with a demonstrated prior interest in the preservation field. (In some exceptional cases, students may be admitted to the program on a part-time basis.)

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Writing Sample: A writing sample of at least 10-30 pages. This can be previous individual academic work or professional work. It does not necessarily have to be related to historic preservation, however a related topic is preferred. Upload to the Writing Sample of the Uploads Requirements section of the application.

All applicants must have a bachelor's degree from an accredited institution. There is no restriction on the applicants' previous field of study, and indeed we encourage diversity in all senses.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	17 Jan

Degree Requirements
Master of Historic Preservation (M.H.P.)

Total Credits	Core Requirements
Non-thesis only (capstone project	HISP 600: History, Theory and Practice of Historic Preservation (3 credits)

required): 45 credits	HISP 611: Historical Research Methods (3 credits) HISP 630: Preservation Policy and Planning (3 credits) HISP 635: Social and Ethnic Issues in Historic Preservation Practice (3 credits) HISP 640: Preservation Law (3 credits) HISP 650: Historic Preservation Studio Workshop (6 credits) HISP 655: American Vernacular Architecture (3 credits) HISP 670: Conservation of Historic Places: Historic Materials, Building Systems, and Conservation (3 credits) HISP 680: Preservation Economics (3 credits) HISP 690: Preservation Management and Practice (2 credits) HISP 710: Final Project in Historic Preservation I (1 credit) HISP 711: Final Project in Historic Preservation II (2 credits) HISP 660: Internship in Historic Preservation (no credits) Seminar course (1 credit) Electives (9 credits)

The Master of Historic Preservation (MHP) requires completion of 45 credits. Required courses cover history and theory of preservation, preservation law, historical research methods,documentation, conservation, preservation economics, preservation planning & policy, group studio/workshop, internship, and independent final project. Elective courses may be taken from all contributing HISP units, and other departments with prior approval from the HISP Director. A description of the full MHP curriculum is available on the program web site at http://arch.umd.edu/hisp/historic-preservation.

Facilities and Special Resources: The University of Maryland's Historic Preservation Program is privileged to be part of a dynamic, successful preservation community that has long thrived throughout the state and in the District of Columbia. Opportunities to study and work abound in the incredibly diverse cities, towns, and landscapes across Maryland. In addition, the Program enjoys close relationships with many state, local, national, international and federal-government organizations working in historic preservation, as well as non-profit groups and private firms**.**

You will have the opportunity to combine your coursework with invaluable research and field-based professional training in documentation, policy and interpretation. Virtually every class gets you out in the field and connects you to preservation issues and practice in communities and neighborhoods. The program has an ongoing relationship with the Town of Bladensburg to use the Bostwick House property as a learning laboratory and classroom. This 1746 brick home and several farm outbuildings sit on a 10-acre parcel adjacent to the Anacostia River in the middle of suburban Bladensburg [www.bostwickhouse.weebly.com] and just 10 minutes from campus.

The HISP program is directly related to and substantially enhanced by the National Trust for Historic Preservation Library, housed on the College Park campus since 1986 [http://www.lib.umd.edu/NTL/ntl.html]. This Library is one of the leading scholarly resources for preservation in the country.

The program is further strengthened by close working relationships with the Maryland Historical Trust, the National Park Service, the National Trust for Historic Preservation, the Maryland National Capital Park and Planning Commission, Historic Annapolis, Inc., Preservation Maryland, Prince George's Heritage, the Anacostia Trails Heritage Area, and others. Practical experience can be gained through a variety of internship opportunities with these organizations and many others.

Financial Assistance: HISP's principal form of financial aid consists of graduate assistantships related to research and outreach activities. The assistantships consist of tuition remission as well as a stipend. In addition, the Program awards--in conjunction with local non-profit Prince George's Heritage--the Prince George's Heritage Preservation Fellowship, an annual competitive award for a HISP student or students whose Prince George's County related project is judged to be especially outstanding. Additionally, there are possibilities for paid internships and paid part-time work with a variety of national and local organizations and governmental agencies.

Historic Preservation (Z005)

Graduate Certificate Program
College: Architecture

Abstract
The historic preservation certifacte program is designed to provide students in allied graduate programs (for example, American studies, anthropology, history, landscape architecture, planning, real estate development, and architecture) at the College Park campus with a basic understanding of the discipline of historic preservation with an emphasis on connecting preservation practice with their home discipline.

Admissions Information
This program is **only** available to students currently enrolled in a graduate degree program at the College Park campus. For example, students pursing a MA or PhD in history or a MArch in Architecture may complete a certificate in historic preservation. Please contact the department for more information.

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	Please see the program website	Please see the program website
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	Please see the program website	Please see the program website

Other Deadlines: Please visit the program website at http://www.arch.umd.edu

Degree Requirements
Post-Baccalaureate Certificate (P.B.C.)

Total Credits	Core Requirements
16 credits required	HISP 600: Introductory Seminar in Historic Preservation: Theory, History and Practice (3 credits) HISP 611: Historical Research Methods (3 credits) HISP 640: Historic Preservation Law, Advocacy and Public Policy (3 credits) HISP 701: Certificate Portfolio Project (1 credit) Electives (6 credits)

Certificate students, in conjunction with their degree programs, complete the required introductory seminar (HISP 600), a survey of preservation law, 15 credit hours of core courses, and the final seminar (HISP 701). The total number of semester credit hours will vary according to the particular requirements of the specific degree program.

Facilities and Special Resources: See Master of Historic Preservation (HISP) for more information.

Historic Preservation and Real Estate Development (HPDV)

Graduate Degree Program
College: Architecture

Abstract
Based in the School of Architecture, Planning, and Preservation, the Historic Preservation Program is a collaboration of faculty from across the University--from the departments of American Studies, Anthropology, Architecture, History, Landscape Architecture, and Urban Studies and Planning, as well as the National Trust Library. Our shared goal is educating professionals for work in a wide range of preservation organizations. Research on historic preservation issues is also a focus of the Program, pursued through faculty and student projects, in partnership with preservation organizations and University partners.
The dual degree program in Historic Preservation and Real Estate Development is a 60 credit program that can be completed, by taking courses full time over 5 semesters (2 1/2 years), including at least one winter and summer term course. While not preferred students may be admitted to the program on a part-time basis. Consult with the HISP Program Director.
The final project for the HISP portion of the degree will also have to meet the requirements for a Capstone Project in real estate development and should be discussed early on with each Program Director to be sure it will meet the requirements of both.

Admissions Information
General Requirements:

- Statement of Purpose: Statement of Purpose – In addition to the stated requirements, students should discuss specific interest in pursuing a concurrent dual degree within two programs.
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) or Law School Admissions Test (LSAT)
- CV/Resume
- Skills Assessment (in the online application): This assessment is not used in determining your admission to the program. Self assessments are used for placing students into the proper sequence of courses once admitted.
- Writing Sample: A writing sample of at least 10-30 pages. This can be previous individual academic or professional work. It does not necessarily have to be related to historic preservation or real estate, however a related topic is preferred. The writing sample should demonstrate the ability to analyze a problem/question and clearly communicate your findings. Upload to the Writing Sample of the Uploads Requirements section of the online application.
- Must be admitted by both programs to pursue dual degree.

All applicants must have a bachelor's degree from an accredited institution. There is no restriction on the applicants' previous field of study, and indeed we encourage diversity in all senses.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	17 Jan

Degree Requirements
Master of Historic Preservation and Master of Real Estate Development (dual degree) (M.H.P. and M.R.E.D.)

Total Credits	Core Requirements
Non-thesis only: 63 credits required	HISP 600: Introductory Seminar in Historic Preservation: Theory, History and Practice (3 credits) HISP 611: Historical Research Methods (3 credits) HISP 630: Preservation Policy and Planning (3 credits) HISP 635: Social and Ethnic Issues in Historic Preservation Practice (3 credits) HISP 640: Historic Preservation Law, Advocacy and Public Policy (3 credits) HISP 650: Historic Preservation Studio Workshop (6 credits) HISP 655: American Vernacular Architecture (3 credits) HISP 670: Conservation of Historic Places: Historic Materials, Building Systems, and Conservation (3 credits) HISP 680: Preservation Economics (3 credits) HISP 710: Final Project in Historic Preservation I (1 credit) HISP 711: Final Project in Historic Preservation II (2 credits) RDEV courses (30 credits)

Required courses cover history and theory of preservation, preservation law, historical research methods, documentation, conservation, preservation economics, preservation planning & policy, group studio/workshop, and independent final project. Real Estate requirements address real estate economics, finance, planning and entitlements, design and construction management and asset and property management.

The final project must not only address historic preservation or adaptive reuse issues, but must meet the requirements of an MRED Capstone project with real estate feasibility and pro forma modelling.

Facilities and Special Resources: The School of Architecture, Planning, and Preservation and the Colvin Institute of Real Estate Development are ideally located between Washington, DC, and Baltimore and surrounded by a number of historic communities and a varied physical environment. The resulting opportunity for real estate development and historic preservation study is unsurpassed.

Close by the University are key historically important and interesting places in the development of U.S. communities, including the 4th settlement in America at Historic St. Mary's City in Southern Maryland, which was the first planned city in America. Just 10 minutes from campus is the 1930s new town of Greenbelt, Maryland, and within 45 minutes are the 1960's new towns of Columbia, Maryland, St. Charles, Maryland and Reston, Virginia. One of the best examples of new urbanism is the Kentlands development less than 30 minutes away. And not to be missed are the major redevelopment and urban living revivals in the Port City of Baltimore and the historic neighborhoods of Anacostia and Columbia Heights in the District of Columbia.

The University of Maryland's Historic Preservation Program is privileged to be part of a dynamic, successful preservation community that has long thrived throughout the state and in the District of Columbia. Opportunities to study and work abound in the incredibly diverse cities, towns, and landscapes across Maryland. In addition, the Program enjoys close relationships with many state, local, national, international and federal-government organizations working in historic preservation, as well as non-profit groups and private firms.

The HISP program is directly related to and substantially enhanced by the National Trust for Historic Preservation Library, housed on the College Park campus since 1986 [http://www.lib.umd.edu/NTL/ntl.html]. This Library is one of the leading scholarly resources for preservation in the country. The program is further strengthened by close working relationships with the Maryland Historical Trust, the National Park Service, the National Trust for Historic Preservation, the Maryland National Capital Park and Planning Commission, Historic Annapolis, Inc., Preservation Maryland, Prince George's Heritage, the Anacostia Trails Heritage Area, and others. Practical experience can be gained through a variety of internship opportunities with these organizations and many others.

The School's resources include a model shop, a digital fabrication lab, and both PC and MAC computer labs with REVIT, ARGUS, GIS, Maptitude and other design programs available. The School's library contains some 57,000 monographs and 6,000 current periodicals, making it one of the major architectural libraries in the nation. The National Trust Library for Historic Preservation, housed in McKeldin Library, contains 11,000 volumes and 450 periodical titles. THe Colvin Institute holds the entire library offerings of the Urban Land Institute and access to all the case studies published by ULI. The slide collection includes approximately 430,000 slides on architecture, landscape architecture, planning, and technical subjects. The

interdisciplinary National Center for Smart Growth Education and Research is based in the School offering perspectives and opportunities to engage important issues facing urban and regional planning.

Both the Real Estate Development and Historic Preservation Programs benefit from the strong support of the professional community, including practitioners who bring expertise into the class room and project courses as instructors and advisors. The RDEV courses are all taught by working or retired real estate professionals giving unparalleled access for students to making connections with current practice in the industry.

Job placement for HISP graduates has been outstanding with graduates sought out by national, local and regional firms and agencies. The over 150 alumni of the real estate program have a very active and passionate group of grads in the area who meet regularly and share practice tips, connections and future job opportunities.

Financial Assistance: HISP's principal form of financial aid consists of graduate assistantships related to research and outreach activities. The assistantships consist of tuition remission as well as a stipend. In addition, the Program awards--in conjunction with local non-profit Prince George's Heritage--the Prince George's Heritage Preservation Fellowship, an annual competitive award for a HISP student or students whose Prince George's County related project is judged to be especially outstanding. Additionally, there are possibilities for paid internships and paid part-time work with a variety of national and local organizations and governmental agencies.

The Colvin Institute provides scholarship funds to a number of highly qualified students each term. Scholarship determinations are made at the time of application and admission. Scholarships are generally awarded on a per course basis and commitments are made at the time of admission and apply for the duration of the entire program, subject to academic performance.
The MRED Program offers a limited number of administrative graduate assistantships to full time MRED students. Contact the Program Director to apply. Periodically there are named scholarships provided by various real estate organizations or development companies.

In addition, there are work opportunities both on, and off campus, and they are relatively plentiful. Students in the past have been successful in finding part time internships and full time work with local real estate companies. The MRED student listserv posts openings periodically as they are brought to the attention of the Program by alumni, friends, faculty and sponsors.

Applicants should inquire as to the availability of scholarship funding for the term they are starting. Scholarships are typically for a portion of tuition only, and are paid on a per course basis as students progress through the program. Scholarships are available to part time, full time, and dual degree students.

Contact Statement: Contact the programs at the following address: HISP/RDEV Graduate Admissions School of Architecture, Planning, and Preservation Building 145, Faculty Suite University of Maryland College Park, MD 20742
Find additional information on program offerings, degree requirements, admissions, and financial aid on the School's Web site (www.arch.umd.edu).

Schedule a visit and tour online at: http://www.arch.umd.edu/students/advising/. Be sure to contact the Program Director for real estate development (mmcf@Umd.edu) if you wish to attend a sampling of classes while here.
Sign up to receive an invitation to our Graduate Open Houses in Fall or Spring online at:
http://www.arch.umd.edu/students/admissions/information_request.cfm

For further information about the Preservation Program, please contact Don Linebaugh, dwline@umd.edu, 301-405-6309.
For further information about the Real Estate Development Program and the Colvin Institute, please contact Margaret McFarland, JD, Director of Graduate programs in Real Estate Development and the Colvin Institute of Real Estate Development, mmcf@Umd.edu.

Additional information on Case competitions, samples of student work, as well as syllabi and adjunct faculty can be found at the School's web site (www.arch.umd.edu. You will also find the Colvin Institute offering outreach and information at the ICSC in Las Vegas each May, at the ULI National Conference each October, and at many local events of Bisnow, ICSC, ULI, CREW, WIRRE and HAND.

History (HIST)

History
Graduate Degree Program
College: Arts and Humanities

Abstract
The Department of History offers programs leading to the degrees of Master of Arts and Doctor of Philosophy. In conjunction with the College of Information Studies, the Department of History also offers a dual-degree Master of Arts in History and Library Science.

Major fields of concentration for the MA and PhD programs are: Ancient Mediterranean, Medieval, Early Modern Europe, Modern Europe, Global Interaction and Exchange, International, Jewish, Latin America, Middle East, Russia & Eurasia, Technology, Science, & Environment, the United States, and Women & Gender. MA-only fields are: Africa and Military. The graduate program, which includes over fifty regular faculty members and approximately 150 degree-seeking students, excels in the following subfields: African-American, US, and Middle East. Other areas of established strength are Western and Central Europe, Russia and Eurasia, Ancient Mediterranean, Latin American, and Women & Gender. More recently, the following fields have emerged as centers of growing faculty strength and are attracting increasing numbers of students and faculty: Atlantic history, the African diaspora, and Global Interaction and Exchange.

The students in our three degree programs come from across the nation, from small liberal arts colleges and major research institutions, as well as from the Europe, Canada, East Asia, Eurasia, and Latin America. History students have won a number of major external fellowships, including the ACLS/Mellon Early Career Fellowship, the Fulbright-Hays Doctoral Research Fellowship, the Berlin Program for Advanced German and European Studies Dissertation Fellowship, the Foundation for the Research and Study of the East German Dictatorship Fellowship, the Fulbright-IIE Student Grant, the International Research & Exchanges Board Fellowship, the Mary Savage Snouffer Dissertation Fellowship, the Library Company of Philadelphia Fellowship, the Maryland Historical Society Lord Baltimore Research Fellowship, the Massachusetts Historical Society Research Fellowship, the Center for Jewish History Fellowship, and the Mellon Fellowship for Dissertation Research in Original Sources.

Recent graduates have started postdoctoral fellowships or tenure-track jobs at institutions that include Case Western University, George Washington University, Bucknell University, Claremont-McKenna College,Christopher Newport University, Morgan State University, Johns Hopkins University, Monash University, Appalachian State University, Montclair State University, Ohio University, Rhode Island College, SUNY Purchase, the United States Naval Academy, the University of South Florida, Framingham State University, the University of Southern Mississippi, and Western Washington University. The members of our extended alumni community, numbering more than 300 master of arts and doctoral recipients, work as professional historians throughout the State of Maryland, in a number of United States Government agencies, and at institutions of higher education and historical research across the United States and the globe.

Admissions Information
General Requirements:

- Statement of Purpose: Other than the required questions for the Statement of Purpose asked by the University of Maryland, the History Department asks applicants to include content that emphasizes academic and research interests:

(a) what is the applicant interested in studying and why, (b) what the applicant might be interested in working on for the M.A. thesis or Ph.D. dissertation and (c) how the applicant's prior education has provided good training for graduate work in the particular field of interest.

- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Writing Sample: Research paper of about 20 pages, uploaded to the Upload Requirements section of the application.

As a demonstration of our commitment to excellence in historical scholarship and education, admission to our degree programs is highly competitive. It is important that each applicant clearly articulate his/her academic preparation and qualifications for graduate study at Maryland. All prospective applicants are encouraged to make contact with the faculty in the area(s) of interest. Faculty play an important role in the admissions decision. Prospective applicants are also encouraged to make contact with current graduate students to learn more about their experiences. The History Graduate Student Association can facilitate communications with current students.

Although there are exceptions, the minimum overall grade point average is 3.25 for admission to a master's degree program and 3.50 for admission to the doctoral program. The admissions committee would typically expect a higher grade point average in past coursework in history and related disciplines. Successful applicants usually score above the 80th percentile in the analytical writing and verbal reasoning portions of the Graduate Record Examination (GRE) General Test. The Department does not require a GRE Subject Test.

There is no language requirement for the MA degree, but the command of one or more languages is required for admission into the PhD program in some fields within History. For more information on language requirements, see the History Department website.

The admissions process is sensitive to variations in GRE scores among applicants whose primary language is not English. However, the University requires that all admitted students demonstrate proficiency in written and spoken English.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Degree Requirements
Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis option: 30 credits **Non-thesis option:** 30 credits	**Thesis option:** HIST 601: History and Contemporary Theory (3 credits) Approved major field courses (9 credits) HIST 8xx Research Seminar (3 credits) Electives (9 credits) HIST 799: Master's Thesis Research (6 credits) **Non-thesis option:** HIST 601: History and Contemporary Theory (3 credits) Approved major field courses (6 credits) HIST 8xx Research Seminar (6 credits) Electives (15 credits) Non-thesis students must also submit two research papers

Organized in the 1920s, the Master of Arts in History program at the University of Maryland provides broad and intensive instruction in bibliography, research, and writing in various fields of historical study. The MA degree may constitute a step toward doctoral research or preparation for a variety of other fields, such as archives administration, museum scholarship and exhibitions, public history, primary or secondary school teaching, law, or international relations.
Admission to the Master of Arts program is offered to highly qualified applicants holding at least a bachelor's degree, normally in history or a related discipline. Application and admissions procedures are described on the Department's website.
The MA degree program requires a total of thirty (30) semester hours of course work and research credits and the submission of one or two original research papers. In addition, MA students must successfully defend a thesis (the Degree-by-Thesis option) or pass a written examination (the Degree-by-Examination or 'non-thesis' option).
The anticipated period for completion is two (2) years of full-time study. The degree must be completed within five (5) years.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students must complete 42 credits including 12 credits HIST 899: Doctoral Dissertation Research. Students must also pass a language exam, pass the Major Field written exam, an oral exam, and pass the Prospectus Defense. **Coursework includes:** HIST 601: History and Contemporary Theory (3 credits) General Seminar in Major Field (3 credits) Three readings courses in Major Field (9 credits) Three readings courses in the Minor Field (9 credits) Two Research Seminars (6 credits)

First awarded in 1937, the Doctorate in History at the University of Maryland is conferred for superior achievement in historical study and research. The major portion of the degree is the dissertation, an original and noteworthy contribution to historical knowledge. In anticipation of this research, students must master the historical literature in their fields, bibliographic tools, research and writing methods, and general, special, and minor fields of study. Competence in these preliminary steps will be measured by successful completion of course work and by comprehensive examinations.
Unless they have taken comparable courses elsewhere, students must complete the general seminar(s) in their major field, History 601 (History and Contemporary Theory), a minimum of nine hours of reading courses, six hours of research seminars, and nine hours in a minor field.

Depending on the field of study, doctoral students may be required to demonstrate competence in one or more foreign languages and/or special skills.

Students who enter with a master's degree in history or a related field are expected to sit for a set of written and oral comprehensive examinations within five semesters. Those who enter with a bachelor's degree typically take the comprehensive exams within six semesters. Upon successful completion of all examinations, doctoral students are expected to prepare a dissertation prospectus and advance to doctoral candidacy within one or two semesters. Upon completion of the dissertation research and writing, candidates defend the dissertation in an oral examination.
The requirements for the doctoral degree are intended to be completed in five to six years. For more information, see the History Department website.

Facilities and Special Resources
In addition to the field concentrations described above, the Department of History offers several forms of specialized training, including certificate programs in Museum Scholarship & Material Culture, co-sponsored by the Department of American Studies, and Historic Preservation, co-sponsored by the School of Architecture.
The Nathan and Jeanette Miller Center for Historical Studies, housed within the Department, promotes both research and graduate training by sponsoring seminars and colloquia, major scholarly conferences, and visiting professors who teach graduate courses. Typically, the Center’s activities each year concentrate on a historical theme of surpassing interests that cuts across the usual chronological and cultural boundaries.

The University of Maryland is home to a number of important archives, special collections, and historical editing projects, including the archives of the American Federation of Labor-Congress of Industrial Organizations (AFL-CIO), the Freedmen and Southern Society Project and the Samuel Gompers Papers, the Library of American Broadcasting, the Gordon W. Prange Collection, and the National Trust for Historic Preservation Library. The Combined Caesarea Expeditions, an archeological project that joins excavation of the terrestrial remains of Caesarea Maritima with underwater investigation of the site’s ancient harbor, are coordinated at Maryland.

The University sponsors a number of significant scholarly publications of interest to historians, including the *Hispanic American Historical Review*, the flagship English-language journal in Latin American history; and *Feminist Studies*, a pioneer in women's history and gender studies.

The College Park campus is located within the Washington-Baltimore corridor, one of the nation's most dynamic regions for historical research. Francis Scott Key Hall, home to the Department of History, sits less than ten minutes from Archives II, the U.S. government's largest repository, and less than thirty minutes from downtown Washington, D.C., a city of unparalleled cultural resources and unique opportunities for historical research, including the Library of Congress, the Folger, and the US Holocaust Memorial Museum. Annapolis and Baltimore, home to significant archival holdings related to the history and cultures of the State of Maryland, the greater Chesapeake Bay region, and the Atlantic world, can be reached in less than forty-five minutes.

Financial Assistance
The Department of History administers several forms of financial assistance for graduate students, including fellowships, teaching assistantships, graduate assistantships, research assistantships, and research grants. All fellowships, assistantships, and grants are awarded on the basis of merit, as determined by the Graduate Committee, upon the recommendation of faculty and the Director of Graduate Studies.

A multiyear guarantee of continuous funding is frequently offered to newly matriculating PhD students. Guaranteed funding is not standard for students entering the MA and HiLS programs.
Funding packages typically include one or two years of fellowship and three years of Teaching Assistantship. The packages include tuition remission and a health benefits option, subject to satisfactory progress towards the fulfillment of program requirements. Some funding packages are just for four years of continuous Teaching Assistantships. All teaching assistants receive tuition remission and a health benefits option.

For FY2016 (2015-16 academic year), the pay scale for 9.5-month teaching, graduate, and research assistantships range between $18,028 and $18,755. Fellowships follow a similar pay scale. Assistantships and fellowships include tuition remission and a health benefits option. Variations in stipend amounts are due to a number of factors, including the type of appointment, international student status, previous appointments, and advancement to candidacy.
Additional funding is available through the Arts and Humanities Research and Travel Grant competition, Department semester dissertation fellowships, the summer Prospectus Development Grant competition, matching funds for travel to academic conferences, and various campus-wide funding competitions. All doctoral students are expected to seek outside funding for pre-dissertation and dissertation research, as appropriate.

History graduate students may seek grants and fellowships, assistantships, hourly employment, and other forms of self-support offered by non-departmental sources.

History and Library & Information Science (HILS)

Graduate Degree Program
College: Information Studies / Arts and Humanities

Abstract
The History and Library Science (HiLS) dual-degree program is the result of a cooperative agreement between the College of Information Studies, (Maryland's iSchool) and the Department of History. HiLS students graduate with both a Master of Arts in History and a Master of Library and Information Science (MLIS) degree.

The HiLS program is ideally suited for students interested in gaining a multidisciplinary perspective to research as well as practical hands-on skills. Because of the proximity of the College Park campus to a variety of immensely rich research collections, students are able to gain first-hand experiences through internships that reinforce their classroom instruction. As a result of the dual-degree studies, students in the HiLS program gain skills in historical methodology and cutting-edge library and information science practices, preparing them for careers in libraries, archives, museums, and other information centers in the public, private, and non-profit sectors.

Students admitted to the HiLS Program typically complete the program of study in three (3) years, however they have up to five (5) years to complete the degrees. The HiLS program requires fifty-four (54) credit hours of study, with a minimum of twenty-four (24) hours in both the Department of History and the College of Information Studies. Students select how to use the remaining six (6) credits.

The MA and the MLIS are awarded simultaneously, and a student who fails to complete the special requirements for the coordinated degree programs may not receive either degree. When a student admitted to the HILS program subsequently wishes to receive only one degree, he/she must transfer from HILS either to the graduate program in History or to the College of Information Studies and fulfill the normal requirements for the separate master's degree. The dual-degree History and Library Science offers the option of a degree-by-thesis (History and iSchool) as well as a degree-by-examination (History).

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Supplementary Application Essay
- Writing Sample
- Employment history

Students must apply for admission to both the Department of History and the College of Information Studies under the rubric HILS (History and Library Science). There is one, consolidated application, but two, independent admission decisions. An offer of admission from both, the Department of History and the College of Information Studies is required in order to be admitted to the dual-degree program.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	12 Jan

Degree Requirements

Master of Arts and Master of Library and Information Science (dual degree) (M.A. and M.L.I.S.)

Total Credits	Core Requirements
Thesis option: minimum of 54 credits **Non-thesis option:** minimum of 54 credits	Students must complete a minimum of 24 credits in the Department of History and a minimum of 24 credits in the College of Information Studies. Students have the option of specializing in one of the iSchool's specializations: Archives and Digital Curation, Community Analytics and Policy, Youth Experience, Diversity and Inclusion, or an Individualized Program Plan. Students completing a thesis must take 6 credits of HIST 799: Master's Thesis Research. **Library and Information Science requirements:** LBSC 602: Serving Information Needs (3 credits) LBSC 631: Achieving Organizational Excellence (3 credits) LBSC 671: Creating Information Infrastructures (3 credits) LBSC 791: Designing Principled Inquiry (3 credits) LBSC 703: Field Study in Archives, Records and Information Management (3 credits) **or** LBSC 707: Field Study in Library Service (3 credits) iSchool electives (9 credits) **History requirements:** HIST 601: History and Contemporary Theory (3 credits) Approved major field courses (12 credits) Minimum of 3 credits in a General Seminar in Major Field HIST 8xx Research Seminar (3 credits)

Facilities and Special Resources

The College of Information Studies operates five research centers: the Human-Computer Interaction Lab (HCIL), the Information Policy and Access Center (iPAC), and the Center for Advanced Study of Communities and Information (CASCI), the Cloud Computing Center (CCC), and the Digital Curation Innovation Center. iSchool faculty and doctoral students also participate in or have affiliations with the University of Maryland Institute for Advanced Computer Studies (UMIACS), the Maryland Institute for Technology in the Humanities (MITH), and the Computational Linguistics and Information Processing Laboratory (CLIP), as well as the Departments of Computer Science, English, and Sociology, the Robert H. Smith School of Business, and the College of Education. The College also operates a student computer lab for currently enrolled students. Faculty and students participate in cooperative research with staff of the University Libraries, the Human-Computer Interaction Laboratory, and other campus units. Students have access through cooperative arrangements and programs to the resources of Archives II, the National Agricultural Library, the Library of Congress, and other prominent research facilities.

Financial Assistance

The College of Information Studies and the Department of History make available a limited number of teaching and/or graduate assistantships for master's students, including students in the HILS dual-degree program. These assistantships are awarded on the basis of merit, staffing needs, and budget. Neither academic unit extends guaranteed awards.
For more information on financial aid options from the College of Information Studies, please visit the Financial Aid section of the College of Information Studies website.

Human Development (EDHD)

Graduate Degree Program
College: Education

Abstract

The purposes of the Human Development graduate programs are to contribute to basic knowledge about human development and learning and apply this knowledge in various settings. The general areas of human development covered in courses and research include infant and early childhood development, child development, and adolescent development. Specific faculty areas of expertise and research include achievement motivation, cognitive development, developmental neuroscience, earhcy childhood policy, language development, literacy development, peer relationships, teacher-student relationships, moral development, social development, temperament, parenting, prejudice and discrimination, and the role of culture on many aspects of development.
Graduate programs in Human Development lead to the Master of Education, Master of Arts, and Doctor of Philosophy degrees. The research-oriented M. A. (with thesis) and the Ph.D. degree programs in human development are designed to develop students' scientific knowledge of human development and ability to carry out original research projects. The M.Ed. and M.A. without thesis programs are designed to develop competencies in identifying implications of the scientific knowledge of human development for specific situations and contexts, particularly elementary and secondary schools.
Human Development offers two specialization areas of study at the doctoral level, Educational Psychology and Developmental Sciences. The graduate programs and specializations prepare graduates for faculty positions at universities or research positions at institutions where research in developmental science and educational psychology is conducted. Graduates of our program have obtained positions as university professors, research scientists, program analysts, and other research-oriented occupations including research-oriented professionals in private, policy, or advocacy organizations.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s): Please note: EDHD requires all applicants to submit official transcripts (hard copies) to: University of Maryland, College Park, Enrollment Services Operation/Graduate Admissions, Room 0130 Mitchell Building, College Park, MD 20742
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)

The College of Education and Graduate School require a minimum GPA of 3.0 (on a 4.0 scale) at the undergraduate level. At the master's level, a minimum GPA of 3.5 is required by the College of Education. The general Graduate Record Exam (GRE) is required by the Department. Three letters of recommendation including evidence of academic potential from university faculty references are required. In addition, students must write a statement of purpose which indicates a match between student research interests and faculty expertise. Students should indicate their research interests, describe any relevant research experience,and how their experience and interests can be met by our program.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	1 Mar (Final) / 1 Dec (Preferred)	29 Sep (Final) / 30 Aug (Preferred)
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	1 Feb (Final) / 15 Nov (Preferred)	29 Sep (Final) / 30 Aug (Preferred)

Other Deadlines: Please visit the program website at http://www.education.umd.edu/HDQM/
Degree Requirements
Master of Education (M.Ed.)

Total Credits	Core Requirements
30 credits required	**Complete the following courses:** EDHD 690: History and Systems in Human Development (3 credits) EDMS 645: Quantitative Research Methods I (3 credits) EDHD 720: Social Development and Socialization Processes (3 credits) EDHD 721: Cognitive Development and Learning: An Introduction (3 credits) EDHD 775: Human Development and Neuroscience (3 credits) **Complete five of the following courses:** EDHD 711: Peer-Culture and Group Processes in Human Development (3 credits)

	EDHD 750: Culture, Context, and Development (3 credits) EDHD 779: Selected Topics in Human Development (3 credits) EDHD 835: The Development of Achievement Motivation (3 credits) EDHD 840: Language and Literacy Development (3 credits) EDHD 850: Social Cognition and Moral Reasoning (3 credits)

The Master of Education degree in Human Development has the following requirements: Minimum of 30 semesters of coursework, including EDMS 645. A minimum of 15 hours in courses numbered 600-800, with the remainder in the 400 series or above. Required courses focus on biological, social, cognitive, and personality development and in quantitative methods. A written comprehensive examination and seminar paper are required to be taken at the end of the coursework.
The Off Campus Master of Education program curriculum is designed to respond to developmental and motivational challenges faced by teachers and other professionals who work with children and adolescents in education settings. This is not a certification program. The program uses a cohort model. Each fall a new cohort of students begins the program, which runs for two years, including one summer semester. To graduate students must successfully complete 30 credits of study and a seminar paper. Classes are held off campus, primarily at the Universities at Shady Grove. For More information, please visit http://www.education.umd.edu/HDQM/academic/degreeListings/InformationPacketOffCampMED.pdf. **The Masters Cohort in Human Development (MCHD) off-campus program deadlines:**

- Fall Domestic (preferred): April 14
- Fall Domestic (final): July 1
- Applicants should email Dr. Ann Battle at abattle@umd.edu for further information.

Master of Arts (M.A.)

Total Credits	Core Requirements	Specialization Options
Thesis or Non-thesis option: 30 credits	EDHD 690: History and Systems in Human Development (3 credits) EDMS 645: Quantitative Research Methods I (3 credits) EDHD 720: Social Development and Socialization Processes (3 credits) EDHD 721: Cognitive Development and Learning: An Introduction (3 credits) EDHD 775: Human Development and Neuroscience (3 credits)	**Thesis option:** EDMS 646: Quantitative Research Methods II (3 credits) EDHD 799: Master's Thesis Research (6 credits) Two Electives approved by advisor (6 credits) **Non-thesis option:** EDHD 789: Internship in Human Development (6 credits) Three Electives approved by advisor (9 credits)

The M.A. program requires 30 credit hours and offers both a thesis option (24 hours of courses plus 6 hours of thesis) and a non-thesis option (24 hours of courses plus 6 hours of supervised placement in an organization and accompanying papers).Courses in biological, social, cognitive, and personality development and in quantitative methods and a written comprehensive examination are required for all master's degrees.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 72 credits, including 12 credits of EDHD 899: Doctoral Dissertation Research. Students can specialize in either Educational Psychology or Developmental Science, and must complete an Independent Emprical Research Project as well as The Doctoral Comprehensive Knowledge Portfolio. **All students must complete the following courses:** EDMS 651: General Linear Models II (3 credits) EDHD 780: Research Methods in Human Development (3 credits) EDHD 888: Apprenticeship in Human Development Research (12 credits) ***Educational Psychology specialization:** EDHD 760: Advanced Educational Psychology (3 credits) EDHD 835: The Development of Achievement Motivation (3 credits) Two of the following courses: EDHD 720: Social Development and Socialization Processes (3 credits), EDHD 721: Cognitive Development and Learning: An Introduction (3 credits), EDHD 775: Human Development and Neuroscience (3 credits) Electives approved by advisor (30 credits) ***Developmental Science specialization:**

EDHD 690: History and Systems in Human Development (3 credits) EDHD 720: Social Development and Socialization Processes (3 credits) EDHD 721: Cognitive Development and Learning: An Introduction (3 credits) EDHD 775: Human Development and Neuroscience (3 credits) EDHD 840: Language and Literacy Development (3 credits) EDHD 629: Seminar for the Center for Children, Relationships, and Culture (6 credits) Electives approved by advisor (21 credits)

The Ph.D. degree requires 72 hours of credit which includes 12 dissertation credits. Courses in biological, social, and cognitive development and in intermediate statistics and research methods are required. Students also receive credit for research experiences. Slight modifications of these requirements characterize the Specializations in Educational Psychology and Developmental Sciences. Students are also required to complete a comprehensive examination portfolio prior to advancement to candidacy.

Facilities and Special Resources: The Washington, D.C. area and the University of Maryland are rich in resources for graduate study in human development. The faculty of the Department is multi-disciplinary, representing the broad range of developmental sciences, educational psychology, and related fields. There are programs of funded research, field service programs, and internship experiences available in cooperation with agencies and schools. The Department sponsors the Center for the Study of Children, Relationships, and Culture and manages the on-campus Center for Young Children. Faculty in the department make use of the research facilities at the Maryland Neuroimaging Center and Maryland Language Science Center. Students in the College of Education have access to the latest technology through Educational Technology Services.

Financial Assistance: Students requesting consideration for Financial Aid, in addition to completing the financial aid form found in the Graduate Admissions application, must submit their application by the priority deadline. All students who submit their application by December 15 will automatically be reviewed for any departmental aid. University fellowships, NIH traineeships, and Departmental assistantships are awarded on a competitive basis -- more students are admitted than can be awarded funding. In recent years, only students with undergraduate GPA's of 3.6, GRE scores above the 70th percentile, and strong letters of recommendation from academic references have been successful in obtaining Recruitment Fellowships sponsored by the Graduate School and graduate assistantships in the Department.

First priority for Departmental assistantships goes to students already admitted to the Department who have been assured financial assistance for the full course of their study. Almost all awards of fellowships and assistantships are based on previous academic performance, with little attention to need. In addition, some faculty have external grants which provide support for graduate students. Students who do not receive a fellowship or assistantship from the Department may contact the University Financial Aid office at 301-314-9000 for information about other sources of financial support.

Human-Computer Interaction (HCIM)

Graduate Degree Program
College: Information Studies

Abstract
In the HCIM program, students learn to design, evaluate, and implement new information technologies that are understandable, usable, and appealing to a wide variety of people. Our students develop a fundamental understanding of the technology design process, tool-building technologies, evaluation techniques, application areas for users, and the social impact of technology on the individual and community. The program prepares students to become human-computer interaction (HCI) leaders in industry and government, or to become successful in doctoral work in a particular specialization of HCI.

Our 30-credit program is typically completed in two years by full-time students, while offering flexibility to accommodate part-time and professional students. Our core curriculum grounds students in the fundamentals of HCI perspectives and methodologies, while electives offer in-depth insight into specialized areas of the field. A required internship experience provides a unique opportunity to gain hands-on experience in industry or research environments, and the choice of an individual thesis or a client-based team capstone project allows students to demonstrate the skills they've acquired in the form best suited to their career goals.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s): Uploading unofficial transcripts is sufficient for the purposes of the application review process. However, if you are offered admission and choose to enroll in the University of Maryland, you will need to provide an official and unopened transcript.
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3): Letters of recommendation should come from current/former faculty members, employers, colleagues, and in rare cases personal references. Letters should not come from family members or those unable to speak to your ability to complete a graduate degree.
- Graduate Record Examination (GRE): Required for international applicants, optional for domestic applicants. GRE Institution Code: 5814.
- CV/Resume
- Supplementary Application
- Supplementary Application Two

All applicants to the College of Information Studies must meet the minimum requirements set by the University of Maryland Graduate School.

- Applicants must have earned a four-year baccalaureate degree from a regionally accredited U.S. institution, or an equivalent degree from a non-U.S. institution.
- Applicants must have earned a minimum 3.0 average GPA (on a 4.0 scale) in all prior undergraduate course work.

- Applicants must provide an official copy of a transcript for all their post-secondary work.

Admission to the HCIM program is competitive. Applicants are evaluated for admission to the program based primarily on academic achievement (GPA and prior coursework) and admissions essays. TOEFL score should be 100 or higher. GRE should be in the 40th percentile or higher for Verbal scores and in the 60th percentile or higher for Qualitative scores.

For more admissions information or to apply to the program, please visit the Graduate School website.

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	15 Feb

Other Deadlines: Please visit the program website at http://www.ischool.umd.edu/hcim

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements	Specialization Options
Thesis option: 30 credits **Non-thesis option:** 30 credits	INST 630: Introduction to Programming for the Information Professional (3 credits) INST 631: Fundamentals of Human-Computer Interaction (3 credits) INST 632: Human-Computer Interaction Design Methods (3 credits) INST 717: Internship Practicum in Human-Computer Interactions (3 credits) Research Methods course (3 credits) Elective courses (9 credits)	**Thesis option:** INST 799: Master's Thesis Research (6 credits) **Non-thesis option:** INST 775: Capstone Preparation (3 credits); INST 776: Capstone Research (3 credits)

The Master of Science in Human Computer Interaction (HCIM) is a unique cross disciplinary degree program that integrates information studies, computer science, education, psychology and engineering to prepare future HCI leaders in industry, government, education and other sectors. Through coursework and research experiences, students in this program will develop skills in the fundamentals of HCI, advanced research methods, usability analysis and testing, social computing strategies and technologies, and technology design.

HCIM students devise a plan of study to meet graduation requirements: three core courses, a required research methods course and internship experience, a thesis or capstone project, and three elective courses for a total of 30 credit hours.

Core Courses

The core courses introduce a broad range of concepts related to HCI and provide the necessary background for more specialized courses and the completion of the thesis or capstone project.

- INST630 Introduction to Programming for Information Professionals (3 credits)
- INST631 Fundamentals of Human-Computer Interaction (3 credits)
- INST632 Human-Computer Interaction Design Methods (3 credits)
- Research Methods Requirement (3 credits)
- INST717 Internship in Human-Computer Interaction (3 credits)

Elective Courses

Students will take 9 credits of elective courses in the following areas: Information Policy, Information Ethics, Users and Use Context, Information and Universal Usability, Information Environments.

Thesis or Capstone

Students who wish to complete a thesis should enroll in six credits of INST799. These credits must be taken as 3 credits in the fall of the student's final year and 3 credits the following spring.

Students who wish to complete a capstone project should enroll in INST775 (3 credits) and INST776 (3 credits). These courses must be taken consecutively in the fall and spring of the student's final year.

Facilities and Special Resources: The College operates six research centers: the Human-Computer Interaction Lab (HCIL), the Information Policy and Access Center (iPAC), and the Center for Advanced Study of Communities and Information (CASCI), the Cloud Computing Center (CCC), the Trace Center, and the Digital Curation Innovation Center (DCIC).

iSchool faculty and doctoral students also participate in or have affiliations with the University of Maryland Institute for Advanced Computer Studies (UMIACS), the Maryland Institute for Technology in the Humanities (MITH), and the Computational Linguistics and Information Processing Laboratory (CLIP), as well as the Departments of Computer Science, English, and Sociology, the Robert H. Smith School of Business, the College of Education, and the Philip Merrill College of Journalism.

Financial Assistance: The HCIM program is not able to offer applicants financial aid on admission. Many of our students apply for and secure graduate assistantships after being admitted to the program, but these positions are administered by indvidual faculty, departments, and offices, not by the program itself. For more information about scholarships and financial aid offered by the College of Information Studies, please see here.
Contact Statement
For more information about applying to the HCIM program, please contact the iSchool Student Services Office at ischooladmission@umd.edu.

Please visit the College of Information Studies website for details on upcoming Information Sessions or Open House programs.

Industrial/Organizational Psychology (MPIO)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The University of Maryland Master's of Professional Studies in Industrial Organizational Psychology provides rigorous training in the scientific principles and methods in IO Psychology while also increasing graduates' capacity to influence the way work is done, to apply evidence-based best practices, and to ask and answer questions that matter in the workplace. Students take 10 courses (two per term) over the course of 15 months. Courses are taught in the evenings at the College Park campus and through pre-recorded online lectures. This program is designed for working professionals who desire advanced knowledge in industrial and organizational psychology to enter, advance, or expand their career options.

Admissions Information

General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (2)
- CV/Resume
- Admissions interview

The Masters in Industrial Organizational Psychology program offers Fall admissions only. Invitations to interview for the program will be sent to select students by May 1, 2017. UMD cannot issue the immigration documents necessary for international students to study (F1 or J1 student visas) in this program. International students who currently reside in the U.S. on existing visas may apply. Eligible international students have additional requirements per the Office of International Student & Scholar Services (ISSS). Additional Requirements can be found here: https://oes.umd.edu/graduates-post-baccalaureates-professionals/professional-graduate-programs/industrialorganizational-psychology/apply#International.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Information Management (INFM)

Graduate Degree Program
College: Information Studies

Abstract
The Master of Information Management (MIM) program at the College of Information Studies, Maryland's iSchool prepares graduates to be industry leaders in information science and technology, maximizing the value of information management solutions and empowering organizations through the optimized decision-making process. Drawing from management, computer science, information systems, and information science, the MIM program provides students with the skills and knowledge necessary to successfully meet users' information needs, lead efforts to develop organizations' information management capabilities, develop and deploy emerging technologies, and manage high-value information resources.
The specific goals of the MIM program are to:

- Prepare professionals for leadership positions that bridge the gap between technology-oriented staff, functional personnel, and management;
- Address the growing need for skilled information professionals who can strategically manage information and technology assets to fulfill critical information needs in organizations;
- Provide leadership in the information management field through the study of ethical, political, social, and technical issues related to information management in modern society;
- Assist organizations in the formation of information policies, development and application of information systems and services, and the use of information management technologies and methods.

The MIM curriculum consists of 36 credits (12 courses) of graduate-level coursework in information management and related subjects, including a balanced mix of required and elective courses. The courses are integrated into four main blocks:

- Core courses provide a foundation of skills and knowledge related to information, technology, user analysis, and management. They are also opportunities for students to determine which aspects of information management they find most interesting and useful.
- Specialized courses in Management and Information Technology enable students to build advanced skills and knowledge and develop the expertise required in the information management field;
- Practicum courses allow students to connect theory from their learning experience in the classroom to real-world settings through projects carried out in partner organizations;
- Elective courses provide flexibility to the program and allow students to pursue their own educational and professional interests in greater depth.

The Master of Information Management degree courses are offered at the College Park campus (College Park, Maryland), at the Universities at Shady Grove campus (Rockville, Maryland), and online.

Admissions Information

General Requirements:

- Statement of Purpose: Though the responses to these questions may have some overlap with the Graduate School's statement of purpose – applicants may cut and paste, as relevant, from the Graduate School's statement submission
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) or Graduate Management Admission Test (GMAT): GRE required for international students but can be waived for domestic students with 3.2 GPA and above.
- CV/Resume
- Supplementary Application

The admissions process for the MIM program is designed to determine whether the program is a good fit for student's background, education, and professional development goals. Applications for admission to MIM program are evaluated on the basis of the following criteria:

- A baccalaureate degree from a regionally accredited college or university with a minimum "B" or 3.0 average on a 4.0 scale on all academic work attempted for consideration;
- Strength of the three (3) recommendations from persons able to judge probable success in graduate school;
- Strength of applicant statement of purpose, explaining the reasons for undertaking the graduate study at the University of Maryland;
- Strength of targeted applicant essay, describing why you are interested in the Masters of Information Management program and why this program is a good fit for your professional/career goals;
- Acceptable scores on the General Test of the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT);
- International applicants are required to submit the TOEFL or IELTS scores;
- Potential for leadership and innovation in information management as reflect in previously earned graduate degrees and work experience;

Please visit the MIM Admission page for more information about applying to the MIM program.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Degree Requirements

Master of Information Management (M.I.M.)

Total Credits	Core Requirements
Thesis option: 36	INFM 600: Information Environments (3 credits)

credits **Non-thesis option:** 36 credits	INFM 603: Information Technology and Organizational Context (3 credits) INFM 605: Users and Use Context (3 credits) INFM 612: Management of Information Programs and Services (3 credits) **Thesis option:** INST 799: Master's Thesis Research (6 credits) **Non-thesis option:** INFM 736: Information Management Experience (3 credits) and INFM 737: Information Management Capstone Experience (3 credits)
Specialization Options	
Archives and Digital Curation: Non-thesis option only **User Experience:** Non-thesis option only **Data Analytics:** Non-thesis option only **Strategic Management:** Non-thesis option only **Technology Development:** Non-thesis option only **Information Management Research:** Thesis option only **Individualized Program Plan:** Non-thesis option only	

Successful completion of the MIM degree requires that students complete 36 credit hours of academic work with at least a B average (3.0 GPA). Full-time students complete the program in 24 months. Part-time students typically complete the program in two to three academic years. Students may take courses in daytime and evening and may switch between part-time and full-time enrollment. However, all coursework must be finished within five calendar years of the first registration.

All MIM students must complete four core courses, which provide a foundation of skills and knowledge related to information, technology, user analysis, and management. These courses must be completed within student's first 18 credits in the program. The MIM core courses include:

- **INFM 600 Information Environments** - An exploration of various models and methodologies used to capture and deploy internal and external information and knowledge in a number of settings; organizational analysis in terms of information creation, flow, sharing, conservation, and application to problem solving; internal and external influences on the management of information and knowledge; various information flows; information management in a variety of settings.
- **INFM 603 Information Technology and Organizational Context** - Application of communication and information technologies to support work processes, including technology-enhanced communication networks, computer-supported collaborative work, decision-support systems, interactive systems, and systems analysis. Acquisition of information systems and their integration into the organization.
- **INFM 605 Users and Use Context** - Use of information by individuals. Nature of information. Information behavior and mental models. Characteristics of problems, task analysis, problem solving, and decision making. Methods for determining information behavior and user needs. Information access. Information technology as a tool in information use.
- **INFM 612 Management of Information Programs and Services** - Key aspects of management - focusing on planning, organizing, leading and controlling. The evolution of management, innovative management for the changing world, management styles and leadership, managerial planning, goal setting and decision making. Ethical issues, designing adaptive organizations responding to change, global environment, diversity, and utilizing the appropriate technology to provide effective management of information programs and services.

After completing the MIM core courses, all students are required to complete a set of electives that provide depth of knowledge in one or more areas of information management expertise. To help students satisfy this requirement, the MIM program offers a variety of specialization guidelines, which provide students with examples of ways their MIM elective coursework can be organized to meet their educational and professional goals. The program offers two specialization tracks:

- Information Analysis - with a focus on either **Data Analytics** or **Strategic Management**.
- Technology Design - with a focus on either **User Experience** or **Technology Development**.

If students are interested in developing a general course of study, there is an option for the **Individualized Program Plan**. There is also an option for the thesis track, titled **Information Management Research**.

In addition, the MIM program has a joint specialization with the iSchool's Master of Library and Information Science program (MLIS) in **Archives and Digital Curation**.

The learning in the MIM program is not confined to the classroom. Most MIM courses involve substantial applied components in the form of individual and group projects, in-class exercises, and mini workshops. The required Capstone Experience represent the zenith of this practice-oriented focus. It consists of 2-full semester courses (INFM 736 and INFM 737), totaling 6 credits, allowing students to work on an information management related project. The 2 Capstone courses involve the following components:

INFM 736 Information Management Experience (3 credits)

- Must be taken prior to INFM 737
- Offered only in the fall semesters
- Curriculum covers:
    - Project Requirements Gathering
    - Project Planning

INFM 737 Information Management Capstone Experience (3 credits)

- Offered only in the spring semesters
- Curriculum covers:
    - Project Execution
    - Project Conclusion

Facilities and Special Resources
The College operates six research centers: the Human-Computer Interaction Lab (HCIL), the Information Policy and Access Center (iPAC), and the Center for Advanced Study of Communities and Information (CASCI), the Cloud Computing Center (CCC), the Trace Center, and the Digital Curation Innovation Center (DCIC).

iSchool faculty and doctoral students also participate in or have affiliations with the University of Maryland Institute for Advanced Computer Studies (UMIACS), the Maryland Institute for Technology in the Humanities (MITH), and the Computational Linguistics and Information Processing Laboratory (CLIP), as well as the Departments of Computer Science, English, and Sociology, the Robert H. Smith School of Business, and the College of Education.

The College also operates a student computer lab for currently enrolled students.

Faculty and students participate in cooperative research with staff of the University Libraries, the Human-Computer Interaction Laboratory, and other campus units. Students have access through cooperative arrangements and programs to the resources of Archives II, the National Agricultural Library, the Library of Congress, and other prominent research facilities.

Information Studies (INFS)

Graduate Degree Program
College: Information Studies

Abstract

The PhD program at Maryland's iSchool offers an interdisciplinary approach to research and teaching provided by faculty at this leading public research university. Small classes and wide-ranging research projects enable students to work closely with faculty mentors to gain experience in identifying knowledge gaps, investigating both theoretical and practical solutions, evaluating

results, and creating and disseminating new knowledge. A range of required research courses, two foundational doctoral seminars, and electives chosen by the students and their faculty mentors provide both the structure necessary for individuals to become successful researchers and the flexibility that allows them to pursue the research areas about which they are most passionate.

What Are the Unique Aspects of the Doctoral Program?
Maryland's iSchool is at the center of groundbreaking research in the fast-moving field of information studies. With a multidisciplinary faculty studying such diverse topics as online communities, information systems, information policy, human-computer interaction, and digital cultural heritage, the iSchool cultivates doctoral students from a wide range of backgrounds. The PhD program offered at the iSchool provides students with training in interdisciplinary theory, research, and pedagogy as preparation for original research that connects communities, technologies, and information.

The iSchool's location near Washington, DC, the information capital of the world, offers unparalleled opportunities for students to pursue research and employment opportunities. Our PhD students hold internships at and conduct research in government agencies, top technology and design firms, and the nonprofit sector; and graduate to jobs in academia, industry, and government.

What are the Goals of the Doctoral Program?
Upon successful completion of the doctoral program, graduates have:

- Knowledge of the foundations of the field of information studies.
- Mastery of research methods and design.
- Understanding of the research in a specialized content area.
- Proficiency in synthesizing and applying knowledge from a variety of areas.
- Expertise in conducting research and disseminating new knowledge.
-

Admissions Information
General Requirements:

- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
    - Our institution code is 5814 and our "department and major field" code for all programs at iSchool is 4701 (Library and Information Science). The GRE test score is required, and the test must have been taken within the five years preceding the application deadline. This requirement cannot be waived under any circumstance.
- CV/Resume
- Supplementary Application

Additional Admissions Requriements:

- The **Graduate School application** form including a non-refundable application processing fee
- **One official copy of each transcript** from each academic institution attended sent directly from the institution
- Maryland **in-state tuition form**, if applicable
- **Three recommendations** sent directly by the student's references. It is preferable to request at least one letter from a former professor who is able to give an in-depth evaluation of the strengths and weaknesses of the applicant's academic work.

Please read the PhD Admissions FAQ for further information.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	17 April / 15 Dec for best consideration
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Mar / 15 Dec for best consideration

Other Deadlines: Please visit the program website at http://www.ischool.umd.edu

Degree Requirements
Doctor of Philosophy (Ph.D.)

Core Requirements
1. Students are required to complete a minimum of 27 graduate credits, in addition to 12 credits of INFS 899: Doctoral Dissertation Research. 2. Students are required to complete 12 credits of Research Methods and Design courses including INST 800: An Introduction to Research and Academic Work (3 credits) and INST 810: Individual Research Experience (3 credits). 3. Students are required to take INST 888: Doctoral Seminar (6 credits) 4. Students are required to complete nine credits in a specialized area. 5. Each student must submit an integrative paper.

Doctoral students must complete a minimum of 27 graduate credit hours at the University of Maryland (or 30 hours if a basic statistics course has not been taken before matriculation).

Course work will be taken in three areas of study:

- Information Studies (6 credit hours)
- Research Methods and Design (12 credit hours)
- Specialized area(s) (9 credit hours)

Milestones within the program include:

- First-year review
- Integrative paper
- Dissertation proposal
- Dissertation

Facilities and Special Resources

The College operates six research centers: the Human-Computer Interaction Lab (HCIL), the Information Policy and Access Center (iPAC), and the Center for Advanced Study of Communities and Information (CASCI), the Cloud Computing Center (CCC), the Trace Center, and the Digital Curation Innovation Center (DCIC).

iSchool faculty and doctoral students also participate in or have affiliations with the University of Maryland Institute for Advanced Computer Studies (UMIACS), the Maryland Institute for Technology in the Humanities (MITH), and the Computational Linguistics and Information Processing Laboratory (CLIP), as well as the Departments of Computer Science, English, and Sociology, the Robert H. Smith School of Business, and the College of Education.

Faculty and students participate in cooperative research with staff of the University Libraries, the Human-Computer Interaction Laboratory (HCIL), and other campus units. Students have access through cooperative arrangements and programs to the resources of Archives II, the National Agricultural Library, the Library of Congress, and other prominent research facilities.

Financial Assistance

Information on the availability of financial assistance is available on the Ph.D. program's website at http://ischool.umd.edu/phd. The College seeks to offer funding to entering doctoral students throughout their study in the doctoral program, contingent on factors such as successful progress through the doctoral program, likelihood of timely completion of the doctoral program, qualifications, and the availability of funding.

Information Systems (BMIS)

Graduate Degree Program
College: Business

Abstract
The Robert H. Smith School of Business offers graduate programs leading to the degrees of Master of Business Administration (MBA), Master of Finance, Master of Science in Accounting (MS), Master of Science in Information Systems (MS), Master of Science in Marketing Analytics (MS), Master of Science in Supply Chain Management (MS), Executive MBA (EMBA), Online MBA, and Doctor of Philosophy (PhD). The school's MBA program is accredited nationally by the Association to Advance Collegiate Schools of Business (AACSB International). Only about 607 programs in the world are accredited by the AACSB, a reflection of the quality of the faculty, students, curriculum, and career management.
The Smith School of Business faculty has been recruited from the graduate programs of leading universities nationwide. They are dedicated scholars, teachers, and researchers with a strong commitment to academic excellence and the education of the professional manager and researcher. The Smith School of Business is dedicated to preparing graduates to lead organizations in an economy driven by technology, globalization, and rapid change. The Smith School curriculum integrates an in-depth education in core business functions -- accounting, entrepreneurship, finance, information technology, logistics, management, and marketing -- with cross-functional e-business areas -- electronic commerce, financial engineering, services marketing, and supply chain management.

Admissions Information
We strongly encourage you to visit the Robert H. Smith School of Business website at www.rhsmith.umd.edu. The Smith School website contains a wealth of information regarding all graduate business programs and their admissions processes.
Admissions requirements can be found here: https://www.rhsmith.umd.edu/programs/ms-information-systems/admissions
MBA and MS Admissions Office: 301-405-2559
Executive MBA Admissions Office: 301-405-2386
Online MBA Admissions Information: 877-807-8741
PhD Admissions Office: 301-405-2214
Admission criteria for the MS program focusing in information systems are based on: quality of undergraduate and graduate coursework; GMAT or GRE score, 1 letter of recommendation; professional experience; video submission; and written essay of objectives. Prospective applicants may contact the program at (301) 405-2559 for information regarding the MS program.

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Non-thesis only: 30 credits required	BUDT 758Y: Database Management Systems (3 credits) BUSI 788B: Data Models and Decisions (3 credits) BUDT 758Z: Data Networks and Infrastructures (3 credits) BUSI 622: Managing Digital Business Markets (2 credits) BUSI 621: Strategic and Transformational IT (2 credits) BUSI 785: Project Management in Dynamic Environments (2 credits) BUDT 758N: Business Process Analysis for Information Systems (2 credits) Approved Electives (12 credits)

The MS in Information Systems program is ideal for those who understand the value of technology and are interested in gaining the knowledge to manage it. You will learn how information is captured, organized, managed and analyzed, preparing you to lead in the ongoing technology revolution. Get ready to harness the power of information and help move your organization to the next level.

Facilities and Special Resources
The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database, which matches a Smith MBA to the right industry position. The OCS also participates in regional and national career forums and job fairs, such as the National MBA Consortium, the National Black MBA Conference, the National Hispanic MBA Conference, the National Association of Women MBA's Conference, and the Career Services Council.
The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Financial Assistance
Financial aid is available to qualified full-time and Executive MBA students in the form of fellowships, graduate assistantships, and scholarships.

Intermediate Survey Methodology (Z011)

Graduate Certificate Program
College: Behavioral and Social Sciences

Abstract
The Post Baccalaureate (Graduate) Certificate in Survey Methodology is designed for the working professional whose education omitted courses in the field of survey statistics and methodology. Both domestic U.S. and international students are welcome to apply. The program is a short but comprehensive treatment of the field at the intermediate level. Courses cover all of the key areas of survey methodology, from the beginning of the design to the completion of the estimation phase. The program is taught at the graduate level but is significantly less intensive than the onsite M.S. program in survey methodology offered by JPSM. The program provides advanced training in areas needed to professionally design and execute surveys of households, business establishments, institutions, and other populations. Students will learn the construction of questionnaires that reliably measure desired concepts, use of computer assistance in data collection, how different modes of data collection can be used to improve survey data, cognitive psychological applications to survey measurement, and methods of non-sampling error reduction. Students will also learn how to analyze survey data properly reflecting the complex survey design features - See more at:

Admissions Information
Applicants must meet the following minimum admission criteria as established by the Graduate School:

- -Applicants must have earned a four-year baccalaureate degree from a regionally accredited U.S. institution, or an equivalent degree from a non-U.S. institution.
- -Applicants must have earned a 3.0 GPA (on a 4.0 scale) in all prior undergraduate and graduate coursework.
- -Applicants must provide an official copy of a transcript for all of their post-secondary work.
- -International students must fulfill all requirements relating to international academic credentials, evidence of English proficiency, and financial certification. Since the students will not have to enter the U.S., visas will not be required. These requirements are found at the Graduate School's Web site.

In addition, the certificate program has the following pre-requisite course requirements:

- -Completed at least 6 credit hours in mathematical or applied statistics
- -Completed the equivalents to Statistical Methods I & II (SURV 615, SURV 616) or passage of an entrance examination that tests their knowledge of the topics covered in those courses.
- -At least one year of work experience in a position dealing with survey or census design, collection, or analysis.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Post-Baccalaureate Certificate in Intermediate Survey Methodology (P.B.C.)

Total Credits	Core Requirements
18 credits required	SURV 400: Fundamentals of Survey and Data Science (3 credits) SURV 623: Data Collection Methods in Survey Research (3 credits) SURV 625: Applied Sampling (3 credits) SURV 630: Questionnaire Design and Evaluation (3 credits) SURV 701: Analysis of Complex Sample Data (3 credits) Elective: SURV6xx or higher (3 credits)

Facilities and Special Resources
The certificate will require a total of 18 credits earned by taking six 3-credit courses. Onsite courses will be taught during the regular academic semesters (September – December and January – May) and during the summer sessions. Academic calendars are at the Provost website.
Students admitted to the certificate program can take up to two courses a term. The expectation is that students would complete the program in two years or less.
Students enrolled in onsite courses will attend at the College Park campus. Some courses are also broadcast to the Census Bureau in Suitland MD, where students can also attend. The lectures for most courses are also recorded and posted to a JPSM website for later viewing.
In the online courses, students will participate using their own computers, providing flexibility for working professionals. The lectures will be recorded and accompanied by real time, weekly online office hours or discussion sessions.

- Recorded lecture material will be posted online at a pre-specified time each week.
- Students will be required to view the class within a set period (usually one week) and are required to submit regular homework assignments.
- Online discussions hosted by the instructor will be used for answering questions and reviewing material presented in lectures.

International Education Policy (HIEP)

Graduate Degree Program
College: Education

Abstract
The Higher Education, Student Affairs, and International Education (HESI) program is committed to advancing the positive role education can have in society. Our faculty and students study core facets of the education system; this includes the functioning and impact of colleges and universities, student learning and development in higher education, and the enactment and implementation of K-18 and nonformal education policies in an international context. HESI offerings are characterized by a

particular emphasis on social justice, diversity, policy, and system change. Our students and faculty are scholars, practitioners, change agents, and innovative leaders active in universities, as well as in national and international organizations and policy-making bodies. The program is a collaborative community that develops theory, conducts research and translates these to practice, and engages students, educators, and professionals in the advancement of education.
The HESI programs offers three areas of concentration: Higher Education; Student Affairs; and International Education Policy. Please only include one area of concentration on the application. Before applying students should familiarize themselves with each concentration area and choose the one that most closely fits their own particular needs and aspirations. The College of Education website (http://www.education.umd.edu/) offers descriptions of all the concentrations, faculty profiles and contact information, and is an essential resource for all applicants.

Note that, as of 2012, the HESI graduate programs are part of a new department, the Department of Counseling, Higher Education, and Special Education. Previously, Student Affairs was part of the Department of Counseling and Personnel Services and Higher Education and International Education Policy were part of the Department of Education Leadership, Higher Education and International Education.

The **International Education Policy (IEP)** program offers M.A. and Ph.D.degrees designed to provide an interdisciplinary understanding of today's educational policy and practice. The focus is on the relation of education to economic, political, and social development in both developing and developed countries at local, national, regional, and global levels. The IEP program gives comprehensive attention to education, considering both formal schooling, from pre-school to higher education, as well as non-formal, adult, and community-based education.

Degree Requirements
Master of Arts (M.A.)

Core Requirements
Thesis option: 30 credits
EDHI 672: Modes of Inquiry in Education Research (3 credits) EDHI 799: Master's Thesis Research (6 credits) Quantitative or Qualitative Methods course (3 credits)

One additional research methods course (3 credits) International Education Electives and Disciplinary Professional courses (9 credits) **Complete two of the following courses:** EDHI 605: Comparative Education (3 credits) EDHI 606: Political Economy of Education in a Global Context (3 credits) EDHI 607: Culture and Education in a Global Context (3 credits)
Non-thesis option (Master's Paper required): 30 credits
EDHI 672: Modes of Inquiry in Education Research (3 credits) EDHI 679: Master's Seminar (3 credits) Quantitative or Qualitative Methods course (3 credits) International Education Electives and Disciplinary Professional courses (15 credits) **Complete two of the following courses:** EDHI 605: Comparative Education (3 credits) EDHI 606: Political Economy of Education in a Global Context (3 credits) EDHI 607: Culture and Education in a Global Context (3 credits) *Non-thesis students must also complete a Master's paper.

The M.A. program in International Education Policy is looking for first-rate students with an interest in professional careers or further study in the field. This degree seeks to form professionals with an understanding of the complex array of issues concerning educational policies and practices in both developing and industrialized countries. It also seeks to form professionals who will join institutions working on projects that range from assistance to educational systems under times of crisis to efforts to improve educational curricula and to the conduct of exchanges of students and academics across countries.

The M.A. program requires a minimum of 30 credits and usually takes one and a half to two years to complete. The program is distinguished by the development of a unique program of study to suit the needs of each student.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 90 credits beyond the Bachelor's degree, including a maximum of 24 credits transferred from a previously earned Master's degree. Students are also required to complete 12 credits of EDHI 899: Doctoral Dissertation Research, which is included in the total credit requirement. **Core courses:** EDHI 605: Comparative Education (3 credits) EDHI 606: Political Economy of Education in a Global Context (3 credits) EDHI 607: Culture and Education in a Global Context (3 credits) **Research Methods courses:** EDHI 672: Modes of Inquiry in Education Research (3 credits) Quantitative Methods course (3 credits) Qualitative Methods course (3 credits) Two courses in Methodological Approaches (6 credits) International Education Electives and Disciplinary Professional courses (30 credits)

The Ph.D. requires a minimum of 90 credits beyond the B.A. Twenty-four credits are usually accepted for transfer from a previous M.A. degree and 12 credits are awarded for dissertation research, which means the degree generally requires 54 credits of coursework which can be completed in 2 to 3 years. The program is distinguished by the development of a unique program of study to suit the needs of each student. Initial program plans are flexible and are usually revised throughout a student's graduate work as particular directions and their implications for coursework develop.

Facilities and Special Resources

Faculty and students in the Department work closely with area schools, colleges, universities, associations and other education-related organizations. Extensive resources in the Washington, D.C., area, including international agencies and non-governmental organizations, provide exceptional opportunities for internships, field experiences, and research to enhance formal course experiences.

Financial Assistance

The Department has a very limited number of merit-based fellowships and graduate assistantships available to doctoral students. Fellowships are awarded to doctoral students in March only for the following fall semester. Assistantships are also awarded in the spring for the following fall semester, but occasionally an assistantship may become available at another time of year. A large number of assistantships are also available throughout campus, and many students regularly find assistantships in other departments and offices on campus. Both fellowships and assistantships are awarded on a competitive basis. It is to the student's advantage to apply well before the published application deadlines and to submit a complete application package if they intend to be considered for a fellowship, assistantship, or other form of financial aid. It is a requirement that a student be admitted as a condition of eligibility. International students' applications are not considered complete and are not reviewed by the Department until they have received clearance from the Office of International Student and Scholar Services (ISSS), which can take additional time. If you need information about ISSS clearance visit the ISSS website at www.umd.edu/ies. For more information on financial assistance, see the department web site: www.education.umd.edu/chse/admissions/finance.

Interpreting (MPIN)

Graduate Degree Program
College: Arts and Humanities

Abstract
The Master of Professional Studies in Interpreting (MPS in Interpreting) is designed to equip students with the required competencies to compete successfully for work as conference interpreters or community interpreters.Example skills include specialized work in both the consecutive and simultaneous modes in health, legal and political settings, for major corporations, international organizations, government ministries, and international, federal, and state courts requiring simultaneous capability. The MPS in Interpreting is a two-year, 44 credit program. In the first year, you begin to develop high-level skills in consecutive interpretation (oral rendering after the speaker pauses). In the program's second year, you build on these fundamental skills and may learn simultaneous interpreting, while specializing in conference interpreting, or public service interpreting. Simultaneous interpreting may be selected as an elective in the public service interpreting track.

Jewish Studies (JWST)

Graduate Degree Program
College: Arts and Humanities

Abstract
The Jewish Studies Program offers both a Masters Degree in Jewish Studies, and a Graduate Certificate in Jewish Studies. The Masters Program in Jewish Studies is designed to offer students broad, interdisciplinary, graduate-level training in Jewish Studies, as well as in-depth focus on some aspect of the Jewish experience. The curriculum draws on the strengths of the Jewish Studies Program at Maryland, especially Jewish History, Bible, Jewish Literature and Cultural Studies (particularly in the ancient and modern periods), Yiddish, Philosophy, Religious Studies, and Israel Studies. In addition, students take courses in cognate fields outside of Jewish Studies in consultation with their advisors. The extremely strong, and still growing, library collection (rivaled in the mid-Atlantic region only by the Library of Congress), and our proximity to the National Archives, the Library of Congress, the U.S. Holocaust Memorial Museum, and other museums and institutions make the University a prime location for graduate Jewish Studies.
The Post Baccalaureate Certificate in Jewish Studies offers students already enrolled in graduate programs at the University to receive training in Jewish Studies. The program draws on faculty in History, English, Philosophy, Hebrew, and other departments and programs.

Degree Requirements
Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis option: 30 credits **Non-thesis option:** 30 credits	JWST 600: General Seminar in Jewish Studies (3 credits) Two specialization courses (6 credits) One course in each of the following areas: Jewish History, Jewish Thought or Religion, Jewish Literature (9 credits) **Thesis option:**

	Two courses in Jewish Studies in the student's specialization, approved by advisor (6 credits) JWST 799: Master's Thesis Research (6 credits) **Non-thesis option:** Four courses in Jewish Studies in the student's specialization, approved by advisor (12 credits) Non-thesis students also must submit a dossier of 2 major research papers to be evaluated by an examinng committee

As a prerequisite for admission, students must have achieved the proficiency-level corresponding to four semesters of university-level Hebrew, and must achieve the level of six semesters of university-level Hebrew by the time they have completed the program. Courses in Hebrew language will not count toward the 30 credits needed for the degree. Students will be asked to demonstrate their knowledge of modern academic Hebrew by examination, or through a research project making extensive use of Hebrew-language materials.

Facilities and Special Resources
The University's libraries hold over 3,000,000 volumes and house among the strongest holdings in Judaic Studies in the Mid-Atlantic region. In addition to the outstanding holdings of the Library of Congress, the area also offers the specialized resources of the Dumbarton Oaks, the National Archives, the Smithsonian Institution, the U.S. Holocaust Memorial Museum, and numerous other scholarly, cultural, and political resources. Through the Consortium of Institutions in the Washington D.C. area, University of Maryland graduate students may enroll in courses at other universities for graduate credit.

Financial Assistance
MA applicants are eligible for University-wide fellowships. In addition, the Jewish Studies program may award up to two fellowships per year to outstanding Masters students.
Limited funds may be available for outstanding certificate students.

Degree Requirements
Post-Baccalaureate Certificate (P.B.C.)

Total Credits	Core Requirements
12 credits required	JWST 600: General Seminar in Jewish Studies (3 credits) JWST xxx (9 credits)

Students must take four graduate level courses (12 credits) in Jewish Studies. At least six of the 12 credits must be in a different discipline than the student's home department. All students take JWST 600, General Seminar in Jewish Studies, plus at least two other graduate readings or research courses at the 600-800 level. Only one 400-level course can count toward the certificate. Students must work with an advisor to determine which courses best suit their particular need

Journalism (JOUR)

Graduate Degree Program
College: Journalism

Abstract
The Philip Merrill College of Journalism offers a Master of Journalism (JOMJ), a Master of Arts in Journalism (JOUR) and a Doctor of Philosophy in Journalism Studies (JOST). The College accepts full-time students to the master's program, which is designed to be completed in 12 to 16 months. There are specialized tracks in multi-platform journalism and broadcast journalism. The College also offers a highly individualized program for veteran journalists, which may be completed on a part-time basis. The Ph.D. in Journalism Studies is a full-time, research-oriented program that prepares students for careers in university teaching, academic and industry research, and media consulting. For more information, visit: http://merrill.umd.edu/.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Portfolio (Multimedia Requirements section) (optional)
- 3 Writing Samples: Writing samples uploaded to the Upload Requirements section of the application – under Writing Sample, Supplementary Application One, and Supplementary Application Two.

Applicants seeking admission to the master's program must hold a bachelor's degree from a recognized institution of higher learning. Undergraduate study of journalism and professional experience in journalistic fields are not required. Completion of the general aptitude portion of the Graduate Record Examination is required and three letters of recommendation must be submitted. Applications for the master's program are considered for admission in the Summer or Fall semesters. Students beginning the master's program in the summer can graduate within 12 months, whereas students beginning in the fall can graduate in 16 months. Students on the broadcast journalism track must start in the summer. Multi-platform students may opt to begin the program in summer or in fall. Applications for the doctoral program (Ph.D.) are considered only for Fall semester enrollment.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements
Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis only: 30 credits	Theory course (3 credits) JOUR 799: Master's Thesis Research (6 credits) Electives chosen with advisor (21 credits)

The master's degree is typically a 36-credit program (30 credits are required for students in the Returning Journalists specialization). The MJ is a non-thesis degree and is the preferred program of those looking to enter the journalism profession. Students pursuing an MA take six credits preparing a thesis. Students admitted to the standard master's program in multi-platform or broadcast journalism are not required to possess prior training or experience in the field. Students admitted to the returning journalist program, however, must have significant professional experience. Students who enter the MJ program with significant professional newsroom experience can request to opt out of the two required 500-level courses. Students on the 12-month track begin in the summer and take six credits each in summer session one and two, and 12 credits each in fall and spring. Students who start in the fall semester take their coursework fall, spring, and the following fall. The program's capstone experience is the Capital News Service, where students serve as full-time reporters in news bureaus in Washington and Annapolis, at the college's TV station, UMTV, and from our state-of-the-art multiplatform news facilities in Knight Hall.
For more information on our programs, visit: http://merrill.umd.edu/academics/masters-programs/
Detailed information on the requirements of our programs can be found in the master's program handbook, available online at the bottom of: http://merrill.umd.edu/academics/masters-programs/

Facilities and Special Resources
The University of Maryland is located just a few miles from Washington, the media capital of the world. Students and researchers have access to The Washington Post and USA Today as well as hundreds of Washington bureaus for newspapers, online news sites, and TV and radio news outlets from around the world. The Philip Merrill College of Journalism operates daily news bureaus in Washington, D.C., at the Ronald Reagan Building a few blocks from the White House; in Annapolis, just a block from the Maryland State House; and on campus from two locations -- Knight Hall, our state-of-the-art building with multiple news labs and opportunities for multi-platform experimentation; and UMTV, a cable TV station that reaches more than 600,000 homes in central Maryland. The broadcast program is equipped with state-of-the-art digital editing systems used by students to produce a 30-minute nightly newscast. Opened in 2010, Knight Hall also brings all of the College's affiliated centers under one roof.

Centers
The Philip Merrill College of Journalism is home to a number of centers and programs designed to help professionals improve key aspects of journalism.
The Shirley Povich Center for Sports Journalism: Launched in 2012, the Povich center will "forge a path in sports journalism toward analyzing complex issues in athletics, to challenge and clarify society's avid participation in games as players and spectators." For more information: http://povichcenter.org/
The Hubert H. Humphrey Journalism Fellowships: The Humphrey fellowship is a special one-year program that brings international journalists to the University of Maryland to study. Fellows seek to strengthen their management and leadership skills and make professional contacts. The fellowship program is led by Serap Rada, who holds a Ph.D. in government and international relations from the University of Maryland. For more information: http://merrill.umd.edu/humphrey/
The Society for Features Journalism: Founded in 1947, the Society for Features Journalism (formerly the American Association of Sunday and Features Editors, or AASFE) is "dedicated to the quality of features in newspapers." The independently operated group sponsors an annual convention, a writing contest, regional workshops and a fellowship program designed to develop minority feature writers. It also publishes two magazines, "Style" and "Feedback." SFJ's membership of nearly 200 is limited to newspaper feature editors and Sunday section editors. For more information: http://featuresjournalism.org/

The National Association of Black Journalists (NABJ): NABJ is an organization of journalists, students, and media-related professionals that provides quality programs and services to and advocates on behalf of black journalists worldwide. Founded in 1975, NABJ is the largest organization of journalists of color in the nation. For more information: http://www.nabj.org/

Financial Assistance
The Philip Merrill College of Journalism offers a number of fellowships and scholarships, and there are additional opportunities at the College of Journalism and across campus for employment in graduate assistant positions.
Students admitted to the PhD program are typically offered assistantships within the College of Journalism. These currently include an annual stipend of approximately $18,494 (revised annually) and come with 24 credits of tuition remission (10 in the Fall, 4 in the Winter, 10 in the Spring) plus access to group health insurance. These assistantships require 20 hours of work per week for nine and a half months, typically in teaching or research.
Master's students interested in assistantships must apply to individual units across campus that have positions available. The number of hours per week and the stipend levels will vary by unit and by the nature of the position.
The College has several scholarships and fellowships to help master's students, PhD students, or both with the cost of study. These include the following awards: Graduate School Dean's Fellowships, John Story Cleghorn and Nona Reese Cleghorn Scholarship , Eleanor Merrill Graduate Fellowship, Lawrence L. and Lillie Z. Goldberg Scholarship, Mary Anne and Frank A. Kennedy Scholarship, the Maury Povich Sports Journalism Scholarship Fund, the Reese Cleghorn Journalism Excellence Scholarship, the Gridiron Foundation Journalism Scholarship, the Michael Gurevitch Journalism Scholarship, and the Professor Thomas J. Aylward Scholarship. Additional information is available at http://merrill.umd.edu/academics/masters-programs/fellowships-and-aid/
Travel funding for graduate students in the Journalism College is available via The Hiebert Journalism International Travel Award and the Gene Roberts Award.
This is in addition to a range of fellowships offered by the Graduate School: http://gradschool.umd.edu/funding/fellowship-information

Journalism (JOST)

Graduate Degree Program
College: Journalism

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	1 Feb
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	1 Feb

Other Deadlines: Please visit the program website at http://www.merrill.umd.edu

Degree Requirements
Doctor of Philosophy (Ph.D.)

Core Requirements
1. Doctoral students are required to complete a minimum of 40 credits. 2. A minimum of nine credits of research design and methods courses are required, including JOUR 775: Quantitative Methods in Journalism and Public Communication Research (3 credits); JOUR 776: Qualitative Research Methods in Journalism and Public Communication (3 credits). 3. A minimum of 18 credits in Journalism are required, including JOUR 601: Theories of Journalism and Public Communication (3 credits); JOUR 610: Seminar in Mass Media History (3 credits); JOUR 800: Introduction to Doctoral Study in Journalism and Public Communication (3 credits); JOUR 801: Advanced Public Communication Theory (3 credits). 4. A minimum of nine credits in cognate courses outside of Journalism are required. Students should consult with the Director of Graduate Studies before choosing these courses. 5. Students are required to complete JOUR 808: Doctoral Colloquium (1 credit) and JOUR 698L: Special Problems in Communication (3 credits) as well as nine credits in cognate courses, with the department's approval. In addition, students should complete six credits of journalism electives. 6. Students must complete a minimum of 12 research credits by enrolling in JOUR 899: Doctoral Dissertation Research.

The University of Maryland's Ph.D. in Journalism Studies is designed to prepare students for careers in university teaching, academic and industry research, and media consulting. The first two years of the program consist of coursework in theory, research methods, journalism, and an outside area of interest (such as Communications, Sociology, History, etc.). At the end of coursework, students take comprehensive examinations (in theory, cognate area, methodology, and in their areas of specialization). Students then conduct research and write the dissertation. Most successful candidates enter the program with a master's degree, but a master’s degree is not a prerequisite for admission.

Kinesiology (KNES)

Graduate Degree Program
College: Public Health

Abstract
A vital part of the School of Public Health, the Department of Kinesiology offers programs leading to the Master of Arts (thesis and non-thesis options) and Doctor of Philosophy degrees. Research emphases within the three broadly defined areas of exercise physiology, cognitive motor neuroscience, and physical cultural studies are offered. Within each of these cognate areas, students develop specialized programs with faculty guidance and consistent with faculty expertise. Details of faculty research interests and additional information can be found at the department website http://www.sph.umd.edu/KNES/

Admissions Information

General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Teaching Assistantship form

Students may qualify for admission with a 3.0 GPA for M.A. or 3.5 GPA for Ph.D. programs, strong GREs, and a focused letter detailing academic and research goals as well as previous research experiences. In addition, each applicant should submit a minimum of three strong recommendations from people knowledgeable about the applicant's prior academic achievements and research potential. Appropriate background course work closely aligned with the intended research specialization is expected. Graduate faculty sponsorship is also necessary for admission; each faculty member has only a limited number of openings and only the most highly qualified applicants are selected. Faculty review of applications does not occur until all required parts of the application are received. This review is done in early January; therefore applicants are encouraged to have all their application materials submitted by January 1 for best consideration for admission and financial support.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Other Deadlines: Please visit the program website at http://www.sph.umd.edu/knes

Degree Requirements

Master of Arts (M.A.)

Total Credits	Core Requirements	Specialization Options
Thesis option: 30 credits **Non-thesis option:** 30 credits	KNES 600: Kinesiology in Public Health (3 credits) KNES 601: Epidemiology of Physical Activity (3 credits) Research Skills and Methods course (3 credits) Research Tools/Processes course (3 credits) Professional Ethics course (1 credit) Specialization courses (6 credits)	**Thesis option:** KNES 799: Master's Thesis research (6 credits) Electives (3 credits) **Non-thesis option:** KNES 798: Internship in Physical Education/Sports Management (3 credits) Electives (6 credits)

	Outside Specialization course (3 credits)	

Completion of the master's degree with thesis requires a minimum of 24 semester hours and six thesis credits. The M.A. non-thesis option requires a minimum of 27 semester hours, a three-credit project based on an independent scholarly investigation, and a final comprehensive examination. Students in both options work under the direction of a graduate faculty advisor and must complete, as a minimum, six semester hours in a cognate area, six semester hours in research processes, and twelve semester hours in supporting courses either in or outside of the department. If internships are selected as part of the individual program, the total credits will exceed the minimum 30 credits.

Doctor of Philosophy (Ph.D.)

Core Requirements
The doctoral program in Kinesiology requires a minimum of 60 credits beyond the master's degree, including 12 credits of KNES 899: Doctoral Dissertation Research. **Required coursework (48 credits) includes:** KNES 600: Kinesiology in Public Health (3 credits) KNES 601: Epidemiology of Physical Activity (3 credits) Professional Ethics course (1 credit) Research Skills and Methods Courses Research Issues Courses

The doctoral program is designed to prepare outstanding scholars in a research domain in Kinesiology. To complete the program, a student must provide substantial evidence of his or her ability to frame and complete original research.
A Ph.D. student's program is tailored to meet his or her academic goals, but all students will produce and follow a research plan and complete a minimum of 90 credit hours relevant to Kinesiology (including dissertation) beyond the bachelor's degree. The program of study includes research experiences, as well as courses in the cognate area, other supportive courses outside of the department that broaden or deepen one's knowledge, and courses in research and analytic processes. Students also are expected to engage in the culture of Kinesiology through active participation in seminars and other departmental activities and to develop teaching expertise in the subdiscipline. All Ph.D. students are expected to complete a dissertation, which is the culminating research experience and contributes to knowledge in kinesiology.

Facilities and Special Resources
The Department has three areas of specialization: Cognitive Motor Neuroscience, Exercise Physiology, and Physical Cultural Studies. Laboratories are maintained, which support original investigations in each of the three areas. Laboratories include equipment for measuring metabolic parameters, strength, body composition, postural sway, ground reaction forces, amount of physical activity in daily life, as well as muscle biopsies and movement analysis. The response of the human body to physical activity/exercise can be viewed through ECG, EEG, EMG and systematic behavior observation systems. Each of the three research areas has interfaced computer hardware and software to support data collection and analysis. Collaborations with the School of Medicine at the Baltimore campus and with NIH often result in the availability of other facilities and equipment. All graduate students have access to computers and other forms of technology. Details and pictures of current facilities and equipment are available at our website: www.sph.umd.edu/KNES/.

Cognitive Motor Neuroscience Lab - Various tools provide students with opportunities to measure, postural sway, ground reaction forces, multi-digit pressing and moments in 3-D, and movement analysis. These tools include: (1) A three wall rear-projected monoscopic CAVE display system with three XGA digital projectors. The system is designed for standing humans to be immersed in a visual world to test questions about how the nervous system processes visual information to maintain upright stance. (2) A hydraulically-controlled moveable force platform for recording center of pressure and ground reaction forces inside the CAVE. (3) An Optotrak motion analysis system, capable of tracking up to 24 LEDs simultaneously for whole body analysis. (4) A touch plate consisting of a miniature force plate capable of resolving .01 N of force in three directions. (5) A Logitech 6D ultrasonic tracking system consisting of a control unit, two triangular receivers and one triangular transmitter. Each receiver provides three components of translation (x, y, z) and three components of rotation (yaw, pitch, roll) with a resolution of .006 cm. (6) A 16 channel EMG Neuraxon system for recording muscle activity. Because responses of the human body can be viewed through Electrocardiographic (ECG), Electroencephalic (EEG), and Electromyographic (EMG), we collaborate with the University of Maryland, School of Medicine at Baltimore and the National Institutes of Health. This results in the availability of other facilities and equipment whereby students may join forces on projects involving neuroimaging and virtual reality environments.

Exercise Physiology Lab The Exercise Physiology group has various laboratories capable of supporting a wide-range of exercise-related studies, including metabolic testing, Bod-Pod body composition, muscular strength and power testing, and various clinical blood-based assays. Moreover, the group collaborates with various nearby facilities for high-quality

measurement of body composition, including muscle size, bone density, and visceral adiposity. A 6,000 sq. ft. training facility is fully equipped with aerobic exercise training equipment and 20+ Keiser strength training machines for all major muscle groups. In addition to these general facilities, the group maintains other specialized laboratories. The Functional Genomics Lab studies the role of genetic variation in disease susceptibility and the responses and adaptations of different individuals to various exercise programs. The lab has state of the art equipment for genetic analysis, including extensive computer resources. The Molecular Biology Lab has extensive scientific resources for examining the effects of exercise and inactivity on muscle, adipose, and other cell types utilizing both in vivo and in vitro approaches. website: www.sph.umd.edu/KNES/.

Physical Cultural Studies (PCS) advances the critically and theoretically-driven analysis of physical culture, in all its myriad forms. These include sport, exercise, health, dance, and movement related practices, which PCS research locates and analyzes within the broader social, political, economic, and technological contexts in which they are situated. More specifically, PCS is dedicated to the contextually based understanding of the corporeal practices, discourses, and subjectivities through which active bodies become organized, represented, and experienced in relation to the operations of social power. PCS thus identifies the role played by physical culture in reproducing, and sometimes challenging, particular class, ethnic, gender, ability, generational, national, racial, and/or sexual norms and differences.

Financial Assistance
Teaching and research graduate assistantships are offered each academic year. At the present time, over two-thirds of the graduate students are financially supported. Teaching assistants work as discussion leaders and laboratory assistants as well as instructors in physical activity classes. Many research assistants are supported by grants. The department is active in seeking University fellowships for its outstanding applicants. Currently the department provides partial financial support for all graduate students who are selected to present their research at scholarly meetings.

Landscape Architecture (LARC)

Graduate Degree Program
College: Agriculture and Natural Resources

Abstract
The Master of Landscape Architecture (MLA) is a professional degree program that prepares students for work as academicians and practitioners. The three-year first professional degree curriculum is for students who have a bachelor's degree in a non-design field. The MLA is a degree that is accredited by the LAAB (Landscape Architecture Accreditation Board), which allows graduates to sit for the professional license exam (LARE). The two-year post-professional degree curriculum is for students who have a bachelor's degree in landscape architecture or a related design field. Through the required courses, concentration electives, and individual research, each student will acquire a thorough theoretical basis, grounding in methods and practices, and exposure to contemporary local and global issues. The required studio courses and the thesis or creative project, conducted with faculty and community partners, advances the knowledge base of landscape architecture through research and community outreach activities.
Our extensive hands-on training and real-world creative problem-solving approaches provide you the knowledge, skills, and abilities needed to excel and make a difference. The studio experience provides an opportunity to implement ecological design

solutions ranging from development, conservation, and restoration. From creating livable communities to solving environmental design problems, Landscape Architects are committed to helping shape the future while protecting the past.
The MLA program is interdisciplinary in its philosophy and its operation. Individual courses convey concepts and tools from diverse disciplines and studio, research, and outreach projects have a multi-discipline association. Project and research advisors come from faculty in Landscape Architecture, Plant Science, Environmental Science, Geography, Geology, American Studies, Architecture, Urban Studies and Planning, Historic Preservation, Real Estate Development, and other academic disciplines and professional partnerships.

Admissions Information

General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Supplementary Application
- Portfolio (Multimedia Requirements section of application)

Portfolio:
The portfolio is a compilation of graphic, written or scored work that you have created or observed and recorded. This collection should show your interest and aptitude for the visual language of design. Expertise in design is welcomed but not required. The portfolio should illustrate your interests in a variety of areas related to landscape architecture and environmental design. This portfolio should be uploaded digitally with your application. If you have any questions please email Sharde Davenport at sdav@umd.edu. **Portfolios are due no later than the application deadline. PLEASE NOTE: Transcripts and financial information should be sent to: University of Maryland ESO-Graduate Rm 0130 Mitchell Building College Park, MD 20742.**
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	27 July (Final) / 1 Feb (Preferred)	15 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Mar (Final) / 1 Feb (Preferred)	29 Sep

Other Deadlines: Please visit the program website at http://larch.umd.edu

Degree Requirements

Master of Landscape Architecture (M.L.A.)

Core Requirements
Three-Year First Professional Degree Curriculum (70 Credits + 6 credits @ 200-level, if required)
Students will be advised to take remedial Woody Plant Identification courses prior to arrival or in the first year of study at Maryland. The MLA Program requires these courses in order to meet accreditation standards. Requirements (contact department for detailed curriculum): Courses in Theory and History (12 Credits) Courses in Studio Design and Planning (25 Credits) Courses in Graphic Communication and Practice Technology (15 Credits) Courses in Ecology and Plant and Soil Sciences (3 Credits + 6 credits of remedial courses) Courses in Independent Study and Research, with Thesis or Creative Design project (15 Credits)
Two-Year Post-Professional Degree Curriculum (39 credits)

This curriculum is for those students with a Bachelor of Landscape Architecture or other approved environmental design degree. Requirements (please contact department for detailed curriculum):

Courses in Theory and History (9 Credits)
Courses in Studio Design and Planning (15 Credits)
Courses in Independent Study and Research, with Thesis or Creative Design project (15 Credits)

Facilities and Special Resources
The Master of Landscape Architecture program is accredited by the Landscape Architecture Accreditation Board (LAAB) of the American Society of Landscape Architects. The program maintains a balance between design theory and application in a professional degree curriculum. The MLA program builds upon the strengths of the Department of Plant Science and Landscape Architecture (PSLA) and the Landscape Architecture Program (LARC). The PSLA Department is composed of faculty members who specialize in landscape architecture, landscape history, ecology, plant science, urban forestry, turf and golf course management, and landscape management. It provides a strong, comprehensive grounding for landscape design, planning and preservation, landscape assessment, site and ecological systems analysis, plant identification, plant conservation, and plant pathology. Other environmental programs in the College of Agriculture and Natural Resources offer knowledge and practical insight into the science of ecology, ecological restoration, water and soil conservation, and forest management. The MLA builds on this collaboration through advanced courses, student advising, and the contribution of non-teaching programs such as lectures, symposia and research projects.

The Master of Landscape Architecture Program is located in the Plant Sciences Building on the College Park campus. Advanced individual computing facilities, personal drafting stations, scanning and printing facilities, and a model-making workshop are available 24 hours a day, 7 days a week, to every student in the MLA program.

Financial Assistance
A limited number of Graduate Assistantships are available to qualified students. These include Teaching, Research, and Administration Assistantships. Assistantships can be 9-month or 12-month appointments and include tuition remission (5 to 10 credits each semester, commensurate with GA appointment), an annual salary, health benefits, and in-state tuition, in exchange for 10 to 20 hours of work per week. Scholarships, fellowships, and other funding sources are available through a variety of external agents, such as the Landscape Architecture Foundation (LAF), the Garden Club of America (GCA), and others, including the following:

- Steven G. King Play Environments Scholarship: undergraduate or graduate students enrolled at LAAB-accredited schools. Award: $5,000.
- The Dangermond Fellowship: graduate students in the United States. Award: Up to three (3) $10,000 fellowships.
- Peridian International, Inc./Rae L. Price, FASLA Scholarship. Award: $5,000.
- The Douglas Dockery Thomas Fellowship in Garden History and Design: graduate student in the United States. Award: $4,000.

Library and Information Science (LBSC)

Graduate Degree Program
College: Information Studies

Abstract
The fully American Library Association (ALA) accredited Master of Library and Information Science (MLIS) program at the University of Maryland prepares graduates to be socially engaged and technologically focused information professionals, ready to create, educate, and innovate. The MLIS is a professional degree that provides students with a comprehensive foundation in both research and practice in library and information science. This foundation prepares students for careers with government agencies, archives, museums, libraries, startups, and any organization engaged in information activities.

At the iSchool we seek students who will serve as the next generation of leaders in information science and who will succeed in the dynamic and evolving global information society.

The MLIS program is designed for students from a wide variety of academic and career backgrounds, and is flexible enough to accommodate students working full or part-time. Students can complete their MLIS degree in-person, fully online, or through a hybrid approach.

Each student in the MLIS Program selects one of our unique specializations. Our specialization offerings are:

- Archives and Digital Curation
- Individualized Program Plan
- Diversity and Inclusion
- School Library
- Youth Experience

To request information about the MLIS program, please reach out to us at https://umdgrad.askadmissions.net/emtinterestpage.aspx?ip=umdinformationstudies or at mlisprogram@umd.edu.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Supplementary Application Essay
- Letters of Recommendation (3)
- CV/Resume

Admission decisions are based upon a thorough review of the applicant's academic record, 3 letters of recommendation, resume/CV, a statement of purpose and a 500 word application essay. Other factors, such as other graduate degrees and work experience, may be considered.

Please visit the Admissions page for complete information: http://ischool.umd.edu/mlis-admission

Degree Requirements
Master of Library and Information Science (M.L.I.S.)

Total Credits	Core Requirements	Specialization Options
Thesis option: 36 credits **Non-thesis option (Field Study):** 36 credits	LBSC 602: Serving Information Needs (3 credits) LBSC 631: Achieving Organizational Excellence (3 credits) LBSC 671: Creating Information Infrastructures (3 credits) LBSC 791: Designing Principled Inquiry (3 credits) **Thesis option:** INST 701: Introduction to Research Methods (3 credits) and LBSC 799: Master's Thesis Research (6 credits) **Non-thesis option:** LBSC 703: Field Study in Archives, Records and Information Management (3 credits) or LBSC 707: Field Study in Library Service (3 credits)	**1. Archives and Digital Curation** **2. Diversity and Inclusion** **3. Youth Experience** **4. Individualized Program Plan**

The MLIS degree requires 36 credit hours of academic work to be completed with a B minimum average within five calendar years from the first semester of registration. A full-time MLIS student usually completes the program in two years. The time limit for completion of all degree requirements is five years.

Students completing their MLIS courses in-person may take courses in the daytime and evening and may change from part-time to full-time and vice versa, as their circumstances permit. Most in-person MLIS courses are offered during the evening, but there are online sections offered on a rotating basis.

The History/Library Science (HILS) dual degree program requires 54 credit hours for the MLIS and MA in History. The time limit for completion of all degree requirements for this dual degree program is five years.
Each student works with an advisor to design a suitable course of study. All MLIS students must successfully complete the following 3 core courses in their first 18 credits:

- LBSC 602 - Serving Information Needs
- LBSC 631 - Achieving Organizational Excellence
- LBSC 671 - Creating Information Infrastructures

And after 18 credit hours:

- LBSC 791 Designing Principled Inquiry

In addition all non-thesis MLIS students are required to complete a required field study course. The section they take should correspond to their program of study:

- LBSC 703 Field Study in Archives
- LBSC 707 Field Study in Library Science
- LBSC 744 Field Study in School Library

The remaining courses are electives selected by the student and an academic advisor in the iSchool.

At least 24 credits of the 36 required credits must be courses taken in the College (LBSC, INST, or INFM). A student may take courses in other UMCP departments or through the Consortium at other area institutions (limit of six credits). Six credits may be transferred from another accredited graduate program. Up to 12 credits earned as an Advanced Special Student at UMCP may be applied to the degree. Information about policies and procedures governing degree requirements and courses taken outside the College is available from the College's Student Services Office and on the College's website at http://ischool.umd.edu/graduate-student-services.

Facilities and Special Resources
The College operates six research centers: the Human-Computer Interaction Lab (HCIL), the Information Policy and Access Center (iPAC), and the Center for Advanced Study of Communities and Information (CASCI), the Cloud Computing Center (CCC), the Trace Center, and the Digital Curation Innovation Center (DCIC). iSchool faculty and doctoral students also participate in or have affiliations with the University of Maryland Institute for Advanced Computer Studies (UMIACS), the Maryland Institute for Technology in the Humanities (MITH), and the Computational Linguistics and Information Processing Laboratory (CLIP), as well as the Departments of Computer Science, English, and Sociology, the Robert H. Smith School of Business, and the College of Education.

Faculty and students participate in cooperative research with staff of the University Libraries, the Human-Computer Interaction Laboratory, and other campus units. Students have access through cooperative arrangements and programs to the resources of Archives II, the National Agricultural Library, the Library of Congress, and other prominent research facilities.

Financial Assistance: For more information on financial aid, please visit the Financial Aid section of the College of Information Studies website.

Linguistics (LING)

Graduate Degree Program
College: Arts and Humanities

Abstract
Research on language has proven to be one of the most fruitful means to cast light on the nature of the human mind and general cognitive capacity and has taken on a new momentum in the last 30 years. The Maryland Linguistics program builds on these recent developments and trains students thoroughly in a research enterprise which tries to develop a detailed answer to these questions: How is a person's linguistic capacity represented in the mind, how does that representation reflect properties which are encoded genetically, how is language acquired by young children, how can language be encoded as a computational, psychological or neurological system, and how can linguistic knowledge be used to improve human language technology?
The Department of Linguistics at the University of Maryland has an internationally recognized Ph.D. program. The Department combines current theoretical research in phonology, morphology, syntax, semantics with state-of-the-art experimental research in psycholinguistics, first language acquisition, language processing, neurolinguistics, and computational linguistics. An interdisciplinary background enables students to evaluate proposals critically and make a lasting contribution to the field. Many students choose to split their major and minor areas between theoretical and experimental linguistics. Many students also choose to concurrently pursue the Certificate Program in Neuroscience and Cognitive Science. The department also hosts an NSF-supported interdisciplinary training program on "Biological and Computational Foundations of Language Diversity" (see web site for more information).

The Department encourages applications from students with an interest in the Department's areas of expertise. Students with a primary interest in Neurolinguistics and Cognitive Science may also want to consider applying to the Neuroscience and Cognitive Science (NACS) Ph.D. program. See the Cognitive Neuroscience of Language Laboratory for more details on alternative programs of study for psycholinguistics. Students seeking a Ph.D. in other areas of linguistics may want to consider a range of other strong programs at the University of Maryland. The PhD program in Second Language Acquisition, based in the School of Languages, Literatures and Cultures, has a strong cognitive science and research focus. Students with a focus on TESOL should consider the Curriculum and Instruction Program, based in the College of Education. Students with a clinical focus should also consider the Hearing and Speech Sciences Program. Students interested in human language technology should also consider the PhD programs in the iSchool (CLIS) or the Department of Computer Science.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- CV/Resume
- Supplementary Application
- Writing Sample: Up to 3 sample submissions, uploaded to the Upload Requirements section of the application.

All students must hold a Bachelors or Masters degree (or international equivalent) prior to starting the Ph.D. program. Although the student's previous degrees may be in a field other than linguistics, it is essential that a student have some previous experience in linguistics.
Applicants should check the University's admission requirements and the department's web site for the most up-to-date information on graduate applications. Electronic submission of application materials is strongly preferred. Applicants are encouraged to submit the initial on-line application form well before the application deadline, preferably by mid-December, since this form must be processed before an applicant is able to submit other electronic materials. Note that the January 5th target date applies to all applicants, domestic and international.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	4 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	4 Jan

Other Deadlines: Please visit the program website at http://www.ling.umd.edu

Degree Requirements
Master of Arts (M.A.)
Under exceptional circumstances, students are awarded an MA degree on completion of the core coursework requirements (six courses, see PhD requirements), four further classes, and writing either an MA thesis which is defended publicly (LING 799) or two comprehensive papers in different areas of language study (LING 798). Two of the post core-level class requirements should be taken in the Department of Linguistics, with the rest being taken either in Linguistics or in other departments satisfying a secondary area of specialization and complementing the student's work. **Note that the Department of Linguistics does not normally admit students whose objective is a terminal M.A. degree.** The M.A. degree primarily serves students who withdraw from the Ph.D. program.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 39 credits of coursework, in addition to 12 credits of LING 899: Doctoral Dissertation Research. **Requirements include:**

LING 800-level electives (9 credits)
Minor area courses (6 credits)
LING 895: Doctoral Research Paper (6 credits)
One of the following course sequences (6 credits):
Syntax - LING 610: Syntactic Theory (3 credits) and LING 611: Issues in Syntax (3 credits)
Phonology - LING 620: Phonological Theory (3 credits) and LING 621: Issues in Phonology (3 credits)
Semantics - LING 660: Introduction to Semantics (3 credits) and LING 661: Issues in Semantics (3 credits)
One additional sequence, and two additional courses from any unselected sequence :
Psycholinguistics - LING 640: Psycholinguistics (3 credits) and LING 641: Issues in Psycholinguistics (3 credits)
Computational Linguistics - LING 723: Computational Linguistics I (3 credits) and LING 773: Computational Linguistics II (3 credits)

Students pursuing the Ph.D. take at least 33 graduate-level credits of course-work, of which at least 9 credits are at the 800-level (seminars) and 6 credits correspond to the Minor area of specialization, possibly in another department. These minimum requirements are usually fulfilled by formal classes and not by independent studies, although the latter may be used to supplement a student's program of study. The student's first year is normally devoted to the 'core', foundational coursework in the department's three primary research areas: (i) theoretical linguistics (syntax, semantics, phonology), (ii) psycholinguistics/neurolinguistics/language acquisition, (iii) computational linguistics. Students must take at least 6 core courses, comprising at least two 2-semester core course sequences. At least one of these core course sequences must be in an area of theoretical linguistics. The core courses are the 600 level LING courses and LING 723, 773. The core sequences are:

1. LING 610, 611 Syntax
2. LING 620, 621 Phonology
3. LING 640, 641 Psycholinguistics
4. LING 723, 773 Computational Linguistics
5. LING 660, 661 Semantics

In addition to satisfying (part of) the 9 credit requirement for seminars, the next two years are devoted to satisfying 6 credits (beyond any core courses) in the Minor, as approved by the Graduate Director. Some students choose to pursue the Certificate in Neuroscience and Cognitive Science, which may count as the minor area.

By their fifth semester, students write a substantial paper (LING 895), under the supervision of a faculty member. This paper enables students to demonstrate a capacity for productive research and to make an original contribution to the literature, often forming the basis for the dissertation research. It is submitted to a three member examining committee, is defended publicly two weeks later, and must be approved by the committee after the defense. The student must then upload the completed 895 paper to the 895 folder in the department PDF locker, and inform the Graduate Director that this has been done.

In addition, by their seventh semester students must also write a paper in their Minor area of specialization (or some other area that is not their major area). The paper must be prepared under the supervision of a member of the faculty. Once the paper is completed to the satisfaction of the supervising faculty member, it must be uploaded to the 896 folder in the department PDF locker, and the Minor Area Paper approval form presented to the Graduate Director. [Under special circumstances, upon the written recommendation of the student's advisor and with the approval of the faculty of the department, a student may satisfy the Minor area paper requirement by instead taking a third course in the Minor area.]
LING 895 and the Minor area paper replace the 'comprehensive examinations' held in some departments.
To help ensure satisfactory progress towards the degree, students are required to submit to the Graduate Director a Ph.D. Roadmap once each semester, completed in consultation with their advisor.
After satisfactory completion of the 895 paper, students are admitted to candidacy and write a proposal for a dissertation, which a faculty member agrees to supervise. Students enroll in LING 899 while working on the dissertation, and must take at least 12 credits of this course. The dissertation must make a substantial and original contribution to knowledge. The supervisor, in consultation with other committee members (selected by the student and the supervisor), determines when there is a draft which will be defended publicly at an oral examination. The dissertation is approved by a five member examining committee. On completion of the approved dissertation, a hard copy will be submitted to the department, along with a 2nd hard copy or else an electronic version for the department web page.

Facilities and Special Resources
In addition to university and departmental library facilities, linguists at Maryland have ample office and meeting spaces. The department has outstanding resources for interdisciplinary research that bridges theoretical, experimental, and computational linguistics. The Cognitive Neuroscience of Language (CNL) Laboratory has the specific purpose of bridging the gap between theoretical/computational models of human language and the brain-level mechanisms that support language. The research in the

CNL Lab combines the study of linguistics, cognitive neuroscience, language acquisition and psycholinguistics, genetic disorders and computational modeling. The CNL Lab is housed in around 5000 sf. of labs and offices and includes the following:

1. Event-Related Potentials (ERP) Lab: 128-channel Neuroscan ERP facility for recording electrical signals originating in the brain by measuring electrical activity at the scalp.
2. Magnetoencephalography (MEG) Lab: a 160-channel whole-head MEG facility that is used for non-invasive measurements of the magnetic fields associated with neuronal activity in the brain.
3. Head-mounted Eye Tracking Lab: lightweight eye-tracker suitable for use with children and adults.
4. Fixed Eye Tracking Lab: eye-tracker suitable for on-line studies of reading.
5. Center for Young Children: state-of-the-art on-campus preschool for 3-6 year olds, with testing rooms suitable for study of language acquisition.
6. Infant Language Lab: for testing infants and young children.
7. Phonetic/Speech Analysis facilities: equipment for generation, recording, manipulation and analysis of speech sounds.

In addition to the facilities available at the CNL Lab itself, Maryland linguists have taken advantage of the many additional research opportunities in closely affiliated departments and institutions, in particular at the National Institutes of Health (NIH), located in nearby Bethesda, Maryland. These include fMRI brain imaging, PET brain imaging and TMS (transcranial magnetic stimulation) at NIH, and aphasia research in collaboration with NIH researchers.

Computational Linguistics
The department also runs two computational linguistics laboratories housing state-of-the art facilities funded by the NSF and DARPA. The Computational Linguistics and Information Processing (CLIP) laboratories contain state of the art computing facilities and data resources.

Financial Assistance
Initial offers of admission and financial aid are normally made in February-April. Further offers are sometimes made at a later date, if additional funds become available. In recent years, around 6-8 new students have started the Ph.D. program each year. Financial aid (tuition + stipend) is available on a competitive basis. The department aims to provide graduate students with financial aid (stipend + tuition) during their full course of study (5 years), provided that the student makes satisfactory academic progress. Graduate funding comes from a number of sources. The Department offers Graduate Assistantships (GAs) and Research Assistantships (RAs). GAs typically involve teaching service in undergraduate linguistics courses. RA positions typically involve research associated with a grant-supported faculty research project. Also available are Graduate Fellowships. The University offers a number of these to outstanding applicants, which release the student from GA or RA responsibilities for 1-2 years of study. Other sources of funding are occasionally available through the Department or University. Also, a number of students come to the Department with funding of their own from external fellowships.

Fellowships and GAs provide 12 and 10 credits of tuition remission respectively per semester. In additions to tuition remission, the Graduate Assistantship comes with Health benefits. The student is responsible for approximately $440.00 in mandatory student fees per semester.

The Department sets aside a portion of its operating budget to support travel by faculty and graduate students to present papers at conferences. Any member of the Department can request support for this purpose. Graduate students may also apply for university travel awards for this purpose.

Contact Statement
The Department's web site, Maryland Linguistics, contains a good deal of information on the program, but if you have further questions about Graduate Study in the Department, you should contact Dr. Jeffrey Lidz (jlidz@umd.edu). Alternatively, if you have a particular interest in the research of an individual faculty member, you may want to contact that person directly via email.

Literacy Coaching (Z038)

Graduate Certificate Program
College: Education

Abstract
The Department of Curriculum and Instruction's (EDCI) literacy coach post-baccalaureate graduate certificate program is designed to prepare experienced, highly qualified middle and high school teachers to serve as literacy coaches in low performing middle and high schools. Literacy coaches are skilled content area collaborators who function effectively in middle school and/or high school settings for secondary teachers in the core content areas of English language arts, mathematics, science, and social studies. They are skilled evaluators of literacy needs within various subject areas and are able to collaborate with secondary school leadership teams and teachers to interpret and use literacy assessment data to inform instruction. Finally, literacy coaches are accomplished middle and high school teachers who are skilled in developing and implementing instructional strategies to improve academic literacy in the four targeted content areas. The program courses focus on

1. reading, cognition, and instruction across content areas,
2. diagnostic reading assessment and instruction,
3. teaching ESOL reading and writing in secondary content areas,
4. assessing, diagnosing, and teaching writing across content areas,
5. TESOL, special education, and assistive technology, and
6. coaching and mentoring teachers.

In addition, literacy coach candidates participate in school district professional development workshops mapped onto the literacy coach coursework. The EDCI literacy coach program addresses the Standards for Middle and High School Literacy Coaches (International Reading Association, 2006). Upon successful completion of the literacy coach program, candidates receive a graduate literacy coach certificate from the University of Maryland.

Marine, Estuarine, and Environmental Sciences (MEES)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
The specific objective of the university-wide Graduate Program in Marine-Estuarine-Environmental Sciences (MEES) is the training of qualified graduate students, working toward the M.S. or Ph.D. degree, who have research interests in fields of study that involve interactions between biological, physical and chemical systems in the marine, estuarine, freshwater or terrestrial environments. The program comprises six areas of specialization: Ecology, Environmental Chemistry, Environmental Molecular Biology and Biotechnology, Environmental Science, Fisheries Science, and Oceanography. Students work with their Advisory Committee to develop a customized course of study based on research interests and previous experience.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume

- Supplementary Application
- Publications/Presentations

It is particularly important that a student articulate clearly, in the application, a statement of goals and objectives for future work in the field. Because of the interdisciplinary and interdepartmental nature of the program, only students for whom a specific advisor is identified in advance can be admitted. Prior communication with the faculty in your choice area of specialization is highly encouraged.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	13 Jan	1 Oct
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	13 Jan	29 Sep

Other Deadlines: Please visit the program website at http://www.mees.umd.edu
Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements	Specialization Options
Thesis only: 30 credits	MEES 608: Seminar in Marine-Estuarine-Environmental Sciences One approved statistics course One graduate course outside of the chosen specialization One course or seminar in Environmental Management MEES 799: Master's Thesis Research (6 credits)	Ecology Environmental Chemistry Environmental Molecular Technology/Biotechnology Environmental Science Fisheries Science Biological Oceanography Physical Oceanography

Course Work: A minimum of 30 credits with 24 credits of course work and 6 credits of graduate research. Of the 24 course credits, 12 of them must be at the 600 level or higher; including, a) one seminar course (MEES 608 or equivalent) must be taken for each year in residence (on average); b) one approved Statistics course (400 level or higher); c) one graduate course representing significant interdisciplinary breadth, outside the student's specialization; d) one course or seminar in management, ethics or philosophy of science.
Thesis Defense: An Oral Defense of the Thesis, administered according to Graduate School regulations, will take place at the completion of the research project. This defense will be conducted by the Advisory Committee and will be administered once all other degree requirements have been fulfilled.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 36 credits, with at least 24 credits of coursework and 12 credits of MEES 899: Doctoral Dissertation Research. At least 12 credits of coursework must be at the 600 level or above. Up to 16 credits of courses can be waived by petition if the student has completed a M.S. degree. **Requirements include:** MEES 608: Seminar in Marine-Estuarine-Environmental Sciences One approved statistics course One graduate course outside of the chosen specialization One course or seminar in Environmental Management

Course Work: The student must complete a minimum of 36 credits, with at least 24 credits of course work and 12 credits of dissertation research. Twelve credits of course work must be at the 600 level or above. Course work completed to fulfill a Master's degree can be applied against this requirement, up to a maximum of 16 credits. Required course work includes a) one seminar course (MEES 608 or equivalent) is required for each year in residence (on average); b) one approved Statistics course (600 level or higher); c) one graduate course representing significant interdisciplinary breadth, outside the student's specialization; d) one course or seminar in management, ethics or philosophy of science.

Examinations: Formal application for Advancement to Candidacy for the doctoral degree requires successful completion of both a Comprehensive Examination (written and oral components) and an oral Defense of the Dissertation Proposal. The Comprehensive Examination must be passed before the student can defend the Dissertation Proposal. An Oral Defense of the Dissertation will be conducted by the Advisory Committee and will be administered once all other degree requirements have been fulfilled.

Facilities and Special Resources
Students may conduct their research in the laboratories and facilities of the College Park (UMCP), Baltimore (UMB), Baltimore County (UMBC), or Eastern Shore (UMES) campuses, in one of the laboratories of the University's Center for Environmental Studies (UMCES): the Chesapeake Biological Laboratory (CBL) at Solomons, Maryland; the Horn Point Laboratory (HPL) near Cambridge, Maryland; and the Appalachian Laboratory (AL) in Frostburg, Maryland; or at the Institute of Marine and Environmental Technology (IMET) in Baltimore. CBL and HPL are located on the Chesapeake Bay. They include excellent facilities for the culture of marine and estuarine organisms. Berthed at CBL are the University's research vessels. At HPL there are extensive marshes, intertidal areas, oyster shoals, tidal creeks, and rock jetties. AL, located in the mountains of western Maryland, specializes in terrestrial and freshwater ecology. On the campuses and at IMET are specialized laboratory facilities for environmental research, including microbiology; biotechnology; water chemistry; cellular, molecular, and organismal biology; and specialized facilities for remote sensing of the environment. Extensive field sites for environmental research are available through the University's agricultural programs and through cooperation with many other organizations in the state.

Financial Assistance
University fellowships, research assistantships and traineeships, and teaching assistantships are available. In general, aid provides for full living and educational expenses. Some partial assistance may also be available. Research support from federal, state, and private sources often provides opportunities for additional student support through either research assistantships or part-time employment on research projects.

Marketing Analytics (BMMA)
Graduate Degree Program
College: Business

Abstract
The Robert H. Smith School of Business offers graduate programs leading to the degrees of Master of Business Administration (MBA), Master of Finance, Master of Science in Accounting (MS), Master of Science in Information Systems (MS), Master of Science in Marketing Analytics (MS), Master of Science in Supply Chain Management (MS), Executive MBA (EMBA), Online MBA, and Doctor of Philosophy (PhD). The school's MBA program is accredited nationally by the Association to Advance Collegiate Schools of Business (AACSB International). Only about 607 programs in the world are accredited by the AACSB, a reflection of the quality of the faculty, students, curriculum, and career management.
The Smith School of Business faculty has been recruited from the graduate programs of leading universities nationwide. They are dedicated scholars, teachers, and researchers with a strong commitment to academic excellence and the education of the professional manager and researcher. The Smith School of Business is dedicated to preparing graduates to lead organizations in an economy driven by technology, globalization, and rapid change. The Smith School curriculum integrates an in-depth education in core business functions -- accounting, entrepreneurship, finance, information technology, logistics, management, and marketing -- with cross-functional e-business areas -- electronic commerce, financial engineering, services marketing, and supply chain management.

Admissions Information
We strongly encourage you to visit the Robert H. Smith School of Business website at www.rhsmith.umd.edu. The Smith School website contains a wealth of information regarding all graduate business programs and their admissions processes.

Admissions requirements can be found here: https://www.rhsmith.umd.edu/programs/ms-marketing-analytics/admissions

MBA and MS Admissions Office: 301-405-2559
Executive MBA Admissions Office: 301-405-2386
Online MBA Admissions Information: 877-807-8741
PhD Admissions Office: 301-405-2214

Admission criteria for the MS program focusing in marketing analytics are based on: quality of undergraduate and graduate coursework; GMAT or GRE score, 1 letter of recommendation; professional experience; video submission; and written essay of objectives. Prospective applicants may contact the program at (301) 405-2559 for information regarding this MS program.

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements	
Non-thesis only: 30 credits required	BUMK 758B: Market-Based Management (3 credits)	BUMK 758D: Customer Analysis (3 credits)
	BUMK 758E: Statistical Programming (3 credits)	BUMK 758F: Business Ethics (1 credit)
	BUMK 758K: Advanced Marketing Analytics (3 credits)	BUMK 758G: Business Communications (2 credits)
	BUMK 758W: Database Science (3 credits)	BUMK 758L: Marketing Research and Analysis (3 credits)
	BUMK 758A: Market Forecasting (2 credits)	BUMK 758H: Business Ethics II (1 credit)
	BUMK 758N: Web Analytics (2 credits)	BUMK 758M: Retail Analytics (2 credits)
	BUMK 758Q: Action Learning Project (2 credits)	**30 credits total**

The MS in Marketing Analytics will give you the cutting-edge knowledge and skills you need to apply marketing analytics to daily business practice. The program will provide you with an in-depth understanding of the mathematical and statistical models and tools needed for customer analysis in the context of marketing problems.

Facilities and Special Resources: The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database, which matches a Smith MBA to the right industry position. The OCS also participates in regional and national career forums and job fairs, such as the National MBA Consortium, the National Black MBA Conference, the National Hispanic MBA Conference, the National Association of Women MBA's Conference, and the Career Services Council.

The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Financial Assistance: Financial aid is available to qualified full-time and Executive MBA students in the form of fellowships, graduate assistantships, and scholarships.

Materials Science and Engineering (ENMA)

Graduate Degree Program
College: Engineering

Abstract
Materials Science and Engineering is an interdisciplinary program. Students from engineering and science disciplines receive a solid foundation in the physics and chemistry of materials, thermodynamics and structure of materials, as well as the latest technological aspects of materials in today's manufacturing environment. Faculty research areas are mainly concentrated in the development of novel materials for today's electronics, energy, biomedical and high tech industries. These materials may be bulk or thin film format and range from ceramics, semiconductors, metals, polymer and biomaterials . Departmental faculty members are major participants in the University of Maryland Materials Research Science and Engineering Center, the Maryland NanoCenter and the University of Maryland Energy Research Center. For an overview of the Materials Science and Engineering Department, please visit Materials Science and Engineering at the University of Maryland.

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements	Specialization Options
Thesis option: 30 credits **Non-thesis option (scholarly paper):** 30 credits	ENMA 650: Nanometer Structure of Materials (3 credits) ENMA 660: Thermodynamics in Materials Science (3 credits) ENMA 661: Kinetics of Reactions in Materials (3) ENMA 671: Defects in Materials (3 credits) or ENMA 620: Polymer Physics (3 credits) ENMA 688: Seminar in Materials Science and Engineering (3 credits)	**Thesis option:** Students complete ENMA 799: Master's Thesis Research (6 credits) **Non-thesis option:** Students complete a scholarly paper.

The M.S. degree program offers thesis and non-thesis options. The thesis option requires 24 credit hours of course work plus a thesis. The non-thesis option requires 30 credit hours of course work and a scholarly research paper. All students must complete the Program Core requirements as well as all Graduate School requirements. The University of Maryland's Office of Advanced Engineering Education also offers a Professional Master of Engineering (M.E.) degree with a materials science and engineering option which requires 30 credits of graduate coursework and does not require a thesis.

Doctor of Philosophy (Ph.D.)

Core Requirements
1. Students are required to complete 45 credits of coursework beyond the Bachelor's degree.
2. All Ph.D. candidates must also meet the course requirements for the M.S. degree.
3. Students are required to complete 18 credits of ENMA 899: Doctoral Dissertation Research.

Students wishing to pursue a Ph.D. must complete 45 credits of core and specialized coursework and a dissertation based on original research. After the completion of the second semester of coursework, the student will take the Ph.D. qualifying examination. Advancement to candidacy occurs after the completion of the core courses with a minimum of 2 grades of A- or higher and 2 grades of B- or higher and successful completion of the qualifying examination.

Facilities and Special Resources
Special equipment includes scanning and transmission electron microscopes; X-ray diffraction devices; image analysis and mechanical testing facilities; crystal growing, thin film deposition and analysis equipment; HPLC, GC, IR and other sample preparation and analytical apparatus.
The Laboratory for Advanced Materials Processing (LAMP) in JM Patterson 2225 includes a class 1000 clean room for various kinds of thin film processing, particularly things difficult to acccomplish in the NanoCenter’s new FabLab clean room in the Kim Building. LAMP also features custom-designed ultraclean chemical vapor deposition (CVD) and atomic layer deposition (ALD) equipment as the basis for research in nano applications and manufacturing process prototyping, particularly with real-time chemical sensing for metrology and process control. A custom wafer-scanning electrical characterization facility enables resistance and capacitance mapping.

The Nano-Bio Systems Laboratory (NBSL) in JM Patterson 2229 adjoins LAMP and provides capability for biotech research, specifically in biomaterials processing and biomicrosystems development. It includes a Zeiss 310 laser confocal/fluorescence microscope, microfluidic chip testing for biomolecular reaction and cellular response experiments, biomaterials deposition, a Zyvex L200 nanomanipulator system for life science studies, and mass spectrometry and ICP optical emission equipment.
The W. M. Keck Laboratory for Combinatorial Nanosynthesis and Multiscale Characterization in 1141 Kim Building houses several thin film deposition chambers for rapid exploration of novel functional materials. The combinatorial approach allows simultaneous invstigation of large numbers of different samples. The combinatorial laser molecular beam epitaxy is used to perfrom atomic layer controlled combinatorial synthesis of functional materials. Atomically controlled growth of unitcells are monitored in-situ using electron diffraction.

The Advanced Imaging and Microscopy Laboratory (AIM), located in 1237 Jeong H. Kim Building, houses the most electron powerful microscopes within any university in the Washington, DC metro area. The facility has a Field-emission Transmission Electron Microscope (TEM) with 1.4 angstrom resolution and can generate chemical-composition maps of materials using Energy-Dispersive X-Ray Spectroscopy (EDS) or Electron Energy-Loss Spectroscopy (EELS). Also housed in the lab are a

thermionic TEM with 2.0 angstrom resolution (capable of in-situ electrical measurements and in-situ observations between -183 C and 1000C) and an electron microprobe with five Wavelength-Dispersion X-Ray Spectrometers (WDS).
Equipment available at other facilities include a Lakeshore vibrating scanning magnetometer and a scanning Auger spectrometer.

For additional information about the department's research facilities, please visit the following webpage: Materials Science and Engineering Research.

Financial Assistance: Financial assistance in the form of teaching and research assistantships and sponsored fellowships are available to qualified students. Requests for financial assistance will be considered for Fall admission only.

Materials Science and Engineering (PMMS)

Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Full admission as a degree seeking student requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in engineering, computer science, physics, applied mathematics, physical science, or a closely related discipline or a closely related discipline from an accredited institution
- Completion of calculus I, II, and II, thermodynamics, solid state physics, and kinetics
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: https://gradschool.umd.edu/admissions

Master of Engineering (M.Eng.)

Total Credits	Core Requirements
Non-thesis only: 30 credits required	ENMA 650: Nanometer Structure of Materials (3 credits) ENMA 660: Thermodynamics in Materials Science (3 credits) ENMA 661: Kinetics of Reactions in Materials (3 credits) Electives approved by advisor (21 credits)

Facilities and Special Resources
Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance: Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change**.

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Materials Science and Engineering (Z060)

Graduate Certificate Program
College: Engineering

Abstract
The Professional Master of Engineering program is a practice-oriented part-time graduate program designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Two (2) Letters of Recommendation are required for anyone with an undergraduate GPA below 3.0. Anyone with a GPA 3.0 or above should contact the Office of Advanced Engineering Education with a request to waive this requirement.

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. International applicants should consider applying for the online programs.
Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Full admission requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in engineering, computer science, physics, applied mathematics, physical science, or a closely related discipline or a closely related discipline from an accredited institution
- Completion of calculus I, II, and II, thermodynamics, solid state physics, and kinetics
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: https://gradschool.umd.edu/admissions

Maternal and Child Health (MCHS)

Graduate Degree Program
College: Public Health

Abstract
Maternal and Child Health is an interdisciplinary field in which empirical research, epidemiological data, and policy analyses are used to understand individual, family, community, and sociocultural factors that influence health behaviors, health outcomes, and use of health services by mothers, children, adolescents, and their families (including fathers). The MCH program prepares students to advance research, policy, and practice to improve the health, safety, and well-being of these groups, with a particular emphasis on low income and ethnic minority populations. The program equips students to address MCH issues at both the family and population levels. It is unique in its focus on the whole family system and family health policy.

Ph.D. graduates in MCH are prepared for academic and research positions in colleges and universities; high level administrative or research positions in city/county/state/national health and human service agencies; and leadership positions in nongovernmental and advocacy organizations. MCH graduates are also increasingly hired by private health care organizations such as hospitals, HMOs, and health insurers.

The Department of Family Science prepares students to describe, explain, and improve the quality of family life through applied research, education, therapy, human services, policy analysis, and advocacy. The approach is interdisciplinary, emphasizing individual, interpersonal, and social change. The program of study is based on a systems or ecological paradigm, combining the perspectives of interrelated professional fields of maternal and child health, family science, couple and family therapy, family policy, behavioral science, and human services. Graduates are prepared for careers in the public, non profit and private sectors, including university teaching, research, family policy analysis, and administrative positions in human service and public health programs.

Admissions Information
The Department seeks imaginative, intelligent, and highly motivated students with a desire for challenge, a commitment to excellence, and a well-developed sense of social responsibility. Applicants must have a Master's Degree in Public Health or a relevant behavioral or social science discipline. Students with Master's Degrees other than an MPH must complete missing courses (biostatistics, epidemiology) within one academic year of their entry into the program.
We are fortunate to attract gifted students who are concerned about public health, social and ethical issues and who view their future profession in a broad context.
Students are selected on the basis of:

- performance in previous undergraduate and/or graduate coursework
- the strength of GRE scores taken within the last five years
- letters of recommendation
- quality of empirical Master's Thesis (for those with a Master's degree)
- relevant work experience
- professional goals congruent with those of the program

Applicants to the MCH Ph.D. program should have an MPH degree or a social/behavioral science master's degree that focuses on family, maternal, and/or child health issues (including mental health). Students without the MPH degree must complete the required 5 public health core courses (biostatistics, epidemiology, environmental health, health services administration, and social and behavioral sciences) within one academic year of their entry into the program. Applicants should also have a minimum undergraduate GPA of 3.0 and a minimum graduate GPA of 3.0.
Important: Applicants to the Maternal and Child Health Ph.D. program are required to submit two applications for admission. First, they will submit an application to SOPHAS and second, they will submit a separate application to the University of Maryland.

Go to http://www.sophas.org/ to fill out an application to SOPHAS. An application to the SOPHAS system is $120, which will cover all public health programs to which a student chooses to apply. All applicants to the MCH program must submit the following supporting documentation:

- The SOPHAS application form
- Official transcripts from all academic institutions from which you earned credit
- Official GRE test scores, taken within the last 5 years (Institution Code: 0485)
- Three letters of recommendation
- Statement of Purpose and Objectives
- CV/Resume

Approximately one week after application to SOPHAS, applicants will receive an email from the University of Maryland College Park Graduate School with instructions for completing the second supplemental application. They will be directed to the application and a $75 non-refundable fee will be processed when it is submitted. Students submit the following information:

- Maryland Residency Information
- Emergency Contact Information
- Demographics

All information required for this application should be submitted on-line and will be sent directly by Graduate Admission to the Department of Family Science for review. No additional hard copies are required.
Standardized test scores (GREs) are to be sent directly from Educational Testing Service (if no category exists on ETS form, please fill in 'other' and write FMSC, code 5814). GREs must be taken in time to reach our department before the December 15th deadline. Allow 2 weeks to receive your scores.

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	15 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Dec

Other Deadlines: Please visit the program website at http://www.sph.umd.edu

Degree Requirements
Doctor of Philosophy (Ph.D.)

Core Requirements	
Doctoral students must complete 51 credits beyond the master's degree. Students must also complete a research internship, pass a qualifying exam, and complete a dissertation and oral defense.	
Required courses:	
FMSC 606: Ethnic Families and Health Disparities (3 credits)	FMSC 660: Program Planning and Evaluation in Family Science (3 credits)
FMSC 689: Research Internship (3 credits)	FMSC 710: Maternal and Child Health from a Life Course Perspective (3 credits)
FMSC 720: Study Design in Maternal Child Health Epidemiology (3 credits)	FMSC 730: Key Topics in Maternal and Child Health (3 credits)
FMSC 750: Family and Health Policy (3 credits)	FMSC 780: Qualitative Methods in Family and Health Research (3 credits)
FMSC 850: Maternal & Child Health Epidemiology (3 credits)	EPIB 650: Biostatistics I (3 credits)
EPIB 651: Biostatistics II (3 credits)	Electives approved by Graduate Director (6 credits)
FMSC 899: Doctoral Dissertation Research (12 credits)	**51 credits total**

The Maternal and Child Health Ph.D. program requires 51 graduate credit hours beyond the master's degree, including a maternal and child health core (24 credits), a research methods core (15 credits), and the dissertation (12 credits). Students in the PhD program advance to candidacy after completing required coursework and passing a written qualifying examination. After advancement to candidacy, students must complete a dissertation proposal and oral defense, followed by doctoral dissertation and oral dissertation defense.
This program provides interdisciplinary training in research, practice, and policy relevant to health problems and services for women, infants, children, adolescents, and their families (including men). The MCH program prepares students to advance research, policy and practice to improve the health, safety, and well-being of these groups, with a particular emphasis on low income and ethnic minority populations.
Students admitted full-time to the Ph.D. program post-master's can complete this program within three years.

Facilities and Special Resources
Center for Healthy Families: This Center is the training and research arm of the Couple and Family Therapy Program in the Department of Family Science. Departmental graduate students and faculty provide clinical and educational services to families from surrounding communities in this state-of-the-art facility. Master's and doctoral students use data collected at the Center for research projects.

The University's close proximity to the nation's capital, the state capital in Annapolis, federal executive departments, and headquarters of national professional and public interest associations provide research and internship placements for studying family policy unmatched by any other graduate program in the discipline. The Washington-Baltimore metropolitan area offers rich opportunities for research on culturally and socioeconomically diverse families. The campus and department have excellent computer facilities. Students have ready access to the University's extensive library systems, as well as holdings from the Library of Congress, the National Institutes of Health, National Library of Medicine, National Archives, and many other library collections.

Financial Assistance: Fellowships and Graduate Assistantships are available to students admitted into the MCH Ph.D program.

Mathematical Statistics (STAT)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
The Statistics Program offers the Master of Arts and Doctor of Philosophy degrees for graduate study and research in statistics and probability. Areas of faculty research activity include high dimensional data, statistical decision and estimation theory, biostatistics, stochastic modeling, robust and nonparametric inference, semiparametric inference, categorical data analysis, theory and inference for stochastic processes, stochastic analysis, time series and spatial statistics. Students may concentrate in applied or theoretical statistics by selecting an appropriate sequence of courses and a research area to form an individual plan of study. The Program has been designed with sufficient flexibility to accommodate the student's background and interests. The Program also offers students from other disciplines an opportunity to select a variety of statistics courses to supplement their own study.
The Program is administratively affiliated with the Department of Mathematics, which maintains the records of all students in the Mathematical Statistics Program and handles correspondence with those applying for admission. However, any application for admission must indicate clearly that the student wishes to enter the Statistics (STAT) Program.
Employment prospects for statisticians are very good. All recent M.A. and Ph.D. graduates of Maryland's Statistics Program have found jobs in academia, industry and government agencies.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students): TOEFL/IELTS required even if eligible for waiver.

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Supplementary Application
- Publications/Presentations
- Advanced Textbooks (section of application)
- GRE Subject (Math): GRE Math Subject required for funding and highly recommended for all others.

Spring admission does not offer financial support of any kind. Applicants should also contact department prior to application.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements

Master of Arts (M.A.)

Total Credits	Specialization Options
Thesis option: 30 credits **Non-thesis option (scholarly paper):** 30 credits	**Thesis option** requires 24 credits of coursework with at least 15 credits at the 600-700 level and at least 12 credits at the 600-700 level in statistics and probability. In addition, students must take six credits of STAT 799: Master's Thesis Research and pass a final oral examination. **Non-thesis option** requires 30 credits of coursework with at least 18 credits at the 600-700 level and at least 12 credits at the 600-700 level in statistics and probability. In addition, students must pass the Master's written examinations or the Ph.D. written examinations on the Master's level, write a scholarly paper, and pass a final oral examination.

The M.A. degree program offers both thesis and non-thesis options; applicants are encouraged to choose the latter. For the non-thesis option, a student must complete 30 credit hours with at least a B average; at least 18 of these credits must be at the graduate level (600/700 level) and at least 12 of the graduate credits must be in Statistics (STAT). The student must also pass at least two Mathematics Department written examinations in Probability, Mathematical Statistics and one more area, such as Applied Statistics or any field of mathematics. Students may complete the qualifying exam requirements either by taking a third exam or by achieving acceptable grades in a specific list of graduate STAT courses. In order to earn the M.A. degree with the non-thesis option, the student must pass two examinations by the end of his or her third year in the graduate program, and must pass complete the qualifying requirements at the M. A. level by the end of the fourth year. A student may take one or more examinations at a time. Most full-time students complete the qualifying requirements by the end of the second year or middle of the third year. The student must also submit a satisfactory short scholarly paper.

For the thesis option, a student must: (1) complete 24 credit hours with at least 15 at the 600/700 level (of these 15 hours, at least 12 hours must be in Statistics); (2) maintain an average grade of B or better; (3) take six hours of STAT 799 (Research) in addition to (1); (4) write a satisfactory thesis; and (5) pass a final oral examination. There is no foreign language requirement for M.A. students.

Applicants should keep in mind that no financial aid is offered to M.A. students.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 36 credits of coursework with at least 27 credits at the 600-700 level and at least 18 credits in statistics and probability. In addition, 12 credits of STAT 899: Doctoral Dissertation Research are required. Students are also required to pass the written examination in three fields at the Ph.D. level, including probability and one statistics area, pass a foreign language exam, and pass the final oral examination.

The M.A. degree is not required for admission to the Ph.D. program. A doctoral student must complete a minimum of 36 hours of formal courses (at least 27 at the 600/700 level) with an average of B or better; at least 18 of the graduate credits must be taken in Statistics. In addition, the university requires at least 12 hours of STAT 899 (Doctoral Research). The Ph.D. student must pass at least two written examinations in Probability, Mathematical Statistics, and a third exam in Applied Statistics or any field of mathematics. The qualifying requirements may be satisfied by passing three written exams or by satisfactory performance in a specified list of courses. These examinations are given by the Mathematics Department twice a year in January and August. A student may take one or more examinations at a time. The student must pass two examinations by the end of his or her third year in the graduate program, and must complete the qualifying requirments by the end of the fourth year. Most full-time students complete the qualifying requirements by the end of the second year or middle of the third year. If successful in the qualifying requirements, the student must pass an oral examination. Administered by the Statistics faculty, the oral examination usually takes place a year after the student passes the written examination. This examination serves as a test of the student's in-depth preparation in the area of specialization and the student's research potential. Successful completion of the oral exam indicates that the student is ready to begin writing the doctoral dissertation. In addition, the Department requires a reading competence in one foreign language for the Ph.D. The student may select one of three languages: French, German or Russian. Administered and graded by the Mathematics Department, the language examination consists of translating foreign mathematical

texts into competent English. To be admitted to candidacy, the Ph.D. student must pass the written examinations and the oral examination and the language examination must be completed before the candidate's final oral examination on the dissertation.

Facilities and Special Resources
The STAT Program cooperates closely with the Mathematics Department and the Applied Mathematics, Statistics and Scientific Computation (AMSC) Program. The Program's faculty are actively involved in research in applied and theoretical areas of statistics and maintain close ties with applied scientists in several federal agencies.
The Program sponsors weekly seminars in Statistics and in Probability. In addition, Research Interaction Teams (RIT's) cover topics of current statistical interest.

Computing is integrated into the applied courses, and the Program also offers a course "Computational Methods in Statistics" By scheduling many of its applied and Master's level courses in late-afternoon time slots, the Program facilitates and invites part-time graduate study.

Financial Assistance
Graduate assistantships are awarded to Ph. D. students in the Statistics Program through the Mathematics Department. At present, the teaching load is six hours each semester, in addition to the duties of meeting with students and grading papers. There are approximately 20 graduate students in statistics with financial support. These are mostly teaching assistantships, but there are also a few research assistantships and fellowships. From time to time advanced students are placed into research assistantships as data analysts or statistical consultants with other campus units. Applications for financial aid are only processed once a year, for admission for the fall semester.

Mathematics (MATH)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
Three programs are currently closely affiliated with the Mathematics Department: the Mathematics Program (MATH), the Applied Mathematics & Statistics, and Scientific Computation Program (AMSC), and the Mathematical Statistics Program (STAT). Students applying for admission should use the appropriate symbol to indicate their program of interest. The interdisciplinary Applied Mathematics & Statistics, and Scientific Computation Program offers three concentrations, one in applied mathematics, one in scientific computation, and one in applied statistics. The Statistics Program is concerned with mathematical statistics and probability. The AMSC and STAT programs are described in detail elsewhere in this catalog. Students can earn a Doctor of Philosophy degree in the Mathematics Program. Admission for a Master's of Arts degree only is rare and only considered on a case by case basis. The master's degree is not required for entrance to the Ph.D. program.
The Mathematics Program offers graduate programs in algebra and algebraic geometry, complex analysis, dynamical systems and chaos, geometry, harmonic analysis, mathematical logic, number theory, numerical analysis, ordinary differential equations, partial differential equations, probability, real and functional analysis, representation theory, statistics and topology.

Degree Requirements
Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis option: 30 credits **Non-thesis option (scholarly paper):** 30 credits	**Thesis option** requires 24 credits of coursework with at least 15 credits at the 600-700 level. Of those 15 credits, at least 12 credits must be at the 600-700 level in mathematics. In addition, students must take six credits of MATH 799: Master's Thesis Research and pass a final oral examination. **Non-thesis option** requires 30 credits of coursework with at least 18 credits at the 600-700 level. Of those 18 credits, at least 12 credits must be at the 600-700 level in mathematics. In addition, students must pass two written exams at the Master's level, complete the corresponding coursework, write a scholarly paper, and pass a final oral examination.

The M.A. degree program offers both a thesis and non-thesis option; most students choose the latter. The non-thesis option requires students to take 30 credit hours with an average of at least a B. At least 18 credits must be at the 600/700 level, including at least 12 hours in mathematics. Also, students must complete two full-year sequences at the 600/700 level, except that a suitable "Selected Topics" course may be substituted for the second part of one of these full-year courses. Additionally, students must pass Departmental written examinations in two different mathematical fields at the Master's level, and write a scholarly paper.

The thesis option requires a total of 24 hours of courses carrying graduate credit of which at least 15 are at the 600/700 level. Of these 15 hours at least 12 must be in mathematics. Of these 12 hours, at least 3 hours must be in each of two fields of mathematics distinct from the one in which the thesis is written, and must be passed with a grade of B or better. The student must also take 6 hours of thesis research, write a satisfactory thesis, and pass a final oral examination.
The M.A. degree includes no foreign language requirement. Generally it takes two to three years to earn the M.A., and approximately 20 degrees are granted each year in mathematics (MATH, STAT, and AMSC combined).

The department also has a 5-year program to earn a combined M.A./B.S. degree. The requirements for this program include the requirements for both the B.S. degree and the M.A. degree, with 9 hours of overlapping credits. Either the thesis or non-thesis option for the M.A. degree is available in this program.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 36 credits of coursework with at least 27 credits at the 600-700 level and at least 18 credits in the Department of Mathematics. In addition, 12 credits of MATH 899: Doctoral Dissertation Research are required. Students are also required to pass the written examination requirements, pass a foreign language exam, and pass the final oral examination.

The Ph.D. program does not require an M.A. degree, but applicants who are accepted should show, on the basis of their undergraduate record and recommendations, that they possess not only marked promise in mathematical activities but the potential to perform on a creative level. Like the M.A. program, admission may be granted on a provisional basis.
Students in the Ph.D. program must complete a minimum of 36 hours of formal coursework (at least 27 at the 600/700 level) with an average grade of B or better; at least 18 hours must be taken in the Department of Mathematics. In addition, the university requires at least 12 hours of MATH 899 (Doctoral Research). Ph.D. students must pass two qualifying exams, and in addition must take and pass four semesters of courses from a specific list with a grade of B or better, and an overall grade point average of at least 3.3 in these four courses (these courses constitute the third and final qualifying exam requirement). These four courses must be distinct from the ones supporting the qualifying exams. The purpose of the written qualifying exams is to indicate that the student has the basic knowledge and mathematical ability to begin advanced study. Passing the exams is thus supposed to certify understanding of (selected) first-year graduate material. These examinations are given twice a year, in January and August. A student may take one or more examinations at a time. The two qualifying exams and four additional courses, must be passed/completed by January of the student's third year in the graduate program. If successful in these written examinations and courses, students must do advanced reading and coursework in their special area of interest before they can be admitted to candidacy and begin dissertation research. The dissertation must represent an original contribution to mathematical knowledge and is usually published in a mathematical journal.

Generally Ph.D. students spend about six years before obtaining the degree. The combined programs of mathematics, applied mathematics and statistics award an average of 18 Ph.D.s each year. The Ph.D. program has a foreign language requirement. Before a student can schedule the Final Oral Examination, he or she must pass a written examination in either French, German or Russian. The language examinations are composed and graded within the Department and involve translating a passage from a mathematical text into competent English.

Facilities and Special Resources
The Department is actively involved in research in a number of areas, strengthened further by a complement of mathematicians from the Institute for Physical Science and Technology. The Department fosters a lively program of seminars and colloquia; about half of these talks are given by outside specialists. In addition the department has a tradition of hosting distinguished long term visitors who give series of seminar talks or teach semester long courses.

The Engineering and Physical Sciences Library is located on the ground floor of the Mathematics Building and contains more than 95,000 volumes in mathematics, physics and engineering, and more than 280 journals in pure and applied mathematics. The Library of Congress, with its extensive collection of books and technical reports, is only a half hour from campus.
The Department has a large network of computers mostly running Linux. The Department houses a computer classroom and a Mathematical Visualization Lab, and similar labs are scattered across campus. There are computers in almost all graduate student offices, and many of the other computers on campus are available for student use.

The Department cooperates closely with the Institute for Physical Science and Technology and with the Department of Computer Science. Faculty members of both groups offer courses in the Department. Computer facilities are available to serve the research needs of both faculty and graduate students. Members of the Department participate actively in the interdisciplinary AMSC Program, and they also staff the Mathematical Statistics Program.

Financial Assistance
The MATH program is expecting to support about 12 new doctoral students each Fall. Offers of support are generally made for up to five years, contingent on the student making satisfactory academic progress. Except for unusual circumstances, offers of financial aid will not be made to applicants seeking a Master’s degree. The normal teaching load is four to six hours per week of classroom teaching in addition to the duties of meeting with students and grading papers. Sometimes fellowships and research assistantships are also available.

Mathematics of Advanced Industrial Technology (MAIT)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
The Norbert Wiener Center, a research and educational unit in the Department of Mathematics at the University of Maryland, College Park, offers a professional Masters degree focusing on the modern mathematical methods and algorithms that underlie today's cutting-edge engineering: The Mathematics of Advanced Industrial Technology (MAIT).

Our program is designed for individuals working in mathematical engineering who are looking for a fast track to understanding and applying the most up-to-date ideas in their current and future projects. Undergraduate degree holders can advance to the Masters level, and Masters degree holders can advance their applicable skills.

In addition to the professional Masters degree, we also offer two certificate programs. For students wishing to enhance their career skills in specific subject matter, the Center also offers a Graduate Certificate in Mathematics of Advanced Industrial Technology to students completing 4 courses (12 credits) within the program. The Norbert Wiener Center also offers a specific Graduate Certificate concentration in Computational Harmonic Analysis. This 12-credit program is tailored to working engineers and scientists wishing to advance their understanding of the latest Fourier, Wavelet, and Time-Frequency Harmonic Analysis methods and algorithms.

Fields including RF and Optical Communications, Signal and Image Processing, Sensor Networks, RADAR and SONAR, Navigations and Avionics, Medical Imaging and Diagnostics, Control Systems, and Robotics, increasingly rely on fast, embedded mathematical algorithms executing on the latest microprocessors, micro-controllers, and DSP cores. Budding fields such as Bioinformatics, Nanotechnology, Data Mining, and Quantum Computing are likewise being built from the ground up around modern mathematical methods. Engineers and scientists that understand advanced mathematical toolsets will have the edge in creating tomorrow's technologies.

The Norbert Wiener Center's educational mission is to teach the mathematics of modern engineering in an accessible and applicable manner. Our faculty is drawn from both academia and industry in order to balance theoretical and "hands on" approaches in the most constructive way. Our courses offer the latest information while tying modern theory directly to application by incorporating industry standard tools. Graduates of the Norbert Wiener Center will be well equipped to apply the latest mathematical tools to advance both their projects and their careers.

The most up-to-date information about the MAIT program can be found on our website at www.mait.umd.edu

Admissions Information
THIS PROGRAM IS NOT ACCEPTING NEW STUDENTS AT THIS TIME.
Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	program not currently accepting applications	program not currently accepting applications
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	program not currently accepting applications	program not currently accepting applications

Other Deadlines: Please visit the program website at http://www.norbertwiener.umd.edu

Degree Requirements
Master of Mathematics of Advanced Industrial Technology (M.M.A.I.T.)
The Master of Mathematics of Advanced Industrial Technology (MAIT) degree requires 10 classes (30 credits) to be completed with a GPA of 3.0 or higher. Coursework must include 3 core subjects (MAIT 613 Advanced Applied Linear Algebra, MAIT 623 Modern Mathematical Methods of Signal and Image Processing I, and MAIT 633 Applied Fourier Analysis), as well as electives chosen from a host of options. Coursework also must include a one or two-semester practical project course under the guidance of a faculty member. The project course may be employer-work related. The student's faculty advisor must approve program coursework.

Facilities and Special Resources
Courses for the MAIT program will be taught in the evening at the College Park Campus and also at sites in northern Virginia. The MAIT program is administered by the Norbert Wiener Center for Harmonic Analysis and Applications which is located within the Mathematics department on the second floor of the Mathematics building on Campus Drive in College Park

Measurement, Statistics & Evaluation (Z019)

Graduate Certificate Program
College: Education

Abstract
The **Certificate in Measurement, Statistics and Evaluation** is a 21-credit certificate designed to provide advanced training in quantitative methods for doctoral students majoring in other programs.
NOTE: To enroll in this Certificate program you must currently be a doctoral student in a University of Maryland program other than EDMS

Admissions Information

Measurement, Statistics and Evaluation (EDMS)

Graduate Degree Program
College: Education

Abstract
Measurement, Statistics and Evaluation offers graduate study leading to the Master of Arts or Doctor of Philosophy degrees for students with strong interests in research methods and their applications. Students pursuing Doctoral degrees in other programs may enroll in a dual degree program leading to the Master's degree in Measurement, Statistics and Evaluation, or there is also a

21-credit certificate program for doctoral students. For select undergraduates, there is a five-year Bachelor's/Master's program in Measurement, Statistics and Evaluation. Please note that for those PhD applicants who are hoping to receive a funding offer, you should adhere to the PREFERRED DEADLINES on the program website and not the deadlines listed below.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)

In addition to Graduate School requirements, admission decisions are based on the quality of previous undergraduate and graduate work, strength of letters of recommendation from persons competent to judge the applicant's likelihood of success in graduate school, scores on the Graduate Record Examination, and the applicant's statement of academic and career objectives in relation to the program of study to be pursued. Students who seek admission should display strong evidence of aptitude and interest in quantitative methods. Programs of study may be designed to meet the individual needs of both full-time and part-time students since many courses are offered in the late afternoon or evening.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	1 Mar (Final) / 1 Dec (Preferred)	29 Sep (Final) / 30 Aug (Preferred)
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	1 Feb (Final) / 15 Nov (Preferred)	29 Sep (Final) / 30 Aug (Preferred)

Other Deadlines: Please visit the program website at http://www.education.umd.edu/Academics/Departments/HDQM/academic/degreePrograms/mseval.html

Degree Requirements
Certificate of Advanced Study (C.A.S.)
The Certificate in Measurement, Statistics and Evaluation is designed to provide advanced training in quantitative methods for graduate students majoring in other doctoral programs. The certificate requires a minimum of 21 graduate credit hours. In addition, an advisor must be selected from members of the Measurement, Statistics and Evaluation faculty.

Master of Education (M.Ed.)
The M.Ed. option is not currently offered.

Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis or Non-thesis option: 30 credits required	**Core courses:** EDMS 623: Applied Measurement: Issues and Practices (3 credits) EDMS 646: General Linear Models I (3 credits) EDMS 647: Causal Inference and Evaluation Methods (3 credits) EDMS 651: General Linear Models II (3 credits) EDMS 655: Introduction to Multilevel Modeling (3 credits) EDMS 657: Exploratory Latent and Composite Variable Methods (3 credits) EDMS 724: Modern Measurement Theory (3 credits) **Thesis option:** EDMS 799: Master's Thesis Research (6 credits) Elective (3 credits) **Non-thesis option:**

Electives (9 credits)

The Measurement, Statistics and Evaluation M.A. degree program requires a minimum of 30 credit hours. Both thesis and non-thesis options are available. A written comprehensive examination is required for both options and a research paper is required for the non-thesis option.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 66 credits including 12 credits of EDMS 899: Doctoral Dissertation Research and 21 credits of electives. **Required courses:** EDMS 623: Applied Measurement: Issues and Practices (3 credits) EDMS 626: Instrumentation (3 credits) EDMS 646: General Linear Models I (3 credits) EDMS 647: Causal Inference and Evaluation Methods (3 credits) EDMS 651: General Linear Models II (3 credits) EDMS 655: Introduction to Multilevel Modeling (3 credits) EDMS 657: Exploratory Latent and Composite Variable Methods (3 credits) EDMS 722: Structural Modeling (3 credits) EDMS 724: Modern Measurement Theory (3 credits) EDMS 779: Seminar in Applied Statistics (3 credits) EDMS 787: Bayesian Inference and Analysis (3 credits)

The Ph.D. program requires both preliminary and comprehensive examinations; the comprehensive examination is designed to assess broad, integrated understanding as well as the student's specialization. All students are expected to engage in research. Measurement, Statistics and Evaluation does not currently offer the Ed.D. degree.

Facilities and Special Resources
The Department maintains computer equipment and high performance server with up-to-date statistical software packages. The faculty are actively engaged in a large variety of basic and applied research projects and students are encouraged to become involved in these activities. The Washington and Baltimore areas have numerous organizations that provide opportunities to become involved in projects that have national importance.

Financial Assistance
Graduate teaching assistantships, research assistantships, and fellowships are available. The Department can usually aid students in locating part-time employment opportunities, both on and off campus, as well as providing funding from its own contracts and grants.

jgraham7@umd.edu

Courses: EDMS
Keywords: Doctoral students may emphasize areas such as Applied Statistics, Psychometrics, or Program Evaluation. Graduates teach at the university/college level, do original methodological research and serve as specialists in school systems, industry or government. The Master's program provides students with the data management, analysis, assessment and computer skills to serve as research associates.

Mechanical Engineering (ENME)

Graduate Degree Program
College: Engineering

Abstract
The Department of Mechanical Engineering offers graduate study leading to the Master of Science and Doctor of Philosophy degrees. In addition, students may pursue a Master of Engineering degree through the Professional Master's Program of the Office of Advanced Engineering Education. The Department's instruction and research are carried out through the following four divisions: i) Design and Reliability of Systems; ii) Electronic Products and Systems; iii) Mechanics and Materials; and iv) Thermal, Fluids and Energy Sciences.

Design and Reliability of Systems (Formerly known as Design, Risk Assessment and Manufacturing) - The focus of this area of concentration is the study of: Product and process design and decision making; Manufacturing system modeling and automation; Manufacturing process modeling and control; Reliability and failure modes associated with specific semiconductor devices; Manufacturing technology designed specifically to meet high standards for yield and quality; Reliability test methods for various electronic or mechanical devices; Test screening of parts or systems to eliminate latent defects; Reliability and safety assessment tools for complex aerospace, nuclear, or chemical process systems.

Electronic Products and Systems - This area of concentration addresses the fundamental methods to attain more cost-effective and reliable electronic packaging. Areas of specialization include: Electronic packaging; Materials characterization; Acceleration testing; Condition monitoring; Computer aided life cycle engineering (CALCE).

Mechanics and Materials - This division concentrates on the study of analytical and experimental fundamentals of mechanics and materials. Areas of specialization include: Computational modeling; Control systems; Design, characterization, and manufacturing of materials; Elasticity; Experimental mechanics; Fracture mechanics; Linear and nonlinear mechanics; Micro-nano-bio systems; Noise and vibration control; Nonlinear dynamics; Robotics and intelligent machines; Smart structures.

Thermal, Fluids and Energy Sciences - This division encompasses two broad disciplines: thermal science and fluid mechanics. Areas of specialization include: Heat transfer; Combustion; Energy systems analysis; Hydrodynamics; Turbulence; Computational fluid dynamics (CFD).

Reliability and Risk Engineering - This program covers aspects of engineering related to reliability and risk assessment. The primary areas of specialization include: Microelectronic reliability; Reliability analysis; Risk analysis; Software reliability.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Publications/Presentations

The programs leading to the M.S. and Ph.D. degrees are open to qualified students holding a bachelor's degree in mechanical engineering. Admission may also be granted to students with degrees from other areas of engineering, mathematics, and physical sciences. In some cases, students may be required to take undergraduate courses to fill gaps in their background.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Domestic Applicants: US Citizens and Permanent Residents	15 May	15 Dec
International Applicants: F (student) or J (exchange visitor) visas	15 Mar	29 Sep

Type of Applicant	Fall	Spring
A,E,G,H,I and L visas and immigrants.		

Other Deadlines: Please visit the program website at http://www.enme.umd.edu

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements	Specialization Options
Thesis only: 30 credits	M.S. students are required to complete 24 credits of approved coursework with at least 15 credits from courses taken at the 600 level or above. In addition, students must complete six credits of ENME 799: Master's Thesis Research.	1. Design and Reliability of Systems 2. Electronic Products and Systems 3. Thermal-Fluid Sciences 4. Mechanics and Materials

Students enrolled in the M.S. program in Mechanical Engineering must complete at least 30 credits for graduation. This includes 24 credits of approved coursework and 6 credits of M.S. Thesis Research. The M.S. Coursework Plan sets forth the courses required to be taken by the student in partial fulfillment of the M.S. degree requirements. The coursework plan must be prepared in consultation with a faculty advisor in the student's technical area of interest, and submitted to the Graduate Office (2180 Glenn L. Martin Hall) for approval by the Director of Graduate Studies at the beginning of the first semester of study. Changes to the plan are permitted, but must be approved by the student's advisor and the Director of Graduate Studies prior to their implementation. A new coursework plan reflecting the changes must be filed with the ME Graduate Office every time changes are made.

Doctor of Philosophy (Ph.D.)

Core Requirements
1. Minimum of 36 credits of coursework is required beyond the Bachelor's degree, in addition to 12 credits of ENME 899: Doctoral Dissertation Research. 2. The coursework plan should contain a minimum of six credits of courses in mathematics. 3. In addition, students must pass a qualifying examination, propose and have approved a Ph.D. dissertation topic (within two semesters of passing the qualifying exam), and successfully produce and defend a Ph.D. dissertation on an original research topic.

Students in the Ph.D. program must take a minimum of 36 credits of approved graduate coursework beyond the B.S. degree (a minimum of 12 credits of coursework at the University of Maryland) and 12 credits of dissertation research. Students currently holding an M.S. from an approved engineering, math, or science program may apply up to 24 credits from their previous degree towards their doctoral coursework requirement. In addition, students must pass a qualifying examination, propose and have approved a Ph.D. dissertation topic (within two semesters of passing the qualifying exam), and successfully produce and defend a Ph.D. dissertation on an original research topic.
(See http://www.enre.umd.edu/grad/phd-req.html for details)

Facilities and Special Resources: The department and college of engineering provide access to a wide variety of experimental and computing facilities. Selected department computer resources include approximately 100 networked PC systems and 100 UNIX workstations. In addition, an enriched CAD computing environment is provided through a large number of third-party software products, including computer aided design applications.

Financial Assistance: Financial assistance is available to highly qualified students in the form of research and teaching assistantships. The most outstanding applicants are offered fellowships. Students seeking financial assistance should submit with their applications a current resume or CV as well as a statement regarding their qualifications and/or past research or teaching experience. Financial assistance is sought for all worthy students. For example, the following fellowships are available for incoming Ph.D students; Dean’s Fellowships (supplements Teaching Assistantships and Research Assistantships (managed by the A. James Clark School of Engineering); University Fellowships administered by the Graduate School (supplements Teaching

Assistantships and Research Assistantships); and LSAMP Bridge to the Doctorate Fellowship. Current graduate students may also apply to the Clark School's Future Faculty Fellows Program; Dissertation Fellowship from the Graduate School; Litton Fellowship (ME & ECE); and other internally awarded and administered fellowships and scholarships. Assistance is also available in identifying and applying for prestigious external fellowships. ARCS Fellowship.

Mechanical Engineering (PMME)

Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.

Full admission as a degree seeking student requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in civil and environmental, mechanical, chemical and biomolecular engineering from an accredited institution
- Completion of calculus I, II, and II, differential equations, thermodynamics, fluid mechanics, and heat transfer. Specialization in general mechanical engineering also requires courses in strength of materials and structural mechanics.
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Non-thesis only: 30 credits required	Students choose one of the two focus areas and take five core courses and five electives from that area. Electives must be approved by their advisor. **General Mechanical core course options:** ENME 600: Engineering Design Methods (3 credits) ENME 605: Advanced Systems Control (3 credits) ENME 607: Engineering Decision Making and Risk Management (3 credits) **or** ENRE 671: Risk Assessment in Engineering (3 credits) ENME 610: Engineering Optimization (3 credits) ENME 631: Advanced Conduction and Radiation Heat Transfer (3 credits) ENME 632: Advanced Convection Heat Transfer (3 credits) ENME 640: Fundamentals of Fluid Mechanics (3 credits) ENME 662: Linear Vibrations (3 credits) ENPM 652: Applied Finite Element Methods (3 credits) ENPM 671: Advanced Mechanics of Materials (3 credits) ENME 690: Mechanical Fundamentals of Electronic Systems (3) ENME 712: Measurement, Instrumentation and Data Analysis for Thermo-Fluid Processes (3 credits) **Energy and The Environment core course options:** ENME 647: Multiphase Flow and Heat Transfer (3 credits) ENPM 621: Heat Pump and Refrigeration Systems Design Analysis (3 credits) ENPM 622: Energy Conversion I - Stationary Power (3 credits) ENPM 623: Control of Combustion Generated Air Pollution (3 credits)

	ENPM 624: Renewable Energy Applications (3 credits) ENPM 625: Heating, Ventilation and Air Conditioning of Buildings (3 credits) ENPM 626: Waste to Energy Conversion (3 credits) ENPM 627: Environmental Risk Analysis (3 credits) ENPM 635: Thermal Systems Design Analysis (3 credits) ENPM 651: Heat Transfer for Modern Application (3 credits) ENPM 654: Energy Systems Management (3 credits) ENPM 656: Energy Conversion II -- Mobile Power (3 credits)

Facilities and Special Resources
Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance
Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Multimedia Journalism (Z071)

Graduate Certificate Program
College: Journalism

Abstract
The Graduate Certificate of Professional Studies in Multimedia Journalism teaches the skills most in demand today for communication professionals in news organizations, nonprofits, and business. Multimedia Journalism blends practical training in video, audio, photography, blogging, and interactive Web publishing with the critical application of editorial, ethical and legal principles in digital media contexts.

Multimedia Journalism is designed for professional journalists and communicators to learn the skills and concepts needed for digital storytelling across media platforms, particularly the Internet and mobile devices. The program offers updated skills to professionals in a field where technology and software are changing so rapidly that it is hard for anyone to stay current. Topics include Multimedia Journalism, Online Journalism, Mobile Journalism, and New Media Entrepreneurship.
Multimedia Journalism is a 12-credit graduate certificate that targets working professionals. Classes meet in the fall and spring semesters and are timed to meet professional work schedules. Completion of all four courses provides media professionals with a thorough understanding of digital communication and entrepreneurship, including the fundamentals of Web publishing, social networking and online community building.

Music (MUSC)

Graduate Degree Program
College: Arts and Humanities

Abstract
The School of Music offers programs of study leading to the Master of Arts degree with areas of specialization in ethnomusicology, music history and literature (musicology), music education, and music theory; the Master of Music degree with areas in performance, composition, conducting, and music education; the Doctor of Philosophy degree with areas of specialization in ethnomusicology, musicology, music education, and music theory; and the Doctor of Musical Arts degree with areas of specialization in composition, performance, and conducting.

Admissions Information
General Requirements:

- Statement of Purpose: The statement of purpose and three letters of recommendation will be required to be uploaded in the Supplementary Application (Acceptd), not the Graduate School's application.
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation: The statement of purpose and three letters of recommendation will be required to be uploaded in the Supplementary Application (Acceptd), not the Graduate School's application.
- Supplementary Application

Admission to the graduate degree programs in music is highly selective. It is determined primarily by a performance audition, tapes and scores of original compositions, scholarly research papers, letters of recommendation, and/or successful teaching experience; additionally, in some academic areas, the general GRE scores are considered. All non-native English-speaking students must achieve a score of 575/233/100 on the TOEFL to be invited for audition/admission (see the School of Music's admission website for detailed English language requirements).

We require a passing TOEFL score (minimum 100 IBT, 233 CBT, 575 PBT) for all applicants whose primary language is not English before we will process your application or consider you for a live audition. The requirement will be waived for applicants who have earned an undergraduate degree from an institution in the United States or another approved English-speaking country. Waivers will only be granted if at least three years of the undergraduate education took place at an English-speaking institution. Graduate degrees or performance certificates or diplomas will not exempt an applicant from submitting a passing TOEFL score. Please go here for more specific information.

The School of Music will allow all graduate applicants whose overall TOEFL score is 90 or higher to audition, but in order to be considered for admission a fully passing TOEFL score must be submitted no later than February 15. Auditions will not be scheduled for applicants with an overall TOEFL score lower than 90.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Degree Requirements
Master of Music (M.Mus.)

Core Requirements
M.M. in Composition (minimum of 30 credits beyond the Bachelor's degree)
Major Studies in Music (10 credits minimum) Studies in Areas Supporting the Major (15 credits minimum) Other Courses in Music (6 credits minimum) Scholarly paper required
M.M. in Conducting (minimum of 30 credits beyond the Bachelor's degree)
Choral Conducting specialization: Major Studies in Music (10 credits minimum) Studies in Areas Supporting the Major (15 credits minimum) Academic Courses in Music (9 credits minimum) including MUSC 648: Seminar in Music Research (3 credits) Scholarly paper required **Instrumental Conducting specialization:** Major Studies in Music (10 credits minimum) Studies in Areas Supporting the Major (13-14 credits minimum) Advanced Courses in Music (9 credits minimum) including MUSC 648: Seminar in Music Research (3 credits)

Scholarly paper required
M.M. in Performance (minimum of 30 credits beyond the Bachelor's degree)
Major Studies in Music (10 credits minimum) Studies in Areas Supporting the Major (credits vary per specialization) Academic Courses in Music (9 credits minimum) including MUSC 648: Seminar in Music Research (3 credits) Scholarly paper required **Specialization options include:** Jazz, Piano Solo, Collaborative Piano, Strings, Voice*, Opera*, Winds and Percussion *Students in the Voice specialization are required to complete one year of college level German, one year of either French or Italian, and a piano proficiency exam. *Students in the Opera specialization are required to complete one year of college level Italian, one year of either French or German, and a piano proficiency exam.

The Master of Music Degree (Non-Thesis Option in Composition, Conducting, Music Education, or Performance) requires a minimum of between 31 and 36 credit hours depending on the specific program. Required coursework is distributed among three areas of study: Major studies, Studies in Areas Supporting the Major, and Other Studies in Music. In addition, a grade of B- or better is required in all courses used to fulfill requirements for the degree; a scholarly research paper must be written as part of MUSC 648 Seminar in Music Research or MUED 690 Research Methods; a Final Project must be completed satisfactorily; and an oral comprehensive examination of courses required in Major Studies and in Studies in Areas Supportive of the Major must be passed. Specific courses are required in each area of specialization.

Doctor of Musical Arts (D.M.A.)

Core Requirements
D.M.A. in Composition
MUSP 719T: Lessons (8 credits total) MUSP 899: Doctoral Dissertation Research (12 credits) Studies in Areas Supporting the Major (15 credits) including MUSC 675: Music Theory Pedagogy (3 credits) Other courses in Music (5 credits minimum) including MUSC 648: Seminar in Music Research (3 credits) *Non-course requirements for composition students include a pre-candidacy scholarly paper and a recital presentation or original music composed while in the degree program at Maryland. The recital presentation must take place prior to the defense of the dissertation project.*
D.M.A. in Conducting
Choral Conducting specialization: Performance, Principal Medium (12 credits) Performance-Related Courses (11 credits) MUSP 899: Doctoral Dissertation Research (6 credits) MUSC 899: Doctoral Dissertation Research (6 credits) Academic Courses in Music (9 credits) including MUSC 648: Seminar in Music Research (3 credits) **Orchestral Conducting specialization:** Performance, Principal Medium (14 credits) Performance-Related Courses (15 credits) MUSP 899: Doctoral Dissertation Research (6 credits) MUSC 899: Doctoral Dissertation Research (6 credits) Academic Courses in Music (9 credits) including MUSC 648: Seminar in Music Research (3 credits) **Wind Conducting specialization:** Performance, Principal Medium (14 credits) Performance-Related Courses (15 credits) MUSP 899: Doctoral Dissertation Research (6 credits) MUSC 899: Doctoral Dissertation Research (6 credits) Academic Courses in Music (9 credits) including MUSC 648: Seminar in Music Research (3 credits) *Non-course requirements for conducting students include proficiencies in diction, voice, and piano. Students must also submit a pre-candidacy paper.*

D.M.A. in Performance
Performance, Principal Medium (10-14 credits)* Performance-Related Courses (12-20 credits)* Academic Courses in Music (9-12 credits)* including MUSC 648: Seminar in Music Research (3 credits) **Piano Solo, Collaborative Piano, Strings, and Winds and Percussion** specializations have a choice between a written dissertation or a performance dissertation. **Voice and Voice Opera** students must complete a performance dissertation by enrolling in MUSP 899: Doctoral Dissertation Research (12 credits). **Voice Pedagogy** students must complete a written dissertation by enrolling in MUSP 899: Doctoral Dissertation Research (6 credits) and MUSC 899: Doctoral Dissertation Research (6 credits) **Credits may vary for the following specializations: Piano Solo, Collaborative Piano, Strings, Voice, Voice Pedagogy, Voice Opera, Winds and Percussion.*

The Doctor of Musical Arts degree requires the satisfactory completion of a significant body of coursework that, in the student's and Graduate Advisor's judgement, prepares the student for the preliminary examination that leads to admission to candidacy, as well as certain specific courses required in each area of specialization. A grade of B- or better is required in all courses used to fulfill requirements for the degree. A dissertation (whether written, or in project form) is required for all doctoral degrees in music. A principal advisor for the dissertation will be chosen by the student and the academic advisor; the principal advisor and the student will then nominate the remaining members of the dissertation committee. The student must submit a detailed prospectus of the dissertation to the members of the dissertation committee and the graduate director, and must be admitted to candidacy prior to the approval of the dissertation committee by the Graduate School. The dissertation must be successfully defended before the entire dissertation committee. The Doctor of Musical Arts degree requires a Written Dissertation, a Recording Project, a Performance Project, or a Musical Composition. Some Doctoral of Musical Arts degrees have an option of a Written Dissertation or a Performance Dissertation.

Facilities and Special Resources
The University of Maryland is one of the nation's leading public universities. The School of Music's home, The Clarice Smith Performing Arts Center, serves as a laboratory for the arts with six performance halls, The Michelle Smith Performing Arts Library, specialized rehearsal rooms, classrooms and more. The Clarice's presenting arm, The Artist Partner Program (APP), provides School of Music students with the opportunity to collaborate and learn from internationally recognized artists and scholars. Recent APP artists-in-residence include the Spektral Quartet, the St. Lawrence String Quartet, eighth blackbird, Brad Meldau and Tia Fuller.

The Michelle Smith Performing Arts Library (MSPAL) in The Clarice ranks among the top twenty university music libraries in the United States, and it offers a variety of archives, special collections, and other research resources that give it international stature among scholars in a broad spectrum of music disciplines. The total music collection includes approximately 50,000 books, 150,000 scores, 140,000 recordings, and 4,500 linear feet of archival materials. The International Piano Archives at Maryland (IPAM) is the only institutional collection in existence devoted to historic piano performance. IPAM contains 40,000 recordings, 8,500 music scores, 2,500 books, and a collection of reproducing pianos with 8,000 piano rolls. To date, IPAM has acquired the collections of more than 40 eminent pianists. The MSPAL Special Collections in Performing Arts embrace a growing number of national and international music organization archives representing music education, band history, solo and ensemble instrumental performance, music librarianship, and ethnomusicology. Materials in these archives include papers, music scores, recordings, books, magazines, photographs, and oral histories. MSPAL also features important archival and manuscript collections on music criticism and American music, the Charles Fowler Papers supporting the study of arts education, a significant Leopold Stokowski Collection, the Jacob Coopersmith Collection of Handeliana, the Radio Station WOR/Alfred Wallen stein Collection of 26,000 orchestral scores, and the performance parts of the Andre Kostelanetz Orchestra.

Within a few miles of the College Park campus are research opportunities offered by Dumbarton Oaks, the Enoch Pratt Free Library of Baltimore, the Folger Shakespeare Library, the Library of Congress, the National Archives, the Smithsonian Institution, and many other specialized libraries.

The School of Music's lively concert season provides music majors with numerous performance opportunities. With approximately 300 public performances each year - showcasing student recitalists and more than 30 ensembles - our students keep a high profile. The surrounding DC-Baltimore region offers additional opportunities to concertize, teach and engage with the community. Our students can be seen performing at major venues such as The John F. Kennedy Center for the Performing Arts, Strathmore Hall and Phillips Collection, and in intimate community spaces such as Riversdale Mansion and the historical Greenbelt Theatre.

Financial Assistance
A number of competitive fellowships, graduate assistantships, teaching assistantships, operatic assistantships, and orchestral assistantships are available. Preference for financial assistance will be given to those who have filed an application for admission to the University and the School of Music Supplemental Application by December 1 (for performance programs) and January 15 (for Music Education only) and have been officially admitted.
Contact Statement
School of Music: The Academic Handbook is available online and provides descriptive information, details of course requirements, examination procedures, and graduation requirements for the M. A., M. M., D. M. A., and Ph. D. degree programs. International students should read the information contained in the International Applicants section of the Graduate Admission Application.

Master of Music (M.Mus.)

Total Credits	Core Requirements
Non-thesis only (scholarly paper required): 30 credits	MUED 690: Research Methods in Music and Music Education (3 credits) MUED 692: Foundations and Perspectives of Music Education (3 credits) Additional 600-level MUED course (3 credits) MUSC 699: Selected Topics in Music (3 credits) Studies in Areas Supporting the Major (9 credits) Academic Courses in Music (9 credits)

The Master of Music Degree (Non-Thesis Option in Composition, Conducting, Music Education, or Performance) requires a minimum of between 31 and 36 credit hours depending on the specific program. Required coursework is distributed among three areas of study: Major studies, Studies in Areas Supporting the Major, and Other Studies in Music. In addition, a grade of B- or better is required in all courses used to fulfill requirements for the degree; a scholarly research paper must be written as part of

MUSC 648 Seminar in Music Research or MUED 690 Research Methods; a Final Project must be completed satisfactorily; and an oral comprehensive examination of courses required in Major Studies and in Studies in Areas Supportive of the Major must be passed. Specific courses are required in each area of specialization.

Doctor of Philosophy (Ph.D.)

Core Requirements
The Ph.D. in Music Education requires a minimum of 48 credits beyond the master's degree, including 12 credits of MUED 899: Doctoral Dissertation Research.
Music Education Doctoral Core:
MUED 780: Seminar in Music Teacher Education (3 credits)
MUED 697: Curriculum & Assessment in Music Education (3 credits)
MUED 785: Teaching Music in Higher Education (3 credits)
MUED 790: Design and Analysis of Research in Music Education (3 credits)
Additional 600-level MUED course (3 credits)
Music Academic Core (6 credits)
Quantitative Reasoning (3 credits)
Advanced Research Methods (6 credits)
Cognate Outside of Music (6 credits)

The Doctor of Philosophy degree requires the satisfactory completion of a significant body of coursework that, in the student's and Graduate Advisor's judgement, prepares the student for the preliminary examination that leads to admission to candidacy, as well as certain specific courses required in each area of specialization. A grade of B- or better is required in all courses used to fulfill requirements for the degree. A dissertation (whether written, or in project form) is required for all doctoral degrees in music. A Principal Advisor for the dissertation will be chosen by the student and the academic advisor; the Principal Advisor and the student will then nominate the remaining members of the dissertation committee. The student must submit a detailed Prospectus of the dissertation to the members of the dissertation committee and the Graduate Director, and must be admitted to candidacy prior to the approval of the dissertation committee by the Graduate School. The dissertation must be successfully defended before the entire dissertation committee. The Doctor of Philosophy degree requires a Written Dissertation.

Facilities and Special Resources

The University of Maryland is one of the nation's leading public universities. The School of Music's home, The Clarice Smith Performing Arts Center, serves as a laboratory for the arts with six performance halls, The Michelle Smith Performing Arts Library, specialized rehearsal rooms, classrooms and more. The Clarice's presenting arm, The Artist Partner Program (APP), provides School of Music students with the opportunity to collaborate and learn from internationally recognized artists and scholars. Recent APP artists-in-residence include the Spektral Quartet, the St. Lawrence String Quartet, eighth blackbird, Brad Meldau and Tia Fuller.

The Michelle Smith Performing Arts Library (MSPAL) in The Clarice ranks among the top twenty university music libraries in the United States, and it offers a variety of archives, special collections, and other research resources that give it international stature among scholars in a broad spectrum of music disciplines. The total music collection includes approximately 50,000 books, 150,000 scores, 140,000 recordings, and 4,500 linear feet of archival materials. The International Piano Archives at Maryland (IPAM) is the only institutional collection in existence devoted to historic piano performance. IPAM contains 40,000 recordings, 8,500 music scores, 2,500 books, and a collection of reproducing pianos with 8,000 piano rolls. To date, IPAM has acquired the collections of more than 40 eminent pianists. The MSPAL Special Collections in Performing Arts embrace a growing number of national and international music organization archives representing music education, band history, solo and ensemble instrumental performance, music librarianship, and ethnomusicology. Materials in these archives include papers, music scores, recordings, books, magazines, photographs, and oral histories. MSPAL also features important archival and manuscript collections on music criticism and American music, the Charles Fowler Papers supporting the study of arts education, a significant Leopold Stokowski Collection, the Jacob Coopersmith Collection of Handeliana, the Radio Station WOR/Alfred Wallen stein Collection of 26,000 orchestral scores, and the performance parts of the Andre Kostelanetz Orchestra.

Within a few miles of the College Park campus are research opportunities offered by Dumbarton Oaks, the Enoch Pratt Free Library of Baltimore, the Folger Shakespeare Library, the Library of Congress, the National Archives, the Smithsonian Institution, and many other specialized libraries.

The School of Music's lively concert season provides music majors with numerous performance opportunities. With approximately 300 public performances each year - showcasing student recitalists and more than 30 ensembles - our students keep a high profile. The surrounding DC-Baltimore region offers additional opportunities to concertize, teach and engage with the community. Our students can be seen performing at major venues such as The John F. Kennedy Center for the Performing

Arts, Strathmore Hall and Phillips Collection, and in intimate community spaces such as Riversdale Mansion and the historical Greenbelt Theatre.

Financial Assistance
A number of competitive fellowships, graduate assistantships, teaching assistantships, operatic assistantships, and orchestral assistantships are available. Preference for financial assistance will be given to those who have filed an application for admission to the University and the School of Music Supplemental Application by December 1 (for performance programs) and January 15 (for Music Education only) and have been officially admitted.

Neuroscience and Cognitive Sciences (Z037)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The Neuroscience and Cognitive Science (NACS) Program offers a Post-Baccalaureate Certificate for students pursuing graduate degrees in related departmental programs. This certificate program allows students to obtain significant interdisciplinary training that complements their graduate degree in a NACS-related discipline. The NACS Certificate serves to acknowledge this training.

Admissions Information
Only students enrolled in a Ph.D. degree program at the University of Maryland, College Park will be eligible for the NACS Certificate. Students enrolled in the NACS Ph.D. program are not eligible. Interested students are encouraged to contact the NACS office for advisement on coordinating the NACS Certificate requirements with their Ph.D. requirements. Admission will be at the discretion of the NACS Graduate Director, with the advice and consent of the NACS Executive Committee. Students must submit a letter to the NACS Graduate Director requesting admission to the Certificate Program and outlining their plan of study for the NACS Certificate. Students must also identify a NACS faculty member to serve as their Certificate advisor. In many cases this may be the student's existing departmental Ph.D. advisor. Study for the Certificate must be completed by the end of the fifth year after admission to the program.

1. Completed application to the NACS Certificate program.
2. PDF copy of unofficial UM transcript.
3. Letter from primary advisor endorsing the application to the NACS Certificate program.

All files should be submitted electronically, with a strong preference for PDF files. Please use transparent file names that start with your name, i.e., smith_application.pdf, smith_transcript.pdf, smith_endorsement.pdf. Send files together in ONE email message to Pam Komarek, NACS Assistant Director, at pkomarek@umd.edu.

Degree Requirements

Post-Baccalaureate Certificate (P.B.C.)

Total Credits	Core Requirements
16 credits required	NACS 608: Neuroscience and Cognitive Science Seminar (1 credit per semester, 2 credits total) Electives approved by advisor (6 credits) **Complete two of the following courses:** NACS 641: Introduction to Neurosciences (4 credits) NACS 642: Cognitive Neuroscience (4 credits) NACS 643: Computational Neuroscience (4 credits) NACS 644: Cellular and Molecular Neuroscience (4 credits) NACS 645: Cognitive Science (4 credits)

Students must earn a minimum of 16 credits through completing the following courses with a grade of B (3.0) or better in each class. 1) Students must complete a core of 10 credits, in addition to their Ph.D. course requirements, comprising at least two of the courses within the NACS core curriculum (NACS641, NACS642, NACS643, NACS644, NACS645, all 4 credit courses) and two semesters of NACS 608, Neuroscience and Cognitive Science Seminar, one credit per semester. 2) Students must complete at least 6 additional credits from graduate courses approved by the NACS program. The student's NACS advisor and the NACS Graduate Director must approve the courses taken to fulfill these credits. Courses taken at the 400-level require the approval of the NACS Graduate Director.

Neurosciences and Cognitive Science (NACS)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The NACS program offers a wide range of research and training opportunities for students who are interested in pursuing doctoral-level research in a variety of areas within neuroscience and cognitive science. Faculty research interests center around seven main areas: Cellular & Molecular, Sensory & Motor Systems, Computational Modeling & Theory, Language & Speech, Cognition & Emotion, Development & Aging, and Disorders & Treatment. Research approaches include both the theoretical and experimental, with several laboratories doing both. Research and training activities of NACS take place within the laboratories of faculty in 23 participating departments and units: Aerospace Engineering, Animal and Avian Sciences, Behavioral and Community Health, Bioengineering, Biology, Computer Science, Electrical and Computer Engineering, English, Entomology, Epidemiology & Biostatistics, Hearing and Speech Sciences, Human Development, Kinesiology, Linguistics, Nutrition and Food Science, Philosophy, Psychology, and Teaching and Learning, Policy and Leadership, as well as the Center for Advanced Study of Language, the Institute for Advanced Computer Studies, the Institute for Systems Research, the Maryland Neuroimaging Center, and the Second Language Acquisition program. The NACS program requires the completion of two required core courses and three out of five core courses, including introduction to neurosciences, cognitive neuroscience, computational neuroscience, cellular and molecular neuroscience, and cognitive science. The goal of the Program is to bring together the diverse perspectives and strengths of all the included disciplines in order to understand the working of the nervous system, the mind, and behavior. For more information, please visit our web site: http://www.nacs.umd.edu.

Admissions Information
General Requirements:

- Statement of Purpose: The statement of purpose and three letters of recommendation will be required to be uploaded in the Supplementary Application (Acceptd), not the Graduate School's application.
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Degree Requirements

Master of Science (M.S.)

Total Credits	Core Requirements	Specialization Options
Thesis or Non-thesis option: 31 credits	NACS 600: Ethics in Scientific Research (2 credits) NACS 640: Foundational Readings Seminar (2 credits) Electives (12 credits) **Select three courses, with at least one in each area (12 credits total):** 1. Cognitive Area: NACS 642: Cognitive Neuroscience (4 credits); NACS 645: Cognitive Science (4 credits) 2. Neuroscience Area: NACS 641: Introduction to Neurosciences (4 credits); NACS 643: Computational Neuroscience (4 credits); NACS 644: Cellular and Molecular Neuroscience (4 credits)	**Thesis option:** NACS 799: Master's Thesis Research (3 credits) **Non-thesis option:** NACS 798: Master's Non-thesis Research (3 credits)

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 37 credits, including 12 credits of NACS 899: Doctoral Dissertation Research. Non-course requirements include completing a First Year Research Project, pass the Qualifying Axam, submit a Dissertation Proposal, and pass the Ph.D. Defense. **Required coursework:** NACS 600: Ethics in Scientific Research (2 credits) NACS 640: Foundational Readings Seminar (2 credits) Supplemental Courses (9 credits) **Select three courses, with at least one in each area (12 credits total):** 1. Cognitive Area: NACS 642: Cognitive Neuroscience (4 credits); NACS 645: Cognitive Science (4 credits) 2. Neuroscience Area: NACS 641: Introduction to Neurosciences (4 credits); NACS 643: Computational Neuroscience (4 credits); NACS 644: Cellular and Molecular Neuroscience (4 credits)

Specific requirements include two core courses--a scientific ethics course and a foundational readings course--and three out of five core courses from among introduction to neuroscience, cognitive neuroscience, computational neuroscience, cellular and molecular neuroscience, and cognitive science. A qualifying examination is given at the beginning of the third year to ensure that all students have a core knowledge of basic neuroscience and cognitive science and know how to apply it to their own research area, and that each student has the knowledge and skills necessary to develop a dissertation proposal. By the end of their fourth year, students formally present their dissertation proposal and are admitted to candidacy. The dissertation is normally completed within one year of the proposal defense, and within five years of entering the program.

Facilities and Special Resources

The Program, by virtue of its breadth, has access to the facilities of all the departments, institutes, and centers of its faculty members. These include the Institute for Systems Research, the Institute for Advanced Computer Studies, the Center for Advanced Study of Language, the Maryland Neuroimaging Center, and the various well-equipped research laboratories and department facilities of the faculty. Animal facilities are available where necessary. NACS has developed close collaborations with the National Institutes of Health (NIH), Children's National Medical Center (CNMC), and Walter Reed National Military Medical Center (WRNMMC). NACS students can conduct research in laboratories with NACS adjunct faculty at these institutions. Thus, these relationships extend research and training opportunities for students while they get their degrees from the NACS program.

Financial Assistance

Fellowships are available on a competitive basis to both entering and continuing students, while qualified students may also receive teaching assistantships. In addition, some faculty have research assistantships for their students.

Nonprofit Management and Leadership (Z116)

Graduate Certificate Program
College: Public Policy

Abstract
The Nonprofit Management and Leadership Certificate is a four-course (twelve-credit) graduate certificate program that is designed to provide invaluable skills and experiences to enable students to delve deeply into the complex challenges facing nonprofit leaders. The certificate will equip students to be able to formulate innovative strategies, negotiate the complexities of global philanthropy and NGO leadership, develop entrepreneurial skills, engage in major international issues in the developing world, employ their skills to advance the work of nonprofit organizations, and make a significant difference around the globe.

Nuclear Engineering (online) (MENU)

Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is a practice-oriented part-time graduate program designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland.

Admissions Information: This program is not currently accepting applications.

Degree Requirements
Master of Engineering (M.Eng.)

Facilities and Special Resources
Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.
The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Nutrition and Food Science (NFSC)

Graduate Degree Program
College: Agriculture and Natural Resources

Abstract
The Graduate Program in Nutrition and Food Science is an interdisciplinary and interdepartmental program administered by the Department of Nutrition and Food Science (NFSC). The program draws upon faculty and scientists from numerous schools, departments, and organizations. These include the Departments of Animal and Avian Sciences, Anthropology, Cell Biology and Molecular Genetics, Chemistry and Biochemistry, Nutrition and Food Science, and Plant Science and Landscape Architecture; the School of Public Health; and nearby research institutions. The Director of the Graduate Program in Nutrition and Food Science is selected from amongst faculty to administer the program.
The program offers graduate study leading to the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Nutrition and Food Science with specialization in either Nutrition or Food Science. All programs require completion of a research project (thesis or dissertation). Programs of research are individually planned with the student, an advisor and an appropriate Graduate Advisory Committee. Research interests of faculty members specializing in Nutrition include the genetic and metabolic basis for dietary requirements of animals and humans, nutritional biochemistry, nutritional aspects of chronic disease, international nutrition, community nutrition, epidemiology, neuroscience, health behavior and health promotion. Research interests of faculty members specializing in Food Science include food chemistry, food processing and engineering, food microbiology, food safety, food nanotechnology, food toxicology, public policy, risk assessment and functional and nutraceutical foods.

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements	Specialization Options
Thesis only: 30 credits	NFSC 688: Seminar in Nutrition and Food Science (2 credits) NFSC 799: Master's Thesis Research (6 credits) One graduate level statistics course (3 credits)	Nutrition (NUTR) Food Science (FDSC)

Requirements for the M.S. degree in Nutrition and Food Science are a minimum of 30 graduate credits of course work including a minimum of 12 credits of 600 level courses and a minimum of 6 graduate credits of masters thesis research (NFSC 799). A minimum GPA of 3.0 is required to maintain good academic progress for graduation. The student must complete a thesis and successfully defend their research before a graduate faculty advisory committee approved by the Graduate School. An average duration of a Master's project is 2-3 years depending upon prior education and experience.

Doctor of Philosophy (Ph.D.)

Core Requirements
1. A minimum of 15 credits of coursework is required beyond the M.S. degree, including at least nine credits of advanced nutrition/food science courses. 2. Doctoral students are required to take three credits of NFSC 688: Seminar in Nutrition and Food Science. 3. At least three credits of 600-level statistics above what is required for the M.S. degree must be taken. 4. Each student is required to present a poster of his or her research progress at the Graduate Program in Nutrition and Food Science Research Day held yearly on the first Friday of May. 5. Students must complete a minimum of 12 research credits by enrolling in NFSC 899: Doctoral Dissertation Research.

Requirements for the Ph.D. degree in Nutrition and Food Science include a mastery of the broad fundamentals of area of specialty, as well as the demonstrated ability to conduct independent research. Course requirements include: a minimum of 27 graduate credits of course work including 9 credits of advanced nutrition/food science courses, beyond the M.S. degree and 12 credits of NFSC 899 Doctoral Dissertation Research. A minimum GPA of 3.0 is required to maintain good academic progress for graduation. Students are admitted to full candidacy for the Ph.D. upon passing a comprehensive exam on basic core knowledge of area of specialty and submittal of a research proposal. In addition the student must prepare and successfully defend a dissertation before their graduate faculty advisory committee. The average duration of a Ph.D. degree program is 4-5 years, depending upon prior education and experience.

Facilities and Special Resources
The Graduate Program office is housed within the Department of Nutrition and Food Science in Room 0112 in the Skinner Building.

Program facilities are located in the Departments of Nutrition and Food Science, Animal and Avian Sciences, Anthropology, Cell Biology and Molecular Genetics, Chemistry and Biochemistry, and Plant Science and Landscape Architecture. There are also collaborative arrangements with the National Institutes of Health (NIH), Food and Drug Administration (FDA), and U.S. Department of Agriculture (USDA). Additionally, opportunities exist for collaborative research with scientists at the FDA through the Joint Institute for Food Safety and Applied Nutrition.

Library facilities and resources are extensive. In addition to campus libraries, the National Archives, the National Agricultural Library, the Library of Congress, and the National Library of Medicine are all within 10 miles of campus and are available to students.

Financial Assistance
Financial support for graduate students is available on a competitive basis. The Department of Nutrition and Food Science offers a number of graduate teaching assistantships that support students in the program. A limited number of research assistantships are also available. Applications for teaching assistantships for the fall semester are due around mid-February for continuing students. New students who are interested in a teaching position should contact their advisor for information. International students who wish to be considered for a teaching assistantship and are not native speakers of English are required by the university to take part in the International Teaching Assistant (ITA) evaluation prior to the start of classes. This includes taking the Test of Spoken English (TSE) and submitting official test scores. International teaching assistants who may have been educated entirely in English and those with a bachelor's and/or master's degree from universities in English-speaking countries must also be evaluated. Decisions regarding teaching assistantships are usually reached by April 1. Graduate teaching assistants receive a stipend plus health insurance. Tuition fees (up to 10 credits per semester) for teaching assistants are waived by the university. Programs in Biochemistry, Chemistry, and Cellular Biology and Molecular Genetics, administered in the corresponding departments, also offer teaching assistantships to qualified students in the Graduate Program in Nutrition and Food Science. Students are encouraged to submit teaching assistantship applications to those programs. A limited number of research assistantships are available from grant funds, with the student assisting in the research supported under the grant. The research often may be applicable to the thesis or dissertation. The tuition for graduate research assistants is charged at the in-state rate and often is paid directly by the supporting grant. In addition, research assistants receive health insurance. Research assistantships generally are not awarded until after students have attended classes and are known to faculty. Additional types of financial aid are available, including a work-study program, grants, fellowships and loans. For more information regarding financial support, please refer to the Graduate School website at www.gradschool.umd.edu.

Other Deadlines: Please visit the program website at http://oes-entm.umd.edu/

Degree Requirements
Post-Baccalaureate Certificate (P.B.C.)

Total Credits	Core Requirements
12 credits required	ENTM 710: Insect Biodiversity, Physiology and Ecology (3 credits) ENTM 735: Sustainability (3 credits) ENTM 730: Plant Diagnostics (3 credits) ENTM 740: Organic Practices (3 credits)

In this 12-credit certificate, students learn about sustainability through examining both the ecosystem services provided by beneficial insects, as well as the management of injurious insects.

Performance (MFAP)

Graduate Degree Program
College: Arts and Humanities

Abstract
The three-year M.F.A. in Performance will offer admission once every three years to experienced performers. This unique world-class graduate program offers an array of studies and opportunities designed to explore the broad spectrum of American and International performance traditions while laying the foundation for individual ground-breaking approaches to personalized expression and teaching skills. We are looking for motivated visionaries with unique voices who would appreciate a performance-based graduate program designed to guide and support them on their journey from idea to revelation, from exploration to ownership. Currently the M.F.A. in Performance program is not accepting applications.

Admissions Information
General Requirements:
- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:
- Letters of Recommendation (3)
- CV/Resume
- Writing Sample: A sample of work, uploaded to the Upload Requirements section of the application.
- Teaching Resume: Entered in the Employment History section of the application.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	Not Accepting Applicants for Fall 2017
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	Not Accepting Applicants for Fall 2017

Other Deadlines: Please visit the program website at http://www.tdps.umd.edu

Degree Requirements
Master of Fine Arts (M.F.A.)
M.F.A. in Performance applicants must provide CV; One page statement of goals in relation to your creative and research interests; teaching resume; video of introduction and creative work; and three letters of recommendation from professional directors, teachers or artistic collaborators. Callbacks are held in February.
The MFA in Performance is currently on hiatus. Please contact the School of Theatre, Dance, and Performance Studies regarding future recruitment.

Facilities and Special Resources: The School of Theatre, Dance, and Performance Studies is housed in the Clarice Smith Performing Arts Center at Maryland. This state-of-the-art facility includes the 650-seat Ina and Jack Kay Theatre, the 200-seat Robert and Arlene Kogod Theatre and the 100-seat Cafritz Theatre.

The campus is within a few miles of the John F. Kennedy Center for the Performing Arts, Arena Stage, the National Theatre, Ford's Theatre, The Shakespeare Theatre at the Lansburgh, and the Olney Theatre Center, which are among more than 80 professional area theatres. Two of the greatest libraries in the world, the Library of Congress and the Folger Shakespeare Library, are in close proximity to campus. Students also make regular use of the Smithsonian Institution, the Federal Theatre Project Archives, the National Archives, and more than 50 specialized libraries and institutions in the Washington metropolitan area.

Philosophy (PHIL)

Graduate Degree Program
College: Arts and Humanities

Abstract
The Department of Philosophy offers graduate study leading to the Master of Arts and Doctor of Philosophy degrees with emphasis on contemporary Anglo-American philosophy and the interaction of philosophy with other disciplines. Students often enter the doctorate program without an M.A. degree, but the M.A. may be earned on the way to the Ph.D. While the Ph.D. program is suitable primarily for students who wish to enter a career in teaching and research at the college or university level, the M.A. program is appropriate for those who want to deepen and expand the knowledge they gained as undergraduates or who wish to develop competence in philosophy to apply to some other professional field.

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	5 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	5 Jan

Other Deadlines: Please visit the program website at http://www.philosophy.umd.edu

Degree Requirements

Master of Arts (M.A.)

Total Credits	Core Requirements
Non-thesis only: 30 credits required	PHIL 660: Metaphysics, Mind, and Language (3 credits) PHIL 640: Value Theory (3 credits) Remainder of coursework (24 credits) Students are also required to fulfill a Logic Requirement and complete a Scholarly paper.

Students must complete ten three-hour courses, or a total of thirty hours of course work. Two of these courses must be Core Courses, the remaining eight graduate seminars offered by the Department. Additional details may be found in the Graduate Handbook on the Department's www site: http://www.philosophy.umd.edu.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are requried to complete 36 credits in addition to 12 credits of PHIL 899: Doctoral Dissertation Research. Students are also required to complete a History requirement and a Logic requirement which does not count towards the total course or credit total. For the Prospectus Requirement, students must form a Prospectus Examining Committe, write a Dissertation Prospectus, and have the Prospectus approved by the Prospectus Examining Committee at a formal Prospectus Meeting. In addition all students who have completed the coursework component of the program are required to audit at least one course in each semester thereafter. **Required coursework:** PHIL 660: Metaphysics, Mind, and Language (3 credits) PHIL 640: Value Theory (3 credits) One course in the Philosophy of Science (3 credits) Remainder of coursework (27 credits)

Students who seek admission to the Ph.D. program normally should intend to pursue only full-time study toward that degree. In addition to the Graduate School requirements, students must complete twelve three-hour courses, or a total of thirty-six hours of course work. Two of these courses must be Core Courses, the remaining ten graduate seminars offered by the Department. Additional details may be found in the Graduate Handbook on the Department's www site. Foreign language skills are required only as demanded by the individual student's research.
Partial credit toward the Ph.D. requirements may be awarded for relevant work done at other graduate institutions. The Director of Graduate Studies will make a specific determination in each case.

Facilities and Special Resources: A number of other departments and programs at the University offer graduate students additional opportunities for coursework and research**.**

In addition to the excellent libraries on campus, students may use other libraries in the Washington/Baltimore metropolitan area, such as the Library of Congress, the Center for Hellenic Studies, and the Eisenhower Library on the campus of Johns Hopkins University.

The Department sponsors a series of colloquia by visiting and local speakers throughout the academic year.

Financial Assistance: The Department administers a number of graduate assistantships and fellowships. Virtually all applicants admitted to the doctoral program are offered support, typically a combination of teaching assistantships and fellowships.

Physical Activity (PHAC)

Graduate Degree Program
College: Public Health

Abstract
The Master of Public Health (MPH) degree with a concentration in Physical Activity is a 43-credit professional degree, administered by the Department of Kinesiology. All MPH students with concentration in Physical Activity will complete five public health core courses, eight courses in the physical activity and related cognate area, an internship, and a capstone project.

Admissions Information
Students may qualify for admission with a 3.0 GPA, strong GREs [50th percentile as minimums in the Verbal and Quantitative sections (approximately 150 in each section); 4.0 minimum in Analytical Writing], and a minimum of three strong recommendations from people knowledgeable about the applicant's prior academic achievements and research potential. Applicants will submit a focused letter detailing academic and career goals relevant to the degree program. Appropriate background course work closely aligned with the intended degree specialization is expected.

Admission Application for MPH in Physical Activity: How to Apply:
MPH applications should be submitted through the Schools of Public Health Application Service, SOPHAS, at www.SOPHAS.org. The application cycle opens in SOPHAS typically in September, and all application documents must be submitted via SOPHAS. Remember to designate the University of Maryland School of Public Health, College Park, as one of your school choices along with your desired program. The University of Maryland School of Public Health GRE Code in SOPHAS is 0485.

SOPHAS will verify the information reported and send it electronically to the University of Maryland School of Public Health once complete. The verification process can take 4-6 weeks to complete. We do not accept materials outside of the SOPHAS process. The University of Maryland requires a Supplemental Application and a Supplemental Application Fee of $75 for each program.

The application deadline for the MPH program is March 1. Applications are accepted for fall semester matriculation only (so spring semester admissions).

Degree Requirements
Master of Public Health (M.P.H.)

Total Credits	Core Requirements
Non-thesis only (capstone project required): 43 credits	EPIB 610: Foundations of Epidemiology (3 credits) EPIB 650: Biostatistics I (3 credits) HLSA 601: Introduction to Health Systems (3 credits) HLTH 665: Health Behavior I (3 credits) MIEH 600: Foundations of Environmental Health (3 credits) KNES 600: Kinesiology in Public Health (3 credits) KNES 601: Epidemiology of Physical Activity (3 credits) KNES 602: Physical Activity Program Planning and Evaluation (3 credits) EPIB 641: Public Health and Research Ethics (1 credit) HLSA 775: Public Health Research (3 credits) Electives (9 credits) **Capstone Courses:** KNES 785: Internship in Physical Activity and Public Health (3 credits) KNES 786: Capstone Project in Physical Activity and Public Health (3 credits)

The Master of Public Health (MPH) degree with a concentration in Physical Activity is a 43-credit professional degree, administered by the Department of Kinesiology. All MPH students with a concentration in Physical Activity will complete five public health core courses, eight courses in the physical activity and related cognate area, an internship, and a capstone project.

Facilities and Special Resources: The Department of Kinesiology has three areas of specialization: Cognitive Motor Neuroscience, Exercise Physiology, and Physical Cultural Studies. Laboratories are maintained, which support original investigations in each of the three areas. Laboratories include equipment for measuring metabolic parameters, strength, body composition, postural sway, ground reaction forces, amount of physical activity in daily life, as well as muscle biopsies and movement analysis. The response of the human body to physical activity/exercise can be viewed through ECG, EEG, EMG and systematic behavior observation systems. Each of the three research areas has interfaced computer hardware and software to support data collection and analysis. Collaborations with the School of Medicine at the Baltimore campus and with NIH often result in the availability of other facilities and equipment. All graduate students have access to computers and other forms of technology. Details and pictures of current facilities and equipment are available at our website: www.sph.umd.edu/KNES/.

Physics (PHYS)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
A fuller picture of the Department of Physics can be found on the department's home page, http://umdphysics.umd.edu; only a summary is provided here. The Department of Physics offers graduate courses on general and specialized topics in advanced physics, and has active research programs in many areas of current interest. The various research groups can be browsed at http://umdphysics.umd.edu/research/research-areas.html.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- Supplementary Application
- Publications/Presentations: If authors exceed 30 leave field blank.
- GRE Subject (Physics)

The University of Maryland Department of Physics has a strong national and international reputation, and receives a large number of applications each year from well-qualified students. Consequently, admission to the graduate degree program is quite selective.
Students who enter the graduate program are normally expected to have strong backgrounds in physics, including intermediate-level courses in mechanics, electricity and magnetism, physical optics, quantum physics, and thermodynamics. Prior research experience and strong letters of recommendation are highly valued. Good preparation in mathematics is also desirable, especially for students who may pursue theoretical physics research.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	15 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Dec

Other Deadlines: Please visit the program website at http://www.umdphysics.umd.edu
Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Thesis option: 30 credits **Non-thesis option (scholarly report):** 30 credits	**Thesis option** requires at least four courses of the general physics sequence, a graduate laboratory course, six credits of PHYS 799: Master's Thesis Research, and passing an oral examination. **Non-thesis option** requires a total of 30 credits including at least four courses of the general physics sequence, completion of a scholarly report, and the passing at the master's level of one section of the Ph.D. qualifying exam.

The Department offers both thesis and non-thesis options in its Master of Science program. However, virtually all students are admitted directly to the Ph.D. program, and obtain a Master's naturally in the course of their Ph.D. studies. A student interested instead in a terminal Master's degree should consult with the physics department. The Departmental requirements for the non-thesis option include: a total of 30 credits excluding research credits; at least four courses of the general physics sequence; a paper as evidence of ability to organize and present a written scholarly report on contemporary research; and the passing at the master's level of one section of the Ph.D. qualifying exam. The thesis option's requirements include at least four courses of the general physics sequence, a graduate laboratory unless specially exempted, and the passing of an oral examination including a defense of thesis.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete the following: 1. Two courses (700 or 800 level) outside of specialization 2. Non-credit Foundations and Frontiers of Physics seminar 3. Two semesters of a physics seminar course 4. Pass the qualifying exam 5. Give a Preliminary Research presentation after passing the qualifying exam 6. Submit a scholarly paper 7. Twelve credits of PHYS 899: Doctoral Dissertation Research 8. Theory students only: take PHYS 624: Advanced Quantum Mechanics (3 credits) or PHYS 625: Non-relativistic Quantum Mechanics (3 credits)

The requirements for the Doctor of Philosophy degree in physics are set in general terms to allow the individual student as much freedom as possible to prepare a course of study suited to individual needs. These requirements are: competence in standard topics of graduate-level physics indicated by a satisfactory performance on a qualifying examination; attendance in a departmental research seminar; the giving of an oral Preliminary Research Presentation demonstrating the ability to organize and orally present a topic of current research interest in physics; a paper showing the student's ability to organize and present a written scholarly report on contemporary research prior to candidacy; advanced course study outside the student's field of specialization consisting of two advanced courses (six credits), at least one of which must be a physics course at the 700 level or above; PHYS 624 or 625 for students with theoretical theses; and research competence through active participation in at least two hours of seminar, 12 hours of thesis research, and the presentation and defense of an original dissertation.

Facilities and Special Resources

Current research in the Department spans an immense range of theoretical and experimental work on the forefront of knowledge, far too large to describe here. Details of current research in the various fields, faculty, and facilities involved can be found at the Departmental web site, http://umdphysics.umd.edu .

There are close academic ties with the Institute for Physical Science and Technology on the campus; members of the Institute supervise graduate research and also teach physics courses. Faculty members in the departments of Astronomy and Electrical & Computer Engineering also frequently direct thesis research.

The University of Maryland is located within the metropolitan area of Washington, D.C., where it enjoys the proximity of a large number of outstanding institutions, such as NASA’s Goddard Space Flight Center, the Naval Research Laboratory, the National Institute of Standards and Technology, the Johns Hopkins Applied Physics Laboratory, the Department of Energy, the National Institutes of Health, the Library of Congress, and other federal institutions. The Department works closely with certain research groups at some of these institutions, and a significant fraction of graduate students do their primary research at off-campus facilities, co-directed by a member of the graduate faculty in the Department. In order to facilitate graduate study in the Washington area, the Department of Physics also has adjunct professors from certain government laboratories.

Financial Assistance

The Department offers both teaching and research assistantships. Combined with fellowships in some cases, virtually all Ph.D. students have full financial support for the duration of their graduate studies. In a typical semester, approximately 50 teaching assistants and 160 research assistants work in the Department, while some others are supported by nearby government and industry facilities at which they are doing their research. Summer research stipends for advanced graduate students are customary, and a few summer teaching assistantships are available.

Plant Science (PLSC)

Graduate Degree Program
College: Agriculture and Natural Resources

Abstract
The Plant Science (PLSC) graduate program offers training with concentrations in Agronomy, Cell Biology, Functional Genomics, Molecular Physiology, Conservation Biology and Ecology, Pathology, and Landscape Ecosystems Management. Students are trained by graduate faculty with an emphasis on interdisciplinary education and mastery of their chosen area of study. All PLSC graduate training is thesis-based, and an emphasis is placed on research and discovery learning rather than coursework. Students work directly with internationally-recognized graduate faculty who are leaders in their disciplines. Students are guided in their studies by a major professor as well as a graduate advisory committee selected by the student from experts on the campus, nearby research institutions, and other universities. The program offers Master of Science and Doctor of Philosophy degrees. Tuition, fees, and stipends of Ph. D students are generally supported by extramural funding or by the department through teaching or graduate research assistantships. M.S. students can be extramurally or self-funded. The objectives of the Plant Science graduate program are: - To provide students with the skills in analyzing and interpreting quantitative and qualitative information; using inductive and deductive reasoning; and communicating in both verbal and written form. - To train a next generation of plant science researchers to lead public and private efforts to provide a secure and nutritious food supply, maintain and restore ecosystems, and provide high quality plant science education. - To advance knowledge in plant sciences that is critical to the improvement of the efficiency, profitability and sustainability of global and national agricultural and natural resources. The Plant Science graduate program seeks to maximize the close association of the many national laboratories (USDA, FDA, NASA, NIST, NIH, DOE, etc.) with have cooperative agreements with the department and the University of Maryland. As a result, graduates of the program are particularly well trained for employment in public and private sector research positions.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)

- Faculty of Interest

Admission to the program requires a baccalaureate from an accredited college or university in the United States or the equivalent in a foreign country. Applicants are expected to have a 3.0 cumulative grade point average (4.0 scale) in all previous academic work. All applicants must submit Graduate Record Examination (GRE) scores and an acceptable combined score of 300 on the verbal and quantitative portions of the GRE are desirable.
Equipment and expertise for next generation sequencing, laser scanning confocal, life science imaging, bioinformatics, genomics, proteomics, and metabolomics are available either in the department or on campus. Extensive controlled-environment

facilities, including state-of-the-art growth chambers and a large and modern greenhouse complex are complemented by a large network of field research facilities located strategically across the state representing various environments with different climates and soil types. Students have access to computer labs and shared processing arrays and a comprehensive computer center located on campus.

The University Libraries on campus and both the National Agriculture Library and Library of Congress located nearby make the library resources accessible to students among the best in the nation. Many of the Departments projects are conducted in cooperation with other departments on campus and with professionals at the Food and Drug Administration facility near the campus and the headquarters of the USDA Agricultural Research Service located three miles from campus in Beltsville. Scientists at the Geologic Survey, the National Academy of Sciences, NASA, National Institutes of Health, Department of Energy, Smithsonian, and National Park Service, as well as other agencies, have cooperated with the Departments faculty on various projects. Scientists from some of these agencies have adjunct appointments in the Department, have taught special courses at the University, and participate on graduate committees.

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	12 Jan	29 Sep

Other Deadlines: Please visit the program website at http://www.psla.umd.edu

Degree Requirements

Master of Science (M.S.)

Total Credits	Core Requirements
Thesis only: 30 credits	PLSC 608: Research Methods (2 credits) PLSC 618: Advances in Research: Critiquing Primary Plant Science Literature (1 credit) PLSC 619: Seminars in Plant Science and Landscape Architecture (1 credit) PLSC 799: Master's Thesis Research (6 credits)

A program of study approved by the Advisor must be completed prior to the second semester of enrollment. This plan must be filed with the Graduate Director. The program requires a minimum of 30 semester hours of course work beyond the B.S. degree, including 6 hours of thesis research credits (799). A minimum of 12 credit hours must be earned in course-work at the 600 level or higher. Students are also required to complete one semester hour of PLSC618: Advances in Research: Critiquing Primary Plant Science Literature and one semester hour of PLSC619: Seminar in Plant Science and Landscape Architecture. Students must also complete one semester each of 400-level (or higher) biochemistry, plant physiology, and statistics which may be completed as part of a B.S. or M.S. degree program.

A thesis must be submitted to the Graduate School. This thesis is approved by the Thesis Examining Committee appointed by the Dean of the Graduate School upon the recommendation of the student's advisor. The advisor serves as the chairperson of the examining committee and the student's advisory committee typically serves as members of the examining committee. Committee membership must comply with Graduate School requirements for membership. The submitted thesis must comply with the University of Maryland Thesis and Dissertation Style Guide.

It is the responsibility of the Advisor and Student to ensure that all University Research Assurances are followed. Research involving human subjects must be approved in advance by the Institutional Review Board (IRB). Research involving the use of vertebrate animals must be approved in advance by the Animal Care and Use Committee. Research using hazardous materials (chemical or biological), recombinant RNA/DNA must be approved in advance by the appropriate University committee

Doctor of Philosophy (Ph.D.)

Core Requirements
1. Doctoral students without an M.S. degree in Plant Science or closely related discipline are required to complete 24 credits of coursework, in addition to 12 credits of Doctoral Dissertation Research (PLSC 899). 2. Doctoral students with an M.S. degree in Plant Science or closely related discipline are required to complete 16 credits of coursework, including 12 credits of Doctoral Dissertation Research (PLSC 899). 3. All doctoral students are required to take two credits of PLSC 608: Research Methods.

4. All doctoral students are required to take one credit of PLSC 618: Advances in Research: Critiquing Primary Plant Science Literature and one credit of PLSC 619: Seminars in Plant Science and Landscape Architecture.

A program of study approved by the Advisor must be completed by the end of the third semester of enrollment. This plan must be filed with the Graduate Director. The Graduate School requires that every student seeking the Ph.D. satisfactorily complete a minimum of 12 semester hours of dissertation credits (899). Students are also required to complete one semester hour of PLSC618: Advances in Research: Critiquing Primary Plant Science Literature and one semester hour of PLSC619: Seminar in Plant Science and Landscape Architecture. Students are also required to complete 2 semester hours of PLSC608 (Research Methods). In addition students admitted to the PhD program that lack the MS degree must complete the course requirements of the MS degree (24 credit hours of coursework). Students must also complete one semester each of 400-level (or higher) biochemistry, plant physiology, and statistics which may be completed as part of a B.S. or M.S. degree program and an additional graduate level course in biochemistry or statistics.

An oral qualifying examination must be completed satisfactorily before a student is admitted to candidacy. At the discretion of the advisor and advisory/examining committee a written exam may also be conducted. The examination must be attempted by the end of the fifth semester of study. Under extenuating circumstances and with written permission of the Program Director, this time frame may be extended. The examining committee corresponds to the student's Advisory committee. To be eligible to take the candidacy examination, the student must have submitted a research proposal that has been approved by the student's advisor and Advisory Committee prior to the formal qualifying examination. The completed proposal must be given to the committee at least two weeks before the scheduled date for the qualifying examination. The qualifying examination focuses principally on the written proposal. However, the student's mastery of general knowledge of Plant Science may also be examined. At the end of the examination, all members of the committee vote on the student's performance. Two negative votes constitute failure. Upon successful completion of the examination, the committee recommends to the Director that the student by admitted to candidacy based on satisfactory performance during the examination. It is the responsibility of the student to submit an application for admission to candidacy when all the requirements for candidacy have been fulfilled. Students failing the qualifying examination may be re-examined once within 6 months of the first examination date. Students may be re-examined only once. Failure to pass the qualifying examination a second time will result in termination of the student's program.

A dissertation based on independent, original research must be submitted to the Program and the Graduate School. This dissertation is approved by the Dissertation Examining Committee appointed by the Dean of the Graduate School upon the recommendation of the student's advisor. The advisor serves as the chairperson of the examining committee and the student's advisory committee typically serves as members of the examining committee. Committee membership must comply with Graduate School requirements for membership. The submitted dissertation must comply with the University of Maryland Thesis and Dissertation Style Guide.

It is the responsibility of the Advisor and Student to ensure that all University Research Assurances are followed. Research involving human subjects must be approved in advance by the Institutional Review Board (IRB). Research involving the use of vertebrate animals must be approved in advance by the Animal Care and Use Committee. Research using hazardous materials (chemical or biological), recombinant RNA/DNA must be approved in advance by the appropriate University committee.

Facilities and Special Resources

State-of- the-art facilities for conducting research in plant science are located at the College Park campus in the Plant Science Building and Research Greenhouse Complex. Modern laboratories are equipped for genomic, molecular genetic, cell biological, physiological, and biochemical research in plant science. Equipment and expertise for next generation sequencing, life science imaging, bioinformatics, genomics, proteomics, and metabolomics are available either in the department or on campus. Extensive controlled-environment facilities, including state-of-the-art growth chambers and a large and modern greenhouse complex are complemented by a large network of field research facilities located strategically across the state representing various environments with different climates and soil types. Students have access to computer labs and shared processing arrays and a comprehensive computer center located on campus. The University Libraries on campus and both the National Agriculture Library and Library of Congress located nearby make the library resources accessible to students among the best in the nation. Many of the Department’s projects are conducted in cooperation with other departments on campus and with professionals at the Food and Drug Administration facility near the campus and the headquarters of the USDA Agricultural Research Service located three miles from campus in Beltsville. Scientists at the Geologic Survey, the National Academy of Sciences, NASA, National Institutes of Health, Department of Energy, Smithsonian, and National Park Service, as well as other agencies, have cooperated with the Department’s faculty on various projects. Scientists from some of these agencies have adjunct appointments in the Department, have taught special courses at the University, and participate on graduate committees.

Financial Assistance: A limited number of research assistantships and teaching assistantships are available for qualified applicants. There is strong competition for these awards, and candidates are encouraged to submit their applications as early as possible in the semester preceding anticipated enrollment in the Department.

Policy Studies (EDPS)

Graduate Degree Program
College: Education

Abstract
The Department of Education Policy Studies (EDPS) merged with the Department of Curriculum and Instruction (EDCI) to form the Department of Teaching and Learning, Policy and Leadership (TLPL). For more detailed and up-to-date information about programs and resources see the TLPL website at http://education.umd.edu/TLPL.

The programs in Education Policy Studies (EDPS) in the Department of Teaching and Learning, Policy and Leadership promotes critical and discipline-based studies of education policies and practices; encourages thoughtful and responsive explorations of education and related social issues; and fosters innovative and collaborative efforts to inform education policy and leadership at all levels of government.

Graduates pursue professional roles in university teaching and research, fill policy and leadership positions in public and private educational institutions, and work as specialists and advocates in governmental and non-governmental agencies. The Department offers graduate programs of study leading to the M.A.

Faculty bring the disciplines of ecomomics, political science, history, philosophy, sociology, cultural studies, curriculum theory, and organizational leadership to the study of education. They are committed to the preparation of professionals who are able to apply a range of theories and disciplinary perspectives to the enterprise of education in governmental and non-governmental agencies.

For graduate programs related to Curriculum and Instruction, please see Education: Curriculum and Instruction (EDCI).
NOTE: This section includes information about the M.A. programs previously associated with the Department of Education Policy Studies (EDPS); students interested in these programs should apply to EDPS, though TLPL now sponsors these programs. Students interested in the Department's new Ph.D. program should go to Education: Teaching and Learning, Policy and Leadership (TLPL) in the graduate catalog.

Admissions Information
General Requirements:
- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:
- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Writing Sample

NOTE: Applicants for the EDPS master's program are accepted for the **FALL ONLY**.
To be recommended for full admission to a master's program, a minimum undergraduate grade point average of 3.0 is required. Scores on the Graduate Record Examination (verbal, quantitative, writing) should be at the 50th percentile or higher. Because graduate programs are highly competitive, successful applicants often score considerably higher. Students who do not meet one of these requirements, but show other evidence of outstanding potential, may be considered for provisional admission. Admission of qualified applicants is based on their competitive ranking to limit enrollments to available faculty resources. See the description of the EDPS programs on the TLPL website for more detailed information.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	1 Mar
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	1 Feb

Other Deadlines: Please visit the program website at http://www.education.umd.edu

Degree Requirements
Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis option: 30 credits required **Non-thesis option:** 30 credits required	**Thesis option:** Coursework chosen with advisor (24 credits) EDPS 799: Master's Thesis Research (6 credits) **Non-thesis option:** Coursework chosen with advisor (27 credits) EDPS 679: Master's Seminar (3 credits) Non-thesis students must complete a seminar paper

The M.A. degree requires 30 credits beyond a Bachelor's level degree. Beyond the successful completion of courses, students must demonstrate high standards of scholarship and the ability to engage in independent research. Students must either write and defend a research thesis or complete a seminar paper (non-thesis option). Your faculty advisor will help you develop a program of study that is consistent with Departmental and University guidelines.

Facilities and Special Resources
Faculty and students in the department work closely with area schools, colleges, universities, associations and other education-related organizations. Extensive resources in the Washington, D.C., area, including embassies and other international organizations, provide exceptional opportunities for internships and field experiences, research, and materials to enhance formal course experiences. Facilities that support graduate study include the Center for Mathematics Education, the Center for Science and Technology in Education, the Multicultural Research Center, and the Maryland Equity Project. Additional facilities in the College of Education include the Educational Technology Services Center and numerous Professional Development Schools in local schools districts.

Financial Assistance
A variety of sources are available for seeking financial assistance in the way of graduate assistantships, scholarships, fellowships and financial aid loans. For more information visit http://www.education.umd.edu/TLPL/admissions/financiad.html .

Policy Studies (POSI)

Graduate Degree Program
College: Public Policy

Abstract
The School of Public Policy is one of the nation's leading graduate programs devoted to the study of public policy, management and international affairs, with particular expertise in the fields of environmental policy, international development, international security and economic policy, social policy, non-profit management, public management and leadership, and public finance. The School offers a wide variety of master's programs, joint degree programs, graduate certificate programs, and one of the nation's premier doctorate programs. The School's location just outside of Washington, D.C. attracts a stellar faculty of scholar-practitioners who are experts in the theory and practice of public policy and management and influential participants in the nation's policy-making process. The location and faculty in turn attract outstanding students by providing them, not only an in-depth, rich curriculum, but extensive exposure to and interaction with the real-life world of policy-making, the federal government, the international diplomatic community, state and local governments, and a host of non-governmental and multinational organizations. It is one of the few policy schools to combine state, national and international policy study under one roof, and to take into account policy interests in all sectors of the economy, thus allowing both faculty and students to study the full range of issues in all courses and in all research. The Ph.D. program trains policy analysts who will make their marks in the practice and teaching of public policy. To this end, a limited number of applicants are admitted annually. In their first year, students develop and demonstrate proficiency in economic, normative, political, and quantitative analysis. They then pursue advanced study within their chosen specialization. Finally, they complete and defend a doctoral dissertation. Those awarded the degree move on to public policy careers in government, research, academia, and the private sector.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Supplementary Application
- Description of Research: Describe the research areas you are interested in, the research problem(s) on which you would like to work, and their relevance / significance.(uploaded to the Uploads Requirements section of the application)
- Writing Sample: The writing sample should be relatively recent, and should preferably demonstrate the applicant's ability to structure and analyze a problem, or critique/develop a viewpoint. (uploaded to the Uploads Requirements section of the application)

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	15 Mar / 15 Dec (Preferred for funding)
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Mar / 15 Dec (Preferred for funding)

Other Deadlines: Please visit the program website at http://www.publicpolicy.umd.edu

Degree Requirements
Doctor of Philosophy (Ph.D.)

Core Requirements
All students are required to choose an advisor within their first year. Students must complete 24 credits of coursework including PLCY 798R and PLCY 798Z. In addition, students must complete 12 credits of PLCY 899: Doctoral Dissertation Research.

The Ph.D. in Policy Studies program enables students to develop in-depth knowledge of the field and to conduct cutting-edge research on public policy and management issues. Students are required to complete at least 24 credits of appropriate coursework, including two required research methods courses. In addition, students must take 12 credits of dissertation research. Students are required to pass exams in the basic disciplines of public policy and two field exams, usually with both a written and oral component, in broad topics relevant to their proposed thesis topics. They then develop and defend a dissertation prospectus followed by the dissertation itself.

The Ph.D. in Policy Studies is principally directed at students who have a master's degree in public policy or a related field, such as economics, statistics, education or international relations, from a program comparable in quality and content to one of the School's own master's programs. Students may apply while in the final year of such a program. Applications will also be considered from recent college graduates without a master's degree who have an outstanding academic record.

Most students will be required to maintain full-time status through completion of the course work leading up to their exams and thesis proposal; this typically requires two to three years. Some students will be admitted on a part-time basis with an agreed schedule to ensure timely completion. A faculty member at the School must agree to serve as the Ph.D. applicant's academic sponsor at the time of admission into the program. To facilitate the selection of a sponsor, applicants should include, as part of their application, a description of the general areas in which they want to study and write their dissertation.

Financial Assistance
The School has financial aid available in the form of fellowships, graduate assistantships, and employment. All qualified applicants meeting appropriate deadlines are considered.

Population Studies (Z036)

Graduate Certificate Program
College: Behavioral and Social Sciences

Abstract

The Certificate Program in Population Studies provides interdisciplinary training in demographic methods, theory, and research for graduate students in departments affiliated with the Maryland Population Research Center (MPRC), culminating in a Certificate in Population Studies for graduate students who complete the required coursework. Historically, the Population Sciences were born out of the discipline of Demography, a field that boomed during the 1950s around fears of a world-wide population explosion and its consequences. Demography was taught largely within departments of Sociology. Today the field has changed a great deal and researchers worry about issues of low fertility and underpopulation as much as overpopulation. What demographers of the 1950s missed in their dire predictions were unprecedented behavioral changes of families to changing economic circumstances, changing social pressures, and changing ideas of what constituted a family. Today, the core of the population sciences is not forecasting population growth and its components (mortality, fertility and immigration) but instead understanding what economic, social, and ideational factors affect these components and how changing mortality, fertility, and immigration may affect other family choices. With the growing emphasis on choice and on the consequences of population change, and with the shift from being a field focusing on forecasting to one focusing on understanding causal relationships, training across several fields of study has become necessary.

Admissions Information
The Certificate Program is offered to students enrolled in a Ph.D. program at the University of Maryland College Park. Please contact your department for more information.

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	Please visit the department's website	Please visit the department's website
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	Please visit the department's website	Please visit the department's website

Other Deadlines: Please visit the program website at http://www.popcenter.umd.edu

Degree Requirements
Post-Baccalaureate Certificate (P.B.C.)

Total Credits	Core Requirements
12 credits required	SOCY 611: Introduction to Demographic Methods (3 credits) SOCY 630: Population and Society or ECON 772: Population Economics (3 credits) Two Electives approved by advisor (6 credits)

The Certificate requires a minimum of four courses (12 credits) including two required core courses and two electives. At least one course taken for the Certificate must be from a department other than the student's home unit. (See the Certificate information page on the MPRC website for details.) Students must achieve a GPA of 3.0 or higher in these four courses. Previously earned credits may be retroactively applied toward the Certificate. Students may apply to participate in the Certificate Program at any time up until the semester before they intend to graduate. Applications may be accessed by following the link above.

Facilities and Special Resources: The Maryland Population Research Center (MPRC) is a multidisciplinary center dedicated to the support and advancement of population research. We provide a research environment conducive to interdisciplinary collaboration among our diverse Faculty Associates and to the development of young scholars through cross-disciplinary training and mentoring. Our proximity to Washington DC allows us to develop strong relationships with the U.S. federal statistical agencies and with policy communities. These ties provide our researchers access to under-utilized or restricted-use government data, allow them to partner with agencies on research and data improvement projects, and allow them to provide policy makers with non-partisan, scientific evidence on population-related issues. MPRC provides workspace, a fully-equipped computer lab, a laptop loaner program, SAS and Stata training courses, and administrative and financial support to associated graduate students.

Principles of Public Health (Z076)

Graduate Certificate Program
College: Public Health

Abstract
The University of Maryland School of Public Health offers a post-baccalaureate Certificate in Principles of Public Health administered by the Department of Health Services Administration. This online 15 credit, five course program is designed to provide working professionals with a foundation in the core principles of public health including

1. Foundations of Epidemiology
2. Introduction to Health Systems
3. Biostatistics
4. Foundations of Environmental Health
5. Health Behavior

The exceptional foundation in the Principles of Public Health will raise your career trajectory, increasing your

- Marketable expertise
- Professional flexibility and mobility
- Core public health competencies
- Career advancement readiness

You do not have to take leave time from work and can complete the certificate program in as little as eight months. You will benefit from the flexibility and accessibility of on-line courses that fit in with your personal and professional responsibilities. Easy to use web-based technology enables you to learn in an engaging, interactive environment. Intensive advising/mentoring enhances your learning experience.
Instruction is delivered by University of Maryland School of Public Health faculty and experts from prominent public health organizations. The University of Maryland School of Public Health is accredited by the Council on Education for Public Health. For more information on the program, please visit our webpage at http://sph.umd.edu/department/hlsa/certificate-principles-public-health

Admissions Information
General Program and Admission Information for the Graduate Certificate in Principles of Public Health can be found here: https://oes.umd.edu/graduates-post-baccalaureates-professionals/professional-graduate-programs/graduate-programs-public-health-practice
UMD cannot issue the immigration documents necessary for international students to study (F1 or J1 student visas) in this program. International students who currently reside in the U.S. on existing visas may apply. Eligible international students have additional requirements per the Office of International Student & Scholar Services (ISSS). Additional Requirements can be found here: https://oes.umd.edu/graduates-post-baccalaureates-professionals/professional-graduate-programs/graduate-programs-public-health-practice/apply and here: http://globalmaryland.umd.edu/offices/international-students-scholar-services/graduate-admissions

Professional Communication for Enhanced English Fluency (Z105

Graduate Certificate Program
College: Arts and Humanities

Abstract
The **Graduate Certificate of Professional Studies in Professional Communication for Enhanced English Fluency** (EEF) provides specialized instruction in professional speaking (voice, diction, pronunciation), professional writing (style, grammar), speaking and writing across professional communication contexts (e.g., business, health, law, politics, science), and professional speech writing. Students also advance their critical thinking and vocabulary skills through courses focused on the rhetorical analyses of public texts (e.g., debates, laws, speeches, judicial decisions), which will deepen students' knowledge of rhetoric and political culture nationally and internationally. Those enrolling in the Z105 certificate will take classes on the campus of the University of Maryland--College Park.

Project Management (PMPM)

Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Full admission as a degree seeking student requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in engineering or a related field from an accredited institution
- Completion of calculus I, II, and III and differential equtions or one course in statistics (such as ENCE302)
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

Facilities and Special Resources
Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance
Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Project Management (online) (MEPM)

Project Management (online)
Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Admissions Information
General Requirements:
- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:
- Letters of Recommendation (3)

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. For anyone needing these documents, should consider applying for the campus programs.
Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Full admission as a degree seeking student requires the following prerequisites:
- A bachelor's degree, GPA of 3.0 or better, in engineering or a related field from an accredited institution
- Completion of calculus I, II, and III and differential equtions or one course in statistics (such as ENCE302)
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Total Credits	Core Requirements
Non-thesis only: 30 credits required	ENCE 661: Project Cost Accounting and Finance (3 credits) ENCE 662: Introduction to Project Management (3 credits) ENCE 664: Legal Aspects of Engineering Design and Construction (3 credits) ENCE 665: Management of Project Teams (3 credits) ENCE 627: Project Risk Management (3 credits) Electives approved by advisor (15 credits)

Facilities and Special Resources

Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Psychology (PSYC)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
Psychology is a remarkably broad field that studies mind and behavior at all levels of analysis ranging from the micro to the macro; from single cells to complex systems; from individuals to groups and cultures; and from invertebrates to humans. Some of these endeavors connect with the biological sciences and others with the social sciences. As analytical, methodological, and theoretical advances in one domain increasingly influence developments in another, psychologists collaborate in ever greater numbers with scientists in neighboring disciplines, resulting in new subfields that blend the biological and social sciences. Our department reflects well this combined diversity of and collaborations among approaches. In recognition of this fact, we organized our training structure into 5 Ph.D. Specialty Areas:
- Clinical (CLIN)
- Cognitive and Neural Systems (CNS)
- Counseling (COUN)
- Developmental (DEV)
- Social, Decision, and Organizational Science (SDOS)

Research collaborations across areas are common and we encourage students to consider training across areas as well. The Department's doctoral programs in both Clinical and Counseling Psychology have been approved by the American Psychological Association. School Psychology, also an APA approved program, is offered in the College of Education.

Admissions Information
General Requirements:
- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:
- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Supplemental Application (Counseling Psychology only)
- Supplemental Application(Social/Decision/Organizational Sciences only)
- Writing Sample (optional)

The Department accepts only those applicants who have demonstrated competence for completing the requirements of the doctoral degree. The typical student admitted to the graduate program has an overall undergraduate grade point average of 3.5 or above, a psychology grade point average over 3.5, GRE scores of 155 and above for Verbal and 147 and above for Quantitative,

appropriate background experiences, outstanding letters of recommendation, research experience and/or previous relevant work experience, and goals congruent with the program. The Department of Psychology encourages applications from members of racial/ethnic minority groups.
Students admitted to the graduate program often earn the M.S. en route to the Ph.D., however, this varies across specialty areas and the specific requirements within a given specialty area should be consulted. All students must be full-time until completion of all requirements of the doctoral program other than the dissertation have been met.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Other Deadlines: Please visit the program website at http://www.psyc.umd.edu/landing/Graduate

Degree Requirements

Master of Science (M.S.)

The M.S. degree requirements are a research thesis (6 credit hours) and 24 credit hours including two courses in statistics. The department does not offer a terminal M.S. Rather, students admitted to the graduate program often earn the M.S. en route to the Ph.D.

Doctor of Philosophy (Ph.D.)

Core Requirements
Students are required to complete 12 credits of PSYC 899: Doctoral Dissertation Research. In addition, students must complete three quantitative courses. The remainder of the student's coursework should be decided with their advisor.

In addition to a quantitative core consisting of three courses, all students are required to take three core courses in areas outside their specialty program. These core courses are designed to provide a breadth of knowledge in psychology. Additionally, each program has requisite coursework and comprehensive examinations. A minimum of 12 credit hours for the dissertation is required for a doctoral degree. In addition to attending classes, students are expected to take part in research.

Facilities and Special Resources

The Department shares a building with the Biology Department and is centrally situated on campus near three libraries and the student union. The Department has state-of-the-art laboratories, computer facilities, and video equipment. The geographic location in a suburb of Washington, D.C. provides access to a wide variety of laboratory and training facilities in governmental and other agencies. In addition, we are near the national headquarters for The American Psychological Association and Association for Psychological Science.

The Department follows all regulations involved in the use of human subjects and animals.

Financial Assistance

The Department attempts to provide financial aid for all incoming students, although aid is not guaranteed. The different possible types of financial support include fellowships (nominated by the department), teaching assistantships, research assistantships, work on campus, and funded externships.

Public Administration (MPPA)

Graduate Degree Program
College: Public Policy

Abstract
The School of Public Policy is one of the nation's leading graduate programs devoted to the study of public policy, management and international affairs, with particular expertise in the fields of environmental policy, energy policy, international development, international security and economic policy, health policy, education policy, social policy, non-profit management, public management and leadership,acquisitions, and public finance. The School offers a wide variety of master's programs, joint degree programs, graduate certificate programs, and one of the nation's premier doctorate programs. The School's location just outside of Washington, D.C. attracts a stellar faculty of scholar-practitioners who are experts in the theory and practice of public policy and management and influential participants in the nation's policy-making process. The location and faculty in turn attract outstanding students by providing them, not only an in-depth, rich curriculum, but extensive exposure to and interaction with the real-life world of policy-making, the federal government, the international diplomatic community, state and local governments, and a host of non-governmental and multinational organizations. It is one of the few policy schools to combine state, national and international policy study under one roof, and to take into account policy interests in all sectors of the economy, thus allowing both faculty and students to study the full range of issues in all courses and in all research.

Master of Professional Studies (M.P.S.)

Total Credits	Core Requirements
Non-thesis only: 36 credits	PUAF 610: Quantitative Aspects of Public Policy (3 credits)

required	PUAF 620: Political Analysis (3 credits) OR PUAF 688A: Public Policy Seminar (3 credits) PUAF 670: Public Budgeting & Financial Management (3 credits) PUAF 711: Public Management and Leadership (3 credits) PUAF 640: Microeconomic and Policy Analysis (3 credits) PUAF 688M: Public Policy Seminar (3 credits) Electives (6 credits) *Students should consult with their advisor to determine remaining course requirements.

The Master's of Professional Studies in Public Administration (MPPA) program provides an in-depth education for students seeking professional careers in public administration. The MPPA requires the completion of 36 credit hours in various aspects of public administration and policy. The program can be completed in either 16 months or 21 months. It is particularly appropriate for international students and uses numerous examples and case studies from around the world. It is cohort-based, with all students in a cohort taking the same courses. Please check the School's website to find out when the next cohort is expected to be formed.

Between the first and second year, and/or during the academic year, most students engage in internships in international, federal, state or local government agencies, non-profit organizations, or private firms that are engaged in public administration. In addition to offering practical experiences and the opportunity to further develop skills acquired during the first year, these internships provide students with contacts and relationships useful for future projects and job placement.

Public Health Practice and Policy (PHPP)

Graduate Degree Program
College: Public Health

Abstract
Healthcare is the largest industry in the U.S. and employs over 11 million workers. 21st century health care professionals require cutting-edge knowledge and exemplary leadership skills to enable their organizations to rise to societal, technological, ethical, financial, and public health challenges. To meet the growing demand for skilled health care professionals, the Department of Health Services Administration, School of Public Health, at the University of Maryland offers an exceptional professional learning opportunity in Public Health Practice. The Master of Public Health in Public Health Practice and Policy (MPH-PHPP) is designed to provide working professionals with the broad range of knowledge and skill-based competencies needed to assume leadership roles in addressing important public health practice and policy issues nationally and globally. The program offer courses in the fall and spring semester (16 weeks each) and Summer Term (two 6-week sessions). The curriculum and degree has the same content, quality, and high standards as the University's traditional on-site curriculum and reflects the broad range of knowledge and skill-based competencies germane to public health practice in the 21st century. Instruction is delivered by School of Public Health faculty and experts from prominent public health organizations. The School of Public Health is accredited by the Council on Education for Public Health.

Admissions Information
General Program and Admission Information for the MPH in Public Health Practice and Policy can be found here: https://oes.umd.edu/graduates-post-baccalaureates-professionals/professional-graduate-programs/graduate-programs-public-health-practice
UMD cannot issue the immigration documents necessary for international students to study (F1 or J1 student visas) in this program. International students who currently reside in the U.S. on existing visas may apply. Eligible international students have additional requirements per the Office of International Student & Scholar Services (ISSS). Additional Requirements can be found here: https://oes.umd.edu/graduates-post-baccalaureates-professionals/professional-graduate-programs/graduate-

The Master of Public Management (MPM) policy track is a 36 credit degree program for professionals with at least 5 years of policy and management experience. The program is identical to the MPP program except that students take four fewer general electives and may substitute a policy or management elective for the capstone course required in the MPP program.
Courses are offered throughout the day, but it is sometimes possible to complete the program by taking only courses beginning no earlier than 4:15pm. Students usually finish the program in three years by taking two courses each fall and spring semester, but can finish in as many as five years, or as few as one year by taking four courses in the fall and spring semesters, 1 during the winter semester, and 3 during the summer semester.

Most MPP students take 4 courses per semester and finish the program in two years. Students may instead take 1-4 courses each semester and complete the degree in two-five years.
Between the first and second year, and/or during the academic year, most full-time students engage in internships in international, federal, state or local government agencies, non-profit organizations, or private firms that are engaged in the policy process. In addition to offering practical experiences and the opportunity to further develop skills acquired during the first year, these internships provide students with contacts and relationships useful for future projects and job placement.
About 150 students from a wide variety of undergraduate schools and majors, from all parts of the country, and from around the world enter the program each fall. The mean undergraduate grade point average of entering students is 3.6 and GRE scores average in the low to mid 600s.

Public Policy and Law (LMPO)

Graduate Degree Program
College: Public Policy

Abstract
The School of Public Policy is one of the nation's leading graduate programs devoted to the study of public policy, management and international affairs, with particular expertise in the fields of environmental policy, energy policy, international development, international security and economic policy, health policy, education policy, social policy, non-profit management, public management and leadership,acquisitions, and public finance. The School offers a wide variety of master's programs, joint degree programs, graduate certificate programs, and one of the nation's premier doctorate programs. The School's location just outside of Washington, D.C. attracts a stellar faculty of scholar-practitioners who are experts in the theory and practice of public policy and management and influential participants in the nation's policy-making process. The location and faculty in turn attract outstanding students by providing them, not only an in-depth, rich curriculum, but extensive exposure to and interaction with the real-life world of policy-making, the federal government, the international diplomatic community, state and local governments, and a host of non-governmental and multinational organizations. It is one of the few policy schools to combine state, national and international policy study under one roof, and to take into account policy interests in all sectors of the economy, thus allowing both faculty and students to study the full range of issues in all courses and in all research.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) or Graduate Management Admissions Test (GMAT)
- CV/Resume
- Supplementary Application
- JD application: Law School (JD) Requirements: applicants should check with the University of Maryland Law School. Applicants must apply to the M.P.P. and law programs separately and be accepted by both programs.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	16 May (Final) / 17 Jan (Preferred for funding)	15 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Mar	29 Sep

Other Deadlines: Please visit the program website at http://www.publicpolicy.umd.edu
Degree Requirements
Master of Public Policy and Juris Doctorate (dual degree) (M.P.P. and J.D.)

Core Requirements
Students are required to complete 114 total credits with 39 credits in Public Policy and 75 credits taken in Law. **Required Public Policy courses include:** PUAF 688E: Normative and Political Dimensions of Public Policy (3 credits) PUAF 688G: Management and Accountability (3 credits) PUAF 640: Microeconomics (3 credits) PUAF 610: Quantitative Aspects of Public Policy (3 credits) PUAF 688I: Macroeconomics (2 credits) PUAF 688R: Budgeting and Finance (2 credits) PUAF 688Y: Practicing Public Policy in the 21st Century (3 credits) PUAF 688T: Team-Based Policy Lab (3 credits) PUAF 699W: Policy Engagement Project (2 credits) PUAF 790: Policy Engagement Project (3 credits)

The University of Maryland School of Law (located in Baltimore) and the School of Public Policy offer a dual program of studies leading to both the MPP and JD degrees, in less time (often four years) and at less cost than if the degrees were obtained separately. Because they can double-count 9 credits taken at each school towards the other school, students complete 75 (versus 84) credits at the law school and 39 (versus 48) credits in the policy school, thus saving 18 credits.
Candidates must separately apply to the dual degree program in both the law school and the policy school. If admitted by only one program, the student may enroll in that program.
For further discussion of admission and degree requirements, students may consult each school's website.

Degree Requirements
Master of Public Policy and Master of Science (dual degree) (M.P.P. and M.S.)
As environmental problems become more scientifically and politically complex, employers and researchers in the environmental analysis and policy fields are increasingly looking to hire graduates who are well-grounded in the natural and life sciences, the workings of the public, private and non-government sectors, and the key policy analysis tools and concepts. The College of Computer, Mathematical and Natural Sciences and the School of Public Policy offer a dual program of studies leading to both the MPP and the Master of Science in Sustainable Development & Conservation Biology in less time and at less cost than if the degrees were obtained separately. Because they can double-count some credits taken in one program towards the other program, students complete a total of 60 credits in the dual program versus 48 in the policy school and 39 in the M.S. program, thus saving 27 credits. Otherwise the requirements of both degree programs must be met.
Candidates must separately apply to the dual degree program in both the M.S. program and the policy school. If admitted by only one program, the student may enroll in that program.
For further discussion of admission and degree requirements, students may consult each school's website.

Quantitative Finance (BMQF)

Graduate Degree Program
College: Business

Abstract
The University of Maryland's Robert H. Smith School of Business Master of Quantitative Finance (MQF) program is designed for students who aspire to enter into mathematically complex fields such as risk management or institutional asset management. The MQF will be one of the most rigorous, career-beneficial degrees of its kind in the Washington, D.C., area.

Admissions Information
For more information about the MQF program, please contact the MBA/MS Admissions office at 301-405-2559 or masters@rhsmith.umd.edu

Real Estate Development (RDEV)

Graduate Degree Program
College: Architecture

Abstract
The Graduate Program leading to a Master of Real Estate Development is based in the School of Architecture, Planning & Preservation, but it is NOT a design degree. It was the 6th program in the country to offer a comprehensive business based, but multi-disciplinary, approach to real estate development education. There are now more than 20 of these programs offered across the US that recognize that real estate development in it's actual practice is multi-disciplinary and requires weighing the financing and investment options in conjunction with consideration of the construction, design, planning and asset management of real estate. In sum -- Real Estate Development -- is all of the above: Finance Plus!! And education for everyone who has an interest in the regulation, development, acquisition, financing or management of real estate will be more effective if they have completed a comprehensive degree about real estate, and not simply 2 or 3 courses about finance and valuation. The 33-42 credit MRED program stresses a comprehensive approach to real estate development, broadly defined, and encompasses traditional real estate finance topics but goes on to address the full range of development issues--from property acquisition, to planning and permitting, contract and property law, investment and finance, design and construction, as well as marketing, commercial leasing, property, portfolio and asset management. The program aims to assure that graduates can effectively engage lenders, investors, architects, contractors, lawyers, accountants, and public officials as well as how to bring a project in on time with dynamic marketing and efficient property management thereafter.

The program uses three key teaching/learning approaches: (1) the traditional graduate reading and research mode, (2) the popular case study review and discussion method, and (3) the active learning, or practice method, engaging the professional development community as partners in class and in the field to enliven the concepts presented in the classroom. All of the instructors for the program are active professionals in the real estate field. Graduates are not only provided foundational real estate knowledge, but are prepared to enter the real estate industry with important skills in business writing, presentation, leadership and negotiation as well as a keen awareness of the MRED Quadruple Bottom Line and ability to develop real estate properties that are: Economically Viable, Environmentally Respectful, Socially Responsible and Beautifully Designed.
The sequence of courses and number of semesters to complete the program can be tailored to the academic preparation and any work experience of each student. There is no requirement for work experience. Students may elect an: *Accelerated Path*--12 months (for students with real estate education or extensive experience); *Full time Path*--15-18 months (for students not working more than 10 hours a week); or *Part Time Path*--24-60 months (for students working 20 hours or more a week). The program admits up to 30 new students in each of the Fall (late August) and Spring (late January) terms. Students have up to 5 years to complete all their course work, although the average time for part time students is 24 months, 18 months for full time students. All real estate (RDEV) courses are offered in the evenings on one night a week, with courses scheduled Mondays through Fridays in the Spring and Fall terms. Some courses are delivered in executive-style workshop format over long weekends. Limited courses are offered evenings in Summer and Fall on more intensive schedules. Electives in other programs may be scheduled late afternoon or on multiple days. Students may use one elective course to take a study abroad course offered by any of the programs in the School provided the academic advisor verifies sufficient real estate content to the course. Additional reduced fee courses in desirable skills are periodically offered through the Colvin Institute, such as Preparation for the LEED exams, ARGUS, Co-Star and REFM Financial Modeling

While the program is quite flexible, there are some restrictions to consider. Students who are working full time are not permitted to take more than two courses in any one semester. Course offerings in the Winter and Summer term are very limited, and students may not enroll in more than one course in the Winter and two in the Summer. Scholarship funds are not available for

Winter, Summer and Study Abroad courses. Students desiring to follow the accelerated path (4 courses per term) need to request early advising and plan their course sequence carefully and may not be working even part time. Completion of the degree in 12 months is only guaranteed to be available for students starting in the Fall term and only for those who have real estate finance education or experience.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE), Law School Admissions Test (LSAT), or Graduate Management Admission Test (GMAT)
- CV/Resume
- Skills Assessment: This assessment is not used in determining your admission to the program. Self assessments are used for placing students into the proper sequence of courses once admitted. (This is a section within the online application.)
- Writing Sample: (A writing sample of 3-5 pages in business style writing related to real estate. This can be previous individual academic or professional work. Any confidential information should be redacted.)

Acceptance to the program is on a competitive basis. Applicants are required to have a minimum undergraduate grade point average (GPA) of 3.0 on a 4.0 scale from an accredited University. Applicants who demonstrate a strong interest and aptitude with a GPA below 3.0 may be considered based on recommendations or proven success in the field. Such applicants are admitted provisionally and may be required to do additional course work.
Applicants for the MRED program are required to submit a GRE/GMAT/LSAT score, unless they are 5 or more years beyond the granting of their undergraduate degree.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements
Master of Real Estate Development (M.R.E.D.)

Total Credits	Core Requirements
Non-thesis only (capstone project required): 33 credits-42 credits	**Core courses:** RDEV 610: Real Property Development Law and Ethics (3 credits) RDEV 630: Real Property Finance and Investment (3 credits) RDEV 690: Capstone Project: Real Property Feasibility Study (3 credits) **Cognate courses:** RDEV 615: Principles, Process and Politics of Planning for Real Property Development (3 credits) RDEV 620: Market Analysis for Real Property Development (3 credits) RDEV 640: Principles of Urban Design for Real Property Developers (3 credits) RDEV 650: Essentials of Design and Construction Management for Development Professionals (3 credits) RDEV 660: Commercial Leasing for Real Property Developers (3 credits) Electives (9 credits) Up to 9 additional credits may be required if there is not adequate

	educational background. Students should check with their advisor.

MRED is a 33-42 credit hour professional masters degree in real estate development. The curriculum has 8 core requirements, 3 electives including a required capstone course integrating knowledge from all parts of the curriculum. There are 3 core required courses in Development Law, Fundamentals of Finance and the Capstone final course. There are 5 cognate areas from which a course must be taken to fulfill degree requirements: Planning and Entitlements, Market Analysis/Valuation, Urban Design, Construction Management, and Asset and Portfolio Management.

Electives may be selected in focus areas of: Advanced Finance, Sustainability, Affordable Housing, Historic Preservation and Urban Planning. There are also electives in types of real estate such as retail, hospitality, and leadership and negotiation skills. Electives may also be taken in any of the cognate areas of Construction, Valuation, and Asset Management. Applicants without education or work experience in real estate, particularly real estate finance, accounting and valuation are admitted subject to adding 3 to 9 credits of additional RDEV course work in the first or second term of their MRED degree program. Students with no background can expect to be subject to the full 9 credits; most applicants have 3 - 6 additional credits to complete.

Admitted Students are required to attend a 2 1/2-day Bootcamp (Assessment and Orientation Program) (Friday night through Sunday afternoon) prior to their first semester of taking RDEV courses.

Students may be required, based on the introductory Assessment sessions or subsequent classwork, to take additional evening or weekend coaching courses/sessions in Excel skills, business writing or oral presentation. Successful completion of all supplemental coaching sessions is required for graduation.

Graduates must achieve a 3.0 GPA in all coursework, including the final capstone course or research project and publicly present their capstone work to a jury in order to be awarded the MRED degree.

Students must meet minimum professional writing and presentation standards, and complete successfully all excel, business writing, and oral presentation and skills non-credit courses or coaching as are offered and required during the period of enrollment. These courses may incur an additional charge paid to the Colvin Institute.

International Students also must test out or successfully complete within two semesters the University English writing courses as determined by the Office of International Student and Scholar Services (ISSS).

The MRED program is highly flexible which allows for tailoring the required core and cognate courses to a student's background and interest, such that a student with a strong background in architecture, law, planning, public policy or finance, could substitute out of the core/cognate course in their area of expertise and add a more advanced course or an unrelated RDEV elective with the advice and approval of the Director. The course work for the core courses is very intense, and off site visits are required in most courses anywhere from 1 to 3 times per semester some of which are scheduled for weekend hours, and some during working hours in limited instances.

Limited Courses are offered during Summer and Winter terms. Students may take no more than two courses over the Summer terms and one course in Winter term. The maximum number of credits toward the MRED degree that may be taken in Summer/Winter terms is twelve (12). One course (no more than 3 credits) may be credited toward the MRED degree for program approved Study Abroad courses. See the Program Director for details before applying for any Study Abroad course. Certificate students are subject to the same requirements as above, but may not take elective or advanced courses or apply a Study Abroad course to the certificate.

Facilities and Special Resources

The University of Maryland is an exceptional location for the pursuit of graduate studies in the field of real estate development, and graduate students are encouraged to take advantage of the opportunities. The University is eight miles from the incomparable library and research facilities of Washington, D.C. In the nation’s capital, MRED graduate students have access to the Library of Congress, as well as the specialized collections of professional associations and international organizations, such as the National Association of Home Builders, the Urban Land Institute, the American Institute of Architects, and the National Building Museum. Access to agencies at all levels of government---municipal, county, state and federal--which regulate various aspects of real estate are all available and engaged with the program.

Close by the University are key historically important and interesting places in the development of U.S. communities, including the 4th settlement in America at Historic St. Mary’s City in Southern Maryland, which was the first planned city in America. Just 10 minutes from campus is the 1930s iconic new town (cooperative) of Greenbelt, Maryland, and within 45 minutes are the

1960's new towns of Columbia, Maryland, St. Charles, Maryland and Reston, Virginia. One of the best examples of New Urbanism is the Kentlands development less than 30 minutes away in Gaithersburg, MD. And not to be missed are the major redevelopment and urban living revivals in the Port City of Baltimore and the historic neighborhoods of Anacostia and Columbia Heights in the District of Columbia, as well as the suburbs that are reinventing themselves in the close in suburbs to the District in Northern Virginia and Maryland.

The program is also the home of the Colvin Institute of Real Estate Development, endowed by the late John Colvin and his wife and Karen. The Institute supports the outreach to the industry through a Council of Advisors, as well as various networking and high profile real estate events on and off campus. Also associated with the School is the National Center for Smart Growth Research and Education, which involves faculty and graduate students from several campus units in multi-disciplinary research on the fiscal, environmental and social impacts of alternative development patterns; evaluation of growth management strategies, transportation patterns and planning therefor, as well as technical assistance to state agencies and local jurisdictions.

The program's location in College Park, Maryland, with direct Metro access to downtown Washington, D.C. and easy access up the Baltimore-Washington Parkway to Baltimore City, makes field work, site visits and interaction with ongoing real estate developments and developers one of the signature features of the MRED program.

The MRED Council of Advisors, as well as adjunct faculty who are active professionals in all aspects of real estate development, are eager to engage with students in the program which offers formal and informal occasions for advice about the current trends in the industry as well as the possibility of full- or part- time employment or internships.

There is an active student real estate club, SoRED, and also a strong MRED alumni group who are very effective in helping each other find positions as well as post jobs from where they are for current MRED students to consider. Announcements about full time and intern positions are posted to the MRED list serve frequently. Adjunct faculty and guest speakers also are generally very willing to help students network and connect with employment resources once they have completed their core courses. The School also has a placement officer who is available by appointment to help students in their search.

Financial Assistance
The Program provides scholarship funds to a number of qualified students, both part time and full time, each term. Scholarship determinations are made at the time of application and admission. Scholarships are awarded on a per course basis and commitments are made at the time of admission and apply to the entire program (other than Study Abroad, Summer and Winter courses), subject to academic performance.

The Colvin Institute offers a limited number of administrative positions to full time MRED students. Contact the Program Director to apply.

Periodically there are named scholarships provided by various real estate organizations or development companies.
In addition, there are work opportunities both on, and off campus, and they are relatively plentiful. Students in the past have been successful in finding part time internships and full time work with local real estate companies. The MRED student listserv posts openings periodically as they are brought to the attention of the Program by alumni, friends, faculty and sponsors.

Applicants should inquire as to the availability of funding for the term they are starting. Scholarships are typically for a portion of tuition only, and are paid on a per course basis as a student progresses through the program. Scholarships are available to part time, full time, and accelerated students.

If tuition costs are a major factor in your choice of real estate program, please contact us about financing possibilities. The total cost of the MRED degree is the most competitive in the region, and one of the lowest nationall, with a cost-benefit ratio that is unparalleled. There are also significant University and Colvin Institute resources available for student enrichment activities such as support for competitions, site visits, and attendance at local, regional and national real estate events.

The MRED program is known for sending 4 teams to the Final Four of the international ULI Competition, and taking first prize twice.

Contact Statement
To arrange a visit, phone interview, or for more information, please contact the Program Director, Margaret McFarland, at mmcf@umd.edu. Additional information on case competitions, samples of student work, as well as syllabi and adjunct faculty bios can be found at the MRED Program's Web site (http://arch.umd.edu/rdev/real-estate-development) and the Colvin Institute site at www.colvininstitute.org. For information about our industry supporters and Colvin Institute activities go to www.colvininstitute.org. You will also find the Colvin Institute providing outreach and information at the ICSC in Las Vegas

each May, at the ULI or NAIOP National Conference each Fall, and at many local events of Bisnow, ICSC, ULI, CREW, NAIOP, AAREP, and HAND.

Real Estate Development (Z029)

Graduate Certificate Program
College: Architecture

Abstract
The Graduate Certificate in Real Estate Development is a 12 - 21 credit program, depending on the work experience and academic preparation of the applicant. The Certificate is primarily designed for obtaining the introductory basics of real estate development for those who may not yet have determined to make their career in the field. However, the courses required may be adapted to prior experience or level of expertise for those who are looking for advanced work. The Certificate is comprised of the two fundamental courses for the Master's degree plus two cognate courses, as well as any courses (3 - 9 credits) that would be additional preparation courses as specified in an admission letter. The basic and preparatory courses are all offered to Masters students as well, and Certificate students are not in separate courses for either preparatory courses or for the RDEV (real estate development) courses.

Up to four courses taken as part of the Certificate may be counted toward the MRED degree upon completion of the certificate if the student applies and is accepted into the MRED degree program. Successful completion of the Certificate with grades of B or better assures admission to the MRED program. Up to additional 9 credits of leveling course work may be required before a Certificate student may move on to the core real estate certificate courses, depending on the background and experience of the applicant.

Students subsequent to admission are subject to three assessments: of Excel Skills, Business Writing and Oral Presentation skills. Students who do not meet minimum standards in the Orientation assessments, or if determined during early coursework that skills are insufficient, may be required to take additional evening or weekend coaching courses in order to meet the Program's Professional Skills Standards.

Generally, Certificate Students take 6 credits (2 courses) per term, and can finish in two terms, if no additional leveling preparatory courses are required. Students required to complete a full 21 credits, can still finish in 15 months by taking classes through two summer sessions as well as 3 spring and fall terms. However, a Certificate student may, if they are not working, take a maximum of four courses per term. There is no guarantee that the four required courses for the Certificate, however, will be offered in each term. There is more information about the courses and teaching methods used for the Graduate Certificate Real Estate Development sequence at the catalogue entry for RDEV -- Real Estate Development. There is also information on all the real estate graduate programs, including dual degrees available with business,l historic preservation and architecture at the web site www.arch.umd.edu/real_estate_development.

Certificate students are not eligible to take elective RDEV courses or the Capstone course prior to admission to the Master's program. Certificate students may, on a space available basis, participate in Study Abroad courses, but not for credit towards the Certificate degree.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- CV/Resume
- Skills Assessment: This assessment is not used in determining your admission to the program. Self assessments are used for placing students into the proper sequence of courses once admitted. (This is a section in the online application.)

Acceptance to the Certificate program is competitive. Applicants are required to have a minimum undergraduate grade point average (GPA) of 3.0 on a 4.0 scale from an accredited University. Applicants who demonstrate a strong interest and aptitude with a GPA below 3.0 may be considered on a case by case basis if they show a strong aptitude and/or experience in the field. Such applicants are admitted provisionally based on meeting grade expectations in the program and likely will be required to take additional courses.

No transfer credits from graduate work in other programs at the University of Maryland, or other academic institutions, are accepted towards the Certificate.

Incoming students are required to attend a two day Bootcamp (Orientation and Assessment Program) on the Saturday and Sunday before the beginning of the term in which they take their first course. Based upon Assessments of Professional Skills, additional coaching sessions on Saturdays or late afternoons (5:00 - 7:00pm) may be required for those who do not meet minimum skills in Excel, Business Writing and Oral Presentation. Fees may be charged for such courses, although currently the Colvin Institute covers the cost. Attendance at the Assessment sessions and any follow-up coaching is required to be awarded the Certificate, although the grading is on a pass/fail basis.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements
Post-Baccalaureate Certificate (P.B.C.)

Total Credits	Core Requirements
12 credits required	RDEV 688A: Development Law (3 credits) RDEV 630: Fundamentals of Real Estate Development and Finance (3 credits) Two additional courses selected from cognate areas in Design, Construction, Asset Management and Planning/Entitlements (6 credits) *Students without finance and real estate education or experience typically take an additional 5-9 credits*

A 12 - 21 credit introductory program to real estate development. Recommended for those considering whether to move into the real estate development field full time. Courses may be applied to the Master of Real Estate Development Program, if a student desires to go on to full professional preparation

The 4 required courses of the Certificate are Development Law, Process and Ethics; Fundamentals of Development Finance, and 1 course from two of the following groups: Urban Design, Asset and Property Management, Planning and Entitlements Policy and Practice, and Design and Construction Management. For students without academic preparation in finance, accounting and economics additional leveling courses are required in those areas before proceeding to the required courses. Students may begin the Certificate program in either the Fall or Spring terms. Applications are reviewed and admission decisions are issued on a rolling basis

Waivers of the deadline for domestic applicants may be available depending on the number of applicants already admitted.

Facilities and Special Resources
The Facilities and Special Resources available to RDEV (Master of Real Estate Development students) are generally available to Graduate Certificate students. Although, Certificate students may not participate in supported competitions, and financial aid may be more limited. Certificate students are not eligible to take the Capstone course, without applying and completing the Master's requirements. To read about the extent of the facilities and special resources available please check the catalogue of the RDEV program or the web site at www.arch.umd.edu/real_estate_development

Financial Assistance
Financial aid through the University administered federal loan programs is now available for Certificate students. This is an exception to the general rule, and is based on application and approval received from the federal government as to the standards of admission and requirements of the program. Contact the Program Director after application as to any available Program scholarship assistance, which, depending on the term, may or may not be available for Certificate students. Scholarship awards from the Program are never available for Summer and Winter term courses or for Study Abroad.

Reliability Engineering (ENRE)

Graduate Degree Program
College: Engineering

Abstract
Reliability Engineering is an interdisciplinary program of the Department of Mechanical Engineering. The academic and research programs are based upon the recognition that the performance of a complex system is affected by engineering inputs that begin at conception and extend throughout its lifetime. Students may specialize in Assessment (Root-Cause Failure Analysis, Probabilistic Risk Assessment, Common-Cause Failures); Testing and Operation (Operator Advisory Systems, Human Reliability, Software Reliability); Manufacturing (Statistical Process Control, Improved Manufacturing Methods); Component and Structures Reliability (Microelectronics and Materials); or Electronic Packaging Reliability.

Admissions Information

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Publications/Presentations

The Program offers graduate study leading to the Master of Science, Professional Master of Engineering (offered through the Office of Advanced Engineering Education), and Doctor of Philosophy degrees and is open to students who have a Bachelor of Science degree in engineering, physics, or mathematics and obtained a GPA of at least 3.0 on a 4.0 scale from accredited programs. An individual plan of graduate study compatible with the student's interest and background is established by the student in consultation with an advisor. In some cases, it may be necessary to require background courses to fulfill prerequisites. For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	15 May	15 Dec
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Mar	29 Sep

Other Deadlines: Please visit the program website at http://www.enme.umd.edu

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements	Specialization Options
Thesis option: 30 credits **Non-thesis option (scholarly paper):** 30 credits	ENRE 600: Fundamentals of Failure Mechanisms (3 credits) ENRE 602: Reliability Analysis (3 credits)	**Thesis option:** Six credits of ENRE 799: Master's Thesis Research are required. **Non-thesis option:** Scholarly paper is required.

The M.S. degree program offers thesis and non-thesis options. The thesis option requires 24 credit hours of coursework and 6 credits of thesis research. Students who enroll directly in the Ph.D. program or students who transfer into the Ph.D. program from the M.S. program by passing the Ph.D. qualifying examination may obtain a non-thesis M.S. degree upon advancing to doctoral candidacy. The non-thesis option requires 30 credit hours of coursework, a scholarly paper, and presentation. All students must complete the Program Core requirements as well as all of the Graduate School requirements.
The Professional Master of Engineering (M.Eng.) program in Reliability does not require a thesis, but students must complete at least 30 credits of approved coursework.

Doctor of Philosophy (Ph.D.)

Core Requirements
1. Doctoral students compile a program of study with their advisor, which is then submitted to the Graduate Studies Office of the Department of Reliability Engineering for approval. This should be submitted in the first semester of study. 2. Doctoral students must complete 36 credits of courses with at least 30 credits at the 600 level or above, including the required courses for the M.S. degree (ENRE 600 and 602). 3. In addition, students must complete 12 credits of ENRE 899: Doctoral Dissertation Research. 4. Students must pass the Ph.D. qualifying examination and successfully produce and defend a Ph.D. dissertation on an original research topic after the core courses and at least two additional ENRE elective courses are taken.

For the Ph.D. degree, students must complete a minimum of 36 credits of approved graduate courses (a minimum of 18 credits of coursework at the University of Maryland) and 12 credits of dissertation research, with a minimum 3.0 GPA overall. In addition, students must pass the Ph.D. qualifying examination and successfully produce and defend a Ph.D. dissertation on an original research topic after the core courses and at least two additional ENRE elective courses are taken. The GPA for these four courses must be 3.5 or higher.

Facilities and Special Resources: Students and faculty have access to a host of special facilities in the College of Engineering, including the nuclear reactor, an 8-MeV electron linear accelerator; environmental chambers; mechanical testing, SEM, X-ray and imaging facilities; and extensive computer resources. The program also has a complete failure analysis laboratory.

Financial Assistance: Financial assistance is available to highly qualified students in the form of research and teaching assistantships. The most outstanding applicants are offered fellowships. Students seeking financial assistance are asked to submit with their applications a current resume or CV as well as a statement regarding their qualifications and/or past research or teaching experience. Financial assistance is sought for all worthy students.

Reliability Engineering (PMRE)

Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Full admission as a degree seeking student requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in engineering or computer science, physics, applied mathematics, physical sciences, or a related field from an accredited institution
- Completion of caluculus I, II, and III and differential equations
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Facilities and Special Resources: Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites

around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance: Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Risk, Compliance, and the Law (Z108)

Graduate Certificate Program
College: Behavioral and Social Sciences

Abstract
The **Graduate Certificate of Professional Studies in Risk, Compliance, and the Law**, offered through the Center of the Study of Business Ethics, Regulation, & Crime, provides post-baccalaureate training and knowledge in the interdisciplinary fields of business law, ethics, criminology, and accounting. This program, along with the Center of the Study of Business Ethics, Regulation, & Crime, is a joint effort between the College of Behavioral and Social Sciences and the Robert H. Smith School of Business.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (2)
- CV/Resume

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland.
Applicants must meet the following minimum admission criteria as established by the Graduate School:

- Applicants must have earned a four-year baccalaureate degree from a regionally accredited U.S. institution, or an equivalent degree from a non-U.S. institution.
- Applicants must have earned a 3.0 GPA (on a 4.0 scale) in all prior undergraduate and graduate coursework.
- Applicants must provide an official copy of a transcript for all of their post-secondary work.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	This program is currently not admitting students.
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	This program is currently not admitting students.

Degree Requirements

Post-Baccalaureate Certificate (P.B.C.)

Total Credits	Core Requirements
12 credits required	BERC 600: Legal and Regulatory Compliance (3 credits) BERC 601: White-Collar Crime and Victimization (3 credits) BERC 602: Accounting and Its Uses in the Forensic Process (3 credits) BERC 603: Investigative tools and Data Analysis (3 credits)

Full-time students complete the 12-credit program in one year by taking three credits (one course) in each of the four 12-week terms. A minimum 3.0 GPA is required to maintain good academic progress for graduation. Students are responsible for keeping track of their progress and should review their academic record to ensure accuracy.

Facilities and Special Resources: To serve the needs of working professionals, courses in Risk, Compliance, and the Law Certificate program are currently offered 100% online in a hybrid format where students will be expected to work both individually and in teams to complete course requirements asynchronously, as well as to participate once per week in a synchronous lecture.

Financial Assistance: This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs
.
Financial Assistance
Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Robotics Engineering (Z084)
Graduate Certificate Program
College: Engineering

Abstract
The Professional Master of Engineering program is a practice-oriented part-time graduate program designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing

business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Two (2) Letters of Recommendation are required for anyone with an undergraduate GPA below 3.0. Anyone with a GPA 3.0 or above should contact the Office of Advanced Engineering Education with a request to waive this requirement.

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. International applicants should consider applying for the online programs.
Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Full admission requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in aerospace, civil, computer, electrical, industrial, or mechanical engineering from an accredited institution
- Completion of calculus I, II, and II and differential equations
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

School Counseling (COSC)

Graduate Degree Program
College: Education

Abstract
The graduate programs in Counseling Psychology, School Psychology, and Counselor Education (CoPE) include several distinct areas of specialization that are designed to provide the knowledge and skills needed for practice and scholarship in counseling and related human service professions. These fields are concerned with assisting people individually, in groups, and in organizations to attain their optimal level of personal, social, educational, and career functioning. Graduates are employed in a variety of settings including schools, colleges and universities, mental health agencies, business and industry, government agencies, and other community service and practice facilities. Depending on the specific area of specialization and level of training, program graduates may serve as researchers, educators, supervisors, psychologists, counselors, or program administrators.

Master's level professional entry-level training is offered in the School Counseling program, which prepares students to become school counselors in elementary, middle, and high school settings. School counselors are leaders, advocates, and systemic change agents who provide individual and group counseling to school-aged children, develop and implement comprehensive developmental school counseling programs, and collaborate with all key stakeholders, including classroom teachers, school administrators, parents, and community members, to ensure the academic, personal-social, and college-career development of students.

The Ph.D. degree is offered in two areas of specialization: Counseling Psychology (in collaboration with the Psychology Department) and School Psychology. Doctoral studies prepare students to achieve exceptional competence in the theory and practice of their field; to develop a high level of skills as researchers, educators and administrators; and to assume positions of leadership in relevant settings. Students in the specialization of Counseling Psychology are prepared to work as researchers, educators, psychologists, and supervisors in such settings as academic departments, college and university counseling centers, and community mental health agencies. Doctoral-level school psychologists serve as researchers, university faculty, supervisors, administrators, and advanced level practitioners. Program accreditation within CoPE includes: The School Psychology and Counseling Psychology doctoral programs are accredited by the American Psychological Association (APA). The School Psychology doctoral program is approved by the National Association of School Psychologists (NASP), and is also approved for certification by the Maryland State Department of Education. The School Counseling masters program is approved by the Maryland State Department of Education.

Note that, since 2012, the CoPE graduate programs have been part of a new department, the Department of Counseling, Higher Education, and Special Education. The CoPE programs were previously housed in the Department of Counseling and Personnel Services.

The **School Counseling** Program at the University of Maryland resides in the number one ranked counseling department (U.S. News and World Report). Graduates of our School Counseling Program are eligible for certification as school counselors in Maryland and other states. The School Counseling Program prepares professional school counselors who will be *leaders*, *advocates*, and *systemic change agents* in K-12 urban educational settings.

Degree Requirements
Master of Education (M.Ed.)

Total Credits	Core Requirements	
Non-thesis only (scholarly paper): 52 credits required	EDCP 610: Professional Orientation (3 credits)	EDCP 616: Counseling II: Theory and Practice (3 credits)
	EDCP 618: Counseling Skills: Introduction to Practicum (3 credits)	EDCP 789X: Lifespan Development (3 credits)
	EDCP 665: Family and Social Support Systems (3 credits)	EDCP 612: Multicultural Issues in Counseling and Personnel credits)
	EDCP 619: Practicum in Counseling (3 credits)	EDCP 651: Group Counseling in Schools (3 credits)
	EDCP 870: Professional Issues Seminar (3 credits)	EDCP 611: Career Development Theory and Programs (3 cre
	EDCP 635: School Consultation I (3 credits)	EDCP 615: Counseling I: Appraisal (3 credits)
	EDCP 652: Research in Counseling (3 credits)	EDSP 600: Issues and Trends in Educating Individuals with I credits)
	EDCP 625: Counseling the Chemically Dependent (3 credits)	EDCP 789T: Program Planning (3 credits)
	EDCP 888G: Counseling Internship (6 credits)	Students must also submit a scholarly paper.
	**EDCP 651 was previously listed twice, in error. Three credits of EDCP 651 are required, as well as three credits of EDCP 61 above chart.*	

Professional entry-level program is offered: a Master of Education (M.Ed.) without thesis in School Counseling. Coursework includes one 100-hour practicum and two 300-hour internships in schools in Prince George's County, District of Columbia, Baltimore City, and other urban public school systems. Students also take courses in counseling, school counseling, research methods, and special education. Students are typically full-time and complete the program in two years.

For more information, please contact Amy Furhmann (furhmann@umd.edu), Graduate Assistant, School Counseling.

Facilities and Special Resources: All master's, A.G.S., and doctoral students are required to include supervised fieldwork experiences in their degree programs. The CoPE programs have excellent cooperative relationships with on-campus facilities, such as the Counseling Center and Health Center. Fieldwork may also be done at a wide variety of school systems, colleges and universities, and counseling services and mental health agencies in the Baltimore/Washington metropolitan area, or nationally.

In addition to campus and program resources, students utilize the many major research and professional institutions that are easily accessible to the campus. These include the Library of Congress, the National Library of Medicine, the National Institutes of Health, the Institute of Education Sciences, professional associations such as the American Counseling Association, the American Psychological Association, and the National Association of School Psychologists.

Financial Assistance: Graduate Assistantship is not available at the masters level. However, there are a number of Scholarships offered through the University, and through external sources which may provide tuition support and/or living allowance. Students are encourage to look for graduate assistantships elsewhere on campus.

School Librarianship (Z114)

Graduate Certificate Program
College: Information Studies

Abstract
The Certificate of Professional Studies in School Librarianship will provide individuals with the coursework required to qualify for certification as a school librarian (library media specialist) in Maryland and in other states with similar certification requirements. The eight required courses, all offered online, may be completed within an 18 month period.

In order to enroll in the certificate program, individuals must have a Master's of Library and Information Science degree or a Master's degree in another field of study and a degree in Education or substantial K-12 teaching experience.

School Psychology (COSP)

Graduate Degree Program
College: Education

Abstract

The graduate programs in Counseling Psychology, School Psychology, and Counselor Education (CoPE) include several distinct areas of specialization that are designed to provide the knowledge and skills needed for practice and scholarship in counseling and related human service professions. These fields are concerned with assisting people individually, in groups, and in organizations to attain their optimal level of personal, social, educational, and career functioning. Graduates are employed in a variety of settings including schools, colleges and universities, mental health agencies, business and industry, government agencies, and other community service and practice facilities. Depending on the specific area of specialization and level of

training, program graduates may serve as researchers, educators, supervisors, psychologists, counselors, or program administrators.

Master's level professional entry-level training is offered in the School Counseling program, which prepares students to become school counselors in elementary, middle, and high school settings. School counselors are leaders, advocates, and systemic change agents who provide individual and group counseling to school-aged children, develop and implement comprehensive developmental school counseling programs, and collaborate with all key stakeholders, including classroom teachers, school administrators, parents, and community members, to ensure the academic, personal-social, and college-career development of students.

The Ph.D. degree is offered in two areas of specialization: Counseling Psychology (in collaboration with the Psychology Department) and School Psychology. Doctoral studies prepare students to achieve exceptional competence in the theory and practice of their field; to develop a high level of skills as researchers, educators and administrators; and to assume positions of leadership in relevant settings. Students in the specialization of Counseling Psychology are prepared to work as researchers, educators, psychologists, and supervisors in such settings as academic departments, college and university counseling centers, and community mental health agencies. Doctoral-level school psychologists serve as researchers, university faculty, supervisors, administrators, and advanced level practitioners. Program accreditation within CoPE includes: The School Psychology and Counseling Psychology doctoral programs are accredited by the American Psychological Association (APA). The School Psychology doctoral program is approved by the National Association of School Psychologists (NASP), and is also approved for certification by the Maryland State Department of Education. The School Counseling masters program is approved by the Maryland State Department of Education.

Note that, since 2012, the CoPE graduate programs have been part of a new department, the Department of Counseling, Higher Education, and Special Education. The CoPE programs were previously housed in the Department of Counseling and Personnel Services.

The **School Psychology** Program is an APA-accredited, research-intensive Ph.D. program in professional psychology that embodies the scientist-practitioner model. Program graduates pursue academic/research- and practice-oriented careers. Graduates of the Program are eligible for licensure as professional psychologists in Maryland and other states, and are also eligible for the Nationally Certified School Psychologist credential awarded by NASP. Graduates are automatically eligible for Maryland State Dept. of Education certification as a School Psychologist.

Admissions Information

Degree Requirements
Certificate of Advanced Study (C.A.S.)

The A.G.S. certificate is offered in some of the CoPE areas of specialization. For individuals who hold a master's degree in counseling or a closely related field, this certificate program may serve: 1) to provide the additional education required for professional certification or licensure in those specialty areas that require a program of two year's length, and/or 2) to provide the academic background for an advanced level of professional practice within a specialty area. **Those interested in the AGS should contact the program *before* applying**.

Master of Arts (M.A.)

Students pursing doctoral degrees may earn the M.A. with thesis within the doctoral program while progressing to the Ph.D.

Doctor of Philosophy (Ph.D.)

Core Requirements

The Doctoral program in School Psychology requires the completion of 101 credits, including 12 credits of EDCP 899: Doctoral Dissertation Research. Included in the 104 credit requirement, students should take one course in each of the following areas for a total of 24 credits: (1) Developmental Psychology, (2) Biological Aspects of Behavior, (3) Cognitive Psychology, (4) Social Aspects of Behavior, (5) History and Systems of Psychology, (6) Assessment Foundations, (7) Research Design, and (8) Cultural and Individual Diversity.

Students are required to complete the following courses:

EDCP 789Q Developmental Psychopathy (3 credits)	EDMS 646 General Linear Models I (3 credits)
EDMS 651 General Linear Models II (3 credits)	EDMS 799 Master's Thesis Research (6 credits)
EDCP 632 Cognitive Assessment (3 credits)	EDCP 633 Diagnostic Appraisal of Children I (3 credits)
EDCP xxx Academic Assessment (1 credit)	EDCP 738 Practicum in Child Assessment (6 credits)
EDCP 630 School-Based Behavioral Interventions (3 credits)	EDCP 789Z Consultation (3 credits)
EDCP 635 School Consultation I (3 credits)	EDCP 789N Therapeutic Approaches with Children (3 credits)
EDCP 789B Theories and Methods of Intervention (3 credits)	EDCP 618 Counseling Skills: Introduction to Practicum (3 credits)
EDCP 651 or EDCP 617 Group Counseling (3 credits)	EDCP 640/641 School Psychology Seminar (3 credits total)
EDCP 888C Field Work (6 credits)	Clinical Supervision course (3 credits)
EDSP xxx Special Education Elective (3 credits)	EDCP 889 Internship (6 credits)

Ph.D. students are expected to attain advanced skills as both practitioners and researchers in their area of specialization. All doctoral students are required to take advanced courses in statistics and research design. Because of the highly specialized nature of each of the doctoral programs, applicants should consult the web page for specific areas of specialization. These pages describe specific course and fieldwork requirements, the nature of the comprehensive examination required for completion of the program, and the dissertation requirements.

Facilities and Special Resources

All master's, A.G.S., and doctoral students are required to include supervised fieldwork experiences in their degree programs. The CoPE programs have excellent cooperative relationships with on-campus facilities, such as the Counseling Center and Health Center. Fieldwork may also be done at a wide variety of school systems, colleges and universities, and counseling services and mental health agencies in the Baltimore/Washington metropolitan area, or nationally.

In addition to campus and program resources, students utilize the many major research and professional institutions that are easily accessible to the campus. These include the Library of Congress, the National Library of Medicine, the National Institutes of Health, the Institute of Education Sciences, professional associations such as the American Counseling Association, the American Psychological Association, and the National Association of School Psychologists.

Financial Assistance

The Department of Counseling, Higher Education, and Special Education offers graduate research, teaching, and administrative assistantships on a selective basis to doctoral students. The Department also assists its students in finding assistantship placements with a variety of on-campus and off-campus units. In addition, a small number of new Ph.D. students are offered highly selective fellowships funded jointly by the Department and the University.

Second Language Acquisition (SLPH)

Graduate Degree Program
College: Arts and Humanities

Abstract
The Ph.D. program in SLA at the University of Maryland aims to train students to conduct research on second language acquisition processes. It has a strong cognitive focus. The program draws upon the expertise of a distinguished cadre of faculty in the School of Languages, Literatures and Cultures, and in affiliate departments such as Human Development, Linguistics; Measurement, Statistics, and Evaluation; Hearing and Speech; Philosophy; Psychology; and Curriculum and Instruction
.

Other Deadlines: Please visit the program website at http://www.sllc.umd.edu

Degree Requirements
Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to take 3 credits of SLAA 649R within their first year. In addition, students choose two courses from two different specializations for a total of 4 courses. Specializations available include Second Language Learning, Second Language Instruction, Second Language Measurement and Assessment, and Second Language Use. Students are also required to complete 2 courses in quantitative and/or qualitative research methods, as well as 12 credits of SLAA 899: Doctoral Dissertation Research.

The Ph.D. has 4 areas of specialization: **Second Language Learning, Second Language Instruction, Second Language Measurement and Assessment**, and **Second Language Use**. Students select 2 courses each from 2 of these areas (for a total of 4 courses) and are expected to take 2 additional electives in the area of their proposed dissertation work. In addition, all students are expected to take 2 courses in quantitative and/or qualitative research methods. The 8 courses (total) represent the minimum coursework requirement. Some students may need remedial coursework prior to undertaking their 8 courses, and many will wish to take courses beyond the minimum 8 based on their interests. Additionally, all students are strongly encouraged to take a course in the philosophy of science. Before graduation, all students completing the PhD in Second Language Acquisition must demonstrate three types of experience with non-native language: learning a non-native language, using a non-native language, and teaching a language to non-native speakers of that language. All three types of experience will be verified through official documentation and/or assessment as follows:

1. Language Learning. Students must have spent at least two semesters as a student of a non-native language in a post-secondary classroom environment (6 total credits minimum). Verified through transcript. SLLC will provide this experience for any student who needs it.
2. Language Teaching. Students must have taught a language to non-native speakers of that language for at least 1 semester, or the equivalent of 45 hours. Verified through contract, letter, etc. SLLC will provide this experience for any student who needs it.
3. Language use. Students must show that they are able to communicate in a non-native language at the intermediate-low level on the ACTFL scale through an Oral Proficiency Interview (OPI). Students whose native language is not English will be able to satisfy this requirement through their competency in English. These three requirements do not necessarily have to be met in the same language. Before the PhD dissertation, two qualifying papers are required. Please see the program website for more details.

Facilities and Special Resources
In addition to the University graduate library, the SLA program offers research facilities and resources to facilitate research and materials development, including a multimedia SLA Lab, the Language House, The Center for Innovative Teaching and Learning, the Office of Information Technology, and the Center for Teaching Excellence.
Students completing coursework with affiliate faculty in the Departments of Psychology, Communication, Linguistics, and Education as well as the Center for Advanced Study of Languages may have access to their respective resources.
Financial Assistance
Most students admitted to the Ph.D. program will be funded, either via graduate or teaching assistantships or via research assistantship on grants and contracts, all providing tuition waiver plus stipend. Some students may receive a Graduate Assistantship from the UMCP-affiliated Center for the Advanced Study of Language (CASL) or the National Foreign Language Center (NFLC, a unit within the College of Arts and Humanities (ARHU).

Second Language Acquisition (SLMA)

Graduate Degree Program
College: Arts and Humanities

Abstract
The M.A. is intended primarily as a two-year program for full-time students. A very limited number of part-time students would also be admitted. It will provide students with rigorous, comprehensive training in the theory and research of second (including foreign) language learning, teaching and testing, and related areas. A major program focus includes preparation for those working, or intending to work, in programs for tertiary students and adults studying less commonly taught languages (LCTLs), e.g., East-Asian and Middle-Eastern languages, and such modern European languages as Spanish, French, Italian and German. Areas of particular faculty expertise include cognitive processes in SLA; language teaching methodology and pedagogy; psycholinguistics; language processing; individual differences in such factors as age, aptitude, and working memory; second language analysis; interlanguage studies; heritage learners; needs analysis; syllabus design; materials writing; learner training; language assessment; program evaluation; second language research methods; task-based language teaching; and uses of technology in language learning and testing.

Admissions Information
General Requirements:
- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE): The GRE is required of all native speakers of English and recommended for non-native speakers.

Students may enter the program in the Fall semester only. Prior to admission to the program, applicants must have successfully completed a Bachelors degree from an accredited university in a relevant field, e.g., linguistics, applied linguistics, psychology, foreign languages, applied linguistics, cognitive science, anthropology or education.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	17 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	1 Feb

Degree Requirements

Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis option: 30 credits **Non-thesis option:** 30 credits	**Core courses:** SLAA 610: Research and Theories in Second Language Acquisition (3 credits) SLAA 611: Fundamentals of Foreign Language Acquisition and Instruction (3 credits) SLAA 630: Second Language Testing (3 credits) SLAA 640: Psycholinguistics (3 credits) SLAA 650: Second Language Analysis (3 credits) SLAA 620: Second Language Research Methodologies (3 credits) **Thesis option:** In addition to the core courses, thesis students must complete 6 credits of approved electives and 6 credits of SLAA 799: Master's Thesis Research. **Non-thesis option:** In addition to the core courses, non-thesis students must complete 12 credits of approved electives.

The M.A. in SLA is a 30-credit program, with two tracks: Plan A, by coursework and thesis, and Plan B, by coursework only. These two tracks are meant to accommodate two slightly different populations, those planning on going on for the Ph.D. at Maryland or elsewhere (Plan A) and those who will be consumers and interpreters rather than producers of research and for whom the M.A. will be a terminal degree (Plan B). A Certificate in SLA will also be offered. The Certificate requires 18 credit hours of course work from the Plan B curriculum.

Facilities and Special Resources

In addition to the University graduate library, the SLA program offers research facilities and resources to facilitate research and materials development, including a multimedia SLA Lab, the Language House, The Center for Innovative Teaching and Learning, the Office of Information Technology, and the Center for Teaching Excellence.
Students completing coursework with affiliate faculty in the Departments of Psychology, Communication, Linguistics, and Education as well as the Center for Advanced Study of Languages may have access to their respective resources.

Financial Assistance

Masters Degree and Certificate students in the College of Arts and Humanities are rarely offered funding. It is expected that students admitted to the SLA M.A. or Certificate Program will come with outside sponsorship.

Sociology (SOCY)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The Graduate Program in Sociology is designed for students seeking a Ph.D. degree. However, the M.A. option is available to students who either wish to obtain a master's degree while continuing in the Ph.D. program, or who leave the program before finishing the PhD. Areas of emphasis in the Department include: demography; development; gender, work, and family; globalizing theory; military sociology; social psychology; and stratification.
Typically, about half the students finishing Ph.D. degrees in the Sociology Department work as faculty members at colleges and universities, and about half are working in research, administration, and consulting in federal, state, or private organizations. Our location in the Washington, D.C., area offers an unusual number of full-time research opportunities for our graduates.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE): Ph.D. only
- CV/Resume
- Supplemental Application (Ph.D. only)
- Writing Sample (Ph.D. only)

Admission to the graduate program is based upon the student's academic record, GRE scores, letters of recommendation, and other information relevant to the applicant's chances of being successful in the program. Although a previous major in Sociology is not required, students entering the graduate program should have had the following in undergraduate courses: mathematics through college algebra, elementary statistics, sociological theory, and sociological research methods. Students who have completed prior graduate coursework in Sociology may petition to waive one or more courses in Social Theory, Statistics, or Research Methods. New graduate students are assigned temporary advisors upon arrival, and are then expected to select a permanent advisor who will direct their dissertation research. For consideration for departmental fellowships or assistantships, applications should be received by the preferred deadlines.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	4 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	4 Jan

Other Deadlines: Please visit the program website at http://www.socy.umd.edu

Degree Requirements
Master of Arts (M.A.)
The graduate program in the Department of Sociology is designed for Ph.D. students. We do not offer a terminal Masters program and we will not accept or enroll students for the single purpose of acquiring a Masters degree. However, doctoral students may obtain a Master of Arts degree during their course of doctoral study by completing 30 credit hours, including 1) two courses in statistics (6 cr.); 2) one in methodology (3 cr.); 3) one in theory (3 cr.); 4) one computer skills course (1 cr.); 5) one course in proposal development (3 cr.); 6) an original research paper completed in the fourth semester (3 cr.).

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete a total of 56 credits including 12 credits of SOCY 899: Doctoral Dissertation Research. In addition, students must complete a Second-Year Research Paper and pass two specialty exams. **Coursework:** SOCY 616: Sociology Pro-Seminar (1 credit) SOCY 620: Development of European and American Sociological Theory (3 credits) Social Theory course (3 credits) SOCY 601: Statistics For Sociological Research I (3 credits) SOCY 602: Statistics For Sociological Research II (3 credits) SOCY 699D: Special Social Problems (3 credits) Advanced statistic course or a research methods course (3 credits) SOCY 699C: Special Social Problems (3 credits) Statistical Techniques course (3 credits) Specialization courses (18 credits)

After completion of the coursework, doctoral students must pass two examinations qualifying them to write their dissertations in the specialties of their choice. Upon the recommendation of the appropriate faculty members, the Department Graduate Committee approves the coursework qualifying students to take the two examinations.

Facilities and Special Resources: In addition to these programs, the department is closely involved with the following research centers: the Center for Research on Military Organization, the Maryland Population Research Center (MPRC), the Center for Innovation, and the Program for Society and the Environment. Collectively, these centers account for over five million dollars in annual research funding. The Department is also affiliated with an interdisciplinary Joint Program on Survey Methods (JPSM). The campus has excellent computer facilities and computer resources are available to faculty and graduate students.

Financial Assistance: Financial assistance for graduate students is available through teaching and research assistantships, and for advanced students through part-time instructorships. We also have several special fellowships for outstanding applicants that provide additional support tailored to the applicants needs. All carry a stipend plus tuition remission, and most include health benefits.

Software Engineering (PMES)

Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Full admission as a degree seeking student requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in computer or electrical engineering, computer science, mathematics, applied mathematics, or a closely related field from an accredited institution
- Completion of calculus I and II and at least one programming language course
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements
Master of Engineering (M.Eng.)

Total Credits	Core Requirements
Non-thesis only: 30 credits required	ENPM 611: Software Engineering (3 credits) ENPM 612: System and Software Requirements (3 credits) ENPM 613: Software Design & Implementation (3 credits) ENPM 614: Software Testing & Maintenence (3 credits) ENPM 696: Reverse Software Engineering (3 credits) ENPM 808E: Managing Software Engineering Projects (3 credits) Electives approved by advisor (12 credits)

Facilities and Special Resources
Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and

Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance
Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Spanish Language and Literature (SPAP)

Graduate Degree Program
College: Arts and Humanities

Abstract
The Faculty of the Department of Spanish and Portuguese is committed to excellence in teaching and mentoring, along with the production of new knowledge that is the hallmark of a strong department. We are known for our focus on intersections between language, literature, culture, and politics, our community engagement, and our MA track in Hispanic Applied Linguistics. We bridge several intellectual fields across Spain and Spanish America and between North, Central and South America, the Caribbean, and Brazil, as we rethink the specificity of our cultures. The Department has been the home of major Latin American and Spanish literary figures, to include Juan Ramon Jimenez, who taught at the University between 1943 and 1951 and who, after being nominated by the Department, received the Nobel Prize for Literature in 1956. His legacy, as well as that of cultural critic Angel Rama, award-winning poet Jose Emilio Pacheco, award winning writer and Professor Emeritus, Jorge Aguilar Mora, and Professor Emerita, Graciela Palau de Nemes, among others, continues to shape our thought, vision, and mission.

The Department is renowned for its multidisciplinary strengths in Latin American and Lusophone literatures and cultures as well as its faculty research in the areas of the history of ideas, Southern Cone literature, Judeo-Latin American literature, Mexican literature, theater, and performance, Latin American modernismo, colonial and transatlantic discourses, Central American transnational cultures, U.S. Latinidades, Quechua language and indigenous literatures, Caribbean-Archipelagic poetics/politics, salsa and *sabor*, Brazilian cinema, Lusophone Africa and African diaspora studies, deconstruction of the Cuban Revolution, and contemporary reinscriptions of the nineteenth century.

Faculty members in the area of Spanish literature are recognized for their work in the history of the Spanish language and philology from the Middle Ages to the present, Medieval historiography and women narratives, Golden Age poetics, Cervantes and Quevedo traditions, revisions of the Enlightenment, romanticism (journalism and costumbrismo) and realism (philosophical traditions), modern and postmodern narrative and poetics, as well as representations of the Spanish Civil War and exile, particularly in Latin America.

The Department is also at the forefront of Spanish Applied Linguistics, language teaching pedagogy, language teacher education, language use and identity, social and political issues in foreign language teaching and learning, instructional technology, learner variables and learning disabilities, language for specific purposes, cross-cultural communication, and heritage language learning.

Mission
The Department of Spanish and Portuguese seeks to forge a strong dialogue between, and within, our areas of specialization pertaining to Latin America, Spain, and Portugal. To that end, we offer thorough instruction in the diverse, complex, and globalized literatures, cultures, and linguistics of the Spanish and Portuguese-speaking world. Our students not only develop the critical language skills to communicate in the target language but also gain an understanding of the cultures, politics, histories, and literatures of the communities and national spaces of the Americas, Spain and Portugal.

Our goal is to foster learning and thought, develop critical perspectives, and promote intellectual growth in our students. We teach across interdisciplinary fields such as literature, film, popular and visual culture, theatre, history, philosophy, critical theory, gender and queer studies, philology, and linguistics in different cultural and geographic contexts. We strive for the creation and discussion of new forms of knowledge and the effective engagement of our students and faculty with the world. We prepare students to become promising professionals in their chosen careers.

Our M.A. and Ph.D. graduates are mentored by our faculty, engage in substantive research projects, and benefit from rigorous training in the teaching skills required by the profession. They are prepared to meet the professional demands of highly competitive academic positions in the United States and Latin America.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s): Minimum 12 credits upper level literature/culture courses.
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Graduate Record Examination (GRE)
- 3 Letters of Recommendation: The letters of recommendation must be in English or notarized translation.

- Writing Sample: A research paper written in Spanish, uploaded to the Upload Requirements section of the application.
- Interview may be required (in person/by phone)

In addition to Graduate School requirements, candidates must have a bachelor's degree with a major in Spanish Language and Literature, or the equivalent in a related field with near native fluency in the written and spoken language.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements

Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis or Non-thesis option: 30 credits	Students can specialize in either Spanish Literature, Latin American Literature, or Hispanic Applied Linguistics. For either option, students must also pass three comprensive exams and pass a language exam. All students must submit a scholarly paper in their final semester of the program.
	Spanish Literature or Latin American Literature:
	Linguistics course (3 credits) Literary theory and/or criticism course (3 credits) Non-major literature courses (9 credits) **Non-thesis option:** Spanish Literature or Latin American Literature courses (15 credits) **Thesis option:** Spanish Literature or Latin American Literature courses (9 credits); SPAN 799: Master's Thesis Research
	Hispanic Applied Linguistics:
	Hispanic Applied Linguistics courses (12 credits) Literature courses (9 credits) **Non-thesis option:** SPAN 798: Final Project (3 credits); Electives (6 credits) **Thesis option:** SPAN 799: Master's Thesis Research (6 credits); Electives (3 credits)

The Department offers three areas of specialization within the 30-credit MA: Spanish literature, Latin American literature, and Hispanic applied linguistics. All areas offer a non-thesis option and a thesis option, and all include a comprehensive examination. A one-credit course in methodology is required of all teaching assistants.
Literature tracks: The non-thesis option includes three credits in linguistics; three credits in literary theory and/or criticism; fifteen credits in either Spanish or Latin American literature, one of which is to be considered the candidate's main field; and nine credits in the other or 'non-major' literature. Students must also submit a written scholarly paper in the final semester of their program which will be read and evaluated by at least two appropriate faculty members. Students who choose to write a thesis must meet the same criteria stated above, except that the course requirement in the 'major' literature is reduced from fifteen to nine credits with six hours of thesis research credit required.
Hispanic applied linguistics track: The non-thesis option includes twelve credits in Hispanic applied linguistics, nine credits in literature, six credits in elective courses, and three credits in a final project. Students who choose to write a thesis must meet the same criteria stated above, with six thesis credits replacing course/project credits.
See the website of the Department of Spanish and Portuguese for more details: http://sllc.umd.edu/spanish/graduate.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 36 credits of coursework in addition to 12 credits of SPAN 899:

Doctoral Dissertation Research. Students must also pass the comprehensive exam, a language reading exam, and the dissertation proposal and defense.
Required coursework includes:
• Two courses in the secondary area
• A graduate course in the History of the Spanish Language
• A minimum of one course in literary and/or criticism

The doctoral degree is a research and specialized degree and the Graduate School does not require a fixed number of credit hours. However, the Department of Spanish and Portuguese requires a total of 36 credits. Before admission to candidacy, the student must demonstrate:

1. a thorough knowledge of the literary production in the chosen area (Spanish or Spanish-American Literature);
2. an in-depth knowledge of the field of specialization;
3. proficiency in at least one field of the others Hispanic literatures;
4. a reading knowledge of a language other than Spanish and English, to be used as a research tool in the field of specialization;
5. one course in linguistics, such as 'History of the Spanish Language';
6. a minimum of one course in Literary Theory and/or Criticism;
7. acquaintance with a third literature (e.g. Luso-Brazilian, French, or English); and
8. a background in supporting fields to be used as research tools (e.g. history, philosophy, political science, sociology, or art). Students must pass a comprehensive examination, a translation exam (in a language other than English and Spanish), have their dissertation proposal approved for admission to candidacy, and defend a dissertation.

Facilities and Special Resources
In addition to the resources of the University libraries, students have easy access to the Library of Congress, the Smithsonian Institution and other Washington-based libraries and archives. National Archives-II, located on University grounds, is readily accessible to the Campus community. Dr. Sosnowski is the founder and editor of the literary journal Hispamerica. The graduate students publish Animal de fondo.

In association with the Latin American Studies Center, the Department promotes original initiatives on Latin American topics. Postdoctoral Fellows and Visiting Professors are an integral part of our academic program. Also the Department hosts Juan Ramón Jiménez Distinguished Lectures and Seminars Series and the José Emilio Pacheco Distinguished Series. In recent years, our faculty has been the recipient of major grants and fellowships from The Rockefeller Foundation, the National Endowment for the Humanities and the John Simon Guggenheim Foundation.

Financial Assistance
Financial assistance in the form of fellowships and assistantships is available for qualified applicants.

Special Education (EDSP)

Graduate Degree Program
College: Education

Abstract
Graduate programs in special education are designed to prepare highly qualified teachers, to provide graduate level content, and to prepare researchers, teacher educators, and leaders in the field of special education. We offer the following graduate program options:
* M.Ed. in Special Education with Elementary/Middle age based certification
* M.Ed. in Special Education with Elementary/Middle age based and severe disabilities certification
* M.Ed. in Special Education with severe disabilities certification only
* M.Ed. in Specialty Program (30 credits)
* M.A. in Special Education (36 credits)
* Advanced Graduate Specialist Certificate (30 credits beyond the master's degree)
* Ph.D. program
Note that, as of 2012, the EDSP graduate programs are part of a new department, the Department of Counseling, Higher Education, and Special Education. The EDSP degree programs were previously housed in the Department of Special Education.

Admissions Information
• M.A. and Ph.D. admissions requirements
• M.Ed. admissions requirements
For the M.Ed. programs, students must submit scores on the Praxis Core Academic Skills for Educators test (meeting the State of Maryland passing scores) prior to admission into the program and have an undergraduate 3.0 GPA. The Master's of Arts program requires a 3.0 undergraduate GPA and the submission of the Miller Analogies Test or the Graduate Record Examination test scores at or above the 40th percentile rank. The AGS program requires a 3.0 undergraduate GPA, a master's GPA of 3.5, and submission of scores on the MAT, GRE, or Praxis Core Academic Skills for Educators test. Admission to the Ph.D. program requires: 1) Master's degree or equivalent in Special Education or a related field from an accredited institution with a GPA of 3.5 or better; 2) An undergraduate GPA of 3.0 or better; 3) A score on the Graduate Record Exam placing the student at or above the 50th percentile on verbal, quantitative, and analytic subtests; 4) Two years of research or work experience with exceptional populations; 5) Three letters of recommendation from individuals who have direct knowledge of the applicant's academic capabilities, work experience, and professional characteristics; 6) A statement of academic and research goals including intended

area of study, research interests, and plans for future employment; 7) Evidence of writing skills shown in the statement of academic and research goals; 8) EDMS Research Methods I or equivalent. Students pursuing teacher certification in special education are required to take courses required by the Maryland State Department of Education which lead to certification in the State of Maryland. Programs for the Master's specialty program, the AGS, and the Ph.D. are planned individually by the students and advisor to reflect each student's background and goals.
A TOEFL score of 100 is required for international students who are not native speakers of English.

1. GRE for Ph.D., Miller Analogies or GRE for M.A., Praxis Core Academic Skills for Educators for M.Ed., MAT, GRE or Praxis Core Academic Skills for Educators for A.G.S. (at State of Maryland cut scores)
2. Three Letters of Recommendation
3. Statement of Goals
4. Transcripts from all previously attended colleges and universities
5. Interview required for Ph.D. and M.Ed. with teacher certification

See http://www.education.umd.edu/CHSE/admissions/admission_criteria/ for more detailed information.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	1 Mar (M.Ed./Certification), 15 Jun (M.Ed./Non-certification) / 1 Feb (M.A. and Ph.D.)
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	1 Mar (M.Ed./Non-certification) / 1 Feb (M.A. and Ph.D.)

Other Deadlines: Please visit the program website at http://www.education.umd.edu/CHSE/SE_overview.html

Degree Requirements
Certificate of Advanced Study (C.A.S.)
The Advanced Graduate Specialist certificate in special education is available to students who wish to take graduate courses beyond the master's degree. The minimum number of graduate hours is 60 (of which no more than 30 credits can be applied from another institution). The core of the program consists of special education courses in addition to other coursework within the university as approved by the student's adviser and the special education graduate faculty. The College of Education awards the certificate.
http://www.education.umd.edu/CHSE/academics/degree_programs/agsEDSP.html

Master of Education (M.Ed.)

Core Requirements
The Master of Education Non-Certification option requires 30 credits.
Students complete the following courses: EDSP 600: Issues and Trends in Educating Individuals with Disabilities (3 credits) **Two of the following:** EDMS 645: Quantitative Research Methods I (3 credits); EDSP 670: Single Subject Research Designs (3 credits); EDSP 671: Qualitative Methodologies in Special Education (3 credits) **One of the following:** EDSP 673: Evaluating Evidence-Based Practices in Special Education (3 credits); EDSP 625: Seminar on Severely Handicapping Conditions (3 credits) Remainder of coursework approved by advisor (18 credits)
The Master of Education with Certification one-year option requires 38 credits. The two-year option includes Severe Disabilities Teacher Preparation and requires 50 credits.
Regardless of whether students choose the one-year or two-year option, all certification students must complete the following courses: EDSP 470: Introduction to Special Education (3 credits)

EDSP 443: Language and Literacy Acquisition in Children with Disabilities (3 credits) EDSP 613: Behavior and Classroom Management in Special Education (3 credits) EDSP 615: Evaluation and Measurement of Exceptional Children and Youth (3 credits) EDSP 616: Reading and Writing Instruction in Special Education I (3 credits) EDSP 652: Curriculum and Instruction: Elementary Special Education (3 credits) EDSP 683: Assessment and Instruction in Mathematics in Special Education (3 credits) EDSP 687: Family Partnerships in Special Education (3 credits) EDSP 690: Teacher Candidate Research Seminar in Special Education (3 credits) EDSP 692: Graduate Internship I: Elementary/Middle Special Education (2 credits) EDSP 695: Graduate Internship II: Elementary/Middle Special Education (3 credits)

Students enrolled in the master's program in special education may earn the Master of Arts degree which requires a thesis or the Master of Education degree which may or may not include teacher certification.
http://www.education.umd.edu/CHSE/academics/degree_programs/agsEDSP.html

Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis option only: 36 credits required	**Students complete the following courses:** EDSP 600: Issues and Trends in Educating Individuals with Disabilities (3 credits) EDSP 799: Master's Thesis Research (6 credits) **Two of the following:** EDMS 645: Quantitative Research Methods I (3 credits); EDSP 670: Single Subject Research Designs (3 credits); EDSP 671: Qualitative Methodologies in Special Education (3 credits) **One of the following:** EDSP 673: Evaluating Evidence-Based Practices in Special Education (3 credits); EDSP 625: Seminar on Severely Handicapping Conditions (3 credits) Remainder of coursework approved by advisor (18 credits)

Students enrolled in the master's program in special education may earn the Master of Arts degree which requires a thesis or the Master of Education degree which may or may not include teacher certification.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 60 credits, including 12 credits of EDSP 899: Doctoral Dissertation Research. Course requirements are as follows: **Students are required to complete 5 of the following courses:** EDSP 600: Issues and Trends in Educating Individuals with Disabilities (3 credits) EDSP 675: Legal and Policy Foundations for Individuals with Disabilities (3 credits) EDSP 798x: Special Problems in Special Education (3 credits) EDSP 872: Theory and Empirical Design in Educational Research (3 credits) EDSP 888: Apprenticeship in Special Education (3 credits) EDSP 670: Single Subject Research Designs (3 credits) **Required Research Methodology and Design courses:** EDMS 646: General Linear Models I (3 credits) EDMS 651: General Linear Models II (3 credits) Three additional courses approved with advisor (9 credits) **Remaining coursework:** EDSP 898: Pre-Candidacy Research (3 credits) Electives (15 credits)

The Doctor of Philosophy (PhD) degree in Special Education prepares researchers, teacher educators, and leaders who will advance the education of children and adults with disabilities. The program is intended for full-time students and requires a minimum of 60 post-Master's credits in courses that address special education issues and trends, policies, current research and practice as well as research methods and design. Doctoral students will, with their advisor, identify a sequence of courses and experiences to advance their knowledge in an area of specialization. Students pursuing the doctoral program in special education must have completed a Master of Arts degree or the Master of Education degree in special education or a related area. Students should consult the Department website on Graduate Programs for more information.
http://www.education.umd.edu/CHSE/academics/degree_programs/EDSP_PhD.html

Facilities and Special Resources
The Special Education program provides an unparalleled setting for graduate study. The program's proximity to outstanding public schools in Maryland provides students who wish to pursue teacher certification the chance to gain experience with a culturally and linguistically diverse student population in urban, suburban, and rural settings.
Additionally,, students pursuing a doctoral degree can have experiences in advocacy and professional organizations, government agencies, including the US Department of Education in addition to the coursework they take at the University.

Financial Assistance
A limited number of fellowships, assistantships and/or grants are available to qualified applicants.

Speech Language Pathology (SPLA)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The Department of Hearing and Speech Sciences provides the opportunity for advanced graduate study in the communication sciences and disorders. At the M.A. level, a clinical degree with a concentration in Speech-Language Pathology is offered. Students have the option of pursuing a Cultural and Linguistic Diversity Emphasis track as part of their M.A. degree.
The department also offers two additional degree programs. A clinical doctorate in Audiology is offered, leading either to an Au.D. degree or a combined Au.D./Ph.D. Applicants should see CAUD and use this code when applying for admission to study. Second, at the doctoral level, the Ph.D. in Hearing and Speech Sciences is offered, with concentrations in Hearing, Speech or Language. Students applying to the Ph.D. program can opt to receive an MA in Speech-Language Pathology en route to the final degree. Applicants should see HESP and use this code when applying for admission to study either for the Ph.D. program alone or for the combined M.A. and Ph.D. Students who wish to pursue the MA degree and Ph.D. successively should still apply to the MA program via the degree code SPLA.

Admission to the M.A. program is on a very competitive basis. Each year, the Department receives approximately 250-300 applications for 25 anticipated spaces in the M.A. program in Speech-Language Pathology. Successful M.A. applicants typically have earned at least a 3.5 undergraduate GPA (with 3.7-3.8 being the average), and have strong GRE scores and letters of recommendation. In addition to the Graduate School requirements, the Department requires applicants to furnish scores on the Graduate Record Examination. Admission to the M.A. and CAUD programs is solely confined to fall matriculation. All students must finish their prerequisite classes before matriculating in the fall. Prospective applicants should note that decisions on admissions are made in early March. Early application is encouraged. The program typically takes 2 years of study (5 semesters, including the intervening summer). Only full-time students are admitted.

Degree Requirements
Master of Arts (M.A.)

Total Credits	Core Requirements	
Thesis or Non-thesis option: 35 credits in addition to Practical Experience	HESP 610: Language Disorders in Adults (2 credits)	HESP 611: Cognitive Disorders in Adults (2 credits)
	HESP 612: Fluency Disorders (2 credits)	HESP 620: Speech Production Disorders Across the Lifespan (3 credits)
	HESP 616: Language Disorders in the Pre-school Age (2 credits)	HESP 624: Voice Disorders (2 credits)
	HESP 625: Dysphagia (2 credits)	HESP 626: Language disorders in school-aged children and adolescents (2 credits)
	HESP 702: Diagnostic Procedures in Speech-Language Pathology (2 credits)	HESP 639F: Special Topics in Hearing and Speech Sciences (2 credits)
	HESP 627: Augmentative and Alternative Communication (2 credits)	HESP 602: Advanced Seminar in Neurological Bases of Communication (2 credits)
	Thesis option: Students take 3 credits of electives and 6 credits of HESP 799: Master's Thesis Research. **Non-thesis option:** Students take 7 credits of electives and 2 credits of HESP 638: Candidacy Paper.	

The Department of Hearing and Speech Sciences offers the Master of Arts degree with major emphasis in Speech-Language Pathology with either the thesis or the non-thesis option. The Master's degree is required by national credentialing standards for individuals intending to practice as speech pathologists in schools, hospitals, rehabilitation facilities, hearing and speech centers or in other clinical settings. Academic course work, which includes a minimum of 35 credits, is supplemented by additional credit registrations in supervised clinical practica in the University Speech and Hearing Clinic and in selected outside clinical facilities so that the graduate will meet the academic and practicum requirements for the Certificate of Clinical Competence (C.C.C.) issued by the American Speech-Language-Hearing Association, and be eligible for licensure in the State of Maryland and other jurisdictions. The Master's degree program is accredited by the Council on Academic Accreditation, the national accrediting agency which oversees graduate programs in Speech-Language Pathology and Audiology. A full description of the Master's degree program is available at our web site, listed below.

Students have the option of pursuing a Cultural and Linguistic Diversity Emphasis track as part of their M.A. degree.

Facilities and Special Resources
The Department's facilities include (1) the Hearing and Speech Clinic at UMCP: this clinic serves as the initial practicum site for all students pursuing clinical training. Ten speech and language diagnostic and therapy rooms are integrated with observation areas. The Clinic also includes multiple audiological test suites equipped for diagnostic testing, a complete hearing aid dispensary, a group rehabilitation room, and state-of-the-art equipment for behavioral and electrophysiological diagnostic testing, as well as hearing aid selection and fitting; students in the SPLA program will receive experience in the audiology clinic as well as the speech clinic. (2) an on-site language pre-school (LEAP, the Language-Learning Early Advantage Program), also equipped for observation. Most students will receive clinical experience through the preschool in addition to that through the HESP clinic. (3) numerous modern research laboratories equipped to support research in the areas of: acoustic phonetics, psychoacoustics, infant and adult speech perception, neuropsychology, aphasia, language and language development, voice, fluency and electrophysiology. All of the clinical and research facilities are potentially available for the conduct of student-directed research projects, or for student participation in faculty-initiated research projects. Additional research and clinical facilities are available in the Washington and Baltimore metropolitan areas. The Library of Congress, the National Library of Medicine and the libraries of various medical schools in the Washington-Baltimore area supplement the University's extensive libraries at College Park. The Department of Hearing and Speech Sciences participates in the Neuroscience and Cognitive Sciences graduate program (see NACS), the Comparative and Evolutionary Biology of Hearing Training Grant, and the Maryland Language Center, and has ties to the Center for Advanced Study of Language (CASL); these connections afford students the opportunity to work with faculty in other departments at the University of Maryland, College Park, or at UMB.

Financial Assistance
A limited number of graduate assistantships and fellowships are available through the Department. Assistantships that carry teaching, research or clinical responsibilities are awarded on a competitive basis. The Department also recommends outstanding students for Graduate School Fellowships; many of these fellowships have early deadlines for recommendations, so students are encouraged to submit their applications to the department early to ensure full consideration for funding. Students may also seek assistantships elsewhere on campus (such as through the Dean's office or through other departments) or fellowships sponsored by private foundations (e.g., American Speech-Language-Hearing Foundation).

Student Affairs (HISA)

Graduate Degree Program
College: Education

Abstract
The **Student Affairs Concentration** is committed to the professional preparation of student affairs educators in higher education environments. The concentration is modeled and directed by the core values of student development, multiculturalism/social justice, leadership, scholarship and research, and ethical practices. We maintain a strong relationship with the Division of Student Affairs at the University of Maryland, College Park, which has a historic commitment to supporting scholar-practitioners. Master's graduates commonly work in settings such as student activities centers, academic advising offices, career services offices, offices of resident life, orientation, leadership programs, and multicultural centers. Doctoral graduates often become graduate faculty and/or senior administrators, directing such offices as academic advising centers, student activities, offices of student life, multicultural centers, assessment and research, learning support services, and career centers.

Our location near Washington DC provides students with an abundance of opportunities to work in various higher education institutions, policy organizations, and associations in the area.

Student Affairs is a an area of concentration within The Higher Education, Student Affairs, and International Education (HESI) graduate program. In addition to Student Affairs, HESI programs offers concentrations in Higher Education and International Education Policy. Please only include one area of concentration on your application. Before applying students should familiarize themselves with each concentration area and choose the one that most closely fits their own particular needs and aspirations. The College of Education website (http://www.education.umd.edu/) offers descriptions of all the concentrations, faculty profiles and contact information, and is an essential resource for all applicants.

HESI graduate programs are part of a new department, the Department of Counseling, Higher Education, and Special Education. Previously, Student Affairs was part of the Department of Counseling and Personnel Services and Higher Education and International Education Policy were part of the Department of Education Leadership, Higher Education and International Education. HESI is committed to advancing the positive role education can have in society. Our faculty and students study core facets of the education system; this includes the functioning and impact of colleges and universities, student learning and development in higher education, and the enactment and implementation of K-18 and nonformal education policies in an international context. HESI offerings are characterized by a particular emphasis on social justice, diversity, policy, and system change. Our students and faculty are scholars, practitioners, change agents, and innovative leaders active in universities, as well as in national and international organizations and policy-making bodies. The program is a collaborative community that develops theory, conducts research and translates these to practice, and engages students, educators, and professionals in the advancement of education.

Graduate Degrees Offered: M.A., M.Ed., Ph.D
The Master's program is designed to meet the Council for the Advancement of Standards in Higher Education criteria for Master's programs with emphasis on the college student population and multicultural issues. The Council for the Advancement of Standards (CAS) is a cooperative effort of over 40 professional associations in Student Affairs Administration who have designed standards of preparation and practice for the profession.

Master of Education (M.Ed.)

Total Credits	Core Requirements
Non-thesis only: 40 credits required	EDCP 610: Professional Orientation (3 credits) EDCP 618: Counseling Skills: Introduction to Practicum (3 credits) EDCP 655: Organizational Dimensions of Student Affairs (3 credits) EDCP 672: Individual and Organizational Assessment in Student Affairs (3 credits) EDCP 741: Multicultural Practice in Student Affairs: Self, Education, and Society (3 credits) EDCP 771: The College Student (3 credits) EDCP 888: Internship in Student Affairs Research/Practice (1 credit) EDCP 888A: Apprenticeship in Student Personnel Services (3 credits) EDMS 645: Quantitative Research Methods I (3 credits) **OR** EDCP 773: Designing Qualitative Research in Counseling and Student Affairs Contexts (3 credits) EDCP 619B: Practicum in Counseling (3 credits) **OR** EDCP 671: Intergroup Dialogue Facilitation Practicum (3 credits) EDCP 798: Research Design and Proposal Writing Seminar (3 credits) Two Professional Concentration/Focus courses (6 credits) Elective (3 credits) *Students must also write a seminar paper and pass a comprehensive exam.

The minimum number of credit hours required beyond the bachelor's degree for the M.Ed., is 40. All MEd students must do a seminar paper and a comprehensive examination.

Doctor of Philosophy (Ph.D.)

Core Requirements
Doctoral students are required to complete 66 credits beyond the Master's degree including 12 credits of EDCP 899: Doctoral Dissertation Research, nine credits of electives, and nine credits in a professional concentration. Students can complete a three-credit internship as part of the elective requirement. **Required courses include:** EDHI 750: International Higher Education (3 credits) EDCP 774: Advanced Seminar in Theories of College Student Development (3 credits) EDCP 775: Facilitating Student Learning in Higher Education (3 credits) EDCP 776: Social Justice in Student Affairs and Higher Education (3 credits) EDCP 870: Professional Issues Seminar (3 credits) EDCP 871: Student Affairs Doctoral Capstone Seminar (3 credits) EDHI 672: Modes of Inquiry in Education Research (3 credits) EDCP 742: Examining College Environments and Outcomes (3 credits) EDCP 772: Research in Student Affairs (3 credits) EDCP 773: Designing Qualitative Research in Counseling and Student Affairs Contexts (3 credits) Quantitative Methods course (3 credits) Advanced Research Methods/Methodology course (3 credits)

Phd students in Student Affairs are required to take 66 credits beyond the Master's degree. In addition to major and elective courses, each concentration requires 15 to 18 credits in research methods and 12 credits of dissertation research.

After students have completed most of their course work, a take-home comprehensive examination is required.

Facilities and Special Resources
Faculty and students in the Department work closely with area schools, colleges, universities, associations and other education-related organizations. Extensive resources in the Washington, D.C., area, including international agencies and non-governmental organizations, provide exceptional opportunities for internships, field experiences, and research to enhance formal course experiences.

Financial Assistance
The Department has a very limited number of merit-based fellowships and graduate assistantships available to students. Fellowships are awarded to doctoral students in March only for the following fall semester. A large number of assistantships are also available throughout campus, and many students regularly find assistantships in other departments and offices on campus. Assistantships are most often awarded in the spring for the following fall semester, but occasionally an assistantship may become available at another time of year.

Both fellowships and assistantships are awarded on a competitive basis. It is to the student's advantage to apply well before the published application deadlines and to submit a complete application package if they intend to be considered for a fellowship, assistantship, or other form of financial aid. It is a requirement that a student be admitted as a condition of eligibility.

International students' applications are not considered complete and are not reviewed by the Department until they have received clearance from the Office of International Student and Scholar Services (ISSS), which can take additional time. If you need information about ISSS clearance visit the ISSS website at http://www.umd.edu/ies. For more information on financial assistance, see the department web site: http://www.education.umd.edu/chse/admissions/finance.

Supply Chain Management (BMSC)

Graduate Degree Program
College: Business

Abstract
The Robert H. Smith School of Business offers graduate programs leading to the degrees of Master of Business Administration (MBA), Master of Finance, Master of Science in Accounting (MS), Master of Science in Information Systems (MS), Master of Science in Marketing Analytics (MS), Master of Science in Supply Chain Management (MS), Executive MBA (EMBA), Online MBA, and Doctor of Philosophy (PhD). The school’s MBA program is accredited nationally by the Association to Advance Collegiate Schools of Business (AACSB International). Only about 607 programs in the world are accredited by the AACSB, a reflection of the quality of the faculty, students, curriculum, and career management.

The Smith School of Business faculty has been recruited from the graduate programs of leading universities nationwide. They are dedicated scholars, teachers, and researchers with a strong commitment to academic excellence and the education of the professional manager and researcher. The Smith School of Business is dedicated to preparing graduates to lead organizations in an economy driven by technology, globalization, and rapid change. The Smith School curriculum integrates an in-depth education in core business functions -- accounting, entrepreneurship, finance, information technology, logistics, management, and marketing -- with cross-functional e-business areas -- electronic commerce, financial engineering, services marketing, and supply chain management.

Admissions Information
We strongly encourage you to visit the Robert H. Smith School of Business website at www.rhsmith.umd.edu. The Smith School website contains a wealth of information regarding all graduate business programs and their admissions processes.

Online MBA Admissions Information: 877-807-8741
PhD Admissions Office: 301-405-2214
Admission criteria for the MS program focusing in supply chain management are based on: quality of undergraduate and graduate coursework; GMAT or GRE score, 1 letter of recommendation; professional experience; video submission; and written essay of objectives. Prospective applicants may contact the program at (301) 405-2559 for information regarding the MS program.

Non-thesis only: 30 credits	BULM 758: Supply Chain Risk Management (2 credits) BULM 758X: Data Models and Decisions I (2 credits) BULM 758Y: Data Models and Decisions II (2 credits) BULM 758L: Lean Six Sigma for Supply Chain Managers I (2 credits) BULM 758V: Lean Six Sigma for Supply Chain Managers II (2 credits) BULM 758: Technology in Supply Chain Management (2 credits) BULM 742: Global Supply Chain Resource Planning (2 credits) BULM 758J: Project Management for Supply Chain Managers (2 credits) BULM 758T: Transportation Management (2 credits) BULM 758B: Supply Chain Strategy (2 credits) BULM 758: Introduction to Supply Chain Management (2 credits) BULM 758K: Business Fundamentals for Supply Chain Managers I (2 credits) BULM 758Q: Business Fundamentals for Supply Chain Managers II (2 credits) **Select two of the following electives:** BULM 733: Global Trade Logistics (2 credits) BULM 758: Networks and Influence (2 credits) BULM 724: Negotiations in Supply Chain Management (2 credits) BULM 758: Supply Chain Resources Planning II (2 credits)

The MS in Supply Chain Management program will prepare you to discover emerging opportunities and lead innovation on a global scale. Whether you're a recent graduate with an interest in how goods move around the world or a manager who would

like to broaden your understanding of the global supply chain, our curriculum will prepare you for new and growing career options in this dynamic industry.

Facilities and Special Resources
The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database, which matches a Smith MBA to the right industry position. The OCS also participates in regional and national career forums and job fairs, such as the National MBA Consortium, the National Black MBA Conference, the National Hispanic MBA Conference, the National Association of Women MBA's Conference, and the Career Services Council.
The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Financial Assistance
Financial aid is available to qualified full-time and Executive MBA students in the form of fellowships, graduate assistantships, and scholarships.

Survey and Data Science (online) (MPDS)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The Joint Program in Survey Methodology (JPSM) blends together faculty with diverse disciplinary backgrounds all devoted to teaching state-of-the-art practices in the statistical and methodological aspects of surveys and data. The program's faculty primarily come from the University of Maryland, University of Michigan and Westat, supplemented by instructors from a number of federal statistical agencies. Many of these faculty are leading researchers and statisticians in the field of survey methodology, thereby providing an unparalleled educational experience to the students. JPSM's offerings include onsite PhD and Master's degrees as well as online Certificates and a Professional Master's degree.

Admissions Information
General Requirements:
- Transcript(s): Should show previous coursework or knowledge in mathematical/applied statistics demonstrated by completion of 6 credits of applied statistical methods courses covering content from probability theory through basic regression techniques (including both OLS and logistic regression)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:
- Provide a CV which should show at least one full year of relevant work experience at the time of application in a position dealing with survey or census design, data collection, or statistical analysis.
- Supplementary Application: Complete a one-page essay describing relevant work experience, interest in survey and/or data science, and expected benefits of enrolling in this degree program. (Uploaded to Supplementary Application in the Uploads Requirements section of the application.)
- Provide the contact information for three references: Supplementary Application Two
- Statistics Prerequisites: Previous coursework or knowledge of mathematical/applied statistics demonstrated by completion of 6 credits of applied statistical methods courses covering content from probability theory through basic regression techniques (including both OLS and logistic regression). Students should provide a short explanation of how

the requirement is met by noting courses on their transcripts, describing courses taken not for credit, or relevant work experience and attach relevant syllabi. If students cannot demonstrate prior knowledge, they will be required to pass an entrance examination administered by JPSM that tests knowledge of applied statistical methods.

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland.
Applicants must have earned a four-year baccalaureate degree from a regionally accredited U.S. institution, or an equivalent degree from a non-U.S. institution. Applicants must have earned a 3.0 GPA (on a 4.0 scale) in all prior undergraduate and graduate coursework.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Degree Requirements
Master of Professional Studies (M.P.S.)
The online *International Master of Professional Studies in Survey and Data Science* will provide post-baccalaureate training for individuals interested in broadening their knowledge and understanding of the emerging field of data science, the conduct of sample surveys, practical applications of data analysis and survey methodology, and data management, along with the skills needed to communicate results.

Survey methodology, which is already an interdisciplinary field drawing upon statistics, sociology, economics, political science, informatics, public health (e.g., physical measures taken on respondents), and the geographic sciences (e.g., geographic information systems), is now intersecting with the big data world. As public and private organizations are increasingly combining various data sources, including survey data, for the purpose of decision making, the need for professional development in data generation, quality and analysis is on the rise. The online environment is convenient for working professionals who cannot easily travel to a traditional campus. In addition, courses will be shared with our international partners, providing a rich perspective to class discussions.

Facilities and Special Resources
Training will be provided by permanent and adjunct faculty in the University of Maryland's Joint Program in Survey Methodology. Online lectures will be conducted via accessible video conference systems and Webinar tools.
Students will be instructed that to fully participate, they will need to purchase a webcam and headset with a microphone, and have a reliable computer and Internet access. Recorded lectures will be posted online at announced times and will be available online at any time thereafter during the course. Weekly discussions or help sessions will be held at scheduled, fixed times once per week.

As officially admitted students to the University of Maryland, students in this program will have access to all University resources that are accessible in the online environment. Students in online programs are assessed an online student services mandatory fee which supports access to these University resources.

Courses: SURV

Keywords: Online Masters, Professional Studies, Survey Practice, Surveys, Survey Research, Data Science, Statistical Methods, International Programs, Distance Learning, Household Surveys, Business Establishments, Institition Surveys, Population Surveys, Samnpling and Estimation in Complex Surveys, Questionnaires, Questionnaire Design, Data Collections, Survey Data Quality, Measurement Error, Survey Design, Data Sources, Applied Sampling, Survey Methodology, Analysis of Complex Data, Sampling Theory, Public Opinion, Statistical Modeling, Survey Management.

Relationships: **Intermediate Survey Methodology (Z011)** **Survey Methodology (SURV)** **Survey Statistics (Z010)**

Survey Methodology (SURV)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The Survey Methodology Program blends together faculty with diverse disciplinary backgrounds, all devoted to teaching state-of-the-art practices in the statistical and methodological aspects of surveys. The program's faculty come primarily from the University of Maryland, University of Michigan, and Westat, supplemented by instructors from a number of federal statistical agencies.

SURV offers a Master of Science in Survey Methodology and a Ph. D. in Survey Methodology. Both degree programs have three areas of concentration: Statistical Science , Social and Psychological Science and Data Science.
The **statistical science** area of concentration is designed for students who wish to specialize in areas such as sample design, estimation in complex samples, variance estimation, statistical measurement error models, and statistical adjustments for missing data.

The **social science** area of concentration is designed for students who wish to specialize in areas such as questionnaire design, design of interviewing systems, computer assistance in data collection, effects of mode of data collection, cognitive psychological insights into survey measurement, and efforts to reduce various nonsampling errors in data collection.
The **data science** area of concentration is designed for students who wish to specialize in the more computational aspects of survey methodology and research involving "big data," including data visualization, management and analysis of large and messy data sets, human-computer interaction in survey research, and machine learning algorithms.
The three areas of specialization share a set of courses in the core curriculum, including a two term survey practicum, a course in data collection methods, two terms of statistical methods, a two term course in total survey quality, and a survey design seminar.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Supplemental Application

Applicants to the M.S. program are expected to hold a baccalaureate degree from a regionally accredited institution with a minimum of a 'B' average. Post-baccalaureate coursework and relevant work experience will also be used in the application evaluation. Entry to the statistical science concentration requires three undergraduate courses in calculus, one in linear algebra, and one in statistics. Entry to the social science concentration requires two undergraduate quantitative courses, at least one of which is in statistics, and at least two undergraduate courses in the social sciences. Entry to the data science concentration requires some background in computer science, with a minimum of two semesters of programming coursework, and also at least one semester of statistics.
Applicants to the Ph.D. program are expected to have a graduate degree in some field (such as statistics or psychology) that is related to survey methodology. Applicants must also demonstrate an appropriate quantitative background.
For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	5 Jan

Other Deadlines: Please visit the program website at http://www.jpsm.umd.edu

Degree Requirements

Master of Science (M.S.)

Total Credits	Core Requirements
Non-thesis option only: 46 credits required	**All students are required to complete 46 credits. The following courses are required as well as an internship:** SURV 615: Statistical Methods I (3 credits) SURV 616: Statistical Methods II (3 credits) SURV 720: Total Survey Quality I (2 credits) SURV 721: Total Survey Quality II (2 credits) SURV 772: Survey Design Seminar (3 credits) SURV 746: Applications of Statistical Modeling (3 credits) Fundamentals of Data Collection I (3 credits) Fundamentals of Data Collection II (3 credits) Fundamentals of Computing and Data Display (3 credits)
Specialization Requirements	
Statistical Science students must complete the following courses: SURV 410: Introduction to Probability Theory (3 credits) SURV 420: Introduction to Statistics (3 credits) SURV 440: Sampling Theory (3 credits) SURV 742: Inference from Complex Surveys (3 credits) Elective (9 credits) **Social Science students must complete the following courses:** SURV 625: Applied Sampling (3 credits) SURV 630: Questionnaire Design and Evaluation (3 credits) SURV 632: Social and Cognitive Foundations of Survey Measurement (3 credits) SURV 701: Analysis of Complex Sample Data (3 credits) Fundamentals of Inference (3 credits) Electives (6 credits) **Data Science students must complete the following courses:** SURV 625: Applied Sampling (3 credits) SURV 701: Analysis of Complex Sample Data (3 credits) Fundamentals of Inference (3 credits) Electives (12 credits)	

SURV offers a non-thesis program, however students in all three tracks the statistical science, social and psychological science and data science concentrations must fulfill a research experience requirement, yielding a scholarly paper. This paper must be the result of either original research conducted by the student, critical analysis, or evaluation of existing surveys.

Doctor of Philosophy (Ph.D.)

Core Requirements
Students must participate in the Ph.D. seminar for four semesters by enrolling in SURV 829: Doctoral Research Seminar in Survey Methodology for a total fo 12 credits. Students must also complete 12 credits of SURV 899: Doctoral Dissertation Research.

There are five major requirements for the Ph.D. Students must pass a qualifying examination (normally at the end of their first year) and a comprehensive examination (normally at the end of their second year). They must participate in the Ph.D. seminar

for four semesters. They must meet a residency requirement which consists of spending at least two days per week at JPSM for a period of three semesters. Finally, they must complete a dissertation.

Facilities and Special Resources
SURV has the goal of offering training to all qualified students, regardless of the employment sector of interest to them. Several features of the program are designed with the working student in mind. Many class times are tailored to be compatible with the work day; a 12-month curriculum offers core courses throughout the year; and research experience requirements are integrated with work activities.

Courses have been offered at a Federal agency facility located in Washington, D.C. and interactive 2-way audio/video transmission equipment is used to transmit some courses between the College Park campus and the Ann Arbor campus of the University of Michigan,also - between College Park and the Census headquarters in Suitland, MD.

Financial Assistance
Financial assistance is available in the form of competitive fellowships and graduate assistantships for teaching or research.

Graduate Certificate Program
College: Behavioral and Social Sciences

Abstract
Certificates in Survey Methodology and Survey Statistics, offered through the Joint Program in Survey Methodology, College of Behavioral and Social Sciences, University of Maryland, will provide post-baccalaureate training for individuals interested in broadening their knowledge and understanding of survey methodology and analysis of data collected through sample surveys.
Admissions Information
Applicants must meet the following minimum admission criteria as established by the Graduate School:

- Applicants must have earned a four-year baccalaureate degree from a regionally accredited U.S. institution, or an equivalent degree from a non-U.S. institution.
- Applicants must have earned a 3.0 GPA (on a 4.0 scale) in all prior undergraduate and graduate coursework.
- Applicants must provide an official copy of a transcript for all of their post-secondary work.
- International students must fulfill all requirements relating to international academic credentials, evidence of English proficiency, and financial certification. Since the students will not have to enter the U.S., visas will not be required. These requirements are found at the Graduate School's Web site: https://gradschool.umd.edu/admissions/faqs/international.

In addition, the certificates will have the following pre-requisite course requirements:

- The program assumes that entering students have graduate-level preparation in probability theory, mathematical statistics, and statistical methods. This should be demonstrated through completion of a relevant statistics or biostatistics graduate degree or related coursework. Therefore students should:
- Have a graduate level degree in statistics or biostatistics from an accredited institution.

OR:

- Have completed graduate level statistics courses equivalent to SURV 410 (graduate-level probability theory course), 420 (graduate-level mathematical statistics course), SURV 615 and SURV 616 (a two-term sequence in statistical methods). To demonstrate satisfaction of this requirement, submit all relevant syllabi for applicable courses.
- At least one year of work experience in a position dealing with survey or census design, collection, or analysis.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Sustainable Development and Conservation Biology (CONS)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract
The principal objective of the CONS Program is to provide graduate training in Sustainable Development and Conservation Biology. CONS is an interdisciplinary and experiential approach to the problems of biological conservation in relation to economic development necessary to meet human needs.

The primary goals of the CONS program are: 1)to provide students with the knowledge and problem-solving skills necessary to research and communicate solutions to global environmental issues; 2) to expand the reach of biodiversity conservation and increasing sustainability; 3)to produce leaders and decision-makers in conservation science that are employed by academia, in

government, or non-governmental agencies (NGOs); and 4) to provide a service role to the state of Maryland, the nation, local communities, and national and international NGOs and government agencies.

Specifically the program's objectives are to: provide broad, multidisciplinary training in the core areas of biological conservation, resource economics, and policy analysis; and explicitly link the conflicting topics of sound conservation of natural resources with sustainable development to meet human needs.

CONS graduates are well-prepared to address conservation issues for employers in the private sector and in local, state and national government posts; and to enter Ph.D. programs for further, specialized training.

CONS offers a dual-degree program (PPCN) with the School of Public Policy, wherein students receive both Master of Science and Master of Public Policy degrees. For more information on our degree programs and acaeic requirements, please see our website at http://cons.umd.edu/cons

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Supplementary Application
- Publications/Presentations

Admission to the CONS Program is competitive, and applicants tend to be a self-selecting group of high achievers. Applicants must have an undergraduate degree and comply with all Graduate School guidelines to be considered for admission, with the most competitive applicants demonstrating preparedness for graduate coursework in ecology, resource economics, and public policy.
CONS has no formal course prerequisites for admission, but admission is highly competitive. CONS students have an established record of excellence in their academic (e.g., high GRE and GPA scores, prestigious honors and awards) and professional careers (e.g., relevant, real-world employment experience at NGOs, government agencies, research labs, Peace Corps, internships). CONS students have leadership abilities, and evidence of research experience (e.g., publications, presentations, internships), are good communicators. Successful applicants typically have a strong background in biology, and are expected to have sufficient academic preparation to enroll in the required graduate level courses in Ecology, Natural Resource Economics, and Environmental Policy. It is encouraged that incoming students have taken one or more courses in statistics, other quantitative skills, mathematics, GIS analysis, economics, and/or have foreign language skills. Many prospective applicants take one or more post-baccalaureate courses in preparation.
For more admissions information or to apply to the program, please visit our Graduate School website: https://gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	17 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	17 Jan

Other Deadlines: Please visit the program website at http://www.cons.umd.edu

Degree Requirements
Master of Science (M.S.)
This Master of Science Program was initiated in 1991 to provide new training and educational emphasis in the areas of sustainable development and conservation biology. The program applies an interdisciplinary and experiential approach to the challenges of biological conservation in relation to the economic development necessary to meet human needs. It includes four components: (1) core courses in the areas of ecology and conservation biology, resource economics, public policy, and multi-

disciplinary problem solving; (2) elective courses from a wide array of disciplines; (3) an internship experience relevant to the student's career interests; (4) a Scholarly Paper - a rigorous, quantitative analysis of an Environmental Problem that synthesizes the student's coursework, internship experience, and career interests. Course requirements for the program total 39 credits. This is intended to be a two-year program.

Facilities and Special Resources
The program is housed within the Department of Biology but is campus-wide in scope. We have strong connections with the School of Public Policy because ~30% of CONS students are enrolled in the dual degree PPCN program. We have strong connections with AREC because CONS students take a required course in natural resource economics. All CONS students complete an internship - either in a research lab, with an NGO, or with an agency - either in the DC area or further abroad. All CONS students select a faculty advisor relevant to the topic of their scholarly paper, which results in many interactions with environmental faculty in Anthropology, Entomology, Environmental Science & Technology, Latin American Studies, MEES, Public Policy, Plant Sciences and Landscape Architecture, and other departments.

Financial Assistance
Students applying to the Program may be nominated for graduate fellowships or may be supported by teaching or graduate assistantships. Fellowship and assistantship offers are made on the basis of past academic performance, financial need, and potential to contribute to the program.

Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. For anyone needing these documents, consider applying for the campus programs.

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Full admission as a degree seeking student requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in civil and environmental, mechanical, or chemical and bimolecular engineering from an accredited institution
- Completion of calculus I, II, and II and differential equations
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Master of Engineering (M.Eng.)

Total Credits	Core Requirements
Non-thesis only: 30 credits required	Students choose five core courses, and five elective courses. All electives must be approved by the student's advisor. ENCH 648K: Advanced Fuel Cells and Batteries (3 credits) ENCH 648L: Photovoltaics: Solar Energy ENME 701: Sustainable Energy Conversion and the Environment (3 credits) **OR** ENPM 624: Renewable Energy Applications (3 credits) ENPM 622: Energy Conversion I - Stationary Power (3 credits) ENPM 627: Environmental Risk Analysis (3 credits) ENPM 656: Energy Conversion II -- Mobile Power (3 credits) Electives approved by advisor (15 credits)

Facilities and Special Resources
Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance
Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Sustainable Energy Engineering (Z066)

Graduate Certificate Program
College: Engineering

Abstract
The Professional Master of Engineering program is a practice-oriented part-time graduate program designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Two (2) Letters of Recommendation are required for anyone with an undergraduate GPA below 3.0. Anyone with a GPA 3.0 or above should contact the Office of Advanced Engineering Education with a request to waive this requirement.

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. International applicants should consider applying for the online programs.
Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.
Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.
Full admission requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in civil and environmental, mechanical, or chemical and bimolecular engineering from an accredited institution
- Completion of calculus I, II, and II and differential equations
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Systems Engineering (ENSE)

Graduate Degree Program
College: Engineering

Abstract
Students in the broadly-based, cross-disciplinary Master of Science in Systems Engineering (ENSE) program at ISR benefit both academically and professionally by:

- Being exposed to a wide range of systems engineering principles and software tools tailored toward support for visual modeling of systems, requirements engineering, system-level modeling, optimization and trade-off analysis, and human factors engineering.
- Becoming familiar with the financial and management issues associated with complex engineering systems.
- Acquiring a deep understanding of one particular application area.
- Becoming familiar for opportunities for leadership within the systems engineering profession.
- Designed with substantial industry input, the ENSE curriculum represents the University of Maryland's first multi-college graduate degree program involving the A. James Clark School of Engineering.

In addition to the technical management of systems projects, the ENSE program covers a wide range of topics, from systems definition, requirements and specifications, to systems design, implementation, and operation. Students specialize in one technical area, selected from computer and software systems, communication and networking systems, signal processing systems, control systems, manufacturing systems, operations research, transportation systems, and robotics. The ENSE program draws upon the extensive engineering, computer science and management experience of the of University of Maryland faculty. The program makes optimum use of the university's advanced facilities, including extensive libraries of numerical, symbolic, and visualization software, engineering workstations, and wireless communication networks.

Admissions Information
Admission to the ENSE program is competitive. The program looks for strong evidence of motivation and achievement and/or significant professional experience in engineering and/or the sciences. At a minimum, all applicants must meet the general admission requirements of the Graduate School, graduation from a regionally accredited college or university with a B average (or 3.0 on a 4.0 scale). Also key are three (3) strongly positive letters of recommendation, usually from current or recent instructors, employers, or supervisors; competitive scores on standardized tests (the GRE general test with writing assessment is required); and an articulate statement of appropriate goals and interests. Applicants should have a solid background in engineering, math or science. Prospective and current students may seek support for their studies through graduate research assistantships or graduate fellowships. Students currently working in industry, the military, or the government, who plan to pursue their graduate studies part-time, might ask their employers about tuition assistance. All applicants are encouraged to explore sources of external funding; a number of comprehensive Internet sites, such as fastweb.com, offer detailed information and application instructions.

1. GRE. Official GRE scores should be sent directly to the University of Maryland (institution code 5814) through ETS.
2. TOEFL. Official TOEFL scores should be sent directly to the University of Maryland (institution code 5814) through ETS.
3. Official transcripts (original hard copy required)
4. Residency information form (U.S. citizens and permanent residents only)
5. Certification of Finances form (international applicants only)
6. International applicants who are already in the U.S. must provide copies of the I-20, I-94, and passport visa stamp
7. 3 Letters of recommendation
8. Statement of Goals

All other supporting documents should be sent to: University of Maryland College Park, Enrollment Services Operations, Application for Graduate Admission, Rm 0130 Mitchell Building, College Park, MD 20742

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	15 Mar	29 Sep
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	1 Feb	29 Sep

Other Deadlines: Please visit the program website at http://www.isr.umd.edu/education/systems-engineering-education

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements	Specialization Options
Thesis option: 30 credits **Non-thesis option (scholarly paper):** 30 credits	ENSE 621: Systems Concepts, Issues, and Processes (3 credits) ENSE 622: Systems Requirements, Design and Trade-Off Analysis (3 credits) ENSE 623: Systems Projects, Validation and Verification (3 credits) ENSE 624: Human Factors in Systems Engineering (3 credits) ENSE 626: System Life Cycle Analysis and Risk Management (3 credits) ENSE 627: Systems Quality and Robustness Analysis (3 credits) **Thesis option:** Two additional electives from one specialization area and six credits of ENSE 799: Master's Thesis Research are required. **Non-thesis option:** Four additional electives from no more than two specialization areas are required. Students must also complete a scholarly paper.	Communication and Networking Systems Computer and Software Systems Control Systems Manufacturing Systems Operations Research Process Systems Robotics Signal Processing Systems Cybersecurity Transportation Systems

General requirements for the master's thesis and non-thesis options are those of the University of Maryland Graduate School. All requirements must be completed within 5 years. The thesis option requires each student to obtain a total of 30 credit hours: 24 hours of coursework and six (6) hours for the thesis project to complete the program. The coursework includes 18 credits for the six core courses (four courses from the systems engineering core and two courses from the management core), and two (2) elective courses. The elective courses must be taken from one specialization area. The master's thesis project demonstrates the practical implications of systems engineering principles. The thesis project may be related to a practical industrial system, and must be supervised by the academic advisor.

The non-thesis option requires each student to obtain a total of 30 credit hours of coursework to complete the program (four courses from the systems engineering core, two courses from the management core, and four elective courses). The elective courses must be taken from not more than two specialization areas. In addition, students must complete a scholarly paper. Expectations of the scholarly paper: While less detailed and complex than the thesis, the scholarly paper also contributes to systems engineering research. For example, a student might chose to write a literature review, identify and propose a solution to a systems problem encountered on the job, or prepare a systems case study. The scholarly paper is prepared under the supervision of the student's academic advisor. It also must be read by at least one additional ISR faculty member, and approved by the ENSE graduate director. No specific format is required by the Graduate School.

Facilities and Special Resources
Modern laboratory, computation, and networking environments play an indispensable role in both the development and day-to-day operation of the research and education programs at the Institute for Systems Research. In all of the ISR laboratories, real-life experiments and associated research studies are enabled through the integrated design of automation and information engineering systems. Computational environments support advanced numerical simulation, sensing and control, and automated design of complex heterogeneous engineering systems. Networking environments play an indispensible role in enabling of interdisciplinary teams of faculty and students to work together. Prototype designs in both hardware and software have led to technological discoveries and patentable inventions.

ISR was established in 1985 as one of the first six National Science Foundation Engineering Research Centers (ERCs). Now a self-sustaining ERC, it is a permanent state-supported institute of the University of Maryland, within the A. James Clark School of Engineering. ISR faculty and graduate students perform basic and applied research with an emphasis on six major research directions: systems engineering methodologies and tools, global communications systems, sensor-actuated networks, next generation product-realization systems, societal infrastructure systems, and cross-disciplinary systems engineering education. ISR seeks a cohesive and balanced approach to the modeling, design, and control of large heterogeneous systems, bringing together a diversified team of outstanding engineers, scientists, and students to research, develop, and implement advances in systems engineering.

Financial Assistance
Prospective and current students may seek support for their studies through graduate research assistantships with ISR faculty or graduate fellowships. Students currently working in industry, the military, or the government, who plan to pursue their graduate

studies part-time, might ask their employers about tuition assistance. All applicants are encouraged to explore sources of external funding; a number of comprehensive Internet sites, such as fastweb.com, offer detailed information and application instructions.

Teaching and Learning, Policy and Leadership (TLPL)

Graduate Degree Program
College: Education

Abstract
The newly approved TLPL Ph.D. program is a reorganization of current, on-campus doctoral programs of study into six related specializations 1) Education Policy and Leadership, 2) Language, Literacy and Social Inquiry, 3) Mathematics and Science Education, 4) Minority and Urban Education, 5) Teacher Education and Professional Development, and 6) Technology, Learning and Leadership.
These specializations prepare doctoral students to assume a variety of roles, including scholars, researchers, policy analysts, teacher educators, instructional specialists, curriculum developers, teachers, education leaders and advocates. The revision and consolidation of previous areas of study provides students with new opportunities for interdisciplinary study that emphasize scholarship in critical areas of education research, including teacher preparation, STEM fields of education, literacy and language acquisition, education policy and leadership. For more details about this program please visit http://www.education.umd.edu/TLPL/academics/programs.html .
This section includes information about the Ph.D. program sponsored by the Department of Teaching and Learning, Policy and Leadership (TLPL). For information about our master's programs please see information under Education: Curriculum and Instruction (EDCI) and/or Education: Education Policy Studies (EDPS) in the graduate catalog.

Admissions Information
General Requirements:
- Statement of Purpose
- Transcript(s)

- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Writing Sample

Applications for the Ph.D. program are accepted for the Fall only.

To be recommended for full admission to the TLPL Ph.D. program, a minimum undergraduate grade point average of 3.0 is required. A minimum graduate grade point average of 3.5 is required for applicants who have completed a graduate program. The Graduate Record Exam (GRE) is required of applicants and scores should be at the 50th percentile or higher. Because graduate programs are highly competitive, successful applicants often score considerably higher. Students who do not meet one of these requirements, but show other evidence of outstanding potential, may be considered for provisional admission. Admission of qualified applicants is based on their competitive ranking to limit enrollments to available faculty resources. See the description of the TLPL programs and admissions overview on the TLPL website for more detailed information: http://www.education.umd.edu/TLPL/.

For more admissions information or to apply to the program, please visit our Graduate School website: https://gradschool.umd.edu/admissions

Other Deadlines: Please visit the program website at http://www.education.umd.edu/TLPL

Degree Requirements

Doctor of Philosophy (Ph.D.)

Core Requirements
Students must complete a minimum of 60 credits beyond the master's degree. Coursework is outlined as follows: • Integrative Departmental Core (6 credits): EDPS 788P and EDPS 788T • Intermediate & Advanced Methods (12 credits): Must include one qualitative methods course and one quantitative methods course • Specialization (30 credits): Complete coursework in one of the following specializations - Education Policy & Leadership; Language, Literacy & Social Inquiry; Mathematics & Science Education; Minority & Urban Education; Teacher Education & Professional Development; Technology, Learning & Leadership • Dissertation Research (12 credits): EDPS 899: Doctoral Dissertation Research

The Ph.D. degree requires a planned sequence of 60 credits beyond a master's degree OR 90 credits beyond a bachelor's degree. In addition to major and elective courses, this includes 6 credits of integrative departmental core, a minimum of 12 credits in intermediate and advanced research methods, 30 credits within the student's specialization and 12 credits of dissertation research. After students have completed most of their course work, the equivalent of 12 hours of comprehensive examination is required prior to advancing to candidacy and approval of the doctoral dissertation committee. The comprehensive exam may take a variety of forms, such as take-home conceptual essays, literature reviews, or research papers. The Doctoral program integrates theory, research, and practice, and students are expected to demonstrate high standards of scholarship and the ability to engage in independent research. Your faculty advisor will help you develop a program of study that will help you fulfill your degree requirements, both coursework and examinations, that is consistent with Departmental and University guidelines. An oral examination in defense of the dissertation is required. It is strongly recommended that prospective doctoral applicants speak with program coordinators and faculty, and visit the Department and classes, to help determine if the Department's programs are appropriate to their academic interests and professional goals.

Facilities and Special Resources

Faculty and students in the department work closely with area schools, colleges, universities, associations and other education-related organizations. Extensive resources in the Washington, D.C., area, including embassies and other international

organizations, provide exceptional opportunities for internships and field experiences, research, and materials to enhance formal course experiences. Facilities that support graduate study include the Center for Mathematics Education, the Center for Science and Technology in Education, the Multicultural Research Center, and the Maryland Equity Project. Additional facilities in the College of Education include the Educational Technology Services Center and numerous Professional Development Schools in local schools districts.

Financial Assistance
The Department offers a limited number of graduate assistantships to newly admitted, full-time Ph.D. students each year. In addition to a possible graduate assistantship, TLPL is able to award a very limited number of Graduate School fellowships each year. These fellowships are awarded only to full-time graduate students and may provide tuition support and/or additional living stipends. All Ph.D. applicants who are offered full-time admissions will be considered for an assistantship and fellowship. For best consideration for fellowships, applicants should apply by the December 1st preferred deadline. For more information visit http://www.education.umd.edu/TLPL/admissions/financiad.html.

Technology Entrepreneurship (MPTE)

Graduate Degree Program
College: Engineering

Abstract
The Master of Professional Studies in Technology Entrepreneurship unites academic insights with startup incubator skills and resources to empower students to launch and grow technology ventures. Developed by the A. James Clark School of Engineering's Maryland Technology Enterprise Institute (Mtech), University of Maryland, the MPS in Technology Entrepreneurship is a fully online program designed to equip students with a conceptual understanding of the principles and action steps of effective new venture creation and launch.

The MPS in Technology Entrepreneurship prepares students to apply newly gained insights and acquired competencies to real-world innovation management challenges across five major stages of the innovation value chain from strategy development and idea generation to commercial concept and product development and successful market establishment, as well as sustainable growth in various contexts.

The *MPS in Technology Entrepreneurship* is committed to teaching the disciplines of entrepreneurial thinking that produce not just entrepreneurial inspirations but an entrepreneurial frame of mind. Courses are offered during 12-week terms; students complete course work in 11 weeks; week 12 is reserved for finals. The 30-credit, 9-course graduate program may be completed in as little as 15 months by enrolling in two 3-credit courses in the first four 12-week terms and a 6 credit capstone course in the final term.

Offered through the convenience and flexibility of the online learning environment, the program enables student to:

- Think beyond current paradigms in order to discover innovation needs and to envision impact through strategic idea and concept development (Term 1).
- Leverage ideas to create sustainable business models aligned with customer needs and wants in competitive marketplaces (Term 2).
- Manage commercialization challenges and market launch efficiently and effectively (Term 3).
- Navigate the legal aspects of product development and company launch and build sound financial and accounting strategies and practices (Term 4).
- Know how to accelerate growth and create sustainable value through appropriate business development, risk management, financing, and value extraction strategies (Term 5).
-

Technology Entrepreneurship (Z103)

Graduate Certificate Program
College: Engineering

Abstract
The Graduate Certificate in Professional Studies (GCPS) in Technology Entrepreneurship pairs an enriching academic experience with the skills and relationships of the University's world-class startup incubators. The 100% online programs are designed to equip students with a practical understanding of the principles and techniques for effective new venture creation and launch.

The GCPS in Technology Entrepreneurship will prepare students to apply newly gained insights and acquired competencies to real-world innovation management challenges across the initial stages of the innovation value chain from idea generation to business modelling and market validation.

The GCPS in Technology Entrepreneurship unites academic insights with startup incubator skills and resources to empower students to launch and grow technology ventures. This 12-credit, 4-course graduate program may be completed in as little as 6 months. Offered through the convenience and flexibility of an online learning environment, students enroll in two 3-credit courses per 12-week term.

Offered through the convenience and flexibility of the online learning environment, the program enables student to:

- Think beyond current paradigms in order to discover innovation needs and to envision impact through strategic idea and concept development (Term 1).
- Leverage ideas to create sustainable business models aligned with customer needs and wants in competitive marketplaces (Term 2).

Telecommunications (ENTS)

Graduate Degree Program
College: Engineering
Abstract

The Master's in Telecommunications Program offers students a unique opportunity to engage in cross-disciplinary coursework from both the Electrical and Computer Engineering Department of the A. James Clark School of Engineering and the Robert H. Smith School of Business at the University of Maryland. This extraordinary combination culminates in a degree that prepares students for the broad range of rigors and issues that encompass the dynamic telecommunications industry.
The program covers several different areas including Information System Security, Wireless Communications, Networking, and Business and Management for the telecommunications industry. The program may be pursued either full-time or part-time. All courses are scheduled in the evening to suit working professionals, while some courses additionally offer daytime sections.
The program is designed around a core curriculum that provides a solid technical foundation and management background. The Master's in Telecommunications degree requires successful completion of 30 credits and a scholarly paper. Please visit our Degree Requirements page for detailed information.

Students may choose from a wide range of electives to develop their interests and complement their career goals. Please visit our Course Descriptions page for a detailed listing of our courses. In addition to the courses listed there, special topics electives are regularly offered. As our program keeps up with industrial trends, these courses focus on emerging, cutting-edge topics.

Please see our website, www.telecom.umd.edu, for the most current information.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) (optional)
- CV/Resume (optional)

For the most current and detailed information regarding admissions and deadlines for the Master's in Telecommunications, please refer to our Admissions page.
The program is open to applicants holding a regionally accredited baccalaureate degree in engineering, computer science, math, physics or related technical fields with a minimum GPA of 3.0. Applicants with an undergraduate GPA of slightly less than 3.0 may be considered if they have demonstrated strong performance in prior graduate study and/or professional experience.
This program is professional in nature and has a non-standard tuition. Tuition for the 2017-18 academic year is $1,037.00 per credit. The tuition rate is the same for all students, regardless of residency or citizenship.
For more admissions information or to apply to the program, please visit our Graduate School website: https://gradschool.umd.edu/admissions

Degree Requirements
Master of Science (M.S.)

Total Credits	Core Requirements
Non-thesis only (scholarly paper required): 30 credits	ENTS 622: Introduction to Digital Communication Systems (3 credits) ENTS 640: Networks and Protocols I (3 credits) ENTS 641: Networks and Protocols II (3 credits) ENTS 625: Management and Organizational Behavior in the Telecommunications Industry (3 credits) ENTS 630: The Economics of International Telecommunications (3 credits) ENTS 632: Telecommunications Marketing Management (3 credits) ENTS 635: Decision Support Methods for Telecommunication Managers (3 credits) One additional approved core course (3 credits) Electives (6 credits) Students must also complete a scholarly paper by the time of graduation.

Requirements to earn the Master's in Telecommunications degree include completing 30 credit hours of course work, achieving a cumulative grade point average (GPA) of at least 3.0, and submitting a satisfactory scholarly paper. The 30 credits include eight required courses and two elective courses. All graduate students at the University of Maryland are required to maintain a 3.0 GPA each semester to remain in good standing.

Additional courses beyond the required courses must be approved by the Program Office and should not impede the student's progress towards degree completion. ALL courses taken at the University of Maryland count towards the student's cumulative GPA.

Facilities and Special Resources: **S**tudents enrolled in the Program are allowed exclusive access to the Telecommunications PC Lab.

Financial Assistance: Since the Master's in Telecommunications Program does not normally offer financial support in the form of graduate assistantships, many of our students find assistantships in other units, especially non-academic units, which do not have graduate students.

Terrorism Analysis (Z039)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract
The National Consortium for the Study of Terrorism and Responses to Terrorism (START) is dedicated to training and mentoring a new generation of scholars and analysts capable of examining questions related to the behavior of terrorists and terrorist groups and to the issue of how societies can best prepare for dealing with a terrorist threat or responding to a terrorist attack. START's Graduate Certificate in Terrorism Analysis provides participants with advanced education on the causes, dynamics and impacts of international and domestic terrorism. Participants also develop the methodological skills necessary to pursue advanced research on and analysis of terrorism. The program consists of four required courses. Each course is offered once per calendar year, in an online, synchronous learning environment. The program can be completed in as little as 12 months to 24 months.

The program is appropriate for individuals interested in (and/or currently) working in fields related to intelligence analysis, homeland security analysis, or analysis of other relevant topic areas; and individuals interested in (and/or currently) conducting scholarly research on terrorism and responses to terrorism.

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland.
Eligible applicants must have earned a 4-year baccalaureate degree from a regionally-accredited U.S. institution, or an equivalent degree at a foreign university. A 3.0 GPA is preferred, but experience may substitute. GRE scores are not required. All applications must be submitted via the online application available at: www.gradschool.umd.edu/gss/admission.html.
All application materials must be received by the deadlines as described below.

For more admissions information or to apply to the program, please visit our Graduate School website: https://gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	26 July	12 Jan
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	26 July	12 Jan

Degree Requirements
Post-Baccalaureate Certificate (P.B.C.)

Total Credits	Core Requirements
12 credits required	BSST 630: Motivations and Intents of Terrorists and Terrorist Groups (3 credits) BSST 631: Societal Impacts of and Responses to Terrorism (3 credits) BSST 632: Development of Counterterrorism Policies and Programs (3 credits) BSST 633: Research Methods in Terrorism and Counterterrorism (3 credits)

The Certificate is earned by successful completion of all four of Graduate Certificate in Terrorism Anaylsis courses. These courses may be taken in any order although students must have successfully completed one other class before enrolling in BSST633: Research Methods in Terrorism Studies.

Graduate Certificate Courses

BSST 630: Terrorist Motivations and Behaviors
(Fall semesters)
Focuses on theories explaining the formation of terrorist groups and the motivations behind terrorist behavior.

BSST631: Societal Impact of and Responses to Terrorism
(Spring semesters)
Examines ways in which different actors respond to both terrorist incidents and to the threat of terrorism.

BSST 632: Development of Counterterrorism Policy and Programs
(Fall semesters)
Explores counterterrorism policies and policy making processes and actors since 2001.

BSST 633: Research Methods in Terrorism and Counterterrorism
(Spring semesters)
Provides students with a basic understanding of the methods of quantitative research available to social scientists studying terrorism and counterterrorism.

Facilities and Special Resources
The START Consortium at the University of Maryland has pulled from its extensive experience in the field of terrorism research and analysis in order to formulate the Graduate Certificate curriculum. Students are drawn from the academic and professional worlds, which brings a range of perspectives to the virtual classroom. Its goal is to provide a well rounded and sophisticated approach to the subject matter and to cultivate a stimulating learning environment.

Financial Assistance
START does not currently provide financial assistance to Graduate Certificate students.

Tuition
Initial application fee: $75
Tuition and fees per course: $2,100

Please note: Students are responsible for purchasing their own books, software, and other supplies as required by each instructor. Students may be required to pay additional UMD student fees.

Theatre and Performance Studies (THPF)

Graduate Degree Program
College: Arts and Humanities

Abstract
The School of Theatre, Dance, and Performance Studies offers a Master of Arts in Theatre and Performance Studies and Doctor of Philosophy in Theatre and Performance Studies (THPF). For more information visit the School website at http://tdps.umd.edu/programs/phd-theatre-and-performance-studies. The School also offers graduate degrees in MFA in Theatre Design and MFA in Dance.
The M.A. program is designed to enhance and develop students' practical, historical, and critical knowledge of theatre so that they may go on to graduate work in Ph.D. or M.F.A programs, or upgrade their skills for high-school teaching. The School's application deadline for best consideration for the MA program and the PhD program is January 15. Applications fully submitted by February 1 may also receive consideration on a space available basis.

The doctoral program in Theatre and Performance Studies is an interdisciplinary course of study that prepares students for careers as educators, professors in higher education, publishing scholars, and cultural critics. The program offers a rigorous exploration of both Theatre History and Performance Studies through the critical and theoretical analyses of historical archives, dramatic and performance texts, and cultural behavior as performance. Applicants who do not hold an undergraduate or graduate degree in theatre (or an equivalent field), may be required to take preparatory coursework prior to admission into the Ph.D. program.

Admissions Information

- Publications/Presentations (optional)
-

Applicants must have earned a 4-year baccalaureate degree from a regionally-accredited U.S. institution, or an equivalent degree earned at a non-U.S. institution with at least a 3.0 GPA. Applicants for the PhD must also have earned MA or MFA degree from a regionally-accredited U.S. institution, or an equivalent degree earned at a non-U.S. institution with at least a 3.0 GPA.
All International students must show evidence of acceptable scores on the Test of English as a Foreign Language (TOEFL). See information on the International Educational Services website for specific admissions requirements, including minimum TOEFL score.

Our PhD program also requires the Graduate Record Exam (GRE). Scores must be less than five years old. (Use institutional score reporting code 5814.)

We expect scores above the 80th percentile on the Verbal Reasoning and Analytical Writing portions of the exam. We do not consider the quantitative reasoning score in our admissions process.

Generally, our successful applicants have GRE scores well above the 80th percentile but this is not always the case. In making determinations on admissions our committees consider many other factors including, but not limited to, the quality and source of the letters of reference, success in previous programs as indicated by transcripts, the strength of the researched writing sample, the interest generated in the faculty by the statement of goals, how the applicants research interests might have a synergy with the work currently being done by our students, the intellectual diversity the applicant might bring to the program.
Please consider that we are a program of Theatre and Performance Studies and that our students study both areas, not one or the other. Include information on what attracts you to scholarship (as opposed to the professional training you might receive in an MFA program), what attracts you to our program (which faculty member or members would you most want to work with, for example) and what your primary research interests are. Consider too that we are dedicated to developing scholar/artists so indicate what practical areas your skills are in or how you hope to develop such skills while engaged in rigorous scholarly work. How might you use this degree in the future if it does not lead directly to a job in higher education?
For more admissions information or to apply to the program, please visit our Graduate School website: https://gradschool.umd.edu/admissions

Degree Requirements
Master of Arts (M.A.)

Total Credits	Core Requirements
Thesis option: minimum of 36 credits **Non-thesis option:** minimum of 36 credits	**Thesis option:** THET 600: Introduction to Graduate Research Methods (3 credits) THET 799: Master's Thesis Research (6 credits) All Teaching Assistants must take THET 606: Teaching Theatre (1 credit) **Non-thesis option:** THET 600: Introduction to Graduate Research Methods (3 credits) Students are required to submit two article-length essays to the Non-thesis Examining Committee All Teaching Assistants must take THET 606: Teaching Theatre (1 credit) **Students should consult with their advisor to determine the remainder of their coursework.*

The Department offers both the thesis and non- thesis options. All students undertaking the M.A. degree must pass a six-hour comprehensive examination on theatre history and criticism, performance and directing, and design and technical theatre. Please contact the Head of History/Theory to get more details.

Doctor of Philosophy (Ph.D.)

Core Requirements
Students are required to complete a set of core courses, electives, and dissertation research. In addition, students must fulfill the production/performance requirement and language requirement. All teaching assistants should complete one credit of THET 606: Teaching Theatre. **Course requirements:** THET 700: Introduction to Doctoral Studies in Theatre (3 credits) THET 711: Critical Theory (3 credits) THET 712: Historical Research Methods and Historiography (3 credits) THET 713: Performance Studies (3 credits) THET 899: Doctoral Dissertation Research (12 credits) Electives within the School of Theatre Dance and Performance Studies (12 credits) Electives outside of the School of Theatre Dance and Performance Studies (6 credits) **Comprehensive Exams:** 1. History of Drama and Performance 2. Theory of Drama and Performance 3. Dissertation Prospectus

Members of the student's comprehensive examination committee write the questions. Area questions are designed to interrogate both literary and performance issues. Selected by the student and her/his advisor, the examination committee consists of the advisor and at least two members of the core and/or affiliate faculty. Exams may be taken one of two ways: in-house or take home with an oral defense. The examinations are based on course work and reading lists. All students are responsible for a core reading list of approximately 15-20 books and articles. In addition to the core reading lists, each student will be responsible for developing a reading list of no less than 50 books and articles reflective of the student's dissertation topic and tailored to his/her interests as they relate to the examination areas. Students devise these lists in consultation with the members of her/his committee. Students have two opportunities to pass the comprehensive examinations. Please note that the examinations are only offered at specific times each semester and that students must plan to take the comprehensive exams during these times.

All doctoral students will engage in original research (in some cases, complemented by appropriate non-print documentation), the result of which is a book-length manuscript. In consultation with her/his advisor, the student selects a five-member dissertation committee. At least three committee members must be permanent members of the University of Maryland Graduate Faculty and each committee must have a chairperson who is a permanent member of the graduate faculty. Please note that the Dean's Representative on the committee may not be a member of the History/Theory Area, but must be from another department at the University of Maryland. In rare cases, students will need an expert in an area not represented by the History/Theory Faculty. Students are reminded that these members must be present at the defense and that the Department cannot guarantee to fund the travel of committee members from other universities.

Each doctoral student must defend her/his dissertation orally as a requirement in partial fulfillment of the doctoral degree. Dissertations must follow the guidelines established by the University. Please see the Graduate Student Handbook (available online through the Graduate School) for guidelines on committee selection and defense procedures.

Please contact the Head of History/Theory area, Esther Kim Lee, eklee@umd.edu, directly for more information.

Facilities and Special Resources
The School of Theatre, Dance, and Performance Studies is housed in the Clarice Smith Performing Arts Center at Maryland. This state-of-the-art facility includes the 650-seat Ina and Jack Kay Theatre, the 200-seat Robert and Arlene Kogod Theatre and the 100-seat Cafritz Theatre.

The campus is within a few miles of the John F. Kennedy Center for the Performing Arts, Arena Stage, the National Theatre, Ford’s Theatre, The Shakespeare Theatre at the Lansburgh, and the Olney Theatre Center, which are among more than 80 professional area theatres. Two of the greatest libraries in the world, the Library of Congress and the Folger Shakespeare Library, are in close proximity to campus. Students also make regular use of the Smithsonian Institution, the Federal Theatre Project Archives, the National Archives, and more than 50 specialized libraries and institutions in the Washington metropolitan area.

Financial Assistance
The School nominates outstanding applicants for competitive University fellowships. Teaching assistantships are available to a limited number of students. The Graduate program head will discuss these with accepted students at the time of acceptance.

Theatre Design (MFAT)

Graduate Degree Program
College: Arts and Humanities

Abstract
The School of Theatre, Dance, and Performance Studies offers a three-year Master of Fine Arts degree in Theatre Design, with concentrations in costume, scenic, lighting and multimedia. The degree offers superior students advanced training in design with on-campus and off-campus opportunities for creative activity. The program prepares the student to enter the professional theatre or to teach in the creative areas at colleges or universities. The School also offers MA and PhD degrees in theatre history and performance studies, and MFA degree in Dance, For more information visit the School website at http://tdps.umd.edu.

Admissions Information
General Requirements:
- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:
- Letters of Recommendation (3)
- CV/Resume
- Portfolio: A sample of work submitted through a professional website, or via a file – uploaded to the Multimedia Requirement section of the application.
- Applicants interested in multimedia design: Should select lighting design as their area of interest on the online application.

Master of Fine Arts (M.F.A.)

Total Credits	Core Requirements
Minimum of 60 credits required	Students choose from one of the following specializations: Costime Design, Scene Design, Lighting Design, or Projected Design. Teaching Assistants should complete one credit of THET 606: Teaching Theatre. Course requirements are as follows: **Core (30-36 credits):** THET 465: History of Fashion for the Theatre (3 credits) THET 6xx: Introduction to Theatre Design THET 603: Introduction to Theatre Design (3 credits) THET 670: Period Style for the Theatre. Fashion and Decor (3 credits) THET 788: Master's Tutorial (5 credits) THET 789: Master's Practicum (6-12 credits) THET 799: Master's Thesis Research (6 credits) **Studio (15-18 credits):** THET 649: Advanced Design Studio in Costume (3 credits) THET 639: Advanced Design Studio in Scenery (3 credits) THET 659: Advanced Design Studio in Lighting (3 credits) THET 678: Theory of Visual Design for the Performing Arts (3 credits) **Electives (6-15 credits)**

The Master of Arts in Theatre Design (costume, lighting, scenic, multimedia) requires 60 credit hours.
Student designers must present and pass three formal design portfolio reviews, at the conclusion of their second, fourth, and sixth semesters in the program. In addition, portfolio interviews take place at the end of the first, third, and fifth semesters. Design portfolios include studio projects as well as fully realized academic and professional scenic, costume, or lighting designs. The fourth semester portfolio review will include an evaluation of a pre-thesis design project (usually a fully realized design, but may include independent study design projects). The pre-thesis design project, in preparation for the thesis, will include a written component. Successful completion of the portfolio reviews will result in the assignment of the thesis project.
Successful completion of the portfolio review will result in the assignment of pre-thesis (after the first year) and thesis (after the second year) projects. Upon completion of each portfolio review, the candidate will receive a formal letter indicating a grade of pass, conditional pass, or fail. In the event of a conditional pass or fail, the faculty may require the candidate to complete additional projects or coursework.

First year portfolio should include:

- A current resume
- Projects from primary and secondary design emphasis courses
- Craft projects from foundation component courses
- Production photographs illustrating realized craft or design work for projects produced by the School or by professional theatres
- Supporting materials, drawings, and photographs that demonstrate effective and productive work as a design assistant (academic or professional projects)

Second year portfolio should include:

- A current resume
- Projects from primary and secondary design emphasis courses
- Production photographs illustrating realized craft or design work for projects produced by the School or professional theaters
- Supporting materials, drawings, and photographs that demonstrate effective and productive work as a design assistant (academic or professional projects)

- A written design analysis and supporting research material for the pre-thesis project that should follow the form of the first chapter of the written component of the thesis project

For their thesis, M.F.A. design students create and realize a scenery, costume, or lighting design for a major production. Each student must meet all deadlines for that production and the design and execution must be acceptable to all members of her/his thesis committee. The written component of the thesis includes all relevant visual material, including research images, drawings, renderings, and production photographs.

M.F.A students typically design three or four productions in our main season during their three years in residence. The first year of study includes several assistant design assignments. We plan our productions at least one semester in advance; therefore, there is a good possibility that students will be designing their first main season production in the spring semester of the first year. We produce five main season shows and approximately five student produced productions per academic year. M.F.A. students also have the opportunity to work with our award-winning faculty on professional projects within the Washington metropolitan theatre community, as well as work in regional theatres, off-Broadway and Broadway.
An exciting feature of the MFA in Design program in the School of Theatre, Dance, and Performance Studies is the annual public portfolio exhibit and review. Each year the Cafritz Theatre is transformed into a gallery where all MFA Design students display their set, costume, and lighting designs.

A multi-day affair, the first day is open to the general public when professional designers and directors from the Washington, DC theatre community have an opportunity to respond to student work and where students often make important professional contacts. The second day involves longer one-on-one critique sessions with the nation's leading designers and directors.
In the past few years our respondents have included designers and directors such as **Paloma Young, Donyale Werle, Jeff Croiter, Ming Cho Lee, John Lee Beatty, David Korins, Ken Posner, Linda Roethke, Serge Seiden, Joy Zinnoman, John Iacovelli, Aaron Posner, James Kronzer, Mary Zimmerman, Jim Ingalls, and Anna Kuzmanic.**

Facilities and Special Resources
The School of Theatre, Dance, and Performance Studies is housed in the Clarice Smith Performing Arts Center at Maryland. This state-of-the-art facility includes the 650-seat Ina and Jack Kay Theatre, the 200-seat Robert and Arlene Kogod Theatre and the 100-seat Cafritz Theatre.

The campus is within a few miles of the John F. Kennedy Center for the Performing Arts, Arena Stage, the National Theatre, Ford's Theatre, The Shakespeare Theatre at the Lansburgh, and the Olney Theatre Center, which are among more than 80 professional area theatres. Two of the greatest libraries in the world, the Library of Congress and the Folger Shakespeare Library, are in close proximity to campus. Students also make regular use of the Smithsonian Institution, the Federal Theatre Project Archives, the National Archives, and more than 50 specialized libraries and institutions in the Washington metropolitan area.

Financial Assistance
The School nominates outstanding applicants for competitive University fellowships. Teaching assistantships are available to a limited number of students. The Graduate program head will discuss these with accepted students at the time of acceptance.

Toxicology (TOXI)

Graduate Degree Program
College: Public Health

Abstract
The **Doctoral Program** in **Toxicology and Environmental Health** at the Maryland Institute for Applied Environmental Health (**MIAEH**) is part of the University of Maryland System-Wide Graduate Program in Toxicology. Our students focus on chemical, biological and/or physical exposures and the related physiological and environmental vulnerabilities and susceptibilities. Students will master an essential core of knowledge in toxicology and environmental and occupational health, exposure sciences, risk assessment, epidemiology and biostatistics. The consequences of the built environment and environmental injustice are a critical part of the overall program. Elective courses and rotations with faculty led field studies and laboratories, offer students the background and tools needed to specialize within the broader area of toxicology and applied environmental public health.
Applicants should review faculty interests and establish a dialogue (email/phone) with one or more faculty before applying.

MIAEH additionally offers a Masters of Public Health (**MPH)** Program in Environmental Health Sciences and supports a **PhD program in Environmental Epidemiology.**

Admissions Information
Applications should be submitted through the Schools of Public Health Application Service, (SOPHAS), at www.SOPHAS.org. Remember to designate the **University of Maryland School of Public Health, College Park** (SOPHAS Code 0485) as one of your school choices along with your desired program. SOPHAS will verify submission, and if complete, SOPHAS will inform the University of Maryland Graduate School. The verification process can take 4-6 weeks to complete. We do not accept materials outside of the SOPHAS process. The University of Maryland Graduate School requires a Supplemental Application and a Supplemental Application Fee of $75 for each program. This request will be made by the Graduate School once your SOPHAS information is verified by SOPHAS. MIAEH will be able to review ONLY after both stages above are complete, thus there may be a some delay in you submitting and getting a final decision.

PhD Admissions Criteria:
Minimum 3.0 undergraduate GPA; outstanding performance in relevant courses
Completion of a relevant master's degree
Official GRE scores may be waived for students with previous advanced degrees, please contact the department to discuss GRE requirements.

Three letters of recommendation that address academic capabilities
The statement of purpose should address each of the following questions: 1) describe your specific areas of interest within environmental health; 2) which primary faculty members in the Maryland Institute of Applied Environmental health do you think most closely share your areas of interest; 3) what previous experiences have influenced your decision to pursue a degree in environmental health; 4) how do you believe UMD's program will help you reach your career goals; and 5) how do you see yourself using this degree in the five years following graduation?

Relevant academic/work experience, including previous coursework in human biology or physiology, demonstration of proficiency in environmental health, statistical methods and statistical software, and research presentation or publication experience.
Applicants are strongly recommended to communicate with our faculty in their area(s) of interest before applying.

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	Please visit the program website	Please visit the program website
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	Please visit the program website	Please visit the program website

Other Deadlines: Please visit the program website at http://sph.umd.edu/department/miaeh

Degree Requirements
Master of Science (M.S.)
The M.S. program in Toxicology does not directly admit students.

Doctor of Philosophy (Ph.D.)

Core Requirements
The PhD in Toxicology and Environmental Health requires a minimum of 46 credits, in addition to 12 credits of TOXI 899: Doctoral Dissertation Research. Students are also required to complete a minimum of 12 credits in two areas of specialization (six credits in each), included in the 46 credit total. **Core courses:** MIEH 720: Principles of Toxicology (3 credits) MIEH 740: Environmental Health Risk Assessment (3 credits) MIEH 770: Law and Policy in Environmental Health (3 credits) MIEH 771: Exposure Assessment of Environmental Hazards (3 credits) EPIB 610: Foundations of Epidemiology (3 credits) EPIB 611: Intermediate Epidemiology (3) EPIB 650: Biostatistics I (3 credits) EPIB 651: Biostatistics II (3 credits) EPIB 641: Public Health and Research Ethics (1 credit) TOXI 609: Methods in Toxicology (6 credits) MIEH 688: Seminar: Current Topics in Environmental Health (3 credits) HLTH 665: Health Behavior I (3 credits) HLSA 601: Introduction to Health Systems (3 credits)

The PhD program consists of a minimum of 46 credit hours of graduate courses, in addition to 12 credits of Doctoral Dissertation Research. The two areas of specialized focus could be in areas like Advanced Epidemiology/Biostatistics, Analytical Chemistry, Pharmacology, Pathology/Immunology/Microbiology, or Environmental Science/Ecology/Climate. Program requirements for a PhD degree in toxicology also include successful completion of a written and oral comprehensive exam in the format of an NIH research proposal, oral defense of a written dissertation research proposal, and a minimum of 12 credits of PhD dissertation research, written dissertation, and a final dissertation defense. The program can be completed on either a full- or part time basis. It is anticipated that students will complete more than the minimum number of credits.

Facilities and Special Resources
The proximity of the University of Maryland, College Park to the nation's capital offers prospective students unparalleled opportunities for internships and research experiences in public health, including placements at the National Institutes of Health, the CDC Washington Office, the U.S. Department of Health and Human Services, Children's National Medical Center, the Maryland Department of Health and Mental Hygiene, and many other national, state, and local health agencies. The diversity of cultural and socioeconomic groups, communities, industries, and health organizations provides a rich environment for learning, research, public policy analysis, and service.

Financial Assistance
MIAEH seeks to provide Financial Assistance for all accepted students on the PhD program, this usually takes place through early Spring via faculty / school level discussions for each applicant.

Translation (MPTR)

Graduate Degree Program
College: Arts and Humanities

Abstract
The Master of Professional Studies in Translation (MPS in Translation) is designed to equip students with the required competencies to compete successfully for work as specialized translators, project managers, or administrators of language services.Example skills include the translation of specialized texts in health, legal and political settings, including the translation of documents and websites for major corporations, international organizations, and government ministries.
The MPS in Translation is a two-year, 41 credit program. In the first year, you begin to develop high-level skills in translation in specific domains (specialized written texts). In the program's second year, you build on these fundamental skills, specializing in written communication for governmental and international organizations.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)
- Supplementary Application
- Proof of residency: A minimum of 6 months proof of residency in a country where your primary acquired language is spoken.
- Admissions tests (contact oes@umd.edu)

For complete Admission Information, please visit: https://oes.umd.edu/graduates-post-baccalaureates-professionals/professional-graduate-programs/interpreting-and-translation-gsit/apply

Application Deadlines

Type of Applicant	Fall
Domestic Applicants: US Citizens and Permanent Residents	17 May
International Applicants: F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants.	15 Mar

Degree Requirements
Post-Baccalaureate Certificate (P.B.C.)

Total Credits	Core Requirements		
21 credits required	**Course**	**Two languages**	**Three languages**
	COMM 610: Introduction to Translation and Interpreting Studies	3 credits	3 credits
	COMM 639: Fundamentals of Translation	4 credits	6 credits
	COMM 683: Intercultural Communication Theory	3 credits	3 credits
	COMM 649: Translation for Specific Domains	4 credits	6 credits
	COMM 730: Seminar in Health Communication or COMM 762: The Rhetoric of Political Institutions	3 credits	3 credits
	Two languages track only - Up to 4 credits of the following electives:		
	COMM 641: Introduction to Computer-Assisted Translation	(1 credit)	not required
	COMM 798: Intensive Writing in English	(1 credit)	not required
	COMM 798: Public Speaking	(2-3 credits)	not required
	COMM 609: Fundamentals of Interpreting	(2-4 credits)	not required
	Two languages track only - Up to 4 credits of the following electives:		
	COMM 629: Introduction to Simultaneous Interpretation	(1 credit)	not required
	COMM 730: Seminar in Health Communication (if not taken to fill requirement)	(3 credits)	not required
	COMM 762: The Rhetoric of Political Institutions (if not taken to fill requirement)	(3 credits)	not required

The Graduate Certificate of Professional Studies in Translation (GCPS in Translation) is designed to equip you with the knowledge and skills required for entry-level work in the translation profession. Examples include serving as translators of general texts for information purposes and specialized texts in subject areas wherein you hold advanced qualifications (e.g., Master of Arts degree, and/or significant professional expertise). You will be grounded in the tenets of the profession, including professional conduct and ethics and guided through the steps needed to advance your professional skill set.

The GCPS in Translation is a 21-credit one year program, offering instruction in the fundamental skills of translation and includes the theoretical fields of translation studies, the translation professions, intercultural communication, and background knowledge in at least one of the following communication contexts: political communication, legal communication, or health communication.

Transportation Systems (online) (METS)

Graduate Degree Program
College: Engineering

Abstract
The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Admissions Information
General Requirements:

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students)

Program-Specific Requirements:

- Letters of Recommendation (3)

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. For anyone needing these documents, consider applying for the campus programs.
Full admission as a degree seeking student requires the following prerequisites:

- A bachelor's degree, GPA of 3.0 or better, in engineering or science from an accredited institution.
- Completed applications are reviewed on a case-by-case basis. Please visit the department website for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions

Application Deadlines

Type of Applicant	Fall	Spring
Domestic Applicants: US Citizens and Permanent Residents	26 July	15 Dec

Other Deadlines: Please visit the program website at http://www.advancedengineering.umd.edu

Degree Requirements
Master of Engineering (M.Eng.)

Total Credits	Core Requirements
30 credits required	Students complete all six core courses and then choose four electives from the Technical Electives list.
	Core courses: ENCE 670: Highway Traffic Characteristics and Measurements (3 credits) ENCE 672: Regional Transportation Planning (3 credits) ENCE 673: Urban Transportation (3 credits) ENCE 677: OR Models for Transportation Systems Analysis (3 credits) ENCE 688I: Discrete Choice Analysis (3 credits) ENCE 688T: Transportation Network Algorithms and Implementations (3 credits) **Technical Electives (choose four):** ENCE 627: Project Risk Management (3 credits) ENCE 666: Cost Engineering and Control (3 credits) ENCE 667: Project Performance Measurement (3 credits) ENCE 674: Urban Transit Planning and Rail Transportation Engineering (3 credits) ENCE 688: Applications of OR in Transportation Systems Management (3 credits) ENCE 688Q: Transportation Economics (3 credits)

Facilities and Special Resources
Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Financial Assistance
Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines.

Urban and Regional Planning and Design (URPD)

Graduate Degree Program
College: Architecture

Abstract
The School of Architecture, Planning and Preservation offers a Doctoral Program, the Ph.D. in Urban and Regional Planning and Design. Participating programs include Urban Studies and Planning, Architecture, Historic Preservation, Landscape Architecture, and The National Center for Smart Growth Research and Education. The program prepares students to teach at the university level in departments of Urban Planning, Architecture, Historic Preservation, Real Estate Development, or Landscape Architecture, as well as qualifies graduates to conduct research and participate in high-level decision-making in the public, private, and nonprofit sectors.
